	machinery, armament, equipment, and improvement at navy-yards	26.	113,	896	46	
	For Indian service		527,			
	For peusions	124.	415.	951	40	
	For interest on the public debt	37.	547,			
	For postal service	65.	931,			
	Total expenditures	421,	304,	470	46	
	Leaving a surplus of				=	
	Leaving a surplus of	37,	239,	762	57	

To this sum was added \$54,207,975.75, deposited in the Treasury under the act of July 14, 1890, for the redemption of national bank notes; \$9,363,715 deposited during the year on the same account; \$3,810 rereceived for four per cent. bonds issued for interest accrued on refunding certificates converted during the year, and \$34,132,372.16 taken from the cash balance in the Treasury, making a total of \$134,947,635.48, which was applied to the payment of the public debt, as follows:

Redemption of—		
Bonds, fractional currency, and notes for the sinking-fund, in-		
cluding \$3,860,086.28 premium paid on bonds	\$47, 866, 197	65
Loan of 1847	300	00
Loan of July and August, 1861		00
Loan of 1863	100	
Loan of 1863, continued	300	00
Five-twenties of 1862	150	00
Five-twenties of June, 1864	10,650	00
Consols of 1865	15, 850	00
Consols of 1867	35, 450	00
Consols of 1868	20, 050	00
Ten-forties of 1864	11,500	00
Funded loan of 1881		
Funded loan of 1881, continued	7, 800	00
Loan of 1882		00
Bounty land scrip	100	00
Old demand, compound interest, and other notes	5, 055	00
National bank notes.	23, 553, 298	50
Purchase of—		
Funded loan of 1891	30, 286, 150	00
Funded loan of 1907	26, 507, 250	00
Premium on funded loan of 1891	135	99
Premium on funded loan of 1907	6, 540, 998	34
Total	134, 947, 635	48
	, , 500	

As compared with the fiscal year 1890, the receipts for 1891 have fallen off \$5,418,847.52, as follows:

Source.	Increase.	Decrease.	Net decrease.
Postal service	\$5,049,687 80 3,079,543 63		
Nashville & Chattánooga R. R. Co Sinking-fund for Pacific railways Sales of Indian lands	483, 794 85		
Repayment of interest by Pacific railways	118, 212 52 112, 185 47		, .
Sales of ordnance material Sales of condemned naval vessels	77,096 89		
Immigrant fund	50,807 00 44,766 81		
Depredations on public lands	7,173 88		
Miscellaneous items Customs Profits on coinage, assays, etc	266, 859 66	\$10, 146, 379 34	
Sales of public lands Registers' and receivers' fees		2,328,737 10 196,730 03	•
Custom-house fees		179, 885 43 129, 118 85	
Tax on national banks Fees on letters patent Customs fines, penaltics, etc		42, 365 92	
Total			\$5, 418, 817 5

There was an increase of \$57,636,198.14 in the ordinary expenditures, as follows:

	Increase.	Decrease.	Net increase.

SINKING FUND.

The requirements of the sinking fund for the current fiscal year are estimated at \$48,913,025. The applications to the fund to November 1, 1891, consisted of bonds, interest notes, and fractional currency amounting to \$20,911,163. The additional application of similar items of indebtedness during the remainder of the year, and of national bank notes redeemed under the provisions of the act of July 14, 1890, in excess of deposits received during the year for the redemption of such notes, estimated at \$4,254,500 and \$13,000,000, respectively, will bring the total amount to be applied to the fund to within \$10,747,362 of the estimated requirement.

THE FOUR AND ONE-HALF PER CENT. LOAN.

The original issue of 4½ per cent. bonds, authorized by the acts of July 14, 1870, and January 20, 1871, consisted of \$131,596,150 registered and \$118,403,850 coupon bonds.

During the fifteen years' existence of the loan there were received and canceled \$77,480,700 coupon bonds for which an equal amount of registered bonds was issued, and there were retired by purchase or redemption prior to April 1, 1891, \$168,039,300 registered and \$28,106,450 coupon bonds. The amount outstanding April 1, was, therefore, \$53,854,250, of which \$41,037,550 were registered and \$12,816,700 coupon bonds. These by their terms were redeemable at the pleasure of the United States after September 1, 1891, and were being received for redemption, with interest to that date, in pursuance of a circular issued by my predecessor October 9, 1890. The bonds so redeemed were paid from the surplus revenues, under section 2 of the act of March 3, 1881, the sinking fund for the current year having been completed by purchases and redemptions of 4 per cent. and 4½ per cent. bonds during July and August, 1890.

In view of the requirements of the sinking fund for the fiscal year 1892, it was deemed advisable to suspend the redemption of $4\frac{1}{2}$ per cent. bonds until after that year should begin, and a circular was therefore published, under date of April 25, 1891, rescinding that under which the bonds were then being redeemed and reserving the residue of the $4\frac{1}{2}$ per cent. loan for adjustment within the fiscal year 1892. There had been presented for redemption in April, prior to the issuance of the circular above mentioned, \$2,985,050, and the amount outstanding subject to settlement at the option of the Government after September 1, 1891, was therefore \$50,869,200, consisting of \$39,202,300 registered and \$11,666,900 coupon bonds.

Nearly twenty-six and one-half millions of the registered bonds were deposited with the Treasurer of the United States as security for circulation and public moneys, and many of the banks to which they belonged would be obliged to replace them with other bonds at great expense or go into liquidation whenever it should be necessary that the $4\frac{1}{2}$ per cents be surrendered. It was apparent, therefore, that an unqualified call for the redemption of the loan, fixing its maturity in September, would project a disturbing element into the finances of the country at a time when its resources are usually severely taxed by the movement of agricultural products. In the desire to avoid monetary disturbance during this critical period, and in the hope that the volume of money in circulation might be increased at an opportune time, through the cooperation of the banks, the holders of the bonds were offered their choice of presenting them for redemption with interest to September 2, 1891, or for continuance at the pleasure of the Government with interest at 2 per cent. per aunum after that date. this proposal there were presented prior to September 2 for continuance \$23,414,000, of which \$20,007,100 were deposited with the Treasurer of the United States as security for circulation and \$2,158,000 for deposits. But it was found that some owners of 4½ per cent. bonds who desired their continuance were unable to take the necessary steps to that end within the prescribed time, and an extension of the time to September 30 was therefore granted. On that day the total amount of bonds which had been presented for continuance was \$25,412,200, leaving for redemption \$25,457,000, of which \$17,940,100 were presented and paid during the month of September. There were also redeemed in that month, to correct an error made by the owner, \$47,700 continued bonds, and the amount now outstanding on interest at 2 per cent. is \$25,364,500.

PUBLIC MONEYS.

The monetary transactions of the Government have been conducted through the Treasurer of the United States, nine sub-treasury officers, and two hundred and thirteen national bank depositaries. The number of such depositaries on November 1, 1891, was one hundred and eighty-three, and the amount of public moneys held by them on that date, including those to credit of the Treasurer's general account and United States disbursing officers, was \$20,106,876.92, a reduction since November 1, 1890, in number of twenty-one, and in amount of holdings of \$9,830,810.76.

These withdrawals have been made from locations where public funds were held in excess of the requirements of the service, and gradually,

in order to avoid disturbing the business of the people. Further withdrawals will be made from time to time when it can be done without detriment to business interests until the holdings of national bank depositaries shall have been reduced to the amount needed for the proper transaction of public business.

CIRCULATION.

This important subject has been unusually prominent since the last annual report. The stringency in the money market during the summer and autumn of 1890 was relieved by the prompt and effective measures of my predecessor, and happily disappeared without producing the grave consequences which were feared by the public; but its existence, and the widespread apprehension which it caused, induced a revival of the erroneous idea that the volume of money in circulation was not only inadequate to the needs of the country, but was very much less per capita than during the so-called flush times which followed the civil war.

The "circulation statement" which has been published by the Department monthly since April 1, 1887, contains in tabular form full information on this subject for the dates specified, and has proved to be a valuable addition to the regular reports of the Department; but in the absence of statements in the same form for the preceding years a comparison by the people has been impracticable, and the mistaken opinion that there has been a severe contraction of the money volume found ready acceptance. This fact became apparent through letters which were received from all sections of the country, and more complete information on the subject was accordingly supplied by means of a statement which was printed in August last, and has been sent by mail to those who ask for it. The tables therein published appear in their appropriate place in this report,* and are reproduced without change, except as to the table for July 1, 1891, which displays the revised figures for that date, including bullion in the Treasury. By the revision of these figures, the amount of money per capita July 1, 1891, has been found to be \$23.41, instead of \$23.45.

The amount of money in circulation has been very largely increased since the close of the fiscal year. The amount July 1, 1891, was \$1,497,440,707, and the amount per capita was \$23.41. The return of gold to the United States, the operation of the Silver Act of July 14, 1890, and disbursements by the Treasury on account of the four and one-half per cent. loan, pensions, etc., have enlarged the volume to \$1,577,262,070, and the per capita amount to \$24.38. The amount of each kind of money in the United States, including bullion in the

Treasury and the amounts in circulation December 1, 1891, are shown in the subjoined table:

December 1, 1891.

[Population, 64,680,000; circulation per capita, \$24.38.]

PRECIOUS METALS.

Deposits and purchases.

The value of the gold deposited at the mints and assay offices during the fiscal year 1891, was \$59,625,678.08, of which \$48,485,800.82 were original deposits, and \$11,139,877.26 were redeposits.

Of the original deposits, \$31,555,116.85 were the product of our own mines; \$12,311,126.66 foreign gold coin and bulliou; \$583,847.16 light weight domestic gold coin; and \$4,035,710.15 old material.

The deposits and purchases of silver aggregated 71,869,663.92 standard ounces, of the coining value of \$83,630,154.31, including 10,006,707.61 standard ounces, of the coining value of \$11,644,168.84, redeposits.

Of the silver received, 56,296,795.19 standard ounces, of the coining value of \$65,508,998.03, were classified as of domestic product; 4,154,244.81 standard ounces, of the coining value of \$4,834,030.31, were foreign silver bullion and coin; 705,253.82 standard ounces, of the coining value of \$820,658.98, were uncurrent domestic coins; 3,248.47 standard ounces, of the value of \$3,780.04, were trade dollars; and 703,414.02 standard ounces, of the coining value of \$818,518.11, consisted of old plate, jewelry, etc.

Coinage.

The coinage of the mints during the last fiscal year was the largest in the history of the mint in this country, aggregating 119,547,877 pieces, valued as follows:

Gold	
· · · · · · · · · · · · · · · · · · ·	63, 611, 159 35

 $\mathbf{X}\mathbf{X}\mathbf{X}$

The number of silver dollars coined during the fiscal year from bullion purchased under the act of 1878 was 8,740,327; from bullion purchased under the act of July 14, 1890, 27,292,475; and from tradedollar bullion, 200,000, a total of 36,232,802 silver dollars, upon which the seigniorage, or profit, was \$6,221,333.42. The profit on the subsidiary silver coinage of the year was \$92,434.48, a total seigniorage of \$6,313,767.90.

The total coinage of silver dollars under the act of 1878, from March 1, 1878, to the close of such coinage, has been \$378,166,793.

The net profit on the coinage of silver during the thirteen years ended June 30, 1891, including the balances in the coinage mints on July 1, 1878, has aggregated \$71,952,390.25.

Bars.

In addition to the coinage, gold bars were manufactured of the value of \$31,165,541.77, and silver bars of the value of \$8,437,657.65, a total of \$39,603,199.42.

Purchases of silver.

The amount of silver purchased from July 1 to August 13, 1890, under the provisions of the act of February 28, 1878, aggregated 3,108,199.47 standard ounces, costing \$3,049,426.46, an average of \$1.09 per fine ounce.

The total amount of silver bullion purchased under the act of February 28, 1878, from the commencement, March 1, 1878, to the end, August 13, 1890, was 323,635,576.19 standard ounces, costing \$308,199,261.71, an average cost of \$1.058 per fine ounce.

The amount of silver purchased under the act of July 14, 1890, from August 13, 1890, to June 30, 1891, aggregated 53,770,125.61 standard ounces, costing \$50,577,498.44, an average cost of \$1.045 per fine ounce.

The total amount of silver purchased during the fiscal year under both acts—February 28, 1878, and July 14, 1890—was 56,878,325.08 standard ounces, costing \$53,626,924.90, an average cost of \$1.04% per fine ounce.

The total amount of silver purchased under the act of July 14, 1890, from August 13, 1890, to November 1, 1891, was 66,588,536 fine ounces costing \$68,626,565, an average cost of \$1.03 per fine ounce.

Recoinage of trade-dollar bullion.

The act of March 3, 1891, directed the Secretary of the Treasury to coin the trade-dollar bullion into silver dollars as soon as practicable. Under the act authorizing the redemption of trade dollars (March 3,

1887), it was left discretionary with the Secretary to coin this bullion into either silver dollars or subsidiary silver coins, and the discretion had been exercised in favor of subsidiary silver coins.

The balance of trade dollar bullion on hand June 30, 1891, stored at the mints at Philadelphia and New Orleans, was 4,193,756.12 standard ounces; of the value of \$4,822,658.90.

As soon as the mandatory coinage of silver dollars, required by the act of July 14, 1890, ceased by limitation of law, the conversion of the trade-dollar bullion into silver dollars was commenced.

The total number of silver dollars coined from trade-dollar bullion to November 1, has been \$3,260,100. This coinage will be completed during the present calendar year.

Price of silver.

The price of silver fluctuated during the last fiscal year from \$0.964 to \$1.21 per fine ounce, a variation of nearly 25 cents an ounce.

At the commencement of the fiscal year the price in New York was \$1.05 per ounce; by July 14, 1890, the date of the passage of the new silver law, the price had advanced to \$1.08 per ounce, and by August 13, the date the new silver law was to take effect, to \$1.14 per ounce. The highest price reached in New York was on August 19, 1890—\$1.21 per fine ounce. In September a decline commenced, extending to the end of the calendar year, when the price had touched \$1.04½. The closing price, June 30, 1891, was \$1.01½ per fine ounce. The price at this date—November 1, 1891—is \$0.96.

The average price of silver during the year, based upon London quotations, was \$1.045 a fine ounce, and upon New York quotations, \$1.053 a fine ounce, an average difference of nearly 1 cent an ounce.

The exports of silver from London to India during the first nine months of the present calendar year show a falling off of \$17,020,730, over 50 per cent. as compared with the same months for the previous year.

Imports and exports.

The loss of gold by *net* export during the fiscal year was \$67,946,768, while there was a gain of silver by excess of imports over exports amounting to \$2,745,365.

The loss of gold by export was materially larger during the last fiscal year than in any recent year. The heavy movement commenced in February, 1891, and did not cease until the close of July. The total amount exported from the port of New York during this period was \$70,223,494.31.

XXXII REPORT OF THE SECRETARY OF THE TREASURY

It is gratifying to report that a return movement of gold is well under way, which has aggregated, since the 1st of July, at the port of New York alone, \$27,854,000, and it is believed that owing to the large exports of breadstuffs and other materials from the United States, this fall and winter, the movement of gold to this country will continue for some months, and in increasing amounts.

In the Report of the Director of the Mint will be found an article treating in detail of the movement of gold from the United States, and pointing out some of the causes which are believed to have operated to produce the same.

Earnings and expenditures.

The total expenditures for the support of the Mint Service for the last fiscal year aggregated \$1,335,910.

The total earnings of the mints and assay offices, from all sources, was \$7,650,529.62, and the total expenditures and losses of all kinds, \$1,661,139.83, a net profit of earnings over expenditures of \$5,989,389.79.

The product of gold and silver.

The mines of the United States produced, during the calendar year 1890, precious metals as follows:

	Fine ounces.	Commercial value.	Coining value.
Gold	1, 588, 880	\$32, 845, 000	\$32, 845, 000
Silver	54, 500, 000	57, 225, 000	70, 464, 645

The product of the mines and reduction works of the United States, including precious metals contained in foreign material reduced in the United States, was:

		rine ounces.
Gold		 1, 838, 366
Silver		 64, 920, 927

The product of gold and silver in the world, based upon returns to the Director of the Mint, was the same year:

	Fine ounces.		Commercial value.	Coining value.
Gold	6,046,875		\$116,009,000	\$116, 009, 000
Silver	128, 914, 000	•	134, 886, 000	166, 677, 000

World's coinage.

The coinage of gold and silver by the various countries of the world aggregated, for the calendar year 1890, as far as reports have been received:

Gold	\$149, 118, 959
Silver	131, 980, 621

Metallic stock of the United States.

The stock of gold and silver in the United States, based upon official tabulations brought forward from year to year, was, on November 1, 1891, approximately:

Gold			 	\$671, 139, 531
Silver	•••••	· · · · · · · · · · · · · · · · · · ·	 :	539, 241, 624
Total	••••		 	1, 210, 381, 155

Use of gold and silver in the arts and manufactures.

According to information gathered by the Bureau of the Mint, the value of the gold and silver used in the industrial arts in the United States during the last year was, approximately: Gold, \$18,000,000, and silver, \$9,000,000, of which \$10,700,000 gold and \$7,140,000 silver was new bullion.

Legislation recommended—Recoinage of uncurrent silver coins in the Treasury.

In the last report of the Secretary of the Treasury attention was directed to the large stock of subsidiary silver coins in the Treasury which, through abrasion or mutilation, were unfit for circulation, or else of denominations for which there was no popular demand, and it was recommended that authority be granted to recoin this uncurrent coin into new coins, and to reimburse the Treasury for the loss of metal incident to such recoinage from the large profits which have been made by the Government on the manufacture and issue of silvercoins of a nominal value in excess of the cost of the bullion contained in them.

Such a provision was inserted by the House of Representatives in the sundry civil appropriation bill for the fiscal year 1892, but the provision was stricken out in the Senate, and, in lieu thereof, an appropriation of \$150,000 was made for such recoinage.

Under this liberal appropriation a large amount of uncurrent silver coins in the Treasury has been recoined into dimes and quarter-dollars, and such recoinage is still in progress.

The face value of the silver coins transferred from the Treasury to the mints for recoinage under this appropriation has been \$3,858,958, upon which the loss of metal, representing abrasion from wear, and reimbursed the Treasurer from the above appropriation, was \$115,055 a loss of about 3 per cent. It was thought that the loss would be about 5 per cent., and that the appropriation of \$150,000 would enable

the Department to recoin about \$3,000,000. By careful and economical work upon the part of the mints the loss has been reduced considerably below this figure, and it is believed that the current appropriation will enable the mints to recoin \$5,000,000.

The beneficial results of this recoinage are shown by the fact that the amount of subsidiary silver coin in the Treasury at the commencement of the last fiscal year, all of which was classed as an "unavailable asset," was \$22,805,225, while the amount in the Treasury at the present time is \$15,196,379, a reduction of \$7,608,846.

In view of the importance of relieving the Treasury of this incubus of uncurrent coins, as well as to provide change money in an attractive form, I renew the recommendation of my predecessor that authority be given to reimburse the Treasurer for the loss of metal incident to the recoinage of uncurrent silver coins in the Treasury, from the "silver profit fund," or else that a permanent annual appropriation for recoinage be made. If, however, this should not meet with favor at the hands of Congress, I most urgently recommend an immediate appropriation of \$100,000 for continuing the recoinage of uncurrent silver coins in the Treasury.

In pursuance of the authority contained in the act of September 26, 1891, the Director of the Mint has prepared new designs for the subsidiary silver coins of the United States, which are believed to be a decided improvement upon those now in existence, and with a liberal appropriation for recoinage it is believed that a large amount of uncurrent silver coins in the Treasury can be profitably converted into new coins bearing the new designs, and that they will be readily absorbed in circulation.

New mint at Philadelphia.

In accordance with the recommendation of Secretary Windom in his last annual report, Congress, by an act approved March 3, 1891, authorized the purchase of a site and the erection of a new building for the mint at Philadelphia, at a cost not to exceed \$2,000,000; but as the law made no appropriation to carry its provisions into effect, no action has been taken thereunder which would involve an expenditure of money from the Treasury.

At my request, however, Messrs. E. H. Fitler, Samuel Gustine Thompson, Anthony J. Drexel, William M. Singerly, James H. Windrim, Alexander K. McClure, and A. C. Bosbyshell consented to serve as a commission without, compensation to recommend a suitable site for the proposed building, and on September 8, 1891, they unanimously recommended a site at a cost not to exceed \$800,000.

The necessity of better and enlarged facilities for the mint is apparent, and I again recommend the subject to the early and favorable consideration of Congress.

It is believed that the valuable site now occupied by the mint at Philadelphia will sell, at the date the new mint can be completed, for a sum approximating the entire cost of a new site and building.

NATIONAL BANKS.

The report of the Comptroller of the Currency* gives full information in relation to the organization, supervision, and liquidation of national banks during the year ending October 31, 1891. In this period 193 associations were organized, with capital aggregating \$20,700,000, thus exhibiting a growth of the national system largely in excess of the annual average for past years. During the same period 41 associations went into voluntary liquidation and 25 became insolvent, leaving as a net gain for the twelve-month 127 banks, with a capital of \$12,553,000.

The administration by the Comptroller of the affairs of suspended banks has been characterized by a wise regard to the interests of all concerned; and of the number of banks closed during the year, 7 have been reopened for business, their solvency having been restored by the voluntary contribution of funds by the stockholders.

The number of banks in operation October 31, 1891, was 3,694, having in capital stock \$684,755,865; bonds deposited to secure circulation, \$152,113,850; bank notes outstanding, \$171,368,948, including \$35,430,721 represented by lawful money deposited for their redemption. Their gross circulation, including notes of gold banks and those of failed and liquidated associations, has decreased \$7,571,085 during the year, while that secured by pledge of bonds has increased \$11,795,101.

The domestic exchange drawn by national banks for the year ending June 30, 1891, is stated at \$12,782,212,495, an increase over the preceding year of more than 11 per cent.

The last report of condition exhibits the liabilities and resources of the banks on September 25, 1891. At that date 3,677 associations reported an aggregate capital of \$677,426,870; surplus, \$227,576,486; and undivided profits, \$103,284,674. The gross deposits, including amounts due to banks, are stated at \$2,039,180,188.12, and loans and discounts at \$1,989,354,239, an increase in both items over any previous date. These banks held \$174,907,550 in United States bonds, of which \$150,035,600 were to secure circulating notes; also \$183,515,076 in specie, \$97,615,608 in legal-tender notes, and \$15,720,000 in United States certificates of deposit.

XXXVI REPORT OF THE SECRETARY OF THE TREASURY.

Of the new associations, 99 are located west of the Mississippi River and 59 in the southern states.

The present has been more disastrous than any former year as to the number of failures, but not as to the amount of capital and liabilities involved.

More than one-half in number of the banks that became insolvent during the period covered by the report of the Comptroller were located in two western states, and their insolvency was chiefly due to the effects of four successive crop failures, while the severe depression of business which followed the stringency of last year influenced in a great degree the failures that occurred in other parts of the country.

It is shown that of the total number of national banks organized only 3½ per cent. have become insolvent during a period of 29 years, and that the annual average loss to creditors during that time has been only one-twentieth of 1 per cent. of their average liability.

The affairs of 102 insolvent banks have been finally closed, at an average expense of 9.28 per cent., with an average dividend to creditors of 74.17 per cent. Those closed during the last five years have divided among creditors 90.65 per cent., at an average cost for expenses of 4.08 per cent. It is believed that no other system can show equally favorable results.

I invite favorable attention to the recommendations of the Comptroller that the present law be so amended as to provide (1) that no association shall be required to maintain a bond deposit of more than \$1,000 to secure circulation; (2) that every association may issue circulating notes equal to the par value of the bonds so deposited; (3) that the monthly withdrawal of bonds pledged to secure such notes shall not exceed \$3,000,000 in the aggregate; and (4) that the semi-annual duty on circulation be so reduced as to equal one-fourth of 1 per cent.

Attention is also invited to the suggestions of the Comptroller that supervising and assistant examiners be appointed, and that all examiners be required to take an oath of office, and give such bonds as the Comptroller may prescribe. His suggestion as to the necessity for legislation more clearly defining the duties of directors, and further restricting the accommodations which may be lawfully afforded to officers and directors by way of loans and discounts, is especially commended to the consideration of the Congress.

Three loan and trust companies, doing business in the District of Columbia, have availed themselves of the provisions of an act of Congress entitled "An act to provide for the incorporation of trust, loan, mortgage, and certain other corporations within the District of Columbia," approved October 1, 1890, and are now subject to the supervision of the Comptroller of the Currency.

TARIFF AND CUSTOMS ADMINISTRATION.

At my request the Chief of the Bureau of Statistics has prepared a special report on our foreign commerce for comparative periods under the old and new tariffs, which furnishes a striking exhibit of the practical effect of the new law.

The existing tariff went into effect as to most of its provisions on the 6th of October, 1890. Under its operations during the twelve months ending September 30, 1891, the first five days of October being under the old tariff, the value of imports of merchandise was \$824,716,507, an increase of \$11,247,116 over the value of imports of the corresponding months of the preceding year. Of this total the value of free goods was \$397,352,107, an increase of \$118,092,436 over the value of free imports during the corresponding months of the previous year. The proportion of merchandise admitted free was 48.18 per cent. of the total importation, as against 34.32 per cent. for the preceding year, thus exceeding the proportion of free goods under any previous tariff for a corresponding period.

For the six months ending September 30, 1891, during which sugar has been admitted free, the proportion of free importations was 55.37 per cent., as against 33.27 per cent. for the corresponding months of the preceding year.

For six months ending March 31, 1891, when sugar was dutiable under the new tariff, the free importations were 40.68 per cent., and for the corresponding period of the preceding year, under the old tariff, they were 35.18 per cent. of the total importations.

The articles now admitted free of duty are chiefly necessaries of life, such as sugar, tea, coffee, and other articles which are not largely produced in this country, and do not successfully compete with our domestic productions.

The removal of the duty on sugar has reduced its price to the consumer, and this result is not in conflict with the doctrine of protection to home industries, because the limited domestic production of sugar under the most favorable protective rates was not sufficient to influence the price in the home market.

The report of the Chief of the Bureau of Statistics is accompanied by tables showing that prices to the consumer of manufactured articles, as a rule, have not been increased, but have been reduced.

The receipts from customs for the year ending September 30, 1891, during the last six months of which sugar was free, were \$196,279,654.60, as against \$238,784,929.71 for the preceding year, a decrease of \$42,505,275.11.

XXXVIII REPORT OF THE SECRETARY OF THE TREASURY.

During the twelve months ending September 30, the value of our exports of merchandise was \$923,091,136, as against \$860,177,115 for the previous twelve months, an increase of \$62,914,021.

Under the operations of the new tariff the customs revenue has been decreased as far as is consistent with the current needs of the Government. By the readjustment of duties in the line of protection to American labor and American industries, the free list has been enlarged by the addition of articles which from climatic or other conditions are not produced profitably, nor extensively, in this country; adequate protective duties have been imposed upon articles that come into competition with our own productions; new industries have been established and others stimulated, thereby giving increased employment to American labor, and better control of our home market to our own people; and the price of nearly every article of common consumption has been reduced to the consumer.

Inasmuch as a considerable portion of our revenues must be derived from duties on imports, it is the part of wisdom and patriotism to so adjust the rates as to have regard first to the interests of our own people and the rightful demands of American labor for remunerative wages.

I do not believe that any considerable number of the people desire to see our manufacturing industries destroyed, or wages reduced to the European basis, which would be the inevitable result of a reduction of duties with a view to revenue only.

A comparison of the prices of goods imported respectively under the old and new tariffs where rates have been increased will demonstrate that the tariff is a tax upon the foreign competitor in our markets in the sale of such articles as are extensively produced here, and that the duties are in fact thus deducted from the foreign market value, and are paid by the foreigner as a tax for the privilege of selling his goods here at prices fixed by our own people competing among themselves in their own market.

Legislation recommended.

I invite attention to, and earnestly renew, the recommendations of my predecessor concerning needed amendments to the laws relating to the administration of the customs service. I quote from his last annual report:

For many years the fund available for defraying the expenses of collecting-the revenue from customs has been insufficient to cover such expenses, and the Department

has been unable to employ a sufficient force to properly collect the revenue and guard against evasions. It is false economy to refuse the means to insure the enforcement of the laws upon which depend the revenues of the Government. The Department is almost daily compelled to refuse expenditures absolutely necessary to such enforcement. On this subject, the following is quoted from the Secretary's last annual report:

"Serious embarrassments have occurred several times through deficiency in this appropriation, which has proved insufficient to defray the necessary expenses of collection, the average annual cost of which exceeds \$7,000,000.

"The fund at disposal is derived from the permanent annual appropriation of \$5,500,000 made by the act of March 3, 1871, 'and in addition thereto such sums as may be received from fines, penalties, and forfeitures connected with the customs, and from fees paid into the Treasury by customs officers, and from storage, cartage, drayage, labor, and services,' which on the date of the passage of the act amounted to nearly \$2,000,000.

"Since that time the annual receipts from these sources have diminished about \$1,000,000, in consequence of legislation affecting fines, penalties, and forfeitures, and the abolition of many of the official fees."

The rapid growth of the country, the opening of an immense line of unguarded frontier by the building of railways and the creation of new ports, make the need of legislation on this subject more imperative than ever before.

Second. The compensation of all collectors of customs by fixed salaries, and the abolishment of all fees, commissions, perquisites, and emoluments.

This is necessary to secure uniformity and the proper adjustment of the compensation of these officers commensurate with their duties and responsibilities.

Under the present system the emoluments of some collectors are excessive while in other cases they are inadequate.

Third. The consolidation of customs districts, demanded alike for reasons of economy and the changed condition of commerce and transportation.

This might be accomplished by authorizing the Secretary of the Treasury to change the boundaries of customs districts, or to abolish districts when the expenditures exceed the receipts therein.

Fourth. The abolishment of oaths to monthly accounts of customs employés as unnecessary and as subjecting these officers to useless expense.

Fifth. The repeal of the laws requiring bonds to be given by individval importers upon the entry of merchandise for warehouse, and for the return of packages not designated for examination and delivered to importers in advance of appraisement and • liquidation of duties.

In the case of warehouse bonds the Government is amply protected by the possession of the merchandise, and the so-called "return bonds" are found in practice to serve no valuable end. The taking of these useless bonds involves a large expense without any compensating benefit.

Sixth. The revision and codification of the customs laws.

These laws are now scattered through the statutes, and should be brought together, revised, and reënacted in one harmonious code.

Seventh. Legislation to secure railway statistics of foreign commerce.

It is indispensable to a proper record and exposition of the foreign commerce of the United States that railway carriers of merchandise should be required by law to render such statistical returns as are required of carriers of freight by water.

Any attempt to completely exhibit the foreign trade of the country is largely neutralized and frustrated at present by the necessity of merely estimating the greater part of such trade conducted by rail.

These recommendations have been made, in whole or in part, by every Secretary of the Treasury of both political parties during the last ten years, and their importance can not be over estimated.

It is certainly unwise to neglect to furnish adequate means for the efficient collection and protection of the customs revenue, which is required to defray a considerable part of the expenses of the Government. The changes of twenty years, since the present provision for defraying the expenses of collecting the revenue from customs was made, necessitate new legislation on the subject.

In the development of the Northwest new customs districts and ports have been created, both on the ocean and frontier; many new interior ports have been established; but the fund at the disposal of the Department for paying the expenses of customs collection and administration, which in 1871 was about \$7,500,000, has been reduced by legislation affecting fines and fees until there is now but little over \$6,000,000 applicable to this purpose, while the actual expense is nearly a million more. This insufficient appropriation embarrasses efficient administration of the customs laws, to the manifest detriment of the revenue.

In this connection I call attention to the report of the Supervising Special Agent,* showing the inadequacy of the present force of customs officers for the protection of the revenue on the Mexican and Canadian frontiers, which force can not be augmented with the present insufficient appropriation.

I renew the recommendation made by my predecessor, in the last annual report, that section 8 of the Customs Administrative Act be repealed. Further experience has demonstrated the impracticability of administering this section. It is a constant source of irritation, and serves no useful purpose in ascertaining dutiable values.

Section 15 of the same act should be so amended as to authorize the taking of testimony now required to be taken by the General Appraisers by commissioners appointed for that purpose by the court, as well as by the General Appraisers, as now provided by law. This is necessary for the reason that the time of the General Appraisers is so fully occupied with their duties at the port of New York that they are unable to give proper attention to the demands of other ports in this regard.

I also renew the recommendation that that part of section 19 which imposes additional duties on unusual coverings be modified so that

such coverings shall pay but a single duty at the rate to which they would be subject if imported separately, not less than that imposed upon their contents.

The General Appraisers call attention in their report to the effect of the clause in section 7 of the Customs Adminisfrative Act which requires the assessment of an additional duty of 2 per cent. on the total appraised value of imported merchandise for every 1 per cent. of the advance above entered value, provided the appraised value exceeds by more than 10 per cent. the value declared on entry, and recommend that the law should be so modified as to limit the additional duty to not more than 100 per cent. I concur in their recommendation that the law be so modified.

By the present law (section 827, Revised Statutes) provision is made for the compensation of district attorneys when they appear on behalf of collectors in customs cases. Under the Administrative Act collectors are no longer parties to suits for the recovery of duties alleged to be unlawfully exacted, and although the services of the district attorneys in such cases are still required, it has been held that there is no authority for their payment. It is therefore recommended that the law be amended so that the district attorneys may receive adequate compensation in such cases.

The care of foreign merchandise at the World's Columbian Exposition will require a large temporary customs force, which can not be provided without an additional appropriation for that purpose. It is estimated that not less than \$200,000 will be required to enable the Department to employ the officers necessary to maintain the custody of dutiable exhibits and examine and appraise and collect duties upon such articles as may be withdrawn for consumption.

There will be undoubtedly a demand for the privilege of selling articles for delivery during the Exposition. This will require legislative authority, and I therefore suggest the enactment of a law to authorize such sales under regulations to be prescribed by the Secretary of the Treasury, as was done during the Centennial Exposition at Philadelphia, in accordance with the provisions of the act of July 20, 1876.

General Appraisers.

The report of the General Appraisers* shows a gratifying progress in the disposition of protests involving questions of classification. The number of these cases undisposed of November 1, 1890, was 996; the number received from November 1, 1890, to November 1, 1891, was 41,557 at the port of New York, and from other ports 8,589, making a

^{*} Omitted from this compilation.

total of 51,142. Of this number, 33,897 involved the constitutionality of the acts of June 10 and October 1, 1890. Many of the remaining cases have been or will be disposed of by a single decision, as they involve identical questions, so that the opinion is expressed that by January 1 next nearly all cases received up to October 1, 1891, will have been settled either by actual decisions or suspensions made to await the final determination of analogous questions on appeals taken from the Board's decisions.

During the same time, the number of appeals to reappraisement has been 2,107, of which 2,051 have been disposed of, leaving but 56 pending.

This showing gives assurance that the Customs Administrative Act has realized the purpose of its enactment and afforded what was imperatively demanded—a speedy, just, and efficacious means for the settlement of differences between the Government and importers, both as to classifications and values.

It was to be expected that a law so radical in many of its features would be met by some embarassments of administration and more or less criticism, but its practical operation for more than a year has in a great measure removed both the administrative difficulties and the opposition it first encountered. It has demonstrated its value and efficacy in checking fraudulent undervaluations and securing uniform assessment of duties, and while in some of its details amendment is desirable, yet in its main features it should not be disturbed.

INTERNAL REVENUE.

The receipts from the several objects of taxation under the internalrevenue laws for the fiscal years ended June 30, 1890 and 1891, are as follows:

	Fiscal year er	ided June 30—				
Objects of taxation.	1890,	1891.	Increase.	Decrease.		
Distilled spirits	33, 958, 991 06 26, 008, 534 74 786, 291 72 153, 503 96	\$83, 335, 963 64 32, 796, 270 97 28, 565, 129 92 1, 077, 924 14 260, 127 30 146, 035, 415 97	\$1,648,588 55 2,556,595 18 291,632 42 106,623 34 3,440.719 40	\$1,162,720 09		
The receipts from all sources of ended June 30. 1891, were The receipts from the same source 1890, were	es for the fisca	l year ended	\$146 June 30,	3, 035, 415 97 2, 594, 696 57		
Making an increase in the re	ceipts for the fi	scal year just	ended of	3, 440, 719 40		
The total cost of collection for the fi				, 205, 655 49 , 095, 110 80		
Increased cost of collection	for fiscal yea	r ended June	30, 1891	110, 544 69		

The amounts herein stated are the amounts actually collected during the fiscal years mentioned, but in many cases the money collected on the last day of June is not deposited until the first day of July, thus causing a discrepancy between the collections and the deposits.

The increase in the cost of collection for the fiscal year ended June 30, 1891, is due to various causes. The appropriation made by Congress for salaries and expenses of agents, gaugers, storekeepers, etc., amounted to \$2,100,000, but owing to a large increase in the products of distilleries operated during the fiscal year, which resulted in an increase of the taxes collected from spirits of more than \$3,000,000 as compared with the receipts of the preceding year, the actual expenses under the above head exceeded the amount appropriated by \$3,451.58, for which unpaid accounts are now on file and for the payment of which an additional appropriation will be necessary. tion to this, there were gauged 193,557 gallons of grape brandy used in the fortification of sweet wines upon which no tax was paid. actual work demanded under this provision, in addition to the above figures, was the gauging of 1,083,274 gallons of sweet wines, and a number of deputy collectors and other officers were required to be employed in the work of supervising the delivery of this brandy to the wine makers.

If expenditures of this character, which can hardly be fairly construed as entering into the cost of collection, could be separated from the total expenditure, the cost of collection for the fiscal year ended June 30, 1891, would be very materially reduced.

The percentage of cost of collection for the fiscal year ended June 30, 1891, was 2.88 per cent., as against 2.82 for the preceding fiscal year, the increase arising as above stated.

The total production of distilled spirits, exclusive of fruit brandies, for the fiscal year ended June 30, 1891, was 115,962,389 gallons; the total production for the fiscal year ended June 30, 1890, was 109,275,928 gallons, making an increase in the production of distilled spirits for the fiscal year just ended of 6,686,461 gallons.

There was also produced during the fiscal year ended June 30, 1891, 284,035 gallons of apple brandy, 777 gallons of peach brandy, and 1,519,900 gallons of grape brandy, making a total production of 1,804,712 gallons of brandy from fruits, as against 1,825,810 gallons of brandy from fruits produced during the fiscal year ended June 30, 1890. A further comparison of the two fiscal years shows a decrease of 325,006 gallons in the production of apple brandy and a decrease of

107,987 gallons in the production of peach brandy, with an increase of 411,895 gallons in the production of grape brandy for the fiscal year ended June 30, 1891. Of the brandy produced from grapes 193,557 gallons were used, free of tax, for the fortification of sweet wines, under the provisions of the act of October 1, 1890.

During the fiscal year ended June 30, 1891, 3,819 distilleries of all kinds were operated. For the preceding fiscal year 6,211 distilleries of all kinds were operated, a comparison showing a decrease of 2,392 in the number of distilleries operated for the fiscal year just ended. Nearly the whole of the above decrease arose from fruit distilleries which were not operated on account of the almost complete failure of the fruit crop.

During the fiscal year ended June 30, 1891, there were produced 30,497,209 barrels of beer. The number of barrels produced during the fiscal year ended June 30, 1890, was 27,561,944, making an increased production for the fiscal year just ended of 2,935,265 barrels.

For the fiscal year ended June 30, 1891, the total receipts from the taxes on tobacco, cigars, cigarettes, snuff, etc., were \$32,796,270.97.

The receipts from the same sources for the fiscal year ended June 30, 1890, were \$33,958,991.06. It was estimated that the provisions of the act of October 1, 1890, reducing the tax on tobacco and snuff to 6 cents per pound and repealing certain special taxes, would result in a decrease in the receipts from this source for the fiscal year ended June 30, 1891, of \$3,898,382.72. The actual decrease was \$1,162,720.09, the increased production of manufactured tobacco, snuff, cigars, cheroots, and cigarettes being the cause for such gratifying result.

The quantity of distilled spirits gauged for the fiscal year ended June 30, 1891, was 342,343,638 gallons. The quantity gauged for the fiscal year ended June 30, 1890, was 324,175,208 gallons, making an increase in the quantity of spirits gauged for the fiscal year just ended of 18,168,430 gallons.

It is estimated that the receipts from all sources of internal revenue for the current fiscal year (ending June 30, 1892) will aggregate \$150,000,000.

I respectfully call attention to the various recommendations contained in the report of the Commissioner of Internal Revenue,* and urge legislation in accordance with the views therein expressed.

^{*} See Appendix, page 400.

FOREIGN COMMERCE.

The value of our foreign commerce—imports and exports of merchandise—during the last fiscal year was greater than for any previous year. It amounted to \$1,729,397,006, as against \$1,647,139,093 during the fiscal year 1890, an increase of \$82,257,913.

The value of imports of merchandise also during the last fiscal year was the largest in the history of our commerce, amounting to \$844,916,-196, as against \$789,310,409 during the fiscal year 1890, an increase of \$55,605,787.

The value of the exports of merchandise during the same period was \$884,480,810, as against \$857,828,684 for the previous fiscal year, 1890, an increase of \$26,652,126.

The exports exceeded the imports of merchandise \$39,564,614.

The value of the imports and exports of merchandise and specie during the last four years ending June 30 has been as follows:

Merchandise.

	1888.	1889.	1890.	1891.
Exports— Domestic Foreign	\$683, 862, 104	\$730, 282, 609	\$845, 293, 828	\$872, 270, 283

Total	872, 270, 28	33 1	2, 210	, 527	884,	480	, 810	844,	916,	196	1,729	, 397,	006	+ ;	39, 5	564,	614

It will be observed that the value of our total trade in merchandise with Great Britain and Ireland amounted to \$640,137,288, of which the value of exports was \$445,414,026, and the value of imports \$194,723,-262, showing an excess in exports of \$250,690,764.

Our import and export trade with Great Britian and Ireland forms 37 per cent. of such trade with all nations, and about 55 per cent. of such trade with all Europe. Our trade with North America including the West Indies stands next in value, followed by that with South America, and that with Asia and Oceanica. Our trade with Germany showed an excess of imports of \$4,520,927; with France, of \$15,995,805.

In our total trade with Europe the excess of exports over imports was \$245,492,675.

Our commerce in merchandise with North America, including Mexico, Central America, and West Indies, amounted to \$259,775,208, of which the value of the imports was \$163,226,079, and of the exports \$96,549,129, an excess of imports of \$66,676,950; but if our export trade by land carriage with Mexico and Canada had been correctly ascertained by means of an adequate law for that purpose, it is esti-

mated that our imports and exports with North America would appear upwards of \$290,000,000, and leave an excess of imports of less than \$36,000,000, instead of \$66,000,000, as now appears.

Our total trade with South America in merchandise amounted to \$152,444,958, of which the value of the imports was \$118,736,668, and of the exports \$33,708,290, an excess of imports of \$85,028,378.

Values of the imports and exports of merchandisc of the United States carried in cars and other land vehicles during each fiscal year from 1871 to 1891, inclusive.

Year ending June 30—	Imports and exports in cars and other land vehicles.	Year ending June 30—	Imports and exports in cars and other land vehicles.
1871	23, 022, 540 20, 388, 235	1882	48, 092, 892 46, 714, 068 45, 332, 775 43, 700, 350 48, 951, 725 54, 356, 827 66, 664, 378

Exports.

The total value of exports of domestic merchandise was \$872,270,283, an increase of \$26,976,455 over the exports of the preceding fiscal year, 1890, and was greater than that of any year except 1881.

The material increase or decrease in value of the principal articles of domestic exports was as follows:

Increase in—	
Cotton, unmanufactured	\$39, 744, 106
Sugar, refined	4,237,360
Cotton manufactures	3, 605, 580
Iron and steel, and manufactures of	3, 367, 406

Imports.

During the last fiscal year, the value of imports of merchandise was \$844,916,196, an increase of \$55,605,787 over the imports of the fiscal year 1890.

The value of free merchandise imported was \$366,241,352, and of dutiable was \$478,674,844, an increase in the value of free merchandise of \$100,572,723, and a decrease in the value of dutiable goods of \$44,966,936, caused mainly by the transfer of sugar and certain textiles from the dutiable to the free list by the new tariff.

The material increase or decrease in value of the principal classes of free and dutiable imports during the year ending June 30, 1891, as compared with 1890, was as follows:

Increase in—		
Free of duty:		
Sugar and molasses, except from Hawaiian Islands		
(made free by new tariff)	\$45, 333, 773	
Coffee	17, 856, 345	k.
Textile grasses and fibrous vegetable substances	14, 608, 019	٠,
Hides and skins other than furs	6, 048, 873	
Chemicals, drugs, and dyes		
Fruits, including nuts		
India rubber and gutta percha, crude	3, 166, 292	
Dutiable:		•
Iron and steel and manufactures of	., ,	
Metals, metal compositions and manufactures of	2, 988, 588	
Wool, unmanufactured	2, 967, 289	
Vegetables	2, 621, 000	
Decrease in—		
Free of duty:	•	
Silk, unmanufactured	\$5, 249, 450	• .
Dutiable:		
Sugar and molasses (caused by transfer to free list)	36, 942, 172	. '
Wool and manufactures of	15, 522, 352	
Flax, hemp, jute, and other vegetable substances	13, 863, 081	
Flax, hemp, jute, etc., manufactures of	4, 397, 185	
Hats, bonnets, and hoods, materials for (caused by		
transfer in part to free list)	2,725,722	
There was an increase in the value of our imports in	1891 over	1890
from—		
Brazil	\$23, 911, 839	
The West Indies	8, 457, 464	
Great Britian and Ireland	8, 234, 346	
Mexico	4, 605, 077	
China	3, 061, 379	
British East Indies	2,552,670	
British Australasia	1, 961, 345	
Central American States	1, 746, 678	
Hawaiian Islands	1, 581, 689	

FI 91——IV

And a decrease from—

Philippine Islands	\$6, 425, 417
Netherlands	4, 607, 059
Japan	1, 794, 126
Germany	1, 521, 300

Imports entered for consumption.

The value of imported merchandise entered for consumption and the duty collected thereon, during the last five fiscal years, has been as follows:

Year ending June 30—	Value of me	rchandise.	Ordinary	Average rate collected on—			
	Free of duty.	Dutiable.	duty collected.	Dutiable.	Free and dutiable.

Trade with Central and South America.

Our total imports of merchandise from Mexico, Central and South American States, British Honduras, and the West Indies, during the fiscal year 1891, amounted to \$242,512,577, or 28.70 per cent. of our total imports of merchandise.

The value of our exports of merchandise to these same countries during the same period was \$90,413,516, or 10.22 per cent. of the value of our total exports of merchandise.

Our total imports and exports of merchandise from and to these countries, during the same period, amounted to \$332,926,093, or 19.26 per cent. of our total imports and exports of merchandise.

It will be seen that the excess of our imports of merchandise from these countries over our exports to them amounted to \$152,099,061. In other words, our imports of merchandise were 72.84 per cent. and exports 27.16 of the total trade with these countries, and we imported merchandise to the value of \$2.68 for every dollar in value exported to these countries.

The excess of imports over exports of merchandise for the fiscal year 1890 was \$108,054,472. For the fiscal year 1889 this excess was \$117,917,883.

A comparison of our commerce with this entire group of countries for the years 1870, 1880, and 1891 shows a gradual increase of both imports and exports of mercahndise.

During the year 1870 the value of imports was \$117,398,951 and of exports \$55,140,322, an excess of \$62,258,629.

During the year 1880 the value of imports was \$178,985,906 and of exports \$61,546,474, an excess of \$117,439,432.

The per cent. of our commerce with these countries, as compared with our total commerce, in 1870, was 20.82; in 1880, 15.99; and in 1891, 19.26.

Table showing the value of imports and exports of merchandise in the trade of the United States with Mexico, Central America, the West Indies, and South America, and the excess of imports or of exports, during the years ending June 30, 1889, 1890, and 1891.

Digitized for FRASER

In the following table the imports from the groups of countries south of the United States are given, and the value and per cent. of imports free of duty and dutiable, during the year ending June 30, 1891:

		Imports.		Per cent. of		
Countries.	Free of duty.	Dutiable.	Total.	free.		
Mexico	\$23, 364, 519	\$3,931,473	\$ 27, 295, 992	85.58		
duras West Indies South America		62, 240 44, 389, 171 8, 263, 277	10, 018, 212 86, 461, 705 118, 736, 668	99.38 48.66 93.04		
Total of group		56, 646, 161	242, 512, 577	76.64		

The principal articles imported from the entire group were: Sugar, coffee, tobacco, crude India rubber, hides and skins other than furskins, silver-bearing ore, and fruits, of which only tobacco and silver-bearing ore and a portion of the fruits are dutiable.

It is probable that under the new tariff the value of dutiable imports during the year ending June 30, 1892, from the group of countries to the south of us will not exceed 10 per cent. of the total value of imports.

The principal articles of domestic exports from the United States to this entire southern group consisted of manufactures of iron and steel, manufactures of cotton, manufactures of wood, wheat flour, mineral oil, and agricultural implements.

Imports and exports under reciprocity treaties.

The reciprocity clause of the new tariff is opening new markets and increasing the demand for our products.

During the year ending June 30, 1890, our exports of domestic products to Brazil amounted to \$11,902,496, and in 1891 to \$14,049,273, an increase of \$2,146,777.

The treaty with Brazil went into effect April 1 last, and it is not to be expected that the results will be very marked as yet. During the six months ending September 30, 1890, our domestic exports of merchandise to Brazil amounted to \$6,208,804, and during the same period of 1891, under the operation of the reciprocity treaty, to \$7,515,858, an increase of \$1,307,054.

This increase in exports to Brazil since the reciprocity treaty went into effect has been mainly in locomotives, steam-engines, machinery and cars for tramways and railways, wheat flour, bacon, boards, deals, planks, etc.

There has been a decrease in the exports of wheat, lard, and cotton manufactures.

The reciprocity treaties with Santo Domingo and with Spain concerning trade relations with Cuba and Puerto Rico did not go into effect until September 1, and as yet there are no available statistics to show the effects of the treaties upon our commerce. Furthermore, the reduction of duties on wheat and wheat flower imported into these islands from the United States will not take effect until January 1, 1892.

NAVIGATION.

The Bureau of Navigation reports the entire documented tonnage of the United States to be as follows:

Documented vessels.

		1891.
Registered	No. 1,587 22,312	Tons. 1,005,950.12 3,678,808.82
Total	23, 899	4, 684, 758, 94

The registered tonnage of the United States has increased 59,254 tons in the last year, and the enrolled and licensed tonnage in the same period has increased 201,007 tons.

During the same time the sailing tonnage has increased 62,324 tons, and the steam tonnage 157,175 tons.

The vessels built and documented during the last fiscal year were as follows:

Class.	1891.			
Sailing vessels	No. 733 488 57 106	Tons. 144, 290, 44 185, 036, 82 7, 059, 48 32, 915, 55		
Total	1,384	369, 302. 29		

LVI REPORT OF THE SECRETARY OF THE TREASURY.

The following table shows the tonnage built, apportioned in respect to the several grand divisions of the country:

Grand divisions.	1888.		1889.		1890.	1891.			
Atlanticand Gulf coasts Pacific coast Northern lakes Western rivers Total	Tons. 83, 168, 43 21, 956, 43 101, 102, 87 11, 859, 15 218, 086, 88	No. 657 112 225 ₹ 83	Tons. 93, 912. 24 17, 939. 43 107, 080. 30 12, 202. 36 231, 134. 33	No. 663 93 191 104	Tons. 156, 755, 99 12, 334, 92 108, 525, 87 16, 505, 98 294, 122, 76	No. 944 122 204 114 1,384	Tons, 218, 392, 46 19, 069, 84 111, 856, 45 19, 983, 54 369, 302, 29		

The iron vessels built during the fiscal year measured 105,618 tons. Of these there was built at the lake ports a tonnage of 57,989 tons and on the Atlantic coast 46,265 tons. The documented iron tonnage on the lakes is 181,724 tons and on the seacoast 554,963 tons. The entire documented iron tonnage, including that of the western rivers, is 741,598.24 tons. The documented tonnage on the Northern lakes June 30, 1891, was 1,154,870 tons; on the Western rivers, 308,348 tons; on the Pacific coast, 440,858 tons; and on the Atlantic and Gulf coasts, 2,780,683 tons.

The foreign going tonnage, exclusive of that engaged in the whale fisheries, is 988,719 tons, of which 236,070 tons are steam vessels, and 752,649 tons are sailing vessels.

Of our total documented tonnage, 2,016,264 tons are steam, and 2,668,495 tons are other than steam.

The registered vessels include the documented tonnage above mentioned in the foreign sea-going trade, and 17,231 tons in the whale fishery. The enrolled and licensed vessels include 3,609,876 tons documented under the federal laws, and engaged in the "coasting trade" along the seacoasts, the rivers, and the great lakes of the United States, and 68,933 tons licensed for the fisheries.

The appropriation by the last Congress of a sum to compensate American built steamships for carrying the mails will greatly encourage the building of ships in the United States of the class to which the benefits of the act are limited, namely, those capable of a speed in many cases of more than 20 statute miles an hour, for thousands of miles, without coaling, and will tend to the recovery of our share of the ocean carrying trade of the world, in competition with the steamships of Great Britain, France, and Germany.

Those nations, together with Spain and Italy, have subsidized their lines of steam vessels in one form or another, and they carry most of

our exports, which are usually products of a bulky nature, and constitute a very large and profitable portion of the commerce of the world.

Our annual customs receipts scarcely exceed the money paid annually to the owners of foreign vessels for the ocean transportation of our own people and merchandise, most of which large sum of about \$200,000,000 would be paid to our own vessel-owners under the fostering influence of friendly legislation.

Through treaties and regulations made since 1827, mostly prior to the late war, the early discriminations of the Government in favor of American shipping in the foreign trade have been removed and the vessels of other nations are now admitted in the United States, in some cases, on more favorable terms than our own, and in nearly all instances on conditions as favorable. The foreign competition thus stimulated, together with the injurious effects of the war upon our ocean carrying trade, have almost destroyed our foreign shipping interests. This, fortunately, is not the case in respect to our coasting trade, which is now the largest of any civilized country, and gives us a fleet of vast benefit to the nation in time of peace and capable of incalculable service in time of war.

There should be no interference with the legal barriers that now preserve the coasting trade to citizens of the United States, whether upon the lakes, the rivers, or the ocean. The late census shows that in addition to the large tonnage of documented vessels mentioned in the statistics above stated of vessels in this trade, there is a very considerable number of inferior undocumented craft employed upon the rivers and elsewhere, consisting of unrigged barges, flat boats, etc. the Ohio River and its tributaries above Cincinnati alone this additional tonnage is found to amount to 2,470,547 tons. The value of the coasting and river fleet to domestic commerce, and its relative importance, is shown by the reports of the Census Office, which state that on the great lakes alone (without considering wharves, elevators, shipyards, or other plants connected with shipping) the aggregate valuation of the vessels in 1890 was \$58,128,500, and that their total ton mileage for the season of 1889 was 15,518,360,000, equivalent to 22.6 per cent. of the total ton mileage of railways in the United States.

Losses of shipping in the foreign trade.

The following table cogently sets forth the loss of our shipping in the foreign trade:

Values of the imports and exports of merchandise of the United States carried, respectively, in American vessels, and in foreign vessels, during each fiscal year from 1857 to 1891, inclusive, with the percentage carried in American vessels.

	Imp	orts and expor	ts-	Percentage

891	206, 439, 725	1, 450, 101, 087	1,729,397,006	12.8

No words can add to the force of these figures. In 1858 over 73 per cent. of our maritime exports and imports was carried in American bottoms, and in 1891 less than 13 per cent. In 1861 our foreign going tonnage, exclusive of that on the lakes, was 2,642,628, the highest point reached in the history of the nation, and in 1865, four years later, it had fallen to 1,602,583. The causes of the decline need not be discussed here. Since the war they have been such as might have been obviated by action similar to that recently taken by Congress, and by encouragement on the part of that body, such as has been given to its navigation interests in no stinted measure by the Government of Great Britain.

The demand for ships of war will give us shipyards competent for building commercial vessels to any extent, and there is no good reason why ships should not be built here, and transport under American ownership a fair share of our exports and imports. Great industries like ship-building and the navigation of ships should not be surrendered by us to other nations without a determined struggle to retain them. No backward step should be taken in the efforts now being made to restore the American flag to the high seas.

The United States courts are considering various questions relating to the rights and duties of American owners of foreign-built yachts navigated in our waters. Some additional legislation in regard to vessels of this class may become necessary.

Changes in trade and commerce, and the rapid growth of seaboard towns, especially on the Pacific coast, make it often desirable to enter and clear vessels and discharge cargo at places other than ports established by law. To meet exigencies of this character, the Secretary of the Treasury should have authority to designate places as ports where customs officers may be stationed, when, in his judgment, the exigencies of commerce so require, with authority to enter and clear vessels, discharge cargo, collect duties and other moneys, and perform such other services in connection with the customs and navigation laws as the Secretary may prescribe.

ESTABLISHMENT OF A MARINE BOARD.

For many years it has been the desire of the various shipping organizations and marine associations of the country that a marine board should be established with a view to securing greater uniformity in the administration of the navigation, quarantine, and marine laws.

Pursuant to a resolution of Congress and the recommendation of the delegates to the United States International Marine Conference, a bill to effect this purpose was submitted to the last Congress, which passed the Senate, but failed of final action in the House, though favorably reported by the Committee on Commerce. The subject is again commended to the favorable consideration of Congress.

IMMIGRATION.

Pursuant to the evident intent of Congress as expressed in the immigration act of March 3, 1891, all contracts with State boards have been abrogated, and the immigration business at all ports of the United States is now controlled and managed directly by the Treasury Department

through a commissioner of immigration stationed at each principal port of entry, assisted by a suitable number of inspection officers. The change proves to be a beneficial one, giving to the service uniformity, method, and greater efficiency. Along the international boundaries the enforcement of the immigration laws is intrusted to immigration inspectors, who are under the general direction of the collectors of customs in the several districts where they are stationed. In the interest both of economy and efficiency, these immigrant inspectors also perform duty, when necessary, in the enforcement of the customs laws and the Chinese exclusion act.

Table showing number and nativity of alien immigrants arriving at ports of the United States during the fiscal year ending June 30, 1891.

Note.—Any disparity between the totals in this table and those furnished by the Bureau of Statistics is accounted for by the fact that the former include immigrants only, while the latter include tourists, etc.

The foregoing table shows an increase in arrivals of 94,376, or more than 22 per cent. over the previous year. The arrivals during the first four months of the present fiscal year (ending October 31, 1891) have been 189,778, an excess of 40,595, or of more than 27 per cent. over the corresponding months of 1890. This extraordinary and progressive increase in the tide of alien immigration to the United States, which does not include the increased arrivals via Canada, has not failed to attract the attention of the whole country, and it will doubtless command the early consideration of Congress. If ever there was a question which ought to be treated independently of partisan politics this would seem to be such a question; and the practical unanimity in this matter of our citizens of all parties and of whatever nationality furnishes the opportunity for the adoption of measures dictated solely by patriotic considerations.

An analysis of the statement of arrivals during the last fiscal year shows that an increasing proportion of immigrants is coming to us from those classes and those countries of Europe whose people are least adapted to, and least prepared for, citizenship in a free republic, and are least inclined to assimilate with the general body of American citizens.

With the approaching exhaustion of the supply of free arable land in the United States only a trifling percentage of immigrants now engage in farming on their arrival in this country, whatever may have been their former occupation. The vast majority of them crowd into our cities and large towns, with the inevitable result of overstocking the labor market and depressing wages, while the least efficient and more vicious among them soon drift into our poorhouses and prisons, to be a continuing burden upon our people. The laws already enacted by Congress for the purpose of checking this tendency and preventing the mischief which would result from unrestricted immigration have accomplished something. The attempt to enforce these laws efficiently has also developed a body of information, based on actual experience, which should be invaluable in framing future legislation. While the application of existing laws has very greatly diminished some of the specific abuses at which they were aimed, it obviously has not prevented a large increase in the total volume of immigration, and a distinct deterioration in its average quality.

The chief causes of the current increase of immigration lie on the surface. The higher wages, the better scale of living, the general and fairly uniform prosperity prevailing in this country, coupled with commercial and industrial depression abroad, the present trifling cost of

steerage passage, and the wide publicity now given to all the first-named facts among the masses of Europe, are a sufficient explanation, though other reasons contribute to the result.

Among the more obvious and fatal weaknesses in the present attempt to winnow somewhat our incoming tide of immigration, and to exclude certain classes of aliens who are admitted by all to be either dangerous or undesirable, are these: (1) In the worst and most important classes of cases, to wit, criminals, ex-convicts, polygamists, and illegally "assisted" immigrants, the law supplies almost no means of ascertaining the facts. The personal statements of such immigrants obviously have little value as evidence, and it is only by accident that any other source of information is open to the inspection officers at the port of arrival. (2) With the increasing efficiency of inspection at our several seaports, and the fact of this vigilance made known to intending emigrants in Europe, an increasing number of aliens are now landing at Canadian ports and thence entering the United States by rail, thus practically avoiding all effective scrutiny, besides depriving the immigrant fund of the head tax which would otherwise be paid.

Congress alone can remedy these glaring defects in a system which has thus far necessarily been tentative and experimental. Plainly the process of sifting immigrants should at least begin abroad, to be completed, and not commenced, at the United States port of arrival. Some system of investigation or certification, consular or otherwise, in the country where the intending emigrant resides, is believed to be entirely practicable, and such a system, supplemented by continued vigilance at our ports of entry, ought to prove effective to the desired end. Considerations of humanity as well as of efficiency require that aliens of the prohibited classes shall not be permitted to come across the ocean to our ports, only to be sent back penniless and stranded.

As to the entrance of alien immigrants into the United States by rail across the Canadian border, the remedy would suggest itself of either securing an international arrangement for a uniform system of foreign or seaport inspection, or, failing that, of making our own inspection at the border as effective as possible, as a part of our own general system.

The extent to which criminals, paupers, and defectives are systematically deported from certain foreign countries to the United States, and the best means of preventing this abuse, will be considered in a future communication to Congress.

The new and commodious Immigrant Station on Ellis Island, in New York harbor, is practically completed, and the business of receiving and inspecting immigrants will be transferred thither from the Barge Office as soon as certain details are arranged. A regular ferry will be maintained between Ellis Island and the Barge Office, and the annex forming part of the latter will be utilized as a final landing-place for those immigrants who are destined for New York City and adjacent points. The new receiving station, besides adding vastly to the comfort, convenience, and sanitary well-being of the arriving immigrants, will enable the inspection officers to perform their duties much more thoroughly, effectively, and expeditiously.

In addition to the information concerning each immigrant heretofore obtained by the inspection officers, a record of illiteracy will hereafter be preserved, by stating upon the register opposite each name whether the person can read and write.

Alien Contract-Labor Laws.

Good progress has been made during the past year in the matter of enforcing the provisions of the Alien Contract Labor Laws. The fact that such laws are on the statute books, prescribing serious penalties for the their infraction, has of itself had a most salutary effect and tended greatly to prevent all law-abiding citizens from attempting the importation of alien laborers under contract. Prosecutions have been instituted wherever sufficient evidence could be procured, and these, with resulting convictions, have had a wholesome deterrent effect upon such employers as might not be influenced by a mere knowledge of the illegality of the prohibited traffic in alien labor. Thus the effectiveness of the laws in question is not measured or indicated by the number of prosecutions brought thereunder, nor by the number of contract laborers intercepted and returned.

In June last I appointed a commission of five persons, who spent the summer months in various parts of Europe, making a careful study of the immigration question, with special regard to the illegal importation hither of alien laborers under contract. The report of that commission is now in course of preparation, and upon its completion I shall expect to lay the same before Congress, accompanying it with such suggestions as shall seem pertinent.

CHINESE EXCLUSION.

The Department has been unremitting in its efforts to enforce the Chinese Exclusion Acts, but with only partial success.

The law provides that Chinese laborers found to be unlawfully within the United States shall be removed therefrom to "the country from whence they came," and appropriations have been made from time to time by Congress to carry this provision of law into effect. It was found that these prohibited persons were gaining access to the country from the contiguous foreign territories of Mexico and Canada, where they were landed direct from China without hindrance, except the imposition of a head-tax of \$50 by the Canadian Government. It was obviously useless to return these people to Mexico or Canada, whence they could seek new and probably successful entrance into the United States, and in the opinion of the Department it was the purpose and intent of the law to return them to China as the country from whence they came, whether they gained admission directly from China or through the avenue of a foreign country.

If any doubt had previously existed it seemed to be set at rest by a specific appropriation by Congress both in 1890 and 1891, to enforce the law and return to China all Chinese persons found to be unlawfully within the United States.

The Department therefore ordered all such persons returned to China, regardless of the avenue of their entrance into this country, with such success that Chinese immigration was practically broken up on the Mexican frontier and measurably checked on the Canadian frontier. But within the last few months the instructions of the Department for deportation to China have been stayed in some instances by the action of the courts in returning such persons to Canada as the country from whence they came, and while the Department has not relaxed its efforts to enforce the law, it has been unable, as a result of such judicial action, to withstand the great influx of Chinese laborers along our Canadian border. It is undoubtedly true that the Chinese population of the United States has been considerably increased within the past year by the addition of Chinese laborers who have entered by way of Syndicates have been formed and much capital has been invested to further this unlawful immigration, and if it is still the purpose of Congress to prohibit it, a thorough revision of the statutes relating to the subject is necessary.

Four acts of Congress relate to the exclusion of Chinese laborers from the United States. These acts bear date May 6, 1882; July 5, 1884; September 13, 1888, and October 1, 1888, respectively. The act of May 6, 1882, suspended the immigration of Chinese laborers from and after the period of ninety days from the passage of such act and until the expiration of ten years next after the date thereof. The act of July 5, 1884, amended certain sections of the act of May 6, 1882, but did not change the period within which its operations were limited. The act of September 13, 1888, provided for the repeal of the acts of May 6, 1882, and

July 5, 1884, such repeal to take effect upon the joint ratification of the treaty then pending between the United States and China; but such treaty has not been ratified, and the Attorney-General has expressed the opinion that the act of September 13, 1888, is not in force. The acts of May 6, 1882, and July 5, 1884, therefore still control. By the act of October 1, 1888, it is made unlawful for any Chinese laborer who shall at any time have been a resident of the United States, and who shall have departed therefrom, to return to the United States. Unless, therefore, Congress shall enact new legislation upon the subject, it would seem that any Chinese laborer may lawfully enter the United States after May 6, 1892, unless he shall have previously resided here, in which case his admission is prohibited.

Any legislation, however, looking to exclusion will fail of its full purpose so long as the Canadian Government admits Chinese laborers to Canada, whence, armed with Canadian permits to leave and return to Canada at pleasure, they are at liberty to invade our territory along its entire northern frontier.

REVENUE-MARINE SERVICE.

The performance of the regular duties of the revenue cutters has continued in a faithful and efficient manner. Thirty-six vessels in commission during the year have cruised for the protection of the revenue a distance of 301,416 nautical miles, and have boarded and examined 26,962 vessels, of which number 1,042 were found violating the law.

The fines incurred by reason of these violations amounted to \$334,046.94. In addition, 123 distressed vessels were assisted, the value of the vessels and their cargoes amounting to \$2,806,056. Revenue cutters, furthermore, have rescued from the water during the past year, and in actual danger of drowning, 26 persons.

Material aid has been rendered during the year to the Life-Saving Service, a distance of 9,915 miles having been cruised by revenue cutters on this duty alone.

The expenditures on account of the Revenue-Cutter Service for 1891 have been \$934,995.22, of which sum \$26,816.59 was used in enforcing the provisions of the act of Congress, approved May 16, 1888, regulating the anchorage of vessels in the bay and harbor of New York.

The personnel of the Revenue Marine consists of 220 commissioned officers, 28 pilots, and 815 enlisted men.

The special duty of enforcing the provisions of the anchorage regula tions of the waters of New York harbor has been continued by the revenue steamer *Manhattan*. During the year 1,375 vessels were found im-

FI 91----V

properly anchored, and of this number 809 were assisted to a proper anchorage. The remaining vessels moved on being notified to do so.

The work of the revenue cutter fleet during the past year has been one of marked activity. The duty performed has been both varied and general. It embraced operations of more than ordinary importance in Bering Sea, in connection with the Eastern fisheries, on the Bahama Banks, the Florida coast, and in Puget Sound. Many of these operations dealt with issues of an international nature, and required throughout a nicety of judgment on the part of those engaged. The prompt and efficient manner with which revenue cutters have responded to demands for special work is creditable to both officers and crews, and leaves no reason to believe that there is any falling off from that high standard of efficiency which has so long characterized the Revenue Marine.

In the early part of April of this year the revenue steamer Bear made a special cruise to western Alaska in the interest of the Department of Justice, for the purpose of arresting criminals and securing witnesses who could not be reached without a special vessel. conveyed to Icy Bay the Russell exploring expedition, sent out under the auspices of the National Geographic Society of Washington, D. C. This vessel has also given transportation to the commissioner of education for Alaska, and the necessary supplies for the Indian schools in Arctic Alaska. The Bear had on board the supplies for the Point Barrow Refuge Station, but was unable to reach that point this season on account of the heavy field ice, which prevented the whaling fleet from proceeding farther north than Point Belcher. She rendered valuable assistance to a number of whalemen, and returning, reached Unalaska September 17, when she resumed guard duty around the Seal Islands, where she will remain until after December 1.

It was learned that the crew of the schooner Silver Wave, of San Francisco, wrecked late last year near Point Barrow, were furnished shelter and subsistence during the winter at the Point Barrow Refuge Station.

The revenue steamer Rush sailed from San Francisco on May 27 for the Seal Islands, and during the summer cruised 11,088.8 miles in the Bering Sea for the protection of the Government interests in that region and the enforcement of the provisions of the President's proclamation, and the modus vivendi with Great Britain. She boarded in the sea 23 vessels, 13 of them seal hunters, which were notified to leave the sea at once. The Rush seized one vessel, the British schooner E. B. Marvin, of Victoria, for noncompliance with the provisions of the proclamation, after having been warned by the United States steamship

Thetis. The Rush returning from her cruise reached San Francisco October 2, and sailed again October 19, to remain in the vicinity of the Seal Islands until December 1 next.

The revenue steamer *Corwin* sailed from San Francisco June 17 for Bering Sea, carrying copies of the President's proclamation and instructions for its enforcement to the other revenue steamers on duty in Alaskan waters, and to the Treasury agents on the Seal Islands. During the season she cruised 9,862.8 miles; boarded and notified 10 seal hunting vessels to leave the sea, and seized 2, the American schooners *La Nimpha*, of San Francisco, and *Ethel*, of San Diego, Cal., for noncompliance with such notice. These cases have since been tried in the United States district court of Alaska, and the vessels were condemned.

A number of new vessels are urgently needed for the proper maintenance of the service. With a fleet of thirty-six vessels it will be readily seen that unless new craft are added to the fleet annually the service must gradually become depleted.

The rapidly increasing commerce on the Great Lakes, the Pacific coast, and Puget Sound; the large number of Chinese subjects unlawfully landing on our shores, and the enormous quantities of opium believed to be smuggled into the United States from contiguous foreign territory; the additional service demanded of the revenue cutter fleet in protecting Government interests in Alaska, all require new and more efficient steamers. There is, in consequence, immediate and urgent need for two able cruising steamers for the Pacific coast and two for Lakes Michigan and Ontario, respectively. To meet any sudden contingency, these vessels should possess features and characteristics enabling them to meet demands other than those for assistance to distressed vessels and the enforcement of the customs revenue laws. This fact has not been lost sight of in the general designs outlined.

There is further need at San Francisco for a new boarding steamer. The vessel now engaged on this duty is too small for the efficient performance of the work assigned to her.

LIGHT-HOUSE SERVICE.

The number of light-stations was increased from 833 to 852. Three first-class light-ships have been finished and placed on stations on the Atlantic coast. Three other less expensive light-ships are being built for service on the Great Lakes, and will be finished in time to be put on stations this fall. The construction of four other first-class light-ships, three for service on the Atlantic and one on the Pacific coast, has been commenced. They are to have the best illuminating

apparatus and fog-signals, and are to be moved to and from their stations by their own steam power.

The Board has two first-class steam tenders well under construction, and the plans of a third are nearly finished.

The number of buoys, spindles, and day marks was increased from 4,651 to 4,715 during the last fiscal year. The appropriation for expenses of buoyage last year was \$335,000, an increase of \$55,000 over the preceding year. With this the Board was able to maintain these aids to navigation and make a slight addition to their number, but not as many as were needed.

The number of lights on navigable rivers was increased from about 1,600 to about 1,700; as the increase was mostly on eastern rivers, where it costs more to build and maintain them than it does on western rivers, the average cost was brought up from \$160 to about \$170 per year each. As each of these river lights serves the purpose that was formerly attained by a light-house costing very much more to build and many times more a year to maintain, it is deemed judicious as well as economical to increase their number. The Board asks an increased appropriation for this purpose.

The Light-House Board, in its annual report, again urges that the exhibition of private lights should be prohibited, and that a penalty be provided by law for the infraction of its regulations as to the lighting of bridges over navigable streams.

MARINE-HOSPITAL SERVICE.

The report of the Supervising Surgeon-General* shows that during the last year there were 52,992 sailors treated in the various marine hospitals and dispensaries; that there were 1,133 surfmen and keepers of the Life-Saving Service examined physically, of which number 59 were rejected for disease or disability; that there were 1,182 pilots examined for color blindness, of which number 29 were rejected; and that 243 seamen were examined physically as a prerequisite to their enlistment in the Revenue-Marine Service, of which number 38 were rejected.

The balance of funds available at the commencement of the fiscal year was \$106,295.77, and the receipts from all sources during the year (tonnage tax and repayments for care and treatment of foreign seamen, etc.) were \$533,760.77. The expenditures were \$564,528.53; leaving a balance on hand at the close of the fiscal year of \$75,528.01. The balance of the appropriation for the prevention of epidemic diseases available June 30, 1891, was \$157,174.32.

^{*} Omitted from this compilation.

During the year the eight quarantine stations have been in operation, including the new quarantine station on Angel Island, San Francisco Bay, which was opened for service in April. There were 1,664 vessels inspected at the national quarantines, of which number 113 were detained for disinfection. At the Gulf Quarantine Station, on Chandeleur Islands, 46 vessels, badly infected with yellow fever, were held and disinfected, and 12 yellow-fever patients were taken from these vessels into the lazaretto. As a result not a single case of yellow fever developed on the coast guarded by this quarantine.

The other stations were also successfully administered, and the Southern cities have been entirely free from this much dreaded disease during the past summer.

The Supervising Surgeon-General calls attention to the increased number of cases of leprosy discovered in the United States, and suggests the necessity of a national asylum where these lepers may be permitted to enjoy as much freedom as possible, and yet be removed from contact with other people. Pertinent correspondence relating to this matter is embodied in his report.

Owing to the prevalence of cholera in the East, and to a want of uniformity in the local health regulations at several of the ports of entry in the United States, a circular has been recently issued prohibiting the entry of rags imported from Marseilles unless previously disinfected. It may be necessary to extend the provisions of this circular to other ports where such rags are rebaled and reshipped.

The services of this Bureau of the Government, in aid of the general public health, find further illustration in the copies of correspondence regarding notification to State boards of health of immigrants arriving from infected ports or on infected vessels, and also in the immigration law, in which the duty of inspection of immigrants to be rejected on account of disease is placed upon the officers of this service.

The sanitary inspection service has been rigidly maintained at the port of Havana during the year by the sanitary inspector of the Marine-Hospital Service and his assistant, who examined 636 vessels at that port. Five thousand and twenty-four applicants for certificates to enable the entry of the applicants into the United States during the quarantine season were examined by the sanitary inspector, and certificates were refused to 455 applicants, because through want of acclimation (Havana being an infected port) these persons might convey disease into the United States.

. A sanitary inspection has also been maintained on the Mexican frontier at El Paso, Tex.

Interesting investigations have been in progress in the two bacteriological laboratories of the service, and a special report is made by the medical officer in charge of the chief laboratory, who was detailed for observation and study in the laboratories of Professors Koch and Pasteur.

Sanitary reports and statistics have been published weekly throughout the year.

The twenty marine hospitals of the United States are reported generally in good condition.

STEAMBOAT-INSPECTION SERVICE.

The personnel of this service, at the end of the fiscal year, consisted of 152 officers, clerks, and messengers. The number of steam-vessels inspected, belonging to the United States, was 7,404, having 1,503,-324.40 net tonnage. The number of foreign steam-vessels inspected was 295.

The number of passengers carried on American steamers, it is estimated, was over 500,000,000. The number of lives lost by various accidents was 338.

The expenses of the domestic service were \$273,295.29 for the fiscal year, and for the foreign service were \$12,953.56.

The services of the officers known as special foreign inspectors have been dispensed with, and the work is all done by the officers of the domestic service, under special appointments as acting special inspectors without pay, thereby saving the salaries formerly paid the special inspectors. It is recommended that the laws providing a separate class of officers for the inspection of foreign steam-vessels be repealed; a better service is obtained by having such inspections made by the officers of the domestic service, as is now done under Departmental authority

Urgent reasons for the proposed legislation are fully set forth in the Secretary's Report on the Finances, 1890, as follows:

The offices proposed to be abolished are virtually sinecures, and much sought after in consequence, and until they are abolished the Executive will remain subjected to importunity to fill them.

Legislation is also asked for regulating the pay of inspectors, great inequality now existing in that respect; and to provide punishment for fraudulently changing or interpolating licenses issued to officers of steam-vessels, and for false swearing by applicants for such officers' licenses.

LIFE-SAVING SERVICE.

At the close of the year there were in operation 238 life-saving stations, 6 having been put in commission and 1 discontinued during the year. The following statistics give a summary of their operations: The number of disasters to documented vessels within the field of station operations was 331, on board of which were 3,147 persons, of whom 3,105 were saved and 42 lost. The estimated value of the property involved was \$6,910,380, of which \$5,677,890 was saved and \$1,232,490 lost. The number of vessels totally lost was 62. Besides the foregoing there were 160 disasters to smaller craft (sailboats, rowboats, etc.), on which were 344 persons, of whom 336 were saved and 8 lost. The property involved in the latter disasters amounted to \$110,425, of which \$106,070 was saved and \$4,355 lost. The following is the aggregate:

Total number of disasters	.491
Total value of property involved	\$7,020,805
Total value of property saved	\$5, 783, 960.
Total value of property lost	\$1, 236, 845
Total number of persons on board	3, 491
Total number of persons saved	3, 441
Total number of persons lost	50
${\bf Total\ number\ of\ ship\ wrecked\ persons\ succored\ at\ stations}$	551
Total number of days' succor afforded	1, 516
Number of vessels totally lost	62

Besides the persons saved from vessels as shown above, 46 others were rescued who had fallen from wharves, etc., and would probably have perished but for the aid of the life saving crews. The assistance rendered by the service in saving vessels and cargoes was unusually effective, a larger amount of property being saved in proportion to that imperiled than in any former year, with the single exception of 1884. Aid was given to 470 vessels in getting them afloat when stranded, repaired when damaged, piloted out of dangerous places, etc. There were also 210 instances in which vessels in danger of stranding were warned off by the signals of the patrolmen.

The cost of the maintenance of the service during the year was \$940.201.04.

Since the date of the last report the stations referred to therein as being in process of construction at Knobb's Beach (near Newburyport) and Great Neck (Nantucket), Massachusetts; Marquette and Bois Blanc Island, Michigan; and Umpquah River, Coos Bay, and Coquille River, Oregon, have been completed and manned for service. One station, located at Neah Bay, in the Straits of Fuca, which was under

the charge of a keeper without crew, has been discontinued under the provisions of section 2 of the act of May 4, 1882, which authorizes the Secretary of the Treasury to discontinue any station whenever, in his judgment, the interests of commerce and humanity no longer require its existence. Preliminary steps have also been taken looking to the discontinuance of the Cape Malabar House of Refuge, Florida.

New stations are now building at Burnt Island (near the mouth of St. George's River), Maine; Quonocontaug, Rhode Island; Fenwick's Island, Delaware, and Ilwaco Beach, Washington.

Extensive repairs and improvements have been made during the year to 26 stations on the coasts of Virginia and North Carolina, and similar work is now in progress on several of the stations on the coasts of Delaware, Maryland, and Virginia. The Sandy Hook, Seabright, and Cold Spring Stations, New Jersey, and the Ocean City Station, Maryland, have been rebuilt; and a new building is being erected at Gurnet (near Plymouth), Massachusetts, to replace the old station, which will be utilized for a boat house and other purposes. The Ditch Plain Station, coast of Long Island, having been struck by lightning and destroyed on the night of February 28 last, a new station is in progress of construction to supply its place.

The telephone system of the service has been considerably extended during the year by short lines connecting stations in the neighborhood of cities with local systems, by means of which steam-tugs and other aids can be readily summoned on occasion of disaster, and a new line is being built from station to station along the Rhode Island coast.

The last two annual reports of the Secretary called attention to the inadequacy of the compensation allowed to the keepers and crews of stations, upon whose skill, bravery, and honest devotion to most perilous and exacting duty the good name of the service and the lives of imperiled mariners depend. In the last report it was shown that during that year more than 30 per cent. of the trained men had left the stations in the Lake districts, and a somewhat smaller percentage on the ocean coasts, for more lucrative employment, occasioning considerable embarrassment to the service. This exodus has increased during the past year, and its continuance can not fail to seriously affect the efficiency of the corps. Many of the remaining veterans are only retained by the hope of better wages, which the repeated recommendations of the Department and the justice of the case have excited. The hope is earnestly expressed that the relief, which simple justice to the men and the preservation of the high standard of efficiency which this service has hitherto maintained alike demand, may not be longer deferred.

COAST AND GEODETIC SURVEY.

Among the operations referred to by the Superintendent of the Coast and Geodetic Survey in his annual report,* the following may be named as of special importance: Surveys relating to the location of a part of the northeastern boundary line between the United States and the Dominion of Canada; resurvey of Nantucket Shoals; observations of tides, currents, densities, and temperatures in Long Island Sound and to the south of Martha's Vineyard, in cooperation with the work of the U.S. Fish Commission: completion of the detailed topographical survey of the District of Columbia; observations begun at Rockville, Md., and at San Francisco, Cal., for ascertaining the variations of latitude, in cooperation with the work of the International Geodetic Association; survey for the site of a light-house on Cape Hatteras Shoals; continuation of the investigations in the Gulf Stream, and preparation for publication of a volume relating to the methods of the investigation and the results of the research; connection of the primary triangulation on or near the 39th parallel advancing to the westward in the State of Indiana with that advancing to the eastward in the same State; extension to Kansas City of the transcontinental line of geodetic leveling; reconnaissance along the boundary line on the Rio Grande between the United States and Mexico; establishment off the coast of California, at the request of the Navy Department, of a trial course for the new naval cruiser San Francisco; advance of the primary triangulation in California by the occupation of Mount Conness; special surveys of harbors in Puget Sound for the Harbor Line Commission of the State of Washington, and continuation of the preliminary operations relating to the location of the boundary line between Alaska and the British Possessions in North America.

Advantage was taken by the Superintendent of opportunities afforded by his visit of inspection to the Pacific coast to determine gravity with new and improved apparatus at a number of stations in California, Washington, and Alaska. In compliance with a request from the International Geodetic Association, and with the sanction of the Secretary of the Treasury, an officer of the Survey was instructed to proceed to the Hawaiian Islands and aid an officer detailed by that Association in observations relating to the variations of latitude. He was further directed to determine simultaneously with latitude the force of gravity at sea-level, and also, when practicable, near the summit of Mauna Kea.

^{*} Omitted from this compilation.

The demand for the charts of the Survey has for some years past exceeded the capacity of the office presses, but new presses and increased working room, soon to become available, will probably enable all public requirements to be met.

During the fiscal year 1891, there were issued 52,959 copies of charts, 3,153 of which were for the use of Congress, 2,651 for the Executive Departments, and 31,465 to sale agents. Of Notices to Mariners—issued monthly or oftener, as occasion demanded—139,000 copies were printed for free distribution. The publication of Coast Pilots and Tide Tables was continued. Of the Coast Pilots for the Atlantic and Pacific coasts, 1,052 copies were distributed. The manuscripts of the Tide Tables, predicting times and heights of high and low waters on the Atlantic and Pacific coasts for 1892, were sent to press before the close of the fiscal year.

The building known as the Richards building, so long occupied by the Coast and Geodetic Survey, was purchased for the use of that Bureau by an appropriation in the Sundry Civil Act of March 3, 1891. In the same act the purchase of the Butler building adjoining, a part of which had long been used by the same service, was also provided for, my predecessor having recommended to Congress that it be bought for the use of the Survey, to afford a much needed increase in the facilities for printing and publishing charts.

Before the close of the fiscal year, however, it became imperative to make new provision for the Marine-Hospital Service, and it was necessary to utilize the greater part of the Butler building for this purpose.

A new building, much more perfectly adapted to the needs of the Coast and Geodetic Survey, can be erected at comparatively small cost on the ground belonging to the Richards building, and, knowing the need for increased room for the proper execution of this important branch of the public service, I respectfully recommend and urge Congress to provide at an early day for the erection of such a building.

Office of Weights and Measures.

The work of constructing sets of standard weights and measures for the States that have not yet received them was continued in the Office of Weights and Measures. Comparisons of thermometers were made for the Internal-Revenue Bureau; comparisons of coin weights for the United States Mint at San Francisco, and of series of test weights for the United States Mint at Carson City, Nev. At the request of the Secretary of the Treasury an examination was undertaken of the standards in use in the sugar laboratories of the appraisers' offices in Bos-

ton, New York, and Philadelphia, and carried to a successful conclusion. Subsequently, at the request of the Commissioner of Internal Revenue, a commission consisting of experts representing the Department of Agriculture, the Internal-Revenue Bureau, and the Office of Weights and Measures was organized with a view of deciding upon improved methods in the analysis of sugars, and of framing regulations for determining the polarization of those upon which a bounty is paid.

For the reasons stated in the last report of my predecessor, I renew the recommendation made by him that the metric system of weights and measures be made obligatory in transactions at United States customhouses from and after the first day of the calendar year 1895.

ENGRAVING AND PRINTING.

The work of the Bureau of Engraving and Printing during this year exceeded that of any other for fourteen years, a considerable portion of this increase being the Treasury notes provided for by the act of July 14, 1890. So great was the demand for these and other small notes that it was necessary to work the larger part of the force of the Bureau overtime throughout the entire year. During a portion of the time work commenced at 7 a.m. and continued until 6:30 p.m. view of this large increase of work, it became necessary to adopt some method of executing at least a part of the printing more rapidly than by the methods heretofore in use. After full and careful consideration of the matter, the Chief of the Bureau recommended that the internal-revenue stamps, known as strip tobacco stamps, be printed from steel plates engraved in relief, which would permit of the printing of these stamps at the rate of 7,000 to 8,000, instead of from 700 to 800, sheets per press daily, as by the method of printing from intaglio plates. Samples of stamps printed by this method were submitted, and after full investigation by the Commissioner of Internal Revenue, the recommendation of the Chief of the Bureau of Engraving and Printing was approved by the Department, and the stamps are now being printed by this method. It is estimated that a saving of about \$156,000 a year will be effected by this change.

The erection of the additional wing to the Bureau building, authorized by Congress, progressed steadily during the year, and it is now finished and occupied by the Bureau. The additional facilities afforded by this wing, together with the change in the method of printing the strip tobacco stamps, permits of the execution of the work of the Bureau within the regular hours for business—that is, from 8 a. m. to 4 p. m. daily. The business of this Bureau is now in a very satisfactory condition.

PUBLIC BUILDINGS.

There were 392 public buildings completed and occupied, in course of construction, not yet commenced, and for which properties for sites had been, or were being, selected, and titles thereto acquired, under the control of the Treasury Department and the supervision and direction of the office of the Supervising Architect during the year ending September 30, 1891, of which number—

One hundred and twenty were in course of construction, including those to which extensions or additions, alterations, and repairs were being made under special appropriations, and sites were selected or being selected.

Two hundred and fifty were completed prior to September 30, 1890, and 19 were completed and 3 were purchased during the past year, making 272 completed and occupied; and all work of repairs thereon, or the repairs to the heating, hoisting, and elevator apparatus therein, were properly chargeable to the general appropriations.

Seventy-eight sites and buildings were authorized during the first and second sessions of the Fifty-first Congress.

Eleven sites remain to be selected.

The amount of money expended on public buildings for the year ending September 30, 1891, is as follows:

For sites and in the construction of new public buildings, extensions		
and repairs specially provided for	\$5, 514, 250	88
For repairs and preservation of public buildings	228,644	10
For heating apparatus for public buildings	119, 745	19
For vaults, safes, and locks for public buildings	48, 304	98
For photographic duplication of the plans for public buildings	3, 484	18
For vaults for storage of silver, New Orleans, La., and San Francisco,		٠.
Cal	34,273	55
Total expenditure	5, 948, 702	78

Among the recommendations of the Supervising Architect to which the attention of Congress is invited is that suggesting the enactment of a general law directing the mode of acquiring sites for public buildings; preparation of plans, and proceeding with the work of construction, leaving for special legislation simply the designation of the place to be provided for and the sum to be appropriated. At present the numerous individual acts providing for public buildings repeat these directions in substantially the same language, thus encumbering the statutes unnecessarily. Another recommendation worthy of attention is that suggesting a law providing for a corps of superintendents of construction

CLAIMS. LXXVII

of public buildings, thus giving to the service superintendents especially selected because of their fitness, and further qualified by their constant experience, in the place of temporary local appointees in too many instances unqualified for their important duties.

CLAIMS.

The importance of providing some limitation of time within which claims against the Government shall be prosecuted, or, for want of such prosecution, be forever barred, is urged upon the attention of Congress.

It may be assumed that any claim in behalf of an individual who is in a situation to present it will, if well founded, be presented for payment within six years from the time when the claimant's right first accrued. Such limitations form part of the codes of all civilized nations, and experience has shown that, as between individuals, less injustice is done by the conclusive presumption that claims, thus delayed beyond a reasonable time, are unfounded or have been adjusted, than by allowing them to be prosecuted after witnesses to the transaction have died or been lost sight of, and other evidence has been destroyed.

The presumption is much stronger in case of a claim against the Government than in one against an individual. The Government is always solvent and can always be found, and it is difficult to suggest a reason why a valid claim against it should not be presented within the term of six years.

Under the present circumstances, it is impossible to administer equal justice to those who present old claims. The Comptrollers and Commissioner of Customs have by law the final determination of all claims coming within their jurisdiction, and while one of them, or the Auditor who first considers the claim, may reject it because its prosecution has been for many years delayed, and he therefore believes it to be unfounded, another officer feels it his duty to examine it upon such evidence as may still exist, because Congress has not interposed a statute of limitation in bar of its allowance. The First Comptroller, in his report,* has called special attention to the importance of some limitation of this character.

It is recommended, therefore, that it be provided by law that no claim pending in any of the Executive Departments shall be allowed unless presented for payment within six years after such claim first accrued, with the usual exception in favor of claimants disqualified by age, or otherwise, from prosecuting claims within such time.

The First Comptroller also recommends in his report that the act of March 3, 1887 (24 Stat., 505), providing for the bringing of suits against

^{*} See Appendix, page 501.

the Government, be amended or repealed; that additional legislation be had touching the subject of double compensation to public officers; and that provision be made for turning into the Treasury the balance on June 30, 1891, standing to the credit of the appropriation for "deposits by individuals for surveying public lands."

WORLD'S COLUMBIAN EXPOSITION.

Work is progressing satisfactorily in the preparation of a suitable contribution by the Treasury Department to the Government exhibit at the World's Columbian Exposition. Pursuant to the provisions of law, the Supervising Architect of the Treasury has completed suitable plans for the Government Exposition building. A contract for the construction has been approved, involving an expenditure of \$316,767, and work is going forward upon the structure.

SEAL ISLANDS.

It has been well known to the Department for some years that there was a marked diminution in the number of seals returning annually to the Pribyloff Islands. This decrease affected the rookeries so seriously that a modus vivendi was entered into between the United States and Great Britain, by the terms of which the number of seals to be killed on the islands between June 15, 1891, and May 1, 1892, was limited to 7,500, and their destruction in that part of Bering Sea lying eastward of the line of demarcation described in article I of the treaty of 1867 was prohibited for the same period.

From reports made by the Treasury agents at the islands, who were instructed to investigate the subject, it would seem that the killing of vast numbers of female seals in the open waters by pelagic hunting is the prime factor in the rapid decrease of seals, and if persisted in will undoubtedly result in the speedy annihilation of these valuable furbearing animals. This will more clearly appear when it is stated that although the proclamation of the *modus vivendi* was issued on June 15, 1891, more than 50,000 skins were taken by sealing schooners during the past season, and as but a small percentage of the seals killed at sea are secured, the figures given would indicate the actual destruction of many times that number.

It would therefore seem that restrictive measures are imperatively needed for the protection of this valuable animal, which contributes so largely to the wealth and comfort of the world at large. Attention is also invited to the fact that on the islands of St. Paul and St. George there are 300 native inhabitants who are supported by their labor in

taking seals for the lessees of the islands, and as this industry is affected by the operations of the pelagic sealers, the natives who, to some extent at least, may be regarded as the nation's wards, must be provided for from the public funds.

There are other matters relating to this subject to which at the proper time I may deem it advisable to invite the attention of Congress.

RECORD OF REAL PROPERTY BELONGING TO THE UNITED STATES.

Attention is again invited to the need of legislation to provide suitable registry of deeds and other evidences of title to real property acquired and held for the use of the United States.

These instruments are now deposited in various offices in the several Departments, and their production when required often involves much labor and research, which would be obviated by collecting them into one place of deposit and record.

This would also afford means of ready reference to the history of titles, and better assure the discovery and perfecting of defective and disputed titles, and the recovery of property which, through disuse or otherwise, has been lost sight of and come into the wrongful possession of private parties.

OFFICIAL FILES OF THE GOVERNMENT.

My predecessors for many years past have called the attention of Congress to the importance of providing a suitable building, centrally located, for the safe and convenient keeping of the official records, documents, and papers of the Government. The importance and urgency of this matter cannot be overstated, and I earnestly recommend that early and favorable action be taken by Congress looking to the erection of such a building.

DISTRICT OF COLUMBIA.

The net expenditures on account of the District of Columbia for the fiscal year 1891 were \$5,635,510.61. The revenues deposited in the Treasury on this account, for the same period, were \$2,853,897.74.

There have been issued during the fiscal year 1891, \$50,750 of the 3.65 per cent. bonds, in satisfaction of judgments of the Court of Claims against the District. There have been retired by the operations of the sinking fund during the same period \$331,500 of the bonded indebtedness of the District, making a net reduction of \$280,750, and reducing the annual interest charge \$16,982.

LXXX REPORT OF THE SECRETARY OF THE TREASURY.

The net reduction in the bonded debt since July 1, 1878, is \$2,606,350, and in the annual interest charge \$177,339.72. The bonded debt July 1, 1891, was \$19,500,300, of which there were due and payable on that date \$2,490,200 6 per cent. bonds and \$276,700 7 per cent. bonds. To provide for the payment of these bonds Congress, by act approved March 3, 1891, authorized the issue of 3.50 per cent. bonds, and the Treasurer, in compliance with the provisions of the law, caused the bonds to be prepared, advertised, and has sold \$2,400,000 at a premium of five hundred and thirty-one one-thousandths per cent., realizing the sum of \$2,412,744, to be applied to the redemption of the matured bonds. The act also authorized the sale of sufficient 3.50 per cent. bonds to pay the bonds maturing in 1892.

The amount realized from the sale of bonds in which the retentions from contracts with the District of Columbia were invested, in excess of the amount due the contractors, have been deposited in the Treasury as a miscellaneous receipt to the credit of the United States and District of Columbia in equal parts, as required by the act of February 25, 1885. The net surplus from this source at the close of the fiscal year 1890 was \$30,676.18. During the fiscal year 1891, in settlement of these accounts, the sum due the contractors is in excess of the amount realized from the sale of bonds, showing a net loss of \$2,609.22, reducing the net surplus at the close of the fiscal year 1891 to \$28,066.96.

The detailed information in regard to the affairs of the District of Columbia will be found in the report to be submitted by the District Commissioners and by the Treasurer of the United States, ex-officio commissioner of the sinking fund of the District.

REPORTS OF HEADS OF BUREAUS.

The several reports of the heads of offices and bureaus are herewith transmitted.

CHARLES FOSTER,

Secretary of the Treasury.

The Honorable

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

LEGAL-TENDER NOTES.	1.	1			· ·		
The act of February 25, 1862 (12 Statutes, 345), authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denomina-	Indefinite	On demand	None	Par	450, 000, 000. 00		346, 681, 016. 00
tions, not less than five dollars, as the Secretary of the Treasury might deem expedient, \$50,000,000 to be applied to the redemption of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender in payment of all debts, public and private, within the United States, except duties on imports and interest on the public debt, and to be exchangeable for six per cent United States bonds. The act of July 11, 1862 (12 Statutes, 532), authorized an additional issue of \$150,000,000 of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and not more than \$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender as before authorized. The act of March 3, 1863	•						
(12 Statutes, 710), authorized an additional issue of \$150,000,000 of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender as before authorized. The same act limited the time in which the Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in lieu of \$100,000,000 authorized by the resolution of January 17, 1863 (12 Statutes, 822). TEMPORARY LOAN.

such notes, when held by any national banking assoc ation, may be counted as a part of its lawful reserve. That upon demand of the holder of any of the Treasury, notes provided for the Secretary of the Treasury shall redeem the same in gold or silver coin, at his discretion, it being the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law.				
NATIONAL BANK NOTES (REDEMPTION ACCOUNT).				•
The act of July 14, 1890 (26 Statutes, 289), provides that balances standing with the Treasurer of the United States to the respective		 	 	 40,018,392.25
credits of national banks for deposits made to redeem the circulating notes of such banks, and all deposits thereafter received for				
like purpose shall be covered into the Treasury as a miscellaneous receipt, and the Treasurer of the United States shall redeem from				
the general cash in the Treasury the circulating notes of said banks which may come into his possession subject to redemption, * * *	!			
and the balance remaining of the deposits so covered shall, at the close of each month, be reported on the monthly public debt state-				
ment as debt of the United States bearing no interest.				
•				*1,545,996,591.61

Exclusive of \$64,623,512 bonds issued to Pacific railroads.

Table B.—Statement of Outstanding Principal of the Public Debt of the United States on the 1st of January of each year from 1791 to 1843, inclusive, and on the 1st of July of each year from 1843 to 1891, inclusive.

In the amount here stated as the outstanding principal of the public debt are included the certificates of deposit outstanding on the 30th of June, issued under act of June 8, 1872, for which a like amount in United States notes was on special deposit in the Treasury for their redemption, and added to the cash balance in the Treasury. These certificates, as a matter of accounts, are treated as a part of the public debt, but being offset by notes held on deposit for their redemption should properly be deducted from the principal of the public debt in making comparison with former years.

† Exclusive of gold, silver, currency certificates, and Treasury notes of 1890, held in the Treasury's cash, and including \$64,623,512 bonds issued to the several Pacific railroads.

Digitized for FRASER

Note 1.—The annual interest charge is computed upon the amount of outstanding principal at the close of the fiscal year, and is exclusive of interest charge on Pacific allway bonds. Interest on the 44 per cent loan is computed at the regular rate from July 1, 1891, to date of maturity, September 1, 1891, and at 2 per cent from that date to close of year.

NOTE 2.—The figures for July 1, 1879, were made up assuming pending funding operations to have been completed.

NOTE 3.—The temporary loan per act of July 11, 1862, is included in the 4 per cents from 1862 to 1868, inclusive, with the exception of the amount outstanding August 31, 1865, this being the date at which the public debt reached its highest point. This loan bore interest from 4 per cent to 6 per cent, and was redeemable on ten days' notice after thirty days; but being constantly changing, it has been considered more equitable to include the whole amount outstanding as bearing 4 per cent interest on an average for the year.

NOTE 4.—In the recent monthly statements of the public debt the interest accrued has been added to the principal, making the net debt larger in that amount than the

TABLE II.—STATEMENT SHOWING THE CHANGES IN THE INTEREST-BEARING DEBT OF THE UNITED STATES DURING THE YEAR ENDED OCTOBER 31, 1891.

Title of loan.	Rate of interest.	Outstanding Nov. 1, 1890.	Increase during the year.	Decrease during the year.	Outstanding Nov. 1, 1891.
Funded loan of 1891	Per cent.	\$63, 979, 850		\$38, 615, 350	\$25, 364, 500
Funded loan of 1907. Refunding certificates	4	568, 203, 850 99, 690	*\$15, 150	8, 645, 850 10, 620	559, 573, 150 89, 070
Total		632, 283, 390	15, 150	47, 271, 820	585, 026, 720

* See statement which follows, showing conversions of refunding certificates, for an explanation of the increase during the year in the interest-bearing debt.

Since November 1, 1890, refunding certificates issued in 1879, under the act of February 26, 1879, have been presented for conversion into 4 per cent bonds as follows:

Total						15, 784. 00
77 7 7 13		e 11 '			****	
For which settlemen						
Four per cent bonds issued						
Four per cent bonds issued	on account o	of accrued in	terest		4, 530	
						15, 150. 00
Interest paid in cash			•••••		• • • • • • • • • • • • • • • • • • • •	634.00
Total as above	• • • • • • • • • • • • • • • • • • • •	• • • • • • • • • • • • • • • • • • • •				15, 784. 00
					-	
The certificates still	outstandir	o amount	to \$89.07	0.		· +,

Principal

The reduction in the annual interest-charge, by reason of the changes during the year ended October 31, 1891, is as follows:

On bonds retire	d by purch	ase or redemptio	n	<i></i> .	\$2,083,524.75
On bonds contin	ned at 2 pe	er cent			634, 112. 50
					· · · · · · · · · · · · · · · · · · ·

2, 717, 637, 25 Deduct the interest on \$4,530 4 per cent bonds issued.....

In addition to the purchases and redemptions of 4 and $4\frac{1}{2}$ per cent bonds there were redeemed \$95,850 United States bonds and seven-thirty notes upon which interest had ceased. The total net reduction of the bonded indebtedness of the United States during the year ended October 31, 1891, was, therefore, \$47,357,050.

APPENDIX.

REPORTS OF HEADS OF BUREAUS AND OTHER OFFICERS.

(No. 1.)

REPORT OF THE TREASURER.

TREASURY OF THE UNITED STATES, Washington, December 1, 1891.

SIR: I have the honor to submit the annual report on the operations

and condition of the Treasury.

For convenience of reference, the tabular statements relating to the work of the past fiscal year, as well as those covering longer periods of time, are presented in the Appendix, where they are grouped according to their topics in the following general order: The revenues and expenditures; the state of the Treasury; the receipts and disbursements of moneys; the issue and redemption of currency; the circulation; the public debt; and the redemption of national-bank notes.

In the preparation of the tables it has been the aim to begin with the the minutest particulars that possess any degree of public interest, to combine these into classes and groups, and lastly to deduce the net results. The operations of the fiscal year, forming the chief subject-matter in hand, are shown with much attention to detail, while those of former years, where brought in for the purpose of presenting a connected historic survey, are treated in a more summary manner. From considerations suggested by current discussion and events, these tables have been a good deal elaborated, for which perhaps no apology will be necessary, if in any measure they may serve to throw new light on the matters to which they relate.

Important legislation, creating a new kind of currency, imposing a new responsibility upon the Treasury, and completely transforming some of the Departmental statements, has made it necessary to alter a number of tables which have been more or less familiar to the readers of former reports. Some other tables heretofore published, relating to transactions long past, or to events of transient interest only, have been shortened or dropped; but no matter of this kind has been omitted, it is believed, that would be useful in forming an understanding of the business of the Treasury, or its bearing upon the financial history of the country. So far as it has been possible the statistics relating to similar subjects have been compiled according to a uniform plan and

3

are presented in uniform shape.

REVENUES AND EXPENDITURES.

There was a decrease of \$10,468,535.32 in the net ordinary revenues of the Government for the fiscal year as compared with those of the year before, from \$403,080,982.63 to \$392,612,447.31. At the same time there was an increase of \$57,636,198.14 in the ordinary expenditures, excluding therefrom the amount paid in premium on the public debt. The surplus revenues were thus cut down from \$105,344,496.03 to \$37,239,762.57. Of this last sum \$10,401,220.61 was expended in premium on bonds purchased, leaving \$26,838,541.96 of surplus for the year applicable to the extinction of as much of the principal of the debt.

The net ordinary receipts and expenditures for the two years, together with the premiums paid, are shown in the following table:

	1890.	1891.	Increase.	Decrease.

Total	318, 040, 710. 66	365, 773, 905. 35	57, 636, 198. 14 47, 733, 194. 69	9, 903, 003. 45
Surplus	85, 040, 271. 97	26, 838, 541. 96		58, 201, 730. 01

Besides the revenues, the amount of which is given as shown by the receiving warrants issued, there was covered into the Treasury during the year the aggregate sum of \$373,208,857.75 as receipts on account of the public debt, consisting of gold coin, silver dollars, and legal tender notes deposited for certificates to be circulated as money, of United States notes received for issue in place of others destroyed, of 4 per cent bonds issued for refunding certificates, of Treasury notes of 1890 issued, and lastly of the fund which before had been on deposit with the Treasurer, as agent, for the retirement of national-bank notes.

The expenditures on the same account, which will be noticed more in

detail under another head, amounted to \$365,352.470.87.

The postal revenues amounted to \$65,762,908.55, an increase of \$4,656,867.26 over those of the preceding year, and the expenditures to \$72,067,580.65, an increase of \$5,056,317.01. Of the revenues \$38,730,624.39 was received and disbursed by postmasters, without passing through the Treasury. The balance standing to the credit of the Post-Office Department on the Treasurer's books was \$5,805,621.79 at the beginning of the year and \$4,242,608.13 at the close.

STATE OF THE TREASURY.

As a public officer the Treasurer is responsible to his superior for the performance of his duties, which consist generally in receiving, keeping, and disbursing the funds of the Government. He stands in the same relations to the Department that a banker does to a depositor. For each receipt or disbursement he must have a proper warrant; for the balance, representing the excess of receipts over disbursements, he must be able to show an equivalent in lawful money or other acceptable assets.

In its essential form the account kept with him on the books of the Department is a simple record of receipts on the one hand and of payments on the other. Save in exceptional cases the Department has no concern in the kinds of money he may receive or pay out. He may accept from the taxpayer any kind of money the law allows, and he may satisfy the public creditor, unless a particular kind is specified in the contract, with any he can most conveniently pay. Hence it follows that the condition of the Treasury, with respect to the proportions of the different kinds of money composing its funds, is dependent much upon the character of the circulating medium of the country, and to a very great extent upon the management of the Treasurer and his subordinate officers. A most important consideration with reference to the state of the Treasury is, therefore, how much of each kind of money the Treasurer may have in his custody against the balance charged to him on the books of the Department.

On June 30, 1890, that balance was \$691,527,403.76. Adding thereto the sum of \$765,821,305.06, which comprises the receipts of the year from all sources, gives \$1,457,348,708.82 as the aggregate to be accounted for on June 30, 1891. Out of this there was disbursed, by warrant, the total sum of \$355,372,684.74 on account of the ordinary expenses of the Government, together with a total sum of \$375,753,691.48 on account of the public debt, making an aggregate disbursement of \$731,126,376.22, and leaving a balance of \$726,222,332.60, for which the Treasurer must

be able to produce cash or other valid assets.

The foregoing statement does not, however, comprise the whole of the operations of the Treasury, nor do the figures represent the sum of its liabilities. Besides being the bank of the General Government, the Treasury is also the depository of the Post-Office Department, of the national bank note redemption fund, and of the disbursing officers of the various services of the Government, to whom the moneys to meet the expenditures are advanced in the first instance. Through these channels a stream of money flows continuously in and out of the Treasury, and a varying amount is always on hand, for which the Treasurer is responsible on his so-called agency account, and for which also he must hold cash or available credits. The balance of this account standing on his books was \$95,581,164.22 on June 30, 1890, and \$50,290,009.36 on June 30, Lastly, the Treasurer held, at the former date, the sum of \$323,-589.78, and at the latter, the sum of \$1,342,603.71, which had been received on account of revenues, but not yet covered by warrant or charged to him on the books of the Department. The total liabilities of the Treasury, therefore, in the strictest technical sense in which the term is understood, were \$787,432,157.76 at the opening of the fiscal year, and \$777,854,945.67 at the close.

To meet these liabilities the Treasury held in the vaults and tills of its ten offices, and in the several associated offices of the mint, in the

form of gold, silver, legal tender and other notes, certificates of deposit, minor coin, fractional currency, bonds, interest checks, and coupons, an aggregate of cash items, which with the amounts on deposit to the Treasurer's credit in depositary banks, a certain sum deposited under a law of 1836 with the States, and certain unavailable funds, composed exactly the same amounts. Arranged in tabular form the figures make the following showing:

	June 30, 1890.	June 30, 1891.
ASSETS.		•
Gold coin and bullion Silver coin and bullion Notes and certificates Minor coin and fractional currency Bonds, interest checks, and coupons Deposits in national bank depositaries Deposits with States Unavailable funds	346, 626, 603. 43 59, 463, 509. 09 194, 722. 87 37, 533. 21 30, 659, 565. 32	\$239, 132, £28. 53 399, 746, £43. 51 82, 742, £77. 40 328, £50. 88 27, £84. 22 26, 369, £82. 31 28, 101, £44. 91 1, 405, 433. 91
Total	787, 432, 157. 76	777, 854, £45. 67
LIABILITIES.

Total	787, 432, 157. 76	777, 854, 945. 67

Of these assets the coin and paper money were instantly available, with the exception of relatively small amounts of uncurrent coin, which will be noticed on another page. The deposits with banks were subject to the Treasurer's draft. The gold and silver bullion, the former valued by weight, and the latter at the cost price, could be coined into legal-tender pieces, in the one case without loss, and in the other at an apparent profit. The deposits with States, which occupy an anomalous position, and would seem to be well worthy of the consideration of Congress, are held to be without the Treasurer's control, and are not actually carried on his books, while the unavailable funds, representing old losses from deficits and defalcations, have no existence as assets, and are omitted by authority of the Secretary from the statements of cash in the Treasury rendered to him. The true assets and liabilities were, therefore, \$757,915,078.94 on June 30, 1890, and \$748,347,866.85 on June 30, 1891, as given elsewhere in this report. These figures represent, on the one side, the total cash actually at the Treasurer's command, and measure, on the other, his accountability as a public officer and his obligation to pay, whether on demand of the Secretary or of any other person.

Since the moneys of the Treasury are derived from three general sources, which may be described as the revenues, the debt, and public deposits, they are held for as many purposes, and the liabilities fall into as many categories. While generally no separation is made in the moneys themselves, with reference to the accounts on which they were received, and it would be inexact to say that any particular coins or notes are held against a given liability, sums of gold, silver, and legal-tender notes must be kept in reserve against certificates of deposit and Treasury notes, and these sums may be considered as set apart, leaving a residue of assets, which are held in the mass against the deposits

carried in the agency accounts, as well as against the reserve or working balance. In this form the statement would be as follows:

	June	30, 1890.	0, 1891.

These figures, which exhibit the condition of the Treasury precisely as it stood at the close of business on the days named, without confusing either prospective expenditures with liabilities or anticipated revenues with assets, present, on their face, the apparent incongruity of \$499,000,000 of gold, silver, and notes held against \$541,000,000 of certificates, and of \$248,000,000 in various assets standing against deposits and the reserve, amounting together to only \$207,000,000. The explanation is found in the certificates in the Treasury, against which nothing needed to be held, and which might have been canceled and destroyed without decreasing either the reserve or the assets necessary to protect the certificates in circulation. If the \$31,215,633 of certificates in the Treasury in 1890 and the \$41,807,579 there in 1891 had in fact been destroyed, the statement would have appeared thus:

		June 30, 1890.	June 30, 1891.

Since June, 1890, the form of the published monthly statement of assets and liabilites has been twice revised, and the document itself was incorporated, at the last revision, into the debt statement, without, of

course, in any manner affecting the true condition of the Treasury or altering the significance of existing facts. The changes that have been made, where not mere matters of clerical or typographical technicality, have amounted simply to a contraction of scope. The present form extends over less ground than some of the others, but the ground itself, whether admitted or excluded, remains unchanged. Differences of opinion exist respecting the value of the various shapes which have been given to the document at different times, but it is believed that this latest form will commend itself to the public judgment for its simplicity and clearness. It consists of a plain schedule of the moneys and other assets, where each item stands, without comment, at the value fixed by law and charged to the Treasurer, and of an equally plain list of those liabilities only which exist in consequence of the presence of those assets. Where moneys are deposited for a specific object, that object is stated as the liability; but where there is no object more specific than the current needs of the Government, no attempt is made to find one. The Treasury is shown as it stands, not as it would stand in the event of a variety of contingencies, all dependent upon time.

The method by which the state of the Treasury is daily ascertained is illustrated in the appendix, where the condition of each office and the composition of the funds held by the mint on June 30, 1891, are given as reported to the Treasurer. The figures for the ten offices of the Treasury proper are first aggregated, as well as those for the eleven offices of the mint, those for the depositary banks, and those for moneys in transit. The four results are then combined, which brings out the aggregate assets and the liabilities on the agency and general accounts. To put this statement in the form in which it is published monthly the liabilities on general account, which arise from outstanding certificates and Treasury notes of 1890, are set out separately, leaving a remainder which is called the balance, and which in fact represents the liabilities arising from revenues collected and not yet expended. For convenience of comparison the statement for June 30, 1890, in the appendix, is made up as if the fund for the retirement of national-bank notes, which by the act of July 14, 1890, was transferred to the debt statement, had already been covered into the Treasury.

already been covered into the Treasury.

By a direction in the act of March 3, 1891, making deficiency appropriations, the sum of \$10,000, heretofore reported as unavailable in the office of the assistant treasurer in San Francisco, representing losses incurred in his office without default or negligence on his part, has been credited in the account of the Treasurer, and the item has disappeared from the list of unavailable funds. This is the only change that has occurred in these somewhat unsubstantial assets of the Treasury, an itemized statement of which is given, as usual, in the appendix. Including the deposits with certain States, they amount, at present, to \$29,507,078.82 for the Treasury itself, and \$37,277.06 for the Post-Office Department.

THE PUBLIC DEBT.

Although the Treasurer is not charged with the management of the debt of the United States, he receives the proceeds of any loans that may be made, and pays the interest as it falls due, as well as the principal when it matures. This part of his duties requires much of his attention and employs the labors of an important division of his office. Besides, the debt stands in such intimate relations, not only to the Treasury, but to the money circulation of the country as well, that no satisfactory presentation of the condition of either can be made if the

debt be left out of view. For these reasons a brief notice of the public loans and of the changes made in them during the fiscal year will be

given.

Incidentally to the transfer of the fund for the retirement of surrendered national bank circulation from the Treasurer's agency account, where it had been secured by a full deposit of lawful money, to the general Treasury, and the adoption of the outstanding notes as part of the debt of the United States, the debt statement was recast and much simplified. By a later revision, in June, 1891, its scope was still more clearly defined and its contents still more succinctly set forth. In its present shape it presents few of the difficulties which before must have been encountered in the attempt to explain the condition of the debt and the relations of the Treasury thereto.

The outstanding principal of the various loans, classed according to the character of their securities, on June 30, 1890, and June 30, 1891, was as given below, the bank-note redemption fund being included

under both dates:

Class.	June 30, 1890.	June 30, 1891.
Interest-bearing loans Matured leans Old demand notes United States notes Fractional currency, estimated National bank notes Certificates of deposit Treasury notes of 1890	56, 032, 50 346, 681, 016, 00 6, 911, 510, 97 55, 619, 359, 75 471, 492, 730, 00	\$610, 529, 120. 00 1, 614, 705. 26 55, 647. 50 346, 681, 016. 00 6, 907, 679. 60 40, 018, 392. 25 489, 961, 614. 00 50, 228, 417. 00
Total	1, 593, 889, 564. 48	1, 545, 996, 591. 61

With respect to the conditions and means of payment, the interest-bearing loans were payable at future dates; the matured loans, the old demand notes, the fractional currency, and the national-bank notes were payable on demand, out of any moneys in the Treasury, for retirement without reissue; the United States notes and Treasury notes were redeemable in coin, but when redeemed or received in the revenues the reissue of like amounts was compulsory; and the certificates of deposit were payable out of coin and legal-tender notes reserved for that purpose. Classified according to these conditions, the amounts outstanding at the two dates were as follows:

Condition of payment.	June 30, 1890.	June 30, 1891.	
At future dates. On demand, without reissue. On demand, for reissue. On demand, out of deposits.	. 64, 402, 708. 48 346, 681, 016. 00	\$610, 529, 120, 00 48, 596, 424, 61 396, 909, 433, 00 489, 961, 614, 00	
Total	. 1,593,889,564.48	1, 545, 996, 591. 61	

The total reduction resulting from the operations of the year in the principal of the bonded debt and the circulating notes redeemable without reissue was \$116,590,273.89, effected at a cost, including premiums, of \$126,991,494.48. The amounts retired from each loan, including the redemptions of bank notes in excess of fresh deposits of lawful money, together with the premium paid on bonds purchased and the total cost, are shown in the table below. Full details of the issue and redemption

of circulating notes and certificates of deposit will be found in the appendix.

Loan.	Principal.	Premium.	Total cost.	
4g per cent bonds 4 per cent bonds Refunding certificates Matured debt. Old demand notes Fractional currency National-bank notes	42, 627, 500. 00 9, 940. 00 201, 100. 00 385. 00	\$70, 081. 62 10, 331, 138. 99	385.00	
Total	116, 590, 273. 87	10, 401, 220. 61	126, 991, 494. 48	

Means for this expenditure were found in the \$37,239,762.57 of surplus revenues for the year, together with \$89,751,731.91 of the reserve in the Treasury. The consequent reduction in the annual interest charge was \$4,322,092.35. A considerable part of these disbursements were made at a time when the financial situation of the country was highly critical and the need of such relief was very urgent. At the same time, during the months of September and October, 1890, as a further means of relieving the monetary stringency, there were paid out of the Treasury, chiefly at the offices in Washington and New York, under the circular of the Department dated September 6, the following amounts for interest due from January 1 to July 1, 1891:

	Bonds.	Amount.
4 per cent bonds Pacific railway 6 per ce	nt bonds	 \$8, 970, 516. 50 3, 060, 100. 80
Total	•	 12,000,617.30

THE CURRENCY.

According to the revised estimates of the Department and the showing of the accounts of the several offices of the Treasury and mint, the stock of money in the country on June 30, 1890 and 1891, including gold, silver, and currency certificates, but omitting the small outstanding remnants of the old issues of the Government and the State banks, was composed as follows:

Kind.	June 30, 1890.	June 30, 1891.
Gold coin and bullion Silver dollars and bullion Fractional silver coin	380, 051, 916 76, 825, 305	\$646 582, 852 438 943, 643 77 848, 700
Total coin and bullion	1, 152, 440, 250	1, 163 375, 19
United States notes Treasury notes of 1890 National bank notes	346, 681, 016	346, 681, 016 50, 228, 417
National-bank notes Gold certificates Silver certificates Currency certificates	301, 539, 751	167, 577, 214 152, 486, 429 314, 715, 185 23, 780, 000
Total paper currency	1, 003, 922, 336	1, 055, 468, 261
Aggregate	2, 156, 362, 586	2, 218, 843, 450

These figures, so far as they relate to the metals, represent their subject strictly as it is defined, and nothing more. They do not pretend to be an estimate of the total metallic stock, but only of the monetary. stock. The distinction is at once explained and established by considerations which will appear later on.

As between the Treasury and the circulation, the total cash holdings of the various offices, but not the deposits in banks, being included under the former head, and the remainder of the estimated stock under the latter, the distribution of the several kinds of money on the two days is shown below:

Kind.	In Tre	easury.	In circulation.		
Nillu.	1890.	1891.	1890.	1891.	
Gold Silver dollars and bullion Fractional silver coin	\$320, 933, 145 323, 833, 885 22, 792, 718	\$239, 132, 229 380, 117, 464 19, 629, 480	\$374, 629, 884 56, 218, 031 54, 032, 587	\$407, 450, 623 58, 826, 179 58, 219, 220

Since the certificates of deposits are mere titles to the ownership of money in the Treasury, and since those in the Treasury itself, whether acquired by redemption and awaiting destruction, or freshly printed and held in readiness for issue, are mere vouchers for use in the settlement of an account, the virtual condition of the currency, as well as that of the Treasury and the circulation, can best be shown by substituting in the place of certificates their value in the kind of money they represent. The notes of 1890 have some peculiarities of their own, which will be considered under another head. By making the substitution for the certificates and treating all the silver and notes for the present as one item, the following result is brought-out:

Kind.	Outstanding.	In Treasury.	In circulation.
June 30, 1890: Gold	\$695, 563, 029 989, 306, 827	\$190, 102, 286 65, 428, 241	\$505, 460, 743 923, 878, 586
Total	1, 684, 869, 856	o255, 530, 527	1, 429, 339, 329
June 30, 1891: Gold	646, 582, 852 1, 031, 050, 573	119, 069, 160 61, 342, 859	527, 513, 692 969, 707, 714
Total	1, 677, 633, 425	180, 412, 019	1, 497, 221, 406

The statement published by the Secretary of the Treasury under date of July 1, 1891, places the amount of money in circulation on that day at \$1,500,067,555, or \$2,846,149 more than is given above. This difference, although it appears to be one of fact, is really one of time. The Secretary's statement was prepared on the day of its date, from data then at hand, some of which, coming from distant subtreasuries, were

from one or two days to a week old. It happened that in the intervals there were heavy receipts at these offices from the revenues, while a large sum was in transit from depositary banks. These changes in the Treasury are fully explained in the appendix, and the apparent difference in the amount of money in circulation is a direct consequence from them.

It appears from the above figures that during the year there was a net loss of forty-nine millions of gold, with a net gain of nearly forty-two millions of other money, and a consequent net contraction of about seven millions in the whole volume. The details of the movements which together produced this result, as well as those for each year since 1878, may be gathered from the tables in the appendix, which show the composition and distribution of the stock of money, together with the imports and exports of gold, at intervals of a month.

Collated from that source, the figures showing the movements of gold, and the resulting changes in the amount of the general stock of that metal, for each month of the last fiscal year, are as follows:

Month.	Imports.	Exports.	Net pro- duction.	Net consumption.	Net gain.	Net loss.
1890. July August September October	2, 635, 583	\$11, 860, 029 2, 135, 821 281, 627 425, 235	\$6, 752, 965 2, 608, 882	\$1,966,456 368,809	\$3, 752, 887 1, 841, 539	\$3, 912, 010 2, 377, 712

Net for year		68, 117, 110	19, 136, 933			48, 980, 177

The table perhaps requires no comment, unless it should be a word in explanation of the columns of net production and consumption. are filled in by adding the imports to the stock of the previous month, subtracting the exports from the sum, and comparing the remainder with the estimated stock at the end of the month. If the remainder is less than the estimated stock, the difference is set down as the net production; if less, as the net consumption for the month. It may be remarked, too, that the figures for the stock are those furnished by the Director of the Mint, and published monthly by the Department, with the exception of those for June in each year, which are taken from the revised estimate published in the Director's annual report. ular monthly estimates are unavoidably made from imperfect data, they must be taken as provisional or approximate merely; and necessarily whatever inaccuracies they may contain are reproduced in the figures. which here are derived from them. The estimates for the end of each fiscal year, however, may be relied upon as the best that can be obtained. It is assumed, therefore, that the figures above given for the net production of the year are correct, and that the errors, if any, in the column of monthly production are offset by those in the column of monthly consumption.

Such heavy exports of gold as signalized the last six months of the year, the heaviest by far that have been recorded in the history of the country, naturally excited profound interest, not only at home, but throughout the whole world. To the Treasury this outflow was particularly significant, since the Treasury was obliged to furnish all the material. It is well understood, indeed, and it will appear in other parts of the present report, that this gold was drawn almost altogether from the sub-treasury in New York, in exchange for other kinds of money. It is important to know, and the inquiry may throw some light upon the monetary situation, what those other kinds of money were. The records do not appear to have been kept in such a manner as to show directly, and in the lack of better data the daily report of receipts and disbursements rendered to this office have been resorted to. During the period in question the assistant treasurer paid out gold coin for gold certificates directly, for gold certificates and other kinds of money upon what is called his exchange account, and in small sums on disbursing officers' checks. It has been possible, therefore, to compile two tables, which will be found in the appendix, the one showing all the operations involving the paying out of gold for other kinds of money, and the other all the rest of the operations of whatever nature. Summarized for the six months ending with June, the first of these shows the following result:

Kind of money.	Receipts.	Disburse- ments.	Gain.	Loss.
Gold coin Standard silver dollars Fractional silver coin United States notes Treasury notes of 1890 National-bank notes Gold certificates Silver certificates	20, 446 121 11, 267, 965 7, 537, 245 312, 045 85, 792, 677	884, 636	4,320,578 312,045 61,317,387	
Total	130, 977, 956	130, 977, 956	82, 922, 610	82, 922, 610

While some gold was gained from other sources, and considerable sums in exchange for other currency, it is here seen that the operations by which the metal was drawn from the subtreasury resulted in a loss exceeding the actual exports, and exceeding by \$17,000,000 the receipts

of gold certificates.

These movements were the result, apparently, of the operation of natural laws. No statute requires the importation, exportation, mining, or industrial employment of a single dollar's worth of gold. Whatever expenditure of time, labor, and substance the cost may have been was made at private risk, presumably for private profit. The motives of the miner and the goldsmith are plain; the circumstances which give the opportunity to either are equally so. The exporter of gold is not less the simple man of business. Before an ounce of gold is put aboard ship his profit is certain or reasonably sure. In the exercise of a legitimate calling, performing, in fact, a necessary and useful service for the commercial world, he is not to blame that his clients have been willing to pay him his premiums, or that his operations in the short space of six months have drained the country of the tenth part of its entire stock of gold. This result, even, is differently viewed by different interests. Nevertheless, the condition of things which has made it possible, whether due to domestic or foreign causes, to financial legislation or the state of trade, whether viewed as unusual and alarming or as ordinary and of no significance, would seem to be worthy of the most careful study. No attempt is here made to throw any light on the subject further than to state the facts and to advance a few points, which, though lying on the surface, are often overlooked.

Concurrently with the operations in gold there went on a set of others, which affected the remainder of the currency to nearly as great an extent. These, however, were induced by causes entirely different and perfectly plain. They consisted in the purchase and coinage of silver, conducted, of course, by the Government in compliance with law, and the contraction of the national-bank circulation, induced, in the main, by the retirement of the bonded debt. The former produced an increase of fifty-eight millions in the stock of silver, and the latter a diminution of eighteen millions in the stock of bank notes. The changes from month to month in the stock of silver dollars and bullion, of fractional silver coin, and national-bank notes, are shown in the following table:

	Incre	ase.	Decrease.			
Month.	Silver dollars and bullion.	Fractional silver.	Fractional silver.	National- bank notes.	Net increase.	
1890.						
July August September October November December	4, 025, 887 4, 702, 322 5, 870, 501 5, 244, 104	\$188, 891 68, 410 317, 513 146, 485	\$207,051	\$1, 494, 722 1, 119, 115 1, 531, 838 1, 992, 482 1, 281, 422 1, 240, 840	\$1, 631, 382 3, 095, 663 3, 238, 894 4, 195, 532 4, 109, 167 4, 111, 525	
1891. January. February March April May June	4, 428, 553 6, 203, 173 4, 406, 051 4, 163, 508 5, 343, 051	1, 463 41, 793		1, 784, 622 1, 880, 525 1, 887, 960 1, 307, 418 1, 376, 807 1, 273, 625	2, 836, 399 2, 549, 491 4, 357, 006 3, 295, 450 2, 766, 896 4, 001, 018	

In order to present a concise view of the changes in the whole money stock the results of the two foregoing tables are combined below:

Month.	Gain of gold.	Loss of gold.	Increase of silver and notes.	Increase of stock.	Decrease of stock.

In the appendix will be found tables, occupying a number of pages, in which, for the first time in a public document, the attempt is made to give a connected view of the amount, composition, and general distribution of the money of the country over any extended period of time. They are in the main a further elaboration of matter first presented in the report for 1890, with a considerable enlargement of scope and the introduction of much new material. So full are they that perhaps there is no fact obtainable from the records, not such a mere matter of detail as to possess no statistical interest, relating to their subject and to the

time they cover, from June 30, 1878, to September 30, 1891, that can not be gathered from them. The figures for the Treasury holdings are taken uniformly from the Treasurer's monthly statements of assets and liabilities, while those for the stock of gold and silver are taken, with the

exception mentioned below, from the official estimates.

The chief difficulty encountered in the preparation of these tables arose from the insufficiency of data relating to the coin circulation. The records of the coinage and movement of silver dollars are very complete, but the estimates of the stock of gold and of fractional silver coin, down to 1887, had been made at intervals of a year, whereas, for these tables, they were wanted by months. To fill the vacant places a method was adopted which may be briefly explained. By adding to the stock at the beginning of any year the imports for that year, subtracting the exports from the sum, and subtracting this remainder from the estimated stock at the beginning of the next year, a result was obtained which represents the year's domestic production in excess of the use in the arts. This quantity was then divided into twelve equal parts and one part was added to the stock obtained for each month as the result of importations and exportations. While the method is indirect and the result provisional, the only possibility of error is in the distribution of the year's domestic production and consumption. nature of the case the approximation to the fact must be close, perhaps close enough for all purposes. With the help of this expedient it became possible to develop the entire scheme of the currency and circulation, by no means simple or easy to understand. The result is submitted with regret that it has been necessary to occupy so much space.

THE CIRCULATION.

The monetary history of the past fiscal year is unusually interesting, and not less so from the character than the magnitude of the movements recorded. Promptly with the beginning of July the autumnal expansion of the circulation set in, drawing material not only from the Treasury reserves and foreign gold, the accustomed sources of supply, but also, a little later on, in greatly increased quantities, from the Government purchases of silver. The month of September witnessed the unparalleled event of the addition of nearly \$62,000,000 to the money in the hands or control of the people. All of this, with the exception of a million of gold imported from other countries, was paid out of the Treasury. During the remainder of the season, to the end of December, there occurred a still further expansion of thirty millions of dollars, of which twenty-two millions came from the Treasury and eight millions in gold from abroad. Altogether, between the 1st of July and the 1st of January, the circulation was increased by the addition of almost exactly a hundred million dollars, consisting of fifty millions in gold and gold certificates, twenty-seven millions in silver and silver certificates, together with twenty-three millions in notes. To effect this result the Treasury paid out seventy one millions of dollars on balance and twenty-eight millions in purchases of silver, while the gold mines produced ten millions in excess of the quantity used in the arts, making in all an increase of a hundred and nine millions; but as against this a net million in gold was lost to foreign countries and eight millions in national-bank notes were retired.

While a movement of this kind has occurred annually, since the resumption of specie payments, with the single exception of the year 1885, it never before attained such proportions, or even approached them, since the period of rapid and continuous expansion which followed resumption. The general causes of this annual movement, as well as

the special conditions which influenced it during the past year, are well understood, and need not be mentioned here.

In January there began a reverse current, though not exactly in a reverse direction. The people who had demanded this hundred millions of ready cash had made their use of it, and collectively were ready to part with a considerable portion of it. But the Treasury, which had found the means of paying it out, was not in a position to call it back. Money began to find its way into the great commercial centers, foreign exchange began to rise, and gold bars began to be taken from the Treasury for shipment abroad. The new safeguards thrown about the gold reserve of the Treasury at the last session of Congress were resorted to and doubtless produced their effect, though it would be difficult to estimate the value of the protection they afforded. By the end of June the exports of gold had reached the unexampled figures of \$70,000,000 for the six months, and \$86,000,000 for the year. Opinions, agreeing in the main with respect to the causes of the expansion of the first half of the year, differ widely as to the causes of this rapid contraction in the last half. The facts alone can be discussed in this report.

Concurrently with this outflow of gold the Treasury poured into the circulation eight and a half millions on balance, and about thirty millions through the operations in silver, while nine and a half millions of gold were extracted from the mines in excess of the industrial consumption, and three millions of the same metal were imported, making in all a gain of fifty-one millions. On the other hand, there must be added to the contraction of seventy millions resulting from exports of gold another of nearly ten millions caused by the retirement of national bank notes, making eighty millions in all, and exceeding the realizations from the sources of supply by twenty-nine millions. In fact, the circulation declined in the six months from \$1,528,736,268 to \$1,499,618,800.

It will of course be understood that these particular gains and losses of monetary material, while they directly affected the circulation in volume, did not in like manner alter it in composition. The value of the gold exported came through the banks out of the pockets of the people, but the metal itself was drawn in great part from the Treasury. Other operations, too, had their usual influence. The actual changes of the six months in the composition of the circulation consisted in a loss of twenty-six millions in gold and gold certificates, together with one of eleven millions in silver and silver certificates, and a net gain of eight millions in notes. The net changes in the volume of the circulation in the first and last six months and the whole twelve months of each of the past thirteen fiscal years, as well as the net average change in each period for the whole time, are shown, in round numbers, in the following table:

T71'	First six	months.	Last six	Last six months.		nonths.
Fiscal year.	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.
879					\$17,000,000	
1880			35, 700, 000		154, 500, 000 141, 300, 000	
1882 1883	58, 700, 000				59, 400, 000 57, 300, 000	
1884	26, 800, 000 49, 100, 000			20, 600, 000 1, 100, 000	6, 200, 000 48, 000, 000	
1886 1887		\$2,400,000	2,700,000	38, 800, 000	68, 100, 000	\$41, 200, 00
1888 1889	66, 700, 000 34, 100, 000			11,700,000 25,800,000	55, 000, 000 8, 300, 000	
1890 1891	49, 900, 000 99, 700, 000			1,300,000 29,100,000	48, 600, 000 70, 600, 000	
Net average	58, 200, 000			4, 900, 000	53, 300, 000	

During the period covered by the fiscal years 1879, 1880, and 1881, in the first six months of which the paper currency passed for the first time at the par of its face value, the circulation was increased by the enormous amount of \$312,000,000, of which all but a hundred million was in the form of foreign and domestic gold. No such transition has been passed through since, nor have any such rapid changes occurred in the Within that period the amount of money in the hands of the people increased from season to season and from year to year; but since then, with the single exception already noted, a greater or smaller growth from January to July has been followed by a contraction of less volume and narrower variations from July to January. It seems proper, therefore, in computing an average for comparison with the results of a single year, to take only the data for the ten years since 1881, a period in which it is true there have been some changes of legislation, and some other important occurrences both at home and abroad, but a period nevertheless in which substantially the same conditions have prevailed as now exist. For the past ten years, then, it is found that from the end of June to the end of December the circulation has been increased on the average by \$52,200,000, and from the end of December to the end of June it has been diminished on the average by \$14,200,000, leaving an average net gain of \$38,000,000 for the whole twelvemonth. The increase actually realized in the past year has, therefore, been nearly double the average, and in the past two years has exceeded the average by \$43,000,000. The bearing of these facts upon possible future changes in the currency may be worthy of serious consideration in the present situation of the monetary affairs of the country.

The plan of receiving money at the subtreasuries and forwarding new notes, which during the autumn months are wanted in small denominations, from Washington to any place that may be designated, has been found to work well as an aid in moving the crops, and has been in satisfactory operation during the season now about to close. Congress at the last session made provisions, which were promptly carried out, for largely increasing the facilities of the printing bureau, and the personal attention of the Secretary, who early in the summer gave directions that every resource of the Department should be employed in the work of supplying currency, has produced a result which has been not less beneficial to the country than gratifying to the officials of the Treasury. Under his supervision an ample stock of notes, in denominations of from \$1 to \$20, was ready when the time came, a thing that had not happened before in some years. North, South, and West have been freely supplied with whatever kind of currency was wanted, at inconsiderable expense to the consignors, while the Treasury has suffered from none of the embarrassments which it so often labored under before, as the consequence of inadquate foresight and provision.

Between July 1st and November 13th the Department sent out in all directions \$49,272,278 in these small notes, chiefly for deposits in the subtreasury in New York. During the month of September alone these deposits amounted to upwards of \$21,000,000, or more than the aggregate for the months of July, August, and September, 1890, and they were followed by \$13,000,000 more in October. The magnitude of these operations can be appreciated by comparing them with the like transactions in the twelve months of the past fiscal year, which reached a total of only \$61,000,000. With the aid thus rendered to the commercial community the handling of the enormous crops of the year has required little effort and produced no strain, while money has never been easier or more plentiful.

It was pointed out in the last report that the policy, which has been persisted in for the past eight years, of making no provision for the free transportation of United States paper currency to Washington for redemption, imposes double work upon the Department, without effecting any considerable saving of expense. So long as the Government paid the express charges on worn-out notes and certificates they were sent in to the Treasury by bankers from nearly every part of the country for other kinds of money or for checks on the assistant treasurers. In this way the paper circulation was kept in good condition, the people had no difficulty in obtaining the kinds and denominations of money they wished, and the work of redemption was carried on at Washing-

ton, where the machinery for it has been erected.

But when the appropriations were stopped, in 1883, and the banks were required to bear the transportation charges on the worn United States currency they sent to Washington, they chose rather to pay it out in their business, if it was at all fit for use, or to send it to their nearest correspondent. The notes thus find their way to the large cities, and next into the subtreasuries, either in the public revenues or for redemption in lawful money. After having been counted and assorted there, they are put up in parcels and sent to the Treasury, of course at the Government's expense. Here they are again counted, in the same manner as if they had been received directly from the interior bank, and they are ultimately paid for, in seasons when the receipts are not largely in excess of the disbursements, by shipments of new money to supply the subtreasuries, likewise at the expense of the Treasury. Only a small proportion of the notes redeemed each year are received directly from private holders, and only a like proportion of the cost of transportation is saved to the Government. At the same time the labor of primary redemption is practically transferred to the subtreasuries, and the Treasury acts merely in review of their work.

A return to the former practice would seem to be prudent, if, indeed, it did not prove, on trial, to be advantageous in several ways. An effect that would probably result from it would be the more rapid retirement of the older issues, of which the remnants still extant are

worn by the service of many years.

TREASURY NOTES OF 1890.

On August 19, 1890, there were paid out the first of the Treasury notes authorized by the act of July 14, of the same year, to be issued in the purchase of silver bullion. By the end of the fiscal year the issues had reached \$50,228,417, and on the 30th of September last there were \$64,251,130 of the notes outstanding, of the denominations of \$1, \$2, \$5, \$10, \$20, \$100, and \$1,000.

These notes seem destined to assume a prominent and peculiar place in the financial history of the future. They possess properties and qualities which are nowhere to be found in any other description of currency. The operations of which their issue forms a part are the most important of the kind, in character and magnitude, now going on

anywhere in the world.

The exact status of the notes has yet to be settled, and the precise duties they are to perform in the circulation have yet to be determined. The law which creates them presents several difficulties of construction. In constitution they much resemble the older legal-tender notes, while in mode of issue they are more like silver certificates. As the United States notes, after many years of discussion, are generally recognized

to be a loan secured by a reserve of a hundred millions of gold, so the new notes will doubtless, in time, be regarded as a similar loan, secured by a full deposit of silver dollars and bullion. For the time being, at least, they are so treated by the Department, as will be seen by the following table, which shows the amount of bullion and coin held against them at the end of each month, the amount of notes issued, and their distribution as between the Treasury and the circulation:

Month.	In Treasury.		Notes issued.	Notes in Treasury.	Notes in cir- culation.
1890. January February March April May June July August September	14, 974, 799, 35 16, 854, 727, 89 20, 211, 513, 63 22, 142, 943, 74 23, 759, 783, 00 26, 880, 847, 95 32, 544, 670, 26 37, 998, 577, 01 41, 579, 253, 44	13, 829, 201 16, 295, 973 16, 881, 687 19, 588, 257 21, 917, 614 23, 347, 570 22, 449, 365 22, 587, 458 22, 671, 877	28, 804, 000 33, 150, 700 37, 093, 200 41, 731, 200 45, 677, 347 50, 228, 417 54, 994, 035 59, 686, 035 64, 251, 130	3, 702, 294 4, 279, 421 3, 177, 227 4, 710, 946 7, 565, 067 9, 765, 252 11, 309, 957 13, 937, 685 7, 045, 902	25, 101, 700 28, 871, 279 33, 915, 97 37, 020, 255 38, 112, 280 40, 463, 169 43, 684, 079 45, 748, 350 57, 205, 226

As the new notes appear to fall within the provisions of the act of June 8, 1872, they are received on deposit for currency certificates. This has added a new intricacy to the monetary system and a new class to the assets of the Treasury. Let a million dollars' worth of silver be purchased with a million dollars' worth of notes, and let the notes be deposited for certificates, and there appears on the face of things to have been a sudden expansion of the currency by \$3,000,000. certificates be returned in the revenues, and the Treasury has increased its cash holdings by the same amount, while the real effect of the whole operation has been that the Treasury has received a million of revenue in silver bullion at the market price, and has assumed the obligation to reissue, in its expenditures, a million of its promissory notes for redemption in silver or gold at its own option. The virtual increase of the money stock has, of course, been only a million dollars, in the shape of uncoined silver valued at the current price of that metal in the markets of the world.

In compiling the statistics relating to the currency, and more particularly in attempting to make plain the complicated relations existing between the Treasury, the monetary stock, and the circulation, it has been found convenient, if indeed it be not necessary, to treat the increase of money resulting from the operations of the law of 1890 as consisting of silver alone. On the other hand, since the notes, whether in the hands of the citizen or in the tills of the Treasury, are the evidences of the obligation to pay, not in silver alone, but in gold or silver, the increase of the circulation itself, as well as that of the assets of the Treasury, so far as it is due to the presence of the new paper, is treated There is thus presented the paradox of a growth as one of notes alone. of the stock of silver without change in the stock of notes, and a growth of the circulation of notes without change in the circulation of silver. Upon a little reflection, however, it will doubtless be recognized that this, paradoxical as it may appear, is the simplest view that can be taken of what is actually going on. In this view, at least, has the matter been considered in the present report, the first of the series in which the subject has been mentioned; and it has been found possible to marshal the statistics of the currency on these lines, in such manner as to exhibit the composition of the whole stock, and its distribution between the Treasury and the people, in the simplest form, without conflict or controlled to a controlled to the statistics.

flict or contradiction, save on this point alone.

An enormous responsibility is imposed by this law of 1890 upon the Treasury and mint. Fifty four million troy ounces are 3,702,857 avoir-dupois pounds, or upwards of 1,851 tons. Nearly two thousand cart loads of silver must be stowed away each year in the Government's vaults. The annual collection of such a vast quantity of treasure, which, though widely distributed, must necessarily accumulate in heavy masses, will ultimately, if continued for any great length of time, raise questions not merely of safe-keeping, but even of national defense.

THE COINAGE.

More liberal appropriations by Congress have made it possible to effect a measurable improvement in the condition of the coinage, particularly the silver, and at the same time to relieve the Treasury of a large part of the superfluous subsidiary coins which it has had to carry for a number of years. During the fiscal year the following amounts of gold, silver, and minor coins were transferred from the Treasury offices to the mint to be recoined, or, in the case of the last, to be cleaned where recoinage was unnecessary:

Kind.	Amount.	Kind.	Amount.
Gold Standard silver dollars 50-cent pieces 25-cent pieces 20-cent pieces 10-cent pieces	10, 800. 00 419, 140. 50 355, 559. 50 1, 807. 20	5-cent pieces 3-cent pieces Minor coins. Total	839.09

A loss of \$148.45 was sustained in melting the gold, and one of \$48,366.28 in melting the silver, which were made good to the Treasurer out of the appropriations for recoinage. In the case of the gold the loss was a little less than one-half of 1 per cent, while in that of the silver it was upwards of 5 per cent.

The kind and amount of uncurrent coin held in the several offices of the Treasury on June 30 last, as compared with the total for the same

date in 1890, are shown in the following table:

Office.	Gold coin.	Standard silver dol- lars.	Fractional silver coin.	Total.
Washington Baltimore New York Philadelphia. Boston	740, 000. 00 573, 676. 00	\$400.00 31,000.00	\$15, 056. 80 1, 000. 00 63, 000. 00 45, 430. 00 400. 00	\$19, 138. 20 1, 400. 00 803, 000. 00 76, 430. 00 574, 076. 00
Cincinnati Chicago St. Louis New Orleans. San Francisco	56, 000. 00		2, 350. 00 180, 339. 10	56, 000. 00 2, 350. 00 183, 984. 10
Total, 1891	1, 376, 712. 40 939, 768. 35	32, 090. 00 4, 624. 00	307, 575. 90 818, 017, 58	1,716,378.30 , 1,762,409.93

While these figures would appear to show that the improvement in the condition of the silver coinage was offset by the degradation in that of the gold, it is not so, for the reason that, as seen above, the cost of restoration to full weight, in the case of gold, is not the tenth part of what it is in the case of silver.

As the result of this expenditure for recoinage and of some special efforts in other directions the amount of fractional silver coin in the Treasury was reduced from \$20,563,708.87 to \$16,846,619.77 in the twelve months ending the 30th of last September. The relief thus afforded to the Treasury vaults may perhaps best be appreciated by

considering that the weight of the metal thus parted with, it is hoped permanently, is upward of 200,000 pounds avoirdupois.

been adhered to without interruption since.

Many of the inquiries for fractional silver specify new coins, and much of the difficulty in the way of enlarging the popular use of this kind of money is found in the objection which most bankers appear to have against all coins showing any signs of wear. But for this prejudice, which, perhaps is not confined to banking circles, and which in the case of silver is altogether groundless, it is believed that the present stock of subsidiary silver would long ago have been absorbed into the circulation.

While the laws relating to the gold coinage provide that worn or abraded pieces shall be received by the Treasury only when the reduction in weight is not more than one-half of 1 per cent below the standard after a circulation of twenty years, and at a ratable proportion for any period less than twenty years, there are absolutely no restrictions whatever upon the receipt of any of the silver coins, no matter how much reduced in weight, if the reduction be the effect of natural abrasion, and not of willful mutilation. This distinction between the coins of the two metals was first made in the coinage act of 1873, and has

Such differences of practice are always more or less confusing, and this one has caused much popular misunderstanding. However, it is not only based on good grounds, but is almost necessary. The gold coins are manufactured at the mint out of bullion brought by a private citizen, who receives back weight for weight and value for value, without charge for the work done. To all intents and purposes the gold remained throughout the operation what it was at first, the private property of the owner. The benefits of the manufacture into coin were all on the side of the citizen; the cost was all borne by the Government. When in the course of business a coin of such origin is offered to the Treasury in a worn or mutilated condition and of less intrinsic value than the standard fixed by law for the money of the country, it is clearly proper that the Government should prescribe a reasonable limit of loss as the utmost it is willing to assume. Since gold is the monetary standard, the value of the dollar of account is the same as that of the legal-If the weight of that piece is allowed to be reduced by wear, the value of the dollar of account depreciates in like proportion. Hence it is highly important that gold coins seriously reduced in weight should not possess the full legal-tender quality, and the law provides that any such coins in the Treasury, when the reduction amounts to more than one half of 1 per cent of the standard weight, shall be recoined.

But with the silver coinage the case is entirely different. This, from the dollar down to the dime, is manufactured, not from metal brought to the mint by the producer, and for his benefit, but from bullion pur-

chased by the Government in the market, and at a large profit. which gives value to the gold dollar, and at the same time to the dollar of account, is weight of metal, to be determined by a scale; that which gives value to the silver dollar, and makes it equal to the dollar of account, is the fiat of the Government, expressed by a stamp. will wear away, and the value with it; but the fiat is unchangeable, and stands so long as the stamp can be recognized. Hence it is that while the Government can not afford to receive gold coins which have been reduced in weight to the extent of one-half of 1 per cent, and it is necessary to the maintenance of the standard of value that this regulation should be rigidly observed, no silver piece is ever weighed at the Treasury to determine whether it shall be received, and none can be rejected for lightness of weight, no matter how great the deficiency, if the loss be apparently due to natural abrasion. A perfectly new silver coin may be handsomer than an old, worn one, and more desirable in the eyes of some people, but it is no better money. some respects, indeed, the advantage is with the latter. The counterfeiter takes as his model the perfect or nearly perfect piece. The smooth half dollar, quartér, or dime, with its shining surface and faint outlines of devices, is pretty certain to be genuine; but the rough, unworn one, with its soiled and discolored indentations, or even the clean, new one, may be spurious.

These remarks have been ventured upon, not to apologize for the condition of the silver circulation, nor to criticise the public taste in such matters, but with the single object of removing a widespread misapprehension, which has worked to the disadvantage of the Treasury. There can, of course, be no excuse for allowing any part of the coinage to fall into neglect, and no reason why Congress should fail to make proper provisions for keeping all of it in good condition. If Congress does not see fit to do this by making a permanent annual appropriation of as much as may be necessary, another special appropriation of not less than \$150,000 is earnestly recommended.

No extensive investigation of the condition of the gold coinage has been made, but when the exports set in last spring a bag of each of the

three larger denominations, taken haphazard out of the vaults of the New York subtreasury, was weighed, with the following results, stated

in grains:

Denomination.	Standard weight.			Tolerated reduction.
Double eagles. Eagles Half eagles	129,000	128, 952 128, 880 128, 808	48 120 192	645 645 645

In the lack of better statistics these figures may be taken as indicating the condition of this part of the circulation, which is seen to be well up to the standard.

SPURIOUS AND FRAUDULENT ISSUES.

The following table shows the amount of the several kinds of spurious silver coin and paper currency rejected and canceled during the fiscal year at the several offices of the Treasury, all counterfeits of the

genuine, with the exception of \$280 in bank notes, which had been stolen while yet unsigned and fraudulently put in circulation:

Denomination.	Silver coin.	United States notes.	Silver certifi- cates.	National- bank notes.	Fractional currency.	Total.
Twenty-five cents Fifty cents One dollar Two dollars Five dollars Ten dollars Ten dollars Ten dollars One hundred dollars	275. 00 1, 536. 00	\$11 60 220 810 560 1,100			\$11.00° 225.50	\$146.75 500.50 1,568.00 238.00 1,020.00 1,880.00 1,480.00 1,150.00 900.00
Total	1,946.75	3, 061	429	3, 210	236. 50	8, 883. 25

In the aggregate there was a considerable decrease from the year before, showing presumably a corresponding improvement in the condition of the currency in this respect. Since the date of the last report there have been seen at this office two examples of a new counterfeit of the ten-dollar United States note bearing the vignette of Webster; four of the five-dollar note of the Quincy National Bank, of Quincy, Ill.; and one of the five-dollar note of the First National Bank, of Bay City, Mich., all photographic. Under date of August 6, 1891, the Kinsman National Bank, of Kinsman, Ohio, informed the Treasurer that \$500 of its notes, of the denominations of \$10 and \$20, bearing Treasury numbers 577058 to 577067 and bank numbers 520 to 529, signed by the president but not by the cashier, had been stolen from its vault by burglars. Under the regulations of the Department these notes will not be redeemed at this office. None of them have yet been seen, and it is not known whether they have been put in circulation or not.

There has been redeemed out of the appropriation of \$2,500 made by the act of September 30, 1890, the aggregate sum of \$1,350 of the notes of the Third National Bank, of New York; the First National Bank, of Jersey City; and the National City Bank, of Lynn, which were stolen, between the years 1864 and 1868, from the office of the Comptroller of the Currency. The estimate for the appropriation was prepared in this office from the records of former rejections, and provided for all of the notes certainly known to have been in circulation and not redeemed out of a former appropriation, with a small margin of excess. Since the appropriation became available a sum in notes never before seen at this office has been redeemed, which, together with the remainder of the notes estimated for, would exceed the amount authorized to be used; but as the fact that the notes had become payable was widely announced in the newspapers, and as none of them have been presented since February 4, it is presumable that not many more of them are in existence. Out of a block of forty-two consecutive numbers of the hundred-dollar notes not one has ever been seen, and it has always been understood that these, with a large part of the others, were destroyed by the thief to avoid detection.

Although the appropriation will doubtless be ample to provide for the retirement of the last of these notes, the Treasurer can not take them from the list of irredeemable notes, because so many of them are still theoretically outstanding without any provision to meet them. Although the public may feel reasonably sure that all danger from them has been removed, yet as the matter now stands no one can with safety receive a bank note of any of the same denominations without scrutinizing the title and numbers. It is suggested that, considering all the circumstances, it would be well for Congress to appropriate the remaining sum of \$9,750 required to cover the whole theft. The probability that any part of this money would actually be needed is very remote, but such a step would relieve the public of all future risk from a source for many years so extremely dangerous.

NATIONAL BANKS.

United States bonds of the face value of \$142,508,900 were held in trust June 30, 1891, to secure the circulating notes of national banks, a decrease of \$2,719,400 during the year. There were also held \$26,349,500 of bonds to secure public deposits, a decrease of \$3,363,500. Two hundred and thirty-nine new banks were organized and deposited bonds. Seven new depositaries were designated, and ten old ones were discontinued. Altogether \$22,099,050 of bonds were deposited during the year, and \$28,181,950 were withdrawn. The amount of each kind remaining on deposit at the close of the year is shown in the following table:

Class of bonds.	Rate of interest.	To secure circulation.	To secure public mone eys.	Total.
Bonds issued to Pacific railroads	45	\$7, 957, 000 22; 565, 950 111, 985, 950	\$2, 113, 000 3, 353, 000 20, 883, 500	\$10, 070, 000 25, 918, 950 132, 869, 450
Total		142, 508, 900	26, 349, 500	168, 858, 400

Under the provisions of the circular of July 2, 1891, \$20,223,350 of 4½ per cent bonds held to secure circulation, and \$2,158,000 held to secure deposits, were continued at 2 per cent.

The amount paid into the Treasury during the year by the national banks as the semi-annual duty on their outstanding circulation was \$1,216,104.72, a decrease of \$38,734.93 as compared with the preceding year.

PACIFIC RAILROAD SINKING FUNDS.

First-mortgage bonds of the Pacific railroads amounting to \$1,331,750 were added during the year to the sinking fund of the Union Pacific Railroad, and \$426,000 of them to that of the Central Pacific Railroad, by purchase. All of the United States 4 per cent bonds formerly belonging to the first-named fund have been sold and the proceeds invested in first-mortgage bonds. The composition of these funds on June 30, 1891, is shown below:

Kind of bonds.	Rate per cent.	Union Pacific sinking fund.	Central Pacific sinking fund.	Total.
United States bonds issued to Pacific railroads Union Pacific first-mortgage Central Pacific first-mortgage Central Branch, Union Pacific Eastern Division, Union Pacific Sioux City and Pacific Western Pacific	6 6 6 6	\$1, 043, 000 3, 996, 000 2, 496, 000 835, 000 791, 000 625, 500 163, 000	\$2, 548, 000 385, 000 985, 000 20, 000 29, 000 3, 000 13, 000	\$3, 591, 000 4, 381, 000 3, 481, 000 855, 000 820, 000 628, 500 176, 000
Total	· · · · ·	9, 949, 500	3, 983, 000	13, 932, 500

Since the above date \$580,000 of the bonds held for the Union Pacific have been exchanged for a like amount of first mortgage bonds of the different roads at a profit of \$34,133.15. A like exchange of \$67,000 for the Central Pacific produced a profit of \$2,246.23. In both cases the profits were invested in bonds of the same kind as those acquired by the exchange.

The continued growth of these funds, and the prospect that in a short time they will consist entirely of coupon bonds, will soon make an increase of vault space indispensable, to say nothing of other muchneeded conveniences for handling the bonds and cutting the coupons. There are now \$14,000,000 of such bonds in the vault, which must be kept separate according to the road which issued them, the year and month in which they mature, and the series to which they belong. They are issued by six different companies, and mature in different

months of each of five years, from 1895 to 1899.

The bonds of the Central Pacific are issued in eight series, and bonds of each series are held. Interest becomes due on them, and coupons must be cut from them, in January, February, May, June, July, August, November, and December. All of these securities are payable to bearer, and if any of them were lost they might be sold in the open market before they were missed. They are kept in the same vault as those of the registered bonds belonging to the national banks, of which there are nearly four thousand lots. These last must all be examined and counted at least once a year by the authorized agents of the banks, a work that should be done inside the vault, but can not be, for want of space.

INDIAN TRUST FUND.

Under the act of June 10, 1876, the bonds and stocks described in the following table are held for the Secretary of the Interior, trustee of various Indian tribes:

	Class of bonds.	Registered.	Coupon.	Total.
Florida State Louisiana Stat North Carolin South Carolin Tennessee Stat Virginia State Virginia, Ches	ded debt. stocks te stocks a State stocks to stocks to stocks stocks stocks stocks bonds issued to Pacific railroads	\$191,666.66§ 540,000.00	69,000 22,000 41,000 122,000 123,000	\$168, 000, 00 69, 000, 00 22, 000, 00 41, 000, 00 122, 000, 00 314, 666, 66 540, 000, 00 1, 000, 00 256, 000, 00
Total	,	987, 666. 663	546, 000	1, 533, 666. 66

On May 14, 1891, by direction of the trustee, in accordance with the provisions of the Indian appropriation act of March 3, 1891, \$37,000 of Florida and \$15,000 of Louisiana stocks were withdrawn from the fund and became the property of the United States. Next day, by the same authority, \$26,000 of Florida and \$4,000 of North Carolina stocks were transferred in the same manner. At the same time \$24,000 of the United States bonds issued to Pacific railroads were sold and the proceeds deposited in the Treasury to the credit of the Delaware tribe of Indians. On September 3, 1891, the bonds of the State of Maryland, amounting to \$8,350.17, were paid.

MISCELLANEOUS TRUSTS.

United States bonds, of the kinds and amounts described below, are held in trust, under various provisions of law, for the institutions named:

American Printing House for the Blind, 4 per cents Pennsylvania Company, 4½ per cents Manhattan Savings Institution, 4 per cents	200, 000 75, 000
North American Commercial Company, 2 per cents	50,000

The bonds and other securities comprised in the following list are the property of the United States, and are held for the Secretary of the Treasury:

Arkansas State bonds	\$625. 000
Louisiana State bonds	560, 480
North Carolina State bonds	17, 000
Tennessce State bonds	21,000
Virginia State bonds	41,800
Chesapeake and Ohio Canal bonds	12,000
South Carolina State stocks	3,000
Florida State stocks	63,000
tana ara-ara-ara-ara-ara-ara-ara-ara-ara-ar	

The bonds of the Nashville and Chattanooga Railroad, formerly in this list, amounting to \$500,000, became due and were paid, together with \$10,000 of accrued interest.

United States 4 per cent bonds, of the face value of \$70,000, are held as a special deposit in the name of the Comptroller of the Currency, for the benefit of the creditors of the Fidelity National Bank, of Cincinnati.

REDEMPTION OF NATIONAL-BANK NOTES.

The heavy fluctuations which have characterized the movements of money have been reflected in the bank-note redemptions, and these have been large in proportion to the volume of the notes outstanding. A greater amount was presented in January, when currency began to return from the interior, than in any previous month since May, 1889, although in the interval the outstanding circulation had been reduced from two hundred and fifteen to one hundred and seventy-five millions. Nearly sixty-seven millions were redeemed in the fiscal year, a decrease of about three millions as compared with the year before. A full statement of the year's operations, including, besides the details presented in former reports, some others which are given for the first time, will be found in the appendix.

What public interest is now taken in the redemption of bank notes is centered chiefly in the effect upon the currency and in the changes in the fund on deposit in the Treasury for the retirement of surrendered circulation, topics which have already been touched upon in this report, and of which the former has perhaps been sufficiently discussed.

The fresh deposits made during the year for the withdrawal of notes from circulation amounted to \$9,728,060, of which \$8,048,530 was received from banks desiring to reduce their issues, \$1,600,200 for banks whose affairs are being wound up, and \$79,330 for the retirement of notes issued prior to the extension of charters.

The redemptions of the year from the aggregate fund were \$25,329,027.50, so that the balance on deposit was reduced from \$55,619,359.75

to \$40,018,392.25. An analyzed statement of the year's operations affecting this fund is given in the following table:

		Dep		: 		
Month.	For reduc- tion.	For retire- ment.	For reissue.	Total.	Redemptions.	Balance.
1890. July	\$534, 195. 00 2, 528, 650. 00 2, 964, 150. 00 776, 250. 00 90, 900. 00 191, 250. 00 92, 610. 00 191, 700. 00 223, 875. 00 370, 800. 00 49, 500. 00 34, 650. 00 8, 048, 530. 00	\$133, 900. 00 171, 890. 00 56, 250. 00 217, 470. 00 171, 550. 00 72, 625. 00 153, 130. 00 138, 495. 00 167, 000. 00 190, 450. 00 72, 190. 00 55, 250. 00	\$600.00 45,000.00 7,950.00 19,350.00 6,430.00	\$668, 095. 00 2, 700, 540. 00 3, 021, 000. 00 993, 720. 00 307, 450. 00 263, 875. 00 245, 740. 00 398, 145. 00 390, 875. 00 580, 600. 00 128, 120. 00 89, 900. 00	\$2, 131, 929, 00 1, 796, 769, 00 2, 074, 431, 50 2, 202, 728, 00 2, 109, 684, 50 1, 935, 467, 00 2, 461, 760, 00 2, 279, 340, 50 2, 440, 204, 50 1, 540, 986, 50 2, 2031, 758, 50 2, 274, 868, 50 25, 329, 027, 50	\$54, 155, 525, 7 55, 055, 296, 7 56, 005, 865, 2 54, 796, 837, 2 52, 994, 622, 7 51, 323, 330, 7 49, 107, 010, 7 47, 165, 815, 2 45, 116, 485, 7 44, 156, 999, 2 42, 203, 360, 7 40, 018, 392, 2

Partly by anticipation, but chiefly by accepting the Secretary's offer of extension, the banks were able to tide over the maturity of the 4½ per cent bonds without any considerable effect upon their circulation. Indeed, the deposits of the new bonds during the months of July, August, and September exceeded the withdrawals of the old, and the new circulation issued on them not only checked for the time the gradual contractions that had so long been going on, but actually increased the volume of this currency by some \$4,000,000. Only \$1,088,663 of lawful money was deposited in this period for the retirement of outstanding notes, while \$4,566,917 of notes were redeemed, so that the new issues would appear to have amounted to about \$7,500,000.

Some little difficulty has arisen in the administration of the act of June 20, 1874, from the narrowness of the working balance now afforded by the 5 per cent redemption fund. Many banks have less than \$1,000 on deposit, and a majority of them all have no more than Although by strict interpretation the law would require \$2,250 each. all redemptions to be reimbursed by the banks before the delivery of any part of the redeemed notes from the Treasury, this provision was early found to be unnecessarily burdensome to the banks and vexatious to the Department. For the last sixteen years it has been the uniform practice to deliver the redeemed notes for the bank's account on the same day that they were charged to the redemption fund, provided only that the whole amount of the notes did not exceed the lawful Manifestly, while the Treasurer could run no risk money on deposit. in parting with notes already paid for by the bank of issue, and could subserve no useful purpose in refusing to do so, he had no authority to let notes go out of his custody which had not been so paid for, but had in fact been received in exchange for other moneys belonging to the Treasury itself.

As long as the redemption fund was ample this system worked satisfactorily; so satisfactorily, indeed, that many bank officers appear to have given themselves little concern about the matter, and made their remittances, not in response to the Treasurer's notifications, as the law requires, but only when currency was actually received from the Department. In time they began to consider it their right to have their notes collected and delivered, no matter what the amount might be, and to pay for them at their convenience. Many of the smaller banks in

particular, with \$562.50 on deposit, have fallen into this error. In the interval from one assortment of a bank's notes to the next it frequently happens that more are redeemed than this sum will take up, and the redemption agency is obliged to hold a part or all of them for a further deposit. A notice is sent to the bank, expressed as clearly as possible,

reciting the facts, and calling for the necessary remittance.

This communication has a forcible legal effect. A bank failing to respond to it forthwith is in default—may even be exposed to summary proceedings. But the paper in many cases is misunderstood or laid No currency being received, no remittance is made. The outstanding notes of the bank continue to be presented at the Treasury and continue to be redeemed. In a few weeks another sum of them has accumulated. Another notice is sent to the bank, and receives as little attention as the first. Eventually a considerable part of a bank's cirenlation may be in the Treasurer's hands. Correspondence is opened, misunderstandings are found to exist, explanations are asked for, long transcripts of account are exchanged. The bank officer at last is made to see that unless he redeems his notes as the law requires they must go to protest, and be paid out of the proceeds of the sale of the bonds on deposit for their security; also that this proceeding will lead to the forfeiture of his charter and the appointment of a receiver. vent such a catastrophe he remits in one sum, perhaps not without inconvenience, what he might have remitted from time to time in a number of small installments, lies out of the use of his money till the return remittance reaches him, feels perhaps that he has been badly treated, and, strange as it may seem, allows himself, by returning to his former methods, to get into the same entanglement the next time the occasion arises.

All this is avoided by the best conducted banks, and might be avoided by all, with no hardship to them, and much less trouble to the Treasurer, by a little attention to the scheme of the redemption system set up by law, if not to the plain requirements of the law itself. The fundamental principle of the plan is that national bank notes are redeemable at the Treasury out of money advanced by the bank of Necessarily the original deposit must become impaired, and that too without the direct knowledge of the bank. When this has occurred to the extent of not less than \$500, the Treasurer may notify the bank of the fact, whereupon the bank must make good the impairment forthwith, under pain of the severest penalties that can be visited upon a financial institution. The privilege of issuing notes to circulate as money is a valuable franchise, and one which in the nature of things it would be improper to grant without the condition that the notes must be paid on demand. When the demand is made, and it comes to the bank, not by the presentation of the notes themselves, but in the shape of a notification from the Treasurer that they have been presented to him, the bank's first and most important business is to respond by re-The issue of new notes mitting to the Treasurer the amount he asks for. to take the place of those paid off and destroyed is another matter altogether, with which the Treasurer has nothing whatever to do. "And when," in the language of the statute, "such redemptions have been so reimbursed, the circulating notes so redeemed shall be forwarded to the respective associations by which they were issued; but if any of such notes are worn, mutilated, defaced, or rendered otherwise unfit for use, they shall be forwarded to the Comptroller of the Currency and destroyed, and replaced as now provided by law."

This plan is not less simple than fair, and has been in successful oper-

ation for nearly twenty years. There are many banks throughout the country to whose management such incidents as those above detailed are unknown, and many others in which parts or the whole of the foregoing recital will be recognized as familiar history,—so many, in fact, that in no instance can exception be taken to what at first might appear to be a direct criticism. It is no part of the Treasurer's duty to instruct bank officers in theirs, but a good share of his labors are devoted to this field. It is perhaps unavoidably so; and the assistance he is called upon to render is cheerfully undertaken, in the spirit, he trusts, of friendly correspondence. The remarks and suggestions here ventured upon are advanced in the same feeling, with the single object of adding to the amenities of the relations which exist between the banks and himself.

COMMISSION ON SAFE AND VAULT CONSTRUCTION.

The commission appointed by the Secretary of the Treasury under the provisions of a clause in the deficiency appropration act of September 30, 1890, "to report on the best method of safe and vault construction, with a view of renewing or improving the vault facilities of the Treasury Department," have been actively engaged in their investigations, and have paid several visits to the Treasurer's Office. The high character and attainments of the gentlemen selected for this important task give the comforting assurance that their labors will be productive of the best results within the reach of modern skill and science.

The chairman, Robert H. Thurston, LL. D., is director of the College of Mechanical Engineering and Mechanic Arts in Cornell University. He served in the Corps of United States Naval Engineers during the late war, and at its close became professor of natural and experimental

philosophy in the Naval Academy at Annapolis.

In 1870 he visited Europe, and made extensive investigations in the manufactures of iron and steel in Great Britain. He resigned from the Navy in 1871, to accept the chair of mechanical engineering in the Stevens Institute of Technology at Hoboken, N. J. He served as United States Commissioner to the World's Fair at Vienna, and as a member of the United States Commission to examine into the causes of boiler explosions; also for a number of years on the United States Board appointed to make tests of iron, steel, and various other metals, in which positions he performed valuable scientific services.

Dr. Thurston was the first president of the American Society of Mechanical Engineers. He is the author of many works on mechanics and

subjects connected therewith, and is an inventor of note.

Mr. Francis A. Pratt, of Hartford, the second member of the commission, is the senior member of the Pratt & Whitney Company, and its president; the founder of the firm and its great establishments in which are built an enormous variety of tools of all kinds, but especially for gunmakers, and where are built the Gardner, Hotchkiss, and other rapid-firing guns of modern invention, and a great variety of standard iron-workers' tools. This firm has established the standards of sizes and forms for the United States in the whole range of construction of bolts and nuts, of taps and dies; and they secure accuracy, formerly considered absolutely impossible of even approximation, through the use of a measuring machine capable of making measurements to the fifty-thousandth of an inch and less, and actually making their work accurate, as sent to the market, to within the ten-thousandth of an inch of standard.

Mr. Pratt is the founder of this system of application of scientific methods of exact measurement to such purposes in practical construction. As a mechanic he is considered to be fully the equal of any man living, and is considered by his colleagues in his profession the "American Whitworth," having accomplished what Sir Joseph Whitworth

aspired to, but never reached.

Mr. Theo. N. Ely, the general superintendent of motive power of the Pennsylvania Railway, is also a noted mechanic and an educated and experienced engineer. He was taught the elements of his profession at the Rensselaer Polytechnic Institute at Troy, N. Y., and graduated with high honors. He later became a member of the engineering staff of the Pennsylvania Railway, and quickly rose to the most important and responsible position in the gift of that great corporation in his department, taking charge of all the mechanical engineering of the road, and finally, as other roads were bought, built, or leased, becoming the general superintendent of the mechanical engineering departments of all. The high standing of that railway in efficiency of all its mechanical departments and all its machinery, whether of transportation or construction, is attributed very largely to Mr. Ely. He has introduced the best and most thoroughly scientific methods and processes of production, of inspection, test, and purchase of materials, and of maintenance and repair, and has made the whole motive power department a model after which are patterned the similar departments of the majority of other roads in this country and many abroad.

Mr. Ely has also kept up his acquaintance with both the scientific and the practitioner's side of his work, outside his own department, and is regarded as quite as high an authority, on constructive engineering gen-

erally, as can be found.

The chairman has kindly furnished the following statement in regard to the labors and plans of the commission:

The United States commission on safe and vault construction, appointed in April last to consider and report upon the desirability and required extent of new vault constructions for the Treasury and upon the best methods of vault construction as practiced at the present time, has been at work, as its members could get together, throughout the intervening period. The three members of this commission are very closely engaged, their regular duties being both important and engrossing; but they have found time to conduct, as suggested by this office, a very extended and thorough investigation of the best of recent methods of insuring safety in the storage of money and securities, and are expected to report upon all the modern systems of safe and vault construction, of detection of attempts to tamper with such receptacles, and of alarm in case of their attack, either by burglars or by their own appointed guardians.

The commission has, up to the present date, given its attention mainly to the generally standard systems of construction of safes and vaults, by the aggregation of laminated plates of iron, steel, and various special compositions; the methods of securely putting together such plates to form a vault or safe; and the best systems of bolting, of securing the corners against injury or penetration, the construction of doors and accessories, and the later forms of bolting doors and of putting in locks

and time attachments.

The commission have, in this investigation, visited the establishments of a number of makers, on their invitation, where the processes of construction could be studied, and have seen the whole work of safe-building carried on, including the preliminary fitting of plates, their erection in the vault under construction, and the final completion of the vault in place. They have been permitted to inspect the safes and vaults most recently constructed by the banks and safe deposit companies of the large cities, and have very fully examined the details of their construction. They have studied the newest forms of time-lock and especially the most recent of the devices known as the automatic systems of opening; in which the time-lock not only removes the obstructions preventing the unlocking of the vault doors during the time for which it is set, but also actually unlocks the door at a specified time, and from the inside, thus doing away with the otherwise unavoidable external mechanism for unlocking, and the consequently necessary passage of a spindle or

its mechanical equivalent through the door, a generally admitted cause of weakness

and source of more or less danger.

The commission have looked into the latest systems of electric guards and alarms, and their arrangements for protection by simple detection of all attempts of the attacking party to even touch the protected receptacle, and of giving an alarm at a distant point, or at any desired point in the neighborhood. These systems are intended to be efficient irrespective of the extent or efficiency of the presumably burglar-proof construction of the safe or vault.

There remains, on the programme, the further study of a few special constructions, the investigation of the later methods of application of chilled cast iron to such work, and the examination of some new forms of lock and automatic bolting. It is possible that some experimentation may be called for. The commission are expected to report soon after the opening of the next session of Congress.

CONDITION OF BUSINESS.

The recent operations of the Treasury, by their magnitude, have called for unwonted exertions on the part of the administrative and clerical force. In particular, the labor of receiving and forwarding currency has been made very heavy by the unusual demands for shipments or the exchange of one kind of money for another. Much extra work was required to carry out the provisions of the act of December 15, 1890, which provided for the payment of a drawback or rebate to manufacturers and dealers, on certain kinds of tobacco, upon which the tax had been paid. All business that has come to the office has been attended to with promptness and, it is believed, with satisfaction to the public.

I desire to express my appreciation of the prompt and cheerful manner in which the subordinate officers, clerks, and other employés in this office have performed their laborious and, in most cases, responsible Skill and integrity in handling enormous sums of money, diligence and correctness in keeping accounts, are absolute necessities in the daily transactions of the United States Treasury. Anxieties surround the proper conduct of such an office, but with a well-trained and

tried force to rely upon cares and worries are greatly lessened.

Thanks are due to Mr. F. W. Lantz for his careful and conscientious work in compiling and editing this report.

I have the honor to be, very respectfully, your obedient servant, E. H. NEBEKER, Treasurer of the United States.

Hon. CHARLES FOSTER, Secretary of the Treasury.

REPORT OF THE DIRECTOR OF THE MINT.

TREASURY DEPARTMENT,
BUREAU OF THE MINT,
Washington, D. C., November 1, 1891.

SIR: As required by section 345 of the Revised Statutes, I have the honor to hand you herewith a report of the operations of the mints and assay offices of the United States for the fiscal year ended June 30, 1891, the present being the nineteenth annual report of the Director of the Mint and the third of the same series signed by me.

DEPOSITS AND PURCHASES OF GOLD AND SILVER.

Gold.—The gold deposits at the mints and assay offices of the United States during the fiscal year ended June 30, 1891, including gold contained in silver deposits and purchases, aggregated 3,204,880.200 standard ounces, of the value of \$59,625,678.08, against \$49,228,823.56 in the preceding fiscal year, an increase of \$10,396,854.52.

Of the gold deposited, 2,606,111.797 standard ounces, of the value of \$48,485,800.82, were original deposits, and 598,768.403 standard ounces,

of the value of \$11,139,877.26, were redeposits.

Of the redeposits \$4,601,070.52 consisted of fine bars bearing the stamp of the United States assay office at New York, being large gold bars redeposited for small; and \$6,538,806.74 were unparted bars, representing the deposits at the minor assay offices shipped to the mint at Philadelphia, for refining and coinage.

Of the gold bullion received at Government institutions during the fiscal year, \$31,555,116.85 was the product of our own mines, against \$30,474,900.25 of the same class of bullion deposited in the preceding

fiscal year, an increase of \$1,080,216.60.

Of the domestic gold bullion received at Government institutions during the year, \$17,344,451.21 were fine bars bearing the stamp of private refineries, and \$14,210,665.64 were unrefined domestic bullion.

The distribution among producing States and Territories of the unrefined gold deposited at Government institutions during the year will

be found in a table in the appendix to this report.

Foreign gold bullion of the value of \$4,054,822.86, and foreign gold coin of the value of \$8,256,303.80, a total foreign gold of \$12,311,126.66, were deposited and melted at the mints and assay offices during the last fiscal year.

Light-weight domestic gold coins were melted for recoinage of the value of \$583,847.16, and old material, consisting of jewelry, plate, etc.,

containing gold of the value of \$4,035,710.15.

Silver.—The deposits and purchases of silver, including silver contained in gold deposits, aggregated during the last fiscal year 71,869,663.92 standard ounces, of the coining value (\$1.16.47 per standard)

ederal Reserve Bank of St. Louis

ounce, or \$1.2929 per fine ounce) of \$83,630,154.31, against \$43,565,135.15

in the preceding year, an increase of \$40,065,019.16.

Of the silver received at Government institutions during the year 10,006,707.61 standard ounces, of the coining value of \$11,644,168.84, were redeposits, so that the original deposits of silver aggregated 61,862,956.31 standard ounces, of the coining value of \$71,985,985.47.

Of the silver received, 52,744,990.07 standard ounces, of the coining value of \$61,375,988.45, consisted of fine bars bearing the stamp of private refineries in the United States. All such bars are classified at Government institutions as of domestic production. As a matter of fact, such bars contain foreign as well as domestic silver, as nearly all the silver imported into the United States in the form of base bars, or contained in miscellaneous ores, is reduced at private works in conjunction with domestic ores, and no distinction is made in the resulting product.

Of the domestic silver bullion deposited at the mints during the year, 3,551,805.12 standard ounces, of the coining value of \$4,133,009.58, was

unrefined silver from the mines of the United States.

The distribution of the unrefined silver deposited at Government institutions among producing States and Territories, is exhibited in a table

in the appendix to this report.

Foreign silver bullion, distinctively known as such, containing 1,964,342.47 standard ounces, of the coining value of \$2,285,780.32, and foreign silver coin, containing 2,189,902.34 standard ounces, of the coining value of \$2,548,249.99, a total foreign silver of \$4,834,030.31, was received at the mints and melted during the year.

Light-weight silver coins of the United States, principally subsidiary pieces transferred from the Treasury to the mints for recoinage, were melted during the year, containing 705,253.82 standard ounces of silver,

of the coining value of \$820,658.98.

In addition, trade dollars were sold to the Government as bullion and melted, containing 3,248.47 standard ounces of silver, of the coining value of \$3,780.04.

Old silver, consisting of jewelry, plate, etc., was melted during the year, containing 703,414.02 standard ounces, of the coining value of

\$818,518.11.

The coining value of the gold and silver (not including redeposits) received at the mints and assay offices of the United States each fiscal year since 1880 is exhibited in the following table:

VALUE OF THE GOLD AND SILVER (NOT INCLUDING REDEPOSITS) RECEIVED AT THE MINTS AND ASSAY OFFICES, 1880-1891.

Fiscal years.	Gold.	Silver (coining value).	Total value.
1880	\$98, 835, 096	\$34, 640, 522	\$133, 475, 618
1881	130, 833, 102	. 30, 791, 146	161, 624, 248
1882	66, 756, 652	33, 720, 491	100, 477, 143
1883	46, 347, 106	36, 869, 834	83, 216, 940
1884	46, 326, 678	36, 520, 290	82, 846, 968
1885	52, 894, 075	36, 789, 774	89, 683, 849
1886	44, 909, 749	35, 494, 183	80, 403, 932
1887	68, 223, 072	47, 756, 918	115, 979, 990
1888	72, 225, 497	41, 331, 014	113, 556, 511
1889	42, 136, 436	41, 238, 151	83, 374, 587
1890	42, 663, 095	42, 644, 719	85, 307, 814
1891	48, 485, 801	71, 985, 985	120, 471, 786

The usual tables exhibiting, by weight and value, the deposits and purchases of gold and silver, at each of the mints and assay offices, will be found in the Appendix.

COINAGE.

The coinage executed during the fiscal year at the four coinage mints located at Philadelphia, San Francisco, Carson City, and New Orleans, aggregated 119,547,877 pieces, of the nominal value of \$63,611,159.35, against 112,698,071 pieces, of the nominal value of \$60,254,436.93, struck in the preceding fiscal year.

The gold coins aggregated 1,414,154 pieces, of the value of \$24,172,-202.50, of which \$22,062,880 were in double-eagles, \$1,170,100 in eagles,

\$908,445 in half-eagles, and \$30,777.50 in quarter-eagles.

The bulk of the gold coinage was executed for depositors at the mints

on the Pacific coast.

The coinage of the three-dollar and one-dollar gold pieces, as well as the three-cent nickel piece, was discontinued by act of Congress approved September 26, 1890, and no pieces of these denominations were struck during the fiscal year ended June 30, 1891.

The silver coinage consisted of 36,232,802 silver dollars, \$82,637.50 in half-dollars, \$195,118.75 in quarter-dollars, and \$1,761,462.10 in

dimes.

The minor coinage, executed at the mint at Philadelphia, consisted of 13,338,275 nickel five-cent pieces, of the nominal value of \$666,913.75, and 50,002,275 one-cent bronze pieces, of the nominal value of \$500,022.75.

The coinage of the mints during the last fiscal year is recapitulated

in the following table:

COINAGE, FISCAL YEAR 1891.

Description.	Pieces.	Value.
Gold	1, 414, 154	\$24, 172, 202. 50
Silver dollars	36, 232, 802	36, 232, 802. 00
Subsidiary silver coins	18, 560, 371	2, 039, 218. 35
Minor coins	63, 340, 550	1, 166, 936. 50
Total	119, 547, 877	63, 611, 159, 35

In the Appendix will be found tables exhibiting, by institutions and by denominations of pieces, the coins struck at the mints during the fiscal year 1891, and also during the calendar year 1890.

A table is also presented exhibiting the coinage of the mints each calendar year since the organization of the Mint in 1792 to the close of

the fiscal year 1891.

GOLD AND SILVER BARS MANUFACTURED.

In addition to the coinage of the mints, gold and silver bars were manufactured during the fiscal year of the value of \$39,603,199.42, as follows:

BARS MANUFACTURED, 1891.

	Description.	Value.
· ·		\$31, 165, 541. 77 8, 437, 657. 65
		39, 603, 199. 42

MEDALS AND DIES MANUFACTURED.

During the last fiscal year 1,237 dies were prepared in the engraving department of the mint at Philadelphia, as exhibited in the following table:

DIES MANUFACTURED, 1891.

Description.	Numb
or gold coinage	
" silver coinage	6
" minor coinage	4
" proof coinage	
" Secretary Windom medal	
" Director of the Mint medal	
" Superintendent of the Mint medal	
" Indian peace medal	
" annual assay medal	
" Railway Mail Service medal	
Total	<u> </u>

The number of medals manufactured aggregated 3,293, distributed as follows:

MEDALS MANUFACTURED, 1891.

	Description.	 Number.
Gold		 191
Silver		 1,509
Bronze		 1,600
Total		 3, 29

The detailed description of the medals manufactured during the year will be found in the Appendix to this report.

The following table exhibits the number of medals and proof sets, as well as single-proof coins sold, during the year:

MEDALS AND PROOF COINS SOLD, 1891.

Description.	Number.	Value.
Medals:		
Gold	234	\$9, 321. 65
Silver	1,558	1,867.50
Bronze	823	696. 19

June 30, 1891	754. 51
Total	2, 025. 93

GOLD BARS EXCHANGED FOR GOLD COIN.

During the fiscal year gold bars were exchanged for gold coin, at the mint at Philadelphia and the assay office at New York, of the value of \$24,965,695.20, as exhibited in the following table:

FINE GOLD BARS EXCHANGED FOR GOLD COIN, 1891.

During the second session of the Fifty-first Congress, pursuant to recommendations contained in my last fiscal report, the following act, amendatory of the act of May 26, 1882, relative to the exchange of gold bars for United States gold coin, became a law March 3, 1891:

SEC. 3. That an act to authorize the receipt of United States gold coin in exchange for gold bars, approved May twenty-six, eighteen hundred and eighty-two, be amended to read as follows:

That the superintendents of the coinage mints and of the United States assay office at New York may, with the approval of the Secretary of the Treasury, but not otherwise, receive United States gold coin from any holder thereof in sums of not less than five thousand dollars, and pay and deliver in exchange therefor gold bars in value equaling such coin so received: *Provided*, That the Secretary of the Treasury may impose for such exchange a charge which in his judgment shall equal the cost of manufacturing the bars.

SEC. 4. That all acts or parts of acts inconsistent or in conflict with the provisions

of this act are hereby repealed.

In order that the change from the old law may be noted the act of May 26, 1882, is appended:

That the superintendents of the coinage mints, and of the United States assay office at New York, are hereby authorized to receive United States gold coin from any holder thereof in sums not less than five thousand dollars, and to pay and deliver in exchange therefor gold bars in value equaling such coin so received.

The act of May 26, 1882, was construed by the Attorney-General to be mandatory as to the exchange of gold bars for gold coin, and he further held that under its provisions no charge could be imposed for the exchange.

The modified act provides that the Secretary of the Treasury may impose a charge for such exchange equal to the cost of manufacturing the bars; and the exchange is to take place only with the approval of

of the Secretary of the Treasury, thus making it discretionary.

The day following the approval of the act (March 4, 1891) requests made at the United States assay office at New York for gold bars, for export, in exchange for gold coin were telegraphed the Director. The superintendent was instructed to deliver gold bars in exchange for gold coin upon the payment of a bar charge of 4 cents per hundred dollars in value.

Notwithstanding the charge imposed, exporters of gold continued to take large amounts of gold bars in exchange for gold coin, so that on March 23, 1891, the superintendent was instructed to decline to give gold bars in exchange for gold coin when required for shipment.

Gold bars are furnished in exchange for gold coin, upon the payment of the bar charge, to jewelers and manufacturers for domestic use in the industrial arts, but since March 23 of the present year have not been

furnished for export.

As I have pointed out in prior reports, the movement of gold from the

United States has been facilitated by the act of May 26, 1882.

The shipment of gold, rather than the purchase of exchange, is, as a rule, decided on a very narrow margin of profit, and it would seem reasonable to infer that when the margin of profit between the actual shipment of specie and the purchase of exchange is small, shipments might be prevented if exporters were required to ship coin or to pay a premium for bars.

The fact that exporters were willing and anxious to pay the charge of 4 cents per hundred dollars in value, and even a higher rate, for gold bars in exchange for coin, is proof conclusive that United States bars of full weight and of recognized purity are a more profitable form of gold

for shipment than coin.

It has not been the policy of the Department to throw any obstacle in the way of the free movement of specie, but there is no good reason why the Government of the United States, reversing the policy of foreign banking houses under governmental control, should facilitate it.

While the refusal to furnish bars for export has been powerless to stop the movement of gold this summer from this country, for the reason that specially powerful causes were operating (which are discussed elsewhere in this report), such refusal should have the effect to raise the "gold point" so as to render it unprofitable as a business transaction to ship gold from this country to London unless the price of sterling exchange approximates \$4.89\frac{1}{4}\$, a rise of at least one-half a cent.

WORK OF GOVERNMENT REFINERIES.

The acid refineries of the coinage mints and of the assay office at New York operated during the last fiscal year on bullion containing 9,070,490 standard ounces of gold and silver, of the value of \$32,462,241.42, as exhibited in the following table:

PRODUCT OF ACID REFINERIES, 1891.

Bullion.	Standard ounces.	Value.
Gold	'''	\$23, 369, 121. 51 9, 093, 119. 91
Total		32, 462. 2

The weight and value of the precious metals treated at the refinery of each of the institutions is exhibited in the following table:

PURCHASES OF SILVER.

From July 1 to August 13, 1890, the purchases of silver bullion were made under the provisions of the act of February 28, 1878.

The amount purchased by the Treasury Department, on telegraphic offers of lots of over 10,000 ounces, was 2,431,827.18 standard ounces,

costing \$2,382,267.28.

In addition to Department purchases, the purchases of silver at the mints in lots of less than 10,000 ounces, aggregated 663,512.57 standard ounces, costing \$655,139.34, while the silver purchased in partings, bar charges, and fractions aggregated 12,859.72 standard ounces, costing \$12,019.84.

The total amount of silver purchased during the last fiscal year, under the act of 1878, was 3,108,199.47 standard ounces, costing \$3,049,426.46.

The average cost of silver purchased under the act of February 28, 1878, during the first two months of the fiscal year, was \$1.09 per fine ounce.

The following table exhibits the quantity and cost of the silver purchased under the act of February 28, 1878, during the first two months of the fiscal year at each of the coinage mints:

Deliveries on Purchases of Silver under Act of February 28, 1878, during Fiscal Year 1891.

	Mints.	Standard ounces.	Cost.
Philadelphia		1, 768, 110. 47	\$1,722,648.66
San Francisco	*******************	426, 469, 28	424, 062. 30
New Orleans			681, 576, 31
Carson	•••••	224, 798. 63	221, 139. 19
Total	••••	3, 108, 199. 47	3, 049, 426. 46

Adding to this total the amount of silver on hand July 1, 4,415,244.66 standard ounces, costing \$4,027,833.80, makes the total amount of silver available for the coinage of silver dollars during the year, purchased under the act of February 28, 1878, 7,523,444.13 standard ounces, costing \$7,077,260.26.

BULLION DELIVERED ON SILVER PURCHASES, ACT OF FEBRUARY 28, 1878.

Mode of acquisition.	Standard ounces.	Cost.
Purchased by the Treasury Department (lots of over 10,000 ounces) .	2, 431, 827. 18	\$2, 382, 267. 28
Purchased at mints (lots of less than 10,000 ounces)	663, 512. 57	655, 139. 34
Partings, bar charges, and fractions	12, 859. 72	12, 019. 84
Total delivered on purchases	3, 108, 199. 47	3, 049, 426. 46
Balance July 1, 1890	4, 415, 244. 66	4, 027, 833. 80
Available for coinage of silver dollars during fiscal year 1891	7, 523. 444. 13.	7, 077, 260. 26

Of the bullion purchased under the act of February 28, 1878, 7,511,-218.49 standard ounces, costing \$7,065,905.45, were used in the coinage of 8,740,327 standard silver dollars; 12,223.76 standard ounces, costing \$11,353.07, were wasted by the operative officers and sold in sweeps, while the balance (consisting of fractions of less than an ounce at each of three coinage mints), 1.88 standard ounces, costing \$1.74, was transferred to the account of "silver purchases under act of July 14, 1890."

The total amount of silver bullion purchased under the act of February 28, 1878, from the commencement, March 1, 1878, to August 13, 1890, was 323,635,576.19 standard ounces, costing \$308,199,261.71, an average of \$0.9523 per standard ounce, or \$1.058 per fine ounce.

SILVER PURCHASES UNDER ACT OF JULY 14, 1890.

On August 13, 1890, the act of July 14, 1890, requiring the purchase monthly of 4,500,000 ounces of silver, went into effect. The amount nurchased by the Treasury Department, on telegraphic offers of lots of over 10,000 ounces, to the close of the fiscal year, aggregated 47,710,254.77 standard ounces, costing \$44,861,371.32. In addition to Department purchases, the purchases of silver at the mints in lots of less than 10,000 ounces, aggregated 5,962,742.75 standard ounces, costing \$5,625,-039.30, while the silver purchased in partings, bar charges, and fractions (including 1.88 standard ounces, costing \$1.74, transferred from 1878 bullion) aggregated 97,128.09 standard ounces, costing \$91,087.82.

The total amount purchased during the last fiscal year under the provisions of the act approved July 14, 1890, was 53,770,125.61 standard ounces, costing \$50,577,498.44.

The average cost of the silver purchased under the act of July 14,

1890, was \$1.045 per fine ounce.

The following table exhibits the quantity and cost of the silver purchased under the act of July 14, 1890, during the fiscal year, at each of the coinage mints:

DELIVERIES ON PURCHASES OF SILVER UNDER ACT OF JULY 14, 1890, FISCAL YEAR 1891.

The following table is a recapitulation of the purchases, and mode of acquisition, under the act of July 14, 1890:

BULLION DELIVERED ON SILVER PURCHASES, ACT OF JULY 14, 1890.

Mode of acquisition.	Standard ounces.	Cost.
Purchased by the Treasury Department (lots of over 10,000 ounces).		\$44, 861, 371, 32
Purchased at mints (lots of less than 10,000 ounces)		-5, 625, 039. 30
costing \$1.74, transferred from 1878 bullion)	97, 128: 09	91, 087. 82
Total	53, 770, 125, 61	50, 577, 498. 44

The act of July 14, 1890, required. That the Secretary of the Treasury shall each month coin 2,000,000 ounces of the silver bullion purchased under the provisions of this act into standard silver dollars, until the first day of July, 1891, and after that time he shall coin of the silver bullion purchased under the provisions of this act as much as may be necessary to provide for the redemption of the Treasury notes herein provided for, and any gain or seignorage arising from such coinage shall be accounted for and paid into the Treasury."

In order to comply with the mandatory coinage of silver dollars required by this act (2,000,000 ounces monthly, equivalent to 2,585,000 silver dollars), there were coined from August 13, 1890, to June 30, 1891, from bullion purchased under the act of July 14, 1890, 27,292,475 silver dollars.

The quantity of silver used in this coinage was 23,454,470.70 standard ounces, costing \$22,747,860.42, while 27,272.98 standard ounces, costing \$25,466.43, were wasted and sold in sweeps, leaving a balance of uncoined silver purchased under the act of July 14, 1890, on hand at the coinage mints June 30, 1891, of 30,288,381.93 standard ounces, costing \$27,804,171.59, distributed as follows:

SILVER BULLION PURCHASED UNDER ACT OF JULY 14, 1890, UNCOINED JUNE 30, 1891.

	Mints.	Standard ounces.	Cost.
Philadelphia		28, 142, 429. 29	\$25, 867, 660, 88

Carson		345, 226. 99	309, 520, 57
Total		30, 288, 381. 93	
		1 30,200,002.00	

The total amount of silver purchased, during the fiscal year, under both acts, February 28, 1878, and July 14, 1890, was 56,878,325.08 standard ounces, costing \$53,626,924.90, an average cost of \$1.04\frac{3}{4}\$ per fine ounce.

The total coinage of silver dollars under the two acts was \$36,032,802.

In addition, 200,000 silver dollars were coined in the last month of the fiscal year from trade-dollar bullion.

The total coinage of silver dollars, during the fiscal year, and the total seignorage on such coinage, is exhibited in the following table:

COINAGE OF SILVER DOLLARS, FISCAL YEAR 1891.

			Act.				Dollars coined.	Seignorage.
February 28, 187	8						\$8,740,327	\$1,674,421.55

The total purchases of silver bullion under the provisions of the act of July 14, 1890, from August 13, 1890, to November 1, 1891, have aggregated 66,588,536 fine ounces, costing \$68,626,565, an average for the whole period of \$1.03 per fine ounce. The balance of silver bullion purchased under the act of July 14, 1890, on hand uncoined at this date, November 1, 1891, is 45,022,085 fine ounces, costing \$45,420,512.

The accompanying table exhibits the offers and purchases of silver during the fiscal year, under the acts of February 28, 1878, and July 14, 1890:

COURSE OF SILVER.

The fluctuations in the price of silver during the last fiscal year covered a wide range, extending from \$0.964 per fine ounce to \$1.21—a variation of nearly 25 cents—a fluctuation greater than in any previous year.

At the commencement of the fiscal year, July 1, 1890, silver was quoted in London at $47\frac{9}{16}$ pence (the London quotation being per ounce British standard .925), equivalent, at the par of exchange, to \$1.042 per fine ounce; the New York price at the same date being \$1.05.

From this date, in anticipation of legislation by Congress which would increase the mandatory purchases of silver by this Government, the price of silver rose rapidly until, July 14, 1890, the date of the passage of the new silver law, the price had advanced in London to 49½ pence, and in New York to \$1.08 per fine ounce.

As the act was not to take effect until thirty days after its passage, the price fluctuated from $47\frac{3}{4}$ pence to $50\frac{1}{2}$ pence (\$1.107 per fine ounce), closing at the end of July at the latter figure.

On August 1 the London price advanced to 51\frac{1}{8} pence (\\$1.12) the New

York price the same day being \$1.14\frac{1}{2}.

On August 13, the date the new silver law took effect, the price had advanced in London to 51½ pence (\$1.123) and in New York to \$1.14 per fine ounce.

The highest price reached was, in New York, August 19, \$1.21 per fine ounce (the highest point touched since 1878), and in London, Sep-

tember 3, $54\frac{5}{8}$ pence (\$1.19\frac{3}{4}).

The price in New York did not vary materially from August 19 to September 3, when a decline commenced, extending, with some fluctuations, to the end of the calendar year, the price on December 31, 1890, being in London 48 pence (\$1.052) and in New York \$1.045.

From the 1st of August to the middle of September the difference between the price of silver in New York and London was so great that bullion dealers were enabled to import silver from London at a profit.

During the month of January, 1891, the price of silver fluctuated

between 48½ and 46½ pence.

From this time forward the decline continued until April 24, when the lowest point was reached—44 pence (\$0.964) in London, the New York price the same date being \$0.97\frac{1}{4}.

From this date the price gradually advanced, closing June 30, 1891, at $45\frac{3}{4}$ (\$1.003), the New York price on the same date being \$1.01\frac{1}{4}.

The average price of silver during the year was, in London, $47\frac{7}{10}$ pence, equivalent to \$1.04½ per fine ounce, and in New York \$1.053; an average difference of nearly 1 cent.

The highest, lowest, and average price of silver each month during the fiscal year, and also during the calendar year 1890, is shown in the following tables:

HIGHEST, LOWEST, AND AVERAGE PRICE OF SILVER BULLION, AND VALUE OF A FINE OUNCE, EACH MONTH DURING THE FISCAL YEAR 1891.

At the lowest price of silver during the fiscal year the value of the silver contained in a silver dollar was \$0.75; at the highest price, \$0.936; at the average price, \$0.814.

The price of silver at the date of the passage of the act of February 28, 1878, which remonetized the silver dollar, and required the purchase and coinage monthly of not less than \$2,000,000 nor more than \$4,000,000 worth of silver, was 55 pence, equivalent to \$1.205 per fine ounce, at which price the commercial value of the silver in the silver dollar was

From that date the decline was, with some slight intermissions, uniform until May 19, 1888, when silver reached its lowest price, 41\sqrt{g} pence (\\$0.912), at which price the commercial value of the silver in the dollar was \\$0.705.

The commercial value of the pure silver contained in the silver dollar has been annually since 1873, at the average price of each year, as follows:

BULLION VALUE OF THE SILVER DOLLAR, 1873-1890.

SUBSIDIARY SILVER COINAGE. .

The subsidiary silver coinage, during the last fiscal year, aggregated 18,560,371 pieces, of the nominal value of \$2,039,218.35, consisting of \$82,637.50 in half-dollars, \$195,118.75 in quarter-dollars, and \$1,761,462.10 in dimes.

Of this coinage, \$1,211,400 were manufactured from trade-dollar

bullion and \$403.75 from purchased bullion.

As the act of March 3, 1891, directed that the trade-dollar bullion should be coined into silver dollars, whereas the act of March 3, 1887, providing for the redemption of the trade dollars, had left the recoinage into standard dollars or subsidiary coin discretionary with the Secretary, the use of this stock of silver for the coinage of subsidiary silver was discontinued.

Worn and uncurrent silver coin, mostly subsidiary pieces, were transferred from the Treasury to the mints for recoinage during the

year of the nominal value of \$910,046.69.

Upon melting, these coins produced 692,575.67 ounces of standard silver, which would manufacture in subsidiary silver coins \$861,680.41, showing a loss of \$48,366.28, or about 5 per cent., of which sum \$19,851.55 was reimbursed the Treasury from the appropriation for recoinage of uncurrent gold and silver coin, contained in the sundry civil bill, approved August 30, 1890, and the balance, \$28,514.73, from the appropriation for recoinage contained in the act of March 3, 1891.

The stock of silver used for subsidiary coinage during the fiscal year

is exhibited in the following table:

The seigniorage on the subsidiary silver coinage during the year was \$92,434.48, derived as follows:

Total	<i>,</i>	\$92, 434, 48

In my last annual report attention was directed to the large stock—\$19,545,362.71—of subsidiary silver coins in the Treasury of the United States, which, through abrasion or mutilation, were unfit for circulation, or else of denominations for which there was no popular demand, and a recommendation made that authority be given to recoin the same into such denominations of subsidiary coins as there was a demand for, and that the loss of metal incident to such recoinage be paid from the profits which had been made on silver coinage.

Such a provision was inserted by the House of Representatives of the Fifty-first Congress in the sundry civil act for 1892, but the provision was stricken out in the Senate, and in lieu thereof an appropriation of \$150,000 was made for "recoinage of the uncurrent fractional silver

coins, abraded below the limit of tolerance, in the Treasury."

Under this liberal appropriation a large amount of uncurrent silver coins in the Treasury have been recoined into dimes and quarter-dol-

lars, and such recoinage is still in progress.

The nominal value of the silver coins transferred from the Treasury to the mints for recoinage from July 1, 1890 to November 1, 1891, has been \$4,277,917.74, upon which the loss of metal, representing the abrasion from wear, has been \$134,676.10 or an average of about 3 per cent. The actual coinage of the same into new silver coins has aggregated \$3,226,414.60.

It was estimated from previous recoinages that the loss would be about 5 per cent, and that the appropriation of \$150,000 would enable the Department to recoin about \$3,000,000. By careful and economical work the loss has been reduced considerably below this figure, and it is believed that the present appropriation will recoin nearly \$5,000,000.

The beneficial results of this appropriation are shown by the fact that the amount of subsidiary silver coin in the Treasury at the commencement of the last fiscal year, all of which was classed in Treasury statements as an "asset not available," was \$22,805,225, while the amount in the Treasury at the present date (November 1, 1891) is \$15,196,379,

a reduction of \$7,608,846.

In view of the importance of relieving the Treasury of this incubus of uncurrent coin, as well as to provide change money in an attractive and desirable form, I renew the recommendation made in my previous report that either a permanent annual appropriation for recoinages be made, or that authority be given to reimburse the Treasurer for the loss of metal incident to the recoinage of silver coins, from the large profits which have been made by the Government in the first instance in the manufacture and issue of such coins. It seems to me that instead of depending upon the caprice of Congress for small annual appropriations for recoinage, that a permanent appropriation would be eminently proper and desirable. If, however, this does not meet with favor at the hands of Congress, I most urgently recommend an immediate appropriation of \$100,000 for continuing the recoinage of uncurrent silver coins in the Treasury.

TRADE-DOLLAR RECOINAGE.

The total number of trade dollars redeemed under the provisions of the act of March 3, 1887, was 7,689,036, containing 6,687,690.61 standard ounces of silver, of the coining value in silver dollars of \$7,782,040. From this there were coined up to the close of the fiscal year 1891, \$2,889,011 in subsidiary silver coins, containing 2,322,042.62 standard ounces, costing \$2,668,654.88. In addition there was transferred from

trade dollars remelted at the Sau Francisco mint to silver dollar bullion, 16.97 standard ounces, costing \$19.51, making the total disposed of up to June 1, 1891, 2,322,059.59 standard ounces, costing \$2,668,674.39, leaving on hand 4,365,631.12 standard ounces, costing \$5,020,361.61.

Of this amount there were stored, at the Philadelphia mint, 1,326,751.51 standard ounces, costing \$1,524,828.61, and, at the New Orleans, mint

3,038,879.61 standard ounces, costing \$3,495,533.

The act of March 3, 1891, directed the "Secretary of the Treasury shall, as soon as practicable, coin into standard silver dollars the tradedollar bullion and trade dollars now in the Treasury, the expense thereof to be charged to the silver profit fund."

As soon as the mandatory coinage of silver dollars required by the act of July 14, 1890, ceased by limitation of law, the conversion of the trade-dollar bullion into standard silver dollars was commenced at the

mints at Philadelphia and New Orleans.

. The total number of silver dollars coined from trade-dollar bullion to November 1, 1891, has been \$3,260,100, upon which seignorage has been \$40,834.19. The coinage of trade-dollar bullion into standard silver dollars will be completed during the present calendar year.

The number of trade dollars redeemed under the act of March 3, 1887, the amount used in the subsidiary silver coinage to the close of the fiscal year ending June 30, 1891, and the uncoined balance on hand are exhibited in the following table:

SEIGNIORAGE ON SILVER.

The balance of silver profits on hand, at the four coinage mints, at the commencement of the fiscal year, was \$302,659.51.

The seigniorage on the coinage of silver dollars during the fiscal year aggregated \$6,221,333.42, and on subsidiary silver coinage \$92,434.48, a total of \$6,313,767.90.

From the gross seigniorage there was paid for the transportation of silver coins the sum of \$52,904.16, and for reimbursement of wastage and loss on sale of sweeps \$6,530.90, a total of \$59,435.06, leaving as the net seigniorage for the year the sum of \$6,254,332.84.

The total amount of seigniorage covered into the Treasury during the fiscal year aggregated \$6,404,677, leaving on hand in the coinage

mints at the close of the year the sum of \$152,315.35.

The net profit on the coinage of silver during the thirteen years ended June 30, 1891, including the balance in the coinage mints on July 1, 1878, has aggregated \$71,952,390.25.

In the Appendix will be found the usual tables showing the seigniorage on the coinage of silver dollars and subsidiary silver separately, and the distribution of the profits.

A table will also be found exhibiting the expenditures from silver profits on account of distribution of silver coins.

MINOR COINAGE.

During the fiscal year 63,340,550 minor coin pieces were struck at the mint at Philadelphia, of the face value of \$1,166,936.50, as follows:

MINOR COINAGE, 1891.

Denominations.	Pieces.	Value.
Five-cent nickel		\$666, 913. 75 560, 022. 75
Total	63, 340, 550	1, 166, 936. 50

The amount and cost of blanks purchased for minor coinage during the year was as follows:

Blanks purchased.	Pounds avoirdupois.	Cost.
One-eent bronze blanks.	! ' !	\$67, 696. 30 46, 444. 20
Total	482, 500	114, 140. 50

The demand for minor coins has been pressing, taxing to the utmost the capacity of the mint at Philadelphia, but there has been no delay upon the part of the mint in supplying such coins. The blanks used in the manufacture of these pieces were purchased, ready for striking, under contract, the rate paid being \$0.1995 per pound for the one-cent blanks and \$0.3194 for the five-cent nickels.

No recoinage of minor coinage metal was executed during the year.

The accompanying statement shows the balance of coinage metal on hand at the commencement of the year, the amount transferred, and the cost of metal necessary to recoin the same and the loss in melting

MINOR COINAGE METAL.

Character.	Amount.
Balance on hand July 1, 1890.	\$28, 012. 46
Transferred to mint by Treasurer of United States	34, 049. 00
In order to make the proper alloy for the recoinage of the 1-cent	
nickel coins into 5-cent nickel coins, it was necessary to add new	
nickel, costing	334. 21
In order to make the proper alloy for the recoinage of the old copper	
cents into bronze 1-cent coins, it was necessary to add tin and zinc,	
costing	. 10.12
In order to recoin the 3-cent nickel coins into 5-cent nickel coins it	
was necessary to add metal of the same alloy, costing	255.76
Making the total amount available for recoinage	62, 661. 55
Deduct from same wastage for the year	1, 186. 71
Leaving the net amount available, at the close of the year, June 30,	
1891, for recoinage, to be	61, 474. 84

The following table exhibits the distribution of minor coins during the fiscal year 1891:

Montana	4,940	1, 105			!

The several types and denominations of minor coins issued by the Philadelphia Mint since its establishment, the amount remelted by the mint, and the amount apparently outstanding June 30, 1891, are set forth in the following table:

Denominations.	Coined.	Remelted.	Ontstanding June 30, 1891.
Copper cents	\$1,562,887.44	\$376, 300. 44	\$1, 186, 587. 10
Copper half-cents *	39, 926. 11		
Copper nickel cents	2, 007, 720.00	763, 782, 78	1, 243, 937. 22
Bronze cents	6, 172, 897. 17	39, 871. 73	6, 133, 085, 44
Bronze 2-cent pieces	912, 020. 00	318, 926. 82	593, 093. 18
Nickel 3-cent pieces	905, 768. 52	230, 684. 74	675, 083. 78
Nickel 5-cent pieces	11, 545, 224. 55	111, 145. 60	11, 430, 483. 95
Total	23, 146, 443. 79	1,840,712.11	21, 262, 270. 67

^{*}There is no record of the melting of any old copper half-cents, but it is believed that few, if any, are in circulation.

APPROPRIATIONS AND EXPENDITURES.

The amounts specifically appropriated by Congress for the support of the mints and assay offices of the United States for the fiscal year ended June 30, 1891, aggregated \$1,030,351.50, against \$1,094,650 appropriated for the preceding fiscal year.

From specific appropriations there was expended \$1,022,806.28, leav-

ing unexpended \$7,545.22.

In addition, there was expended at the four coinage mints from the general appropriations contained in the act of February 28, 1878, and July 14, 1890, the sum of \$312,191.72.

There was also expended from the latter appropriations at the Treasury Department the sum of \$912 for cablegrams from London giving

the daily price of silver.

The total expenditures, therefore, for the mint service for the last

fiscal year aggregated \$1,335,910.

The appropriations and expenditures for the mint service, exclusive of the amount paid by the Treasury Department for cablegrams, are exhibited in the following table:

APPROPRIATIONS AND EXPENDITURES, 1891. APPROPRIATIONS.

On the 28th of September, 1891, I had the honor to submit for your consideration estimates of appropriations required for the support of the mint service for the fiscal year ended June 30, 1893.

These estimates, including the usual appropriation for "freight on bullion and coin," aggregated \$1,126,711.50, against appropriations for the same purposes for the current fiscal year aggregating \$1,126,761.50, a slight reduction.

EARNINGS AND EXPENSES OF THE REFINERIES OF THE COINAGE MINTS AND ASSAY OFFICE AT NEW YORK.

The amount collected from depositors during the fiscal year 1891 at the coinage mints and assay office at New York, as charges for parting and refining bullion, was \$199,946.79.

The law requires that the charges collected of depositors shall be used to defray the expenses of the operations of the refinery.

The total amount expended was \$215,767.63.

There was realized, however, during the year, from the sale of by-products from the refinery (blue vitriol and spent acid) the sum of \$19,480.42,

a legitimate gain to the refinery, which gains prior to the fiscal year 1885 were used in offsetting payments for acids.

1885 were used in offsetting payments for acids.

Since that date, under a decision of the First Comptroller, the proceeds of the sale of blue vitriol and spent acids, the by-products of the acid refinery, have not been available for reducing the expenses of the refinery, but are covered into the Treasury as a miscellaneous receipt.

Deducting from the gross expenditures the amount realized from the sale of these by-products, the *net* expenditures for parting and refining bullion were \$196,287.14, or \$3,659.65 less than the charges collected.

In my fiscal report attention was directed to the advisability of changing existing law, as construed by the accounting officers of the Department, so as to permit the use of moneys arising from the sale of refinery by-products in reducing the expenses of the refineries.

The purpose of the law was to make the refineries self-supporting, and this purpose is partly defeated by diverting legitimate gains, which in any metallurgical establishment would be used to offset losses and

expenses.

Under a separate heading in this report I invite attention to the

propriety and advisability of changing the law in this respect.

The total receipts for parting and refining bullion since July 1, 1876, the date at which the refineries were made self-supporting, have exceeded the gross expenditures for the same period by the sum of \$114,727.02, the latter amount standing to the credit of the appropriation for parting and refining bullion on July 1, 1891.

The receipts and expenses of the refineries for the fiscal year 1891

are exhibited in the following table:

CHARGES COLLECTED AND EXPENDITURES FOR PARTING AND REFINING BULLION, 1891.

Institutions.	Charges collected.	Gross ex- penditures.	Net expend- itures.
Mint at Philadelphia	\$18, 510. 74	\$19, 419. 83	\$19, 419. 83

		, , ,	

EARNINGS AND EXPENSES OF THE MINTS AND ASSAY OFFICES.

The total earnings of the mints and assay offices during the last fiscal year aggregated \$7,650,529.62, of which \$6,221,333.42 arose from seigniorage on the coinage of silver dollars, \$92,434.48 from seigniorage on subsidiary silver coins, and \$1,050,144.31 from seigniorage on minor coinage.

The remainder of the earnings were derived from charges collected from deposits, profits on the sale of medals and proof coins, from surplus bullion returned by the operative officers and recovered from the deposit melting room, and from the sale of old material and by-prod-

ucts.

The total expenditures and losses of all kinds, including the entire expenses for the support of the mints and assay offices and the acid refineries, the wastage of the operative departments and losses on the sale of sweeps, the expenses of distributing silver dollars, subsidiary

silver, and minor coins, aggregated \$1,661,139.83, leaving a net profit of earnings over expenditures for the fiscal year of \$5,989,389.79.

In the appendix will be found the usual table exhibiting in detail the earnings and expenditures under each classification and at each institution.

CLASSIFIED STATEMENT OF EXPENDITURES.

The following table exhibits the expenditures for the different classes of supplies (as well as for salaries and wages) at the institutions comprising the mint service during the fiscal year 1891, the expenses of the acid refineries being separated from the ordinary expenses of the mints.

MOVEMENT OF GOLD FROM THE UNITED STATES.

In the report of this Bureau for the fiscal year 1889, attention was directed to the heavy export of gold from the United States, commencing in May, 1888, and continuing, with some interruption, to the end of

July, 1889, aggregating \$61,435,989.

In considering this movement it was mentioned that in addition to the bars consigned directly to France, the bulk of the other gold shipments were intended for the Bank of France, and the causes which seemed to operate in producing this drain of gold were enumerated, among others the large expenditures by Americans at the Paris Exposition.

In the summer of 1890 a movement of gold from this country occurred, which, while by no means as serious in amount as its predecessor, was somewhat remarkable as a monetary transaction, considering the low rate of sight sterling exchange which obtained during the period.

This movement aggregated in a period of less than two months the

sum of \$15,672,982.

In February of the present year another movement of gold to Europe commenced which did not cease until near the close of July, exceeding in amount the exports of the fiscal year 1889, and causing by far the most serious loss of gold which this country has sustained for many years.

The total amount exported from the port of New York was

\$70,223,494.31.

The following table, which has been prepared with great care and research by the superintendent of the assay office at New York, exhibits the dates and value of the shipments, the names of the shippers, and the destination of the specie, and prevailing rates of sterling exchange:

FI 91----10

An examination of the above table discloses the very singular fact that of this large amount all but \$9,300,000 was shipped when the rate of sterling exchange was below the point (about \$4.886) at which gold shipments can be made without loss. The movement, therefore, must have been artificially stimulated by banks and bankers in Europe paying a premium on gold or making discounts to bill-drawers for cash remittances.

This was the result of a condition of affairs very unusual in the mer-

cantile world.

Ordinarily, large banking houses in New York, at certain seasons, can draw on correspondents in the financial centers of Europe sight and time exchange to a large amount in advance of expected commercial bills drawn a gainst shipments of produce attachments.

bills drawn against shipments of produce, etc.

The heavy losses incurred by European capitalists in South American countries, and the resulting financial disturbances and uneasiness produced thereby, not only greatly restricted this credit, but led to a continuous pressure, more or less strong, for gold to strengthen the reserves of the banks in England, France, and Germany.

For reasons connected with loan difficulties, Russia at the same time withdrew from the depositories of Western Europe large quantities of gold, thus adding greatly to the drain and increasing the pressure for the import of gold from the United States, this country being the only outside source from which gold in large amounts could be readily drawn.

The usual encouragement to the import of gold by the banks of Paris and Berlin in giving credit to importers for money on the day of

shipment from New York, was, of course, in operation.

It is a well-known fact that the Bank of England paid a premium for American gold coin, and increased that premium from time to time as

the financial crisis grew more threatening.

The rate of interest for money being above the normal price in Europe, investments in American securities were discouraged. Indeed, large amounts of the latter were returned in exchange for gold, some holders being doubtless influenced by the fear of the advent of a silver standard here.

The amount of silver exported was also greatly reduced by the increased monthly purchases by this Government, and gold took its place.

The relative amounts of exports and imports of produce and merchandise generally were such as to make our indebtedness larger than usual.

The gold carried out of the country to meet the expenses, by sea and land, of Americans spending their summers abroad, must have nearly if not quite equaled the year of the Paris Exposition, when such expenditures were estimated at over \$92,000,000.

The balance of trade, for these reasons, being against us, and the pressing need for gold in London, Paris, and Berlin, account very largely

for the very heavy exports of gold during these five months.

Desultory quantities of gold were returned to this country from Europe in the month of July of the present year, but by September the return movement was well under way and has continued to the present time. The following table exhibits the importations of gold (over half our own coin returned), from July 1 to November 1, 1891:

IMPORTS OF GOLD COIN AND GOLD BULLION AT NEW YORK FROM JULY 1, 1891, TO OCTOBER 31, 1891.

Month.	Country.	United States coin.	Foreign coin.	Foreign bul- lion.	Total.

^{*} Includes \$20,967.07 United States assay office bars.

With the return of confidence in Europe, investors and others there have bought heavily in American securities, and these investments, together with the large exports of breadstuffs and other materials from the United States this fall and winter, must necessitate additional shipments of gold to this country, and it is believed that the movement of specie to our shores now in progress will continue, with some interruptions, for some months yet and in increasing amounts.

IMPORTS AND EXPORTS OF THE PRECIOUS METALS.

Gold.—The value of the gold bullion imported into the United States during the fiscal year 1891—all foreign gold—was \$2,105,034, of which \$1,073,243 came from Mexico, \$399,472 from British Columbia, \$324,010 from Colombia, \$145,995 from Great Britain, and the remainder from countries of Central America and South America.

Gold was contained in imported silver-lead ores of the value of \$68,742.

Foreign gold ores, of the invoiced value of \$214,803, were imported into the United States for reduction, all except a small amount coming from Mexico.

Foreign gold coins were imported of the value of \$13,303,387, of which \$5,851,526 were from Australia, \$2,447,901 from Great Britain, \$2,375,133 from Cuba, \$1,410,385 from Germany, \$472,850 from France, \$328,208 from San Domingo, \$154,592 from Mexico, and the remainder from various countries.

United States gold coins were returned to this country during the year of the value of \$2,824,146.

The total imports of gold into the United States during the fiscal year may be summed up as follows:

GOLD IMPORTS, 1891.

Items.	Amount.
Foreign bullion.	\$2, 105, 034
Foreign coin.	13, 303, 387
Foreign ores	• 214, 803
Foreign gold in silver-lead ores	68,742
Total foreign	15, 691, 966
United States coin	2, 824, 146
Total imports	18, 516, 112

The exports of domestic gold bullion aggregated \$17,234,651, of which \$15,118,702 were United States bars and \$2,115,949 private bars.

Of the gold bullion exported, \$12,901,547 were consigned to Great Britain, \$4,100,877 to Germany, \$209,010 to France, \$13,217 to Hongkong, and \$10,000 to British West Indies.

In addition \$11,770 in foreign gold bullion was reëxported to Great Britain, while \$34,542 represented the invoiced value of the exports of domestic gold ores, and \$209 of the gold in foreign ores exported.

United States gold coin was exported of the value of \$67,704,900, of which \$35,285,950 was consigned to Great Britain, \$14,450,005 to France, \$12,429,500 to Germany, and the remainder to various countries.

Foreign gold coins were reexported during the year of the value of \$1,411,333, of which \$1,027,196 went to Cuba, \$327,889 to Venezuela, and the remainder to various countries.

The movement of gold from the United States during the last fiscal year may be summed up as follows:

GOLD EXPORTS, 1891.

Items.	Amount.
United States bars	\$15, 118, 702
Other domestic bullion	2, 115, 949
Domestic coin	
Gold contained in copper matte	
Domestic ores	34, 542
Total domestic	85, 039, 568
Foreign bullion re-ëxported	
Foreign coin re-ëxported	
Foreign ores re-ëxported	
Total foreign	1, 423, 312
Total gold exports	86, 462, 880

From the above tables it will be seen that there was a net loss of gold to the United States, by excess of exports over imports, of \$67,946,768. Silver.—The commercial value of the foreign silver bullion imported into the United States during the fiscal year was, as registered at the custom-houses, \$6,321,977, of which \$4,848,771 consisted of unparted

bars from Mexico, \$838,992 commercial bars from Germany, \$388,304

commercial bars from England, and the remainder small lots from various countries of this continent.

In addition to the imports of silver bars, silver ores were imported into the United States for reduction, of the invoiced value of \$8,953,608.

As usual, the bulk of these ores, \$8,679,845 came from Mexico, \$254,-270 from the British Possessions in North America, and the remainder in small lots from other countries of this continent.

The silver ores imported into the United States were what is known as silver-lead ores, containing in addition to the silver contents large

quantities of metallic lead and some gold and copper.

The following valuable table, compiled by the Chief of the Bureau of Statistics from special statements furnished by collectors of customs, exhibits approximately the quantity and value of the different metals contained in these ores.

SILVER ORE IMPORTED INTO THE UNITED STATES DURING THE FISCAL YEAR 1891, WITH THE QUANTITIES AND VALUES OF GOLD, SILVER, LEAD, AND COPPER CONTAINED, IN THE ORE, AS FAR AS COULD BE ASCERTAINED.

^{*}No details obtainable.

[†]Includes value of gold and silver.

Note.—The data in this table have been obtained from special reports by the collectors of customs, and although necessarily incomplete in some details are believed to be valuable. This table will not in the total value of ore compare with the stated publications which latter represent only the value of free silver ore and exclude dutiable contents, such as copper, and, since October 5, 1899, lead. The value of the lead is estimated at 3½ cents per pound, the average value of bar lead at New York less 1 cent.

From the above table it will be seen that the approximate value of the silver contained in these ores was \$8,252,036 and of the gold \$68,742, while they contained in addition 40,289,803 pounds of metallic lead, of the invoiced value of \$1,410,143 (against \$905,470 in the previous fiscal year), and 468,384 pounds of copper, of the value of \$25,129.

Foreign silver coins were imported of the value of \$11,379,663, of which \$8,187,918 were Mexican dollars and the remainder principally

South American coins.

Our own silver coins, principally subsidiary pieces, were returned during the year of the value of \$325,240.

The imports of silver into the United States during the fiscal year may be summed up as follows:

IMPORTS OF SILVER, 1891.

Items.	Amount.
Foreign bullion (commercial value)	\$6, 321, 977
Silver in foreign ores (commercial value)	8, 252, 036
Foreign silver coin	11, 379, 663
Total foreign	25, 953, 676
United States silver coin	325, 240
Total silver imports	26, 278, 916

Domestic silver bars of the value of \$13,797,391 were exported from the United States during the fiscal year, of which \$12,722,398 were consigned to England.

In addition to exports of domestic silver bullion, copper matte was exported from the port of Baltimore to England, for reduction, con-

taining silver of the commercial value of \$838,388.

The following letter from the collector of the port of Baltimore in regard to the character of this matte and where it was produced will be found interesting:

Custom-house, Baltimore, Md., Collector's Office, September 8, 1891.

SIR: In reply to your letter of the 4th instant requesting me to furnish you a statement of the amount of gold and silver contained in silver ores, copper matte, and argentiferous matte exported from the port of Baltimore, during the fiscal year ended

June 30, 1891, I inclose a transcript, showing the amount in copper, silver, and gold. I would say that the "Baltimore Copper Smelting and Rolling Company," the principal exporters of copper ores, now make no distinction between copper matte and silver-copper matte, it being all exported from this custom-house as silver-copper matte, at the uniform basis of 60.5 per cent pure copper, 35 ounces pure silver, and 0.14 of pure gold.

The locality from which the ore is received is the Anaconda mine, State of Montana.

Very respectfully,

H. LINGENFELDER. Special Deputy Collector.

The DIRECTOR OF THE MINT, Washington, D. C. TRANSCRIPT OF THE EXPORTATION OF COPPER MATTE AND SILVER-COPPER MATTE FROM THE PORT OF BALTIMORE DURING THE FISCAL YEAR ENDED JUNE 30, 1891.

[Silver-copper matte calculated on a basis of 60\frac{1}{2} per cent fine copper, 35 ounces pure silver, and 0.14 ounce gold per ton.]

Year.	Pounds.	Tons.	Pounds fine copper.	Ounces of silver.	Ounces of gold.
1890.					
July	3, 662, 915	1, 831. 46	2, 216, 066	64, 101. 1	256.40
August	3, 823, 297	1, 911. 64	2, 313. 080	66, 907. 4	267.63

May	2, 222, 000	1, 111	1, 344, 310	38, 885	155. 54

[Copper matte calculated on a basis of $60\frac{1}{2}$ per cent fine copper, 32 ounces silver, and 0.10 ounce pure gold per ton.]

Year.	Pounds.	Tons.	Pounds fine copper.		Ounces of gold.
1890. July	1, 216, 000	608	735, 680	19, 456	60, 8
AugustSeptember	1,304,000	652 232	788, 920 280, 720	20, 864 7, 420	65, 2 23, 2

The quantity of gold contained in this matte was approximately 3,167.37 fine ounces, of the value of \$65,475, and the quantity of silver 802,285 fine ounces, worth, at the average price of silver for the year, \$838,388.

United States silver coins were exported of the value of \$236,323.

Foreign silver bullion was reexported of the value of \$29,914, and foreign silver ores of the value of \$104,175.

Foreign silver coin was reëxported of the value of \$8,527,360.

The exports of silver during the last fiscal year may be recapitulated as follows:

EXPORTS OF SILVER, 1891.

Items.	Amount.
Domestic bars (commercial value)	\$13, 797, 391
Silver contained in copper matte	838, 388
United States subsidiary silver coin	236, 323
Total domestic	14, 872, 102
Foreign silver coin reëxported	
Silver in foreign ores reëxported	
Foreign silver bullion reëxported	
Total foreign	8, 661, 449
Total silver exports	23, 533, 551

From the above table it will be seen that there was a net gain of silver to the United States during the year, by excess of imports over

exports, of the value of \$2,745,365.

In the Appendix will be found the usual tables exhibiting the movements of the precious metals to and from the United States each month during the year, and also tables showing the countries from which the precious metals were shipped to the United States and the countries to which the precious metals exported from the United States were consigned.

STOCK OF MONEY IN THE UNITED STATES.

It has been the practice to present in the reports of this Bureau an estimate, based upon official tabulations, of the stock of gold and silver

coin in the country.

The foundation of these estimates was the *actual* amount of gold in the Treasury and in National banks on June 30, 1872, with an addition of \$20,000,000 as the minimum amount of gold coin in circulation in the States of the Pacific slope. No allowance was made for the amount in circulation in the States east of the Rocky Mountains.

Since that date the official estimates, presented from year to year, have been prepared, by adding to the actual stock June 30, 1872, the annual coinage of the mints (less the amount of our own coin melted for recoinage), and the gain (or loss) by import and export of our own coin, with an annual allowance for melting of United States coin for use in the arts and industries.

In continuation of previous tabulations, the following estimate of the stock of United States coin in the country on July 1, 1891, is presented:

OFFICIAL TABLE OF STOCK OF COIN IN THE UNITED STATES JULY 1, 1891.

Items.	Gold.	Silver.	Total.
Estimated stock of coin July 1, 1890	\$629, 932, 449	\$446, 251, 771	\$1, 076, 184, 220
Coinage, fiscal year 1891	24, 172, 202	38, 272, 620	62, 444, 222
Net imports of United States coin, fiscal year 1891		88, 917	88, 917
Total	654, 104, 651	484, 612, 708	1, 138, 717, 359
Loss:			
Net exports of United States coin for fiscal year 1891	64, 880, 754	·	64, 889, 754
United States coin melted for recoinage, fiscal year 1891.	583, 847	904, 740	1, 488, 587
United States coin used in the arts, fiscal year 1891	3, 500, 000	200, 000	3, 700, 000
Total	68, 964, 601	1, 104, 740	70, 069, 341
Estimated stock of coin July 1, 1891	585, 140, 050	483, 507, 968	1, 068, 648, 018

In addition to the gold and silver coin in the country July 1, 1891, gold and silver bullion belonging to the Government was stored in the mints and assay offices, at that date, valued as follows:

BULLION IN MINTS AND ASSAY OFFICES, JULY 1, 1891.

Metals.	Value.
Gold	
Silver (cost)	<u> </u>

The stock of silver bullion outside Government vaults, is not known except the bars with the Mercantile Safe Deposit Company in New York City, which, according to the report of that company to the New York Stock Exchange, contained, at the close of business June 30, 1891, to 5,605,470 ounces of fine silver, of the market value of \$5,675,538.

Adding the value of the silver bullion in the vaults of the Mercantile Safe Deposit Company and the value of the gold and silver bullion in Government institutions to the stock of coin, the total metallic stock of the United States, July 1, 1891, was as follows:

METALLIC STOCK, JULY 1, 1891.

Coin and bullion.	Value.
Gold	\$646, 582, 852
Silver (bullion in mints and Mercantile Safe Deposit Company)	522, 277, 740
Total	1, 168, 860, 592

While the total metallic stock was increased during the year by the sum of \$10,085,644, there was a loss of gold of \$48,980,177, and a gain of silver of \$59,065,821, as compared with the stocks of these metals respectively at the commencement of the year.

This loss of gold was due to the heavy export of United States gold

coin during the spring and summer of 1891.

The ownership of the stock of United States coin and gold and silver bullion in the country is exhibited in the following table:

OWNERSHIP OF GOLD AND SILVER IN THE UNITED STATES, JULY 1, 1891.

^{*} Includes \$6,706,000 gold clearing house certificates.
† Includes \$3,291,922 of their own notes held by different national banks.

The value of the gold and silver bullion in the mints and assay offices at the same date was as follows:

GOLD AND SILVER BULLION IN MINTS AND ASSAY OFFICES, NOVEMBER 1, 1891.

Metals.	Cost value.
Gold	\$74, 753, 259 48, 482, 492
Total	123, 235, 751

The market value of the silver bullion reported by the Mercantile Safe Deposit Company to the Stock Exchange as in its vaults at the close of business October 21, 1801, was \$2,082,240.

of business October 31, 1891, was \$3,982,249.

Adding the visible stock of bullion—that is, gold and silver bullion in the mints and silver bullion in the vaults of the Mercantile Safe Deposit Company—to the stock of coin, the total metallic stock on November 1, 1891, was approximately as follows:

METALLIC STOCK, NOVEMBER 1, 1891.

Coin and Bullion.	Amount.
Gold	\$671, 139, 531 539, 241, 624
Total	1, 210, 381, 155

The following table exhibits the amount of paper and metallic money in the United States and the location of the same on November 1, 1891:

LOCATION OF THE MONEYS OF THE UNITED STATES, NOVEMBER 1, 1891.

Total	45, 763, 787	1, 033, 481, 197	1, 079, 244, 984	

From an examination of this table it will be seen that the amount of metallic and paper money in circulation, that is outside of the Treasury vaults, and exclusive of the stock of silver bullion in New York City, was \$1,564,492,161 against \$1,499,004,121 at the same date last year, showing an increase in the amount of money in actual circulation in the United States of \$65,488,040.

The following table exhibits, approximately, the stock of gold and silver and "uncovered" paper money in the United Kingdom, France, Germany, and the United States at the present time, and the amount

per capita.

The stocks of gold and silver are of course estimates made by the best recognized authorities. In the case of Great Britain the estimate is that of the deputy master of the royal mint, and in the case of Germany it is based upon one by Dr. A. Soetbeer.

ESTIMATED STOCK OF GOLD AND SILVER AND ACTUAL AMOUNT OF "UNCOVERED" PAPER MONEY, IN THE UNITED KINGDOM, FRANCE, GERMANY, AND THE UNITED STATES.

For the purpose of ascertaining the value of gold and silver bars furnished by private works for industrial purposes, a circular letter, inclosing a form of report, was addressed to thirty-nine firms in the United States, believed to comprise all the private works engaged in the business of making gold and silver bars.

Replies have been received from thirty-eight of the thirty-nine firms addressed, of which number sixteen reported that they had not manufactured any bars for industrial use during the year, while twenty-two furnished a statement in detail showing the value and composition of the bars so furnished.

The returns on the part of private works are more complete than for any previous inquiry, showing that much popular interest is taken in this important subject. The thanks of the Bureau are due, and are hereby extended, to the officers in charge of private works in the United States who have so courteously furnished the information asked for.

The result of this inquiry upon the part of private works is exhibited in the following table:

BARS FOR INDUSTRIAL USE FURNISHED GOLDSMITHS AND OTHERS BY PRIVATE RE-FINERIES DURING THE CALENDAR YEAR 1890.

	Gold bars manufactured. Silver bars manufactured				
Material used.	Finc ounces.	Valne.	Fine ounces.	Coining value.

Of the bars furnished by private works to goldsniths and others for industrial uses \$2,083,177 in gold, and \$480,297 in silver, were what are known as "United States bars," that is, bars bearing the stamp of a mint or Government assay office. As these are included in the bars reported by Government institutions as issued for the same purpose, to prevent duplication the value of these bars must be deducted from the totals reported by private works.

Eliminating, therefore, the value of "United States bars" furnished by private works, the following table exhibits the work of private refineries in this line during the calendar year 1890:

BARS FOR INDUSTRIAL USE (EXCLUSIVE OF GOVERNMENT BARS), FURNISHED GOLD-SMITHS AND OTHERS BY PRIVATE REFINERIES DURING THE CALENDAR YEAR 1890.

	Gold bars ma	nufactured.	Silver bars manufactured.		
Material used.	Fine ounces.	Value.	Fine cunces.	Coining value.	
Domestic bullion	57, 026. 800	\$1, 178, 848	2, 882, 251. 97	\$3,726,548	
United States coin	20, 060. 870	414, 695	600.18	776	
Old plate, jewelry, and other old material	41, 850. 857	865, 134	175, 279. 50	226, 624	
Total	118, 938, 527	2, 458, 677	3, 058, 131, 65	3, 953, 948	

The following is a summary of the work of Government and private institutions in the preparation of bars for industrial use during the calendar year 1890:

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS DURING THE CALENDAR YEAR 1890, AND CLASSIFICATION OF THE MATERIAL USED.

Material.	Gold.	Silver.	Total.
Domestic bullion	\$10,717,472	\$7, 143, 635	\$17, 861, 107
United States coin		2,024	451, 965
Foreign bullion and coin	362, 062	1, 245, 419	1,607,481
Old material	3,076,426	640, 100	3, 716, 526
Total	14, 605, 901	9, 031, 178	23, 637, 079

For the purpose of comparison, a table exhibiting the work of Government institutions and private refineries in this line during the calendar year 1889 is here presented:

GOLD AND SILVER BARS FURNISHED FOR USE IN MANUFACTURES AND THE ARTS DURING THE CALENDAR YEAR 1889, AND CLASSIFICATION OF THE MATERIAL USED.

Material.	Gold.	Silver.	Total.
United States coin	\$426, 879	\$2,373	\$429, 252
Domestic bullion	9, 686, 827	7, 297, 933	16, 984, 760
Foreign coin and bullion	291, 258	657, 997	949, 255
Old material	3, 218, 971	611, 015	3, 829, 986
Total	13, 623, 935	8, 569, 318	22, 193, 253

Comparing the totals for the two years, it will be seen that the quantity of both gold and silver employed for industrial purposes is steadily increasing in the United States.

The value of the gold bars reported as furnished for industrial use during the calendar year 1889 was \$13,623,935, and in 1890, \$14,605,901, an increase of \$981,966, and silver, \$9,031,178 in 1890 against \$8,569,318

in the preceding year.

The amount of gold coin reported as used in the composition of bars for industrial uses was only \$449,941, against an estimated melting down annually of \$3,500,000 of our gold coin for industrial uses, based upon four censuses taken for different years by this Bureau as to the direct employment of the precious metals by goldsmiths and others in the manufacture of watches, jewelry, and gilding. The amount of United States silver coin reported as melted in the composition of bars for industrial use during the last year was only \$2,024, against a reported melting down of silver coin by jewelers and others, based upon the censuses referred to, of \$200,000 annually.

As is well known, the melting of coin for industrial uses is principally upon the part of jewelers, and not by private works manufacturing bars. If, therefore, there has been no falling off in the amount of coin used in repairs and jewelry, the value of the precious metals used in the industrial arts in the United States during the calendar year 1890 approximated \$18,105,901 gold, and \$9,231,178 silver (coining value), of which

\$10,717,472 gold and \$7,143,635 silver was new bullion.

It has been the practice of the Bureau to solicit information from private refineries as to the preparation of bars of gold and silver only for calendar years. The information covering the last fiscal year is therefore confined to Government institutions.

The following tables exhibit the quantity and value of the bars of gold and silver issued by Government institutions for industrial uses during the fiscal year ended June 30, 1891.

BARS ISSUED FOR USE IN THE INDUSTRIAL ARTS, BY THE UNITED STATES ASSAY OFFICE AT NEW YORK, DURING THE FISCAL YEAR 1891.

Material used.	Go	ld.	Silver.		
Material used.	Fine ounces.	Value.	Fine ounces.	Value.	
United States coin	74. 157	\$1,532.96	559. 90	\$723.92

Total	55, 352. 379	1, 144, 235. 22	21, 925. 92	28, 348. 61	

BARS ISSUED BY THE UNITED STATES ASSAY OFFICE AT NEW YORK AND THE UNITED STATES MINT AT PHILADELPHIA, FOR USE IN THE INDUSTRIAL ARTS, DURING THE FISCAL YEAR 1891.

25:4: 1:11	Go	ld.	Silver.		
Material used.	Fine ounces.	Value.	Fine ounces.	Value.	
United States coin	1, 805, 932	\$37 , 331. 93	737, 20	\$953. 15	
Domestic bullion	460, 878. 119	9, 527, 196. 27	2, 852, 594. 45	3, 688, 202, 90	
Foreign material	18, 060, 379	373, 341. 16	863, 681. 94	1, 116, 679. 67	
Old plate, jewelry, etc	112, 704. 522	2, 329, 809. 21	339, 292. 25	438, 680. 88	
Total	593, 448. 952	12, 267, 678, 57	4, 056, 305. 84	5, 244, 516. 60	

Comparing the totals of the above tables with the work of the preceding fiscal year, it appears that the gold bars paid out at these two institutions for use in the industrial arts during the fiscal year 1891 aggregated \$12,267,678.57 against \$11,639,980 in the preceding fiscal year, an increase of \$627,698 in gold. For silver, the amount for the fiscal year 1891 was \$5,244,516.60 against \$5,312,349 in the preceding fiscal year, a falling off of \$67,833.

PRODUCT OF GOLD AND SILVER.

The statistics of the product of gold and silver in the United States were presented for the calendar year 1890 in a special report to Congress.

These statistics are collected only for calendar years.

The product of gold and silver from the mines of the United States, exclusive of foreign bullion and ores reduced in this country, was as follows:

PRODUCT OF MINES OF THE UNITED STATES, 1890.

Metals.	Fine ounces.	Commercial value.	Coining value.
Gold		\$32, 845, 000 57, 225, 000	\$32, 845, 000 70, 464, 645
Total			

The following tables exhibit, approximately, the product of gold and silver from the mines and smelters of the United States during the calendar year 1890, including the amount obtained from foreign material treated.

GOLD PRODUCT OF REFINERIES IN THE UNITED STATES, 1890.

Items.	Fine ounces (troy).			
Louing.	Domestic.	Foreign.	Total.	
Reported product of private refineries in the United States	867, 584	44,078	911, 662

In the Appendix will be found a table showing the annual product of gold and silver from the mines of the United States since 1792.

A table will also be found, compiled principally from information furnished at the instance of this Bureau by foreign governments through our diplomatic representatives abroad, and revised from the latest returns at hand, exhibiting the quantity and value of the gold and silver product of the principal producing countries of the world for the calendar years 1888, 1889, and 1890.

In the preparation of this table, in cases where official estimates or reports were not at hand, either the product officially reported for the preceding or some near year has been used by way of estimate, or the product as ascertained from other reliable sources; but in cases where the product credited a producing country is not an official estimate this fact, as well as the data upon which the estimate is based, has been stated in a footnote.

The value of silver in this table, as in similar tables for preceding years, published in the reports of this Bureau, has, for the purpose of uniformity, been reckoned at the coining rate in silver dollars, viz, \$1.2929 per fine ounce.

The following table exhibits the product of the precious metals in the world for each calendar year, since 1873. The silver product is given at its commercial value, calculated at the average market price of silver each year, as well as at its coining value:

PRODUCT OF GOLD AND SILVER IN THE WORLD, CALENDAR YEARS 1873-1890.

			Silver.	
Calendar years.	Gold.	Fine ounces (troy).	Commercial value.	Coining value.
1873	\$96, 200, 000	63, 267, 000	\$82, 120, 000	\$81, 800, 00
1874	90, 750, 000	55, 300, 000	70, 673, 000	71, 500, 00

WORLD'S COINAGE.

In the Appendix will be found a table exhibiting the coinage of each nation, so far as reported, during the calendar years 1888, 1889, and 1890.

The following summary is presented:

WORLD'S COINAGE.

Calendar years.	Gold.	Silver.
1888	168, 901, 519	138, 444, 595
1890		149, 405, 099

It should be remembered that the coinage executed does not represent the amount of new gold and silver, of current production, made into coins during the year, for the reason that the coinages reported include the value of domestic and foreign coins melted for recoinage as well as old material, plate, etc., used in coinage.

Governments were requested to report, in addition to the coinage of gold and silver, the data covering recoinages, but failed to do so in many

instances.

The following table of recoinages for the calendar years 1889 and 1890 has been prepared from information furnished by foreign governments.

RECOINAGES REPORTED BY CERTAIN COUNTRIES, CALENDAR YEARS 1889 AND 1890.

	18	89.	1890.

VALUE OF FOREIGN COINS.

The law requires:

That the value of foreign coins as expressed in the money of account of the United States shall be that of the pure metal of such coin of standard value; and the values of the standard coins in circulation of the various nations of the world shall be estimated quarterly by the Director of the Mint, and be proclaimed by the Secretary of the Treasury immediately after the passage of this act and thereafter quarterly on the 1st day of January, April, July, and October in each year.

In accordance with the above requirement the values of foreign coins were estimated by me, and proclaimed by the Secretary of the Treasury, on January 1, April 1, July 1, and October 1, 1891, to be as follows:

VALUES OF FOREIGN COINS, JANUARY 1, 1891.

Country.	Standard.	Monetary unit.	Value in terms of United States gold dollar.	Coins.

In estimating the value of foreign coins the same practice has been followed as heretofore. The value of the monetary unit of countries having a gold or double standard was ascertained by comparing the amount of pure gold in such unit with the pure gold in the United States dollar, and the silver coins of such countries were given the same valuation as the corresponding gold coins with which they are interchangeable by law.

In countries having a silver standard, the values of the silver coins were fixed at the commercial value of the pure silver contained in such coins.

SPECIAL TESTS OF COINS.

The regulations governing the mint service provide for special assays of current coinage of the mints, as follows:

SEC. 9. From the first and two subsequent deliveries in each week of gold and silver coins of each denomination of coin delivered by the coiner, specimen pieces, two in number, shall be taken, certified, and inclosed by the superintendent and assayer in the same manner as above prescribed for trial by the annual assay commission, when they shall be promptly forwarded to the Director of the Mint by regis-SEC. 10. The value of the special assay coins shall be returned at the end of each six months (June 30 and December 31) to the proper mints.

In order to enable the Director to know from day to day that the coins being issued at the mints conform in all respects to the requirements of law, a laboratory was established in 1878 on the fourth floor of the Treasury Department, which has proved a valuable adjunct to the Bureau.

Special examinations are also made in the laboratory, for the Treasury Department, of coins and other material for the purpose of detecting

and preventing counterfeiting, and for custom requirements.

During the calendar year 1890 there were tested in the laboratory of this Bureau 196 gold coins and 1,010 silver coins, all of which were found to be within the legal requirements in regard to weight, fineness. and mechanical perfection.

Tables will be found in the appendix showing the fineness of the coins assayed and the percentage of coins of various degrees of fine-

ness.

ANNUAL TRIAL OF COINS.

The following commissioners were appointed under the provisions of section 3547 of the Revised Statutes, to test the weight and fineness of the gold and silver coins of the coinage of the calendar year 1890, reserved for that purpose by the coinage mints, viz: Hon. Nelson W. Aldrich, United States Senate; Hon. Thomas H. Carter, House of Representatives; Messrs. B. A. Gould, Massachusetts; Cabell Whitehead, Virginia; Nelson F. Evans, Pennsylvania; Frank A. Leach, California; G. R. Metten, Montana; John H. Appleton, Rhode Island; C. W. Moore, Idaho; E. S. Willcox, Illinois; Irwin Shepard, Minnesota; H. W. Cannon, New York; J. M. Bailey, jr., South Dakota; W. D. Éwing, Indiana; Charles W. Pavey, Illinois; Daniel M. Houser, Missouri.

The Commission met in Philadelphia on February 11, 1891, with the exception of Hon. N. W. Aldrich and W. D. Ewing, all of the commissioners appointed being present, together with the following ex officio commissioners: Hon. William Butler, United States judge for the eastern district of Peunsylvania, Hon. E. S. Lacey, Comptroller of the Currency, and Herbert G. Torrey, assayer of the United States assay

office at New York.

The committee on counting reported:

The packages containing the pieces reserved by the several mints for the trial of coins, in accordance with section 3539, Revised Statutes, were delivered to us by the superintendent of the mint at Philadelphia.

The number of coins corresponded with the record kept by the Director of the

Mint, of all transcripts sent him by the several superintendents,

The coins reserved were as follows:

PIECES RESERVED FOR ANNUAL TEST, 1890.

	Mints.		Pieces.	Value.

The committee on assaying reported:

No coin among those examined was found to deviate from the standard fixed by law beyond the legal tolerance, but they were in all cases far within the legal allowance.

The committee on weighing reported:

The committee on weighing pronounces the examination of the weights of the coinage of the several mints during the year 1890 to be satisfactory.

The result of the annual test is contained in the following resolution adopted by the Commission:

Resolved, That the Assay Commission, having examined and tested the reserved coins of the several mints for the year 1890, and it appearing that these coins do not differ from the standard fineness and weight by a greater quantity than is allowed by law, the trial is considered and reported satisfactory.

CHANGES IN REGULATIONS.

On the 28th of September, 1891, an order was issued, approved by the Secretary of the Treasury, increasing the charge for small gold bars at the United States assay office at New York from 4 to 5 cents per hundred dollars in value.

Heretofore it has been the practice to charge 4 cents per hundred dollars in value for the manufacture of fine gold bars, and to give depositors, in payment of their deposits, gold bars as nearly approximating the value of their deposits as possible, the smallest being about \$5,000 in value.

In many cases these bars were redeposited for small bars for jewelry and manufacturing purposes, and it has been customary to charge for this exchange, that is, for furnishing small gold bars in the place of large ones, the same amount as the original bar charge, 4 cents per hundred dollars in value.

Under the new regulations small gold bars will be furnished depositors originally when they desire it, and the charge will be 1 cent more

per hundred dollars in value than for large bars, to cover the additional cost of manufacturing small bars.

On the 29th of September, 1891, the following regulation was issued:

In cases of deposits of foreign gold coin or foreign gold bars at the United States assay office at New York, such approximation of the value of the bullion delivered as, in the discretion of the Superintendent, may be regarded safe and proper, not to exceed 90 per cent of the value, will be paid, pending melt and assay.

The purpose of this regulation was to encourage the importation of foreign gold by allowing depositors approximate spot cash value for foreign gold as soon as received at the counter of the assay office, thus saving interest on the value of the deposit pending melt and assay.

NEW DESIGNS OF UNITED STATES COINS.

In my last annual report attention was directed to the inelegance of the designs upon some of the coins of the United States and the absence of any authority of law to change an existing design.

The following bill, introduced at my request in the Fifty-first Congress, and which met with the approval of the Secretary of the Treasury,

became a law September 26, 1890:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section thirty-five hundred and ten of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as fol-

lows:
"Sec. 3510. The engraver shall prepare from the original dies already authorized all the working dies required for use in the coinage of the several mints, and, when new coins, emblems, devices, legends, or designs are authorized, shall, if required by the Director of the Mint, prepare the devices, models, hubs, or original dies for the same. The Director of the Mint shall have power, with the approval of the Secretary of the Treasury, to cause new designs or models of authorized emblems or devices to be prepared and adopted in the same manner as when new coins or devices are authorized. But no change in the design or die of any coin shall be made oftener than once in twenty-five years from and including the year of the first adoption of the design, model, die, or hub for the same coin: Provided, That no change be made in the diameter of any coin: And provided further, That nothing in this section shall prevent the adoption of new designs or models for devices or emblems already authorized for the standard silver dollar and the five-cent nickel piece as soon as practicable after the passage of this act. But the Director of the Mint shall, nevertheless, have power, with the approval of the Secretary of the Treasury, to engage temporarily for this purpose the services of one or more artists, distinguished in their respective departments of art, who shall be paid for such service from the contingent appropriation for the mint at Philadelphia." Approved, September 26, 1890.

In pursuance of the authority contained in this act, the following circular was addressed to artists and relief designers in the United States inviting designs for the obverse and reverse of the silver dollar, and for the obverse only of the half dollar, quarter dollar, and dime, and offering a reward not to exceed \$500 for each design accepted.

CIRCULAR LETTER TO ARTISTS.

TREASURY DEPARTMENT, BUREAU OF THE MINT,

Washington, D. C., April 4, 1891.
Under the provisions of the act of September 26, 1890, authorizing the Director of the Mint, with the approval of the Secretary of the Treasury, to cause new designs or models of authorized emblems or devices to be prepared and adopted for the coins of the United States, it has been decided to invite designs for the obverse and reverse of the silver dollar, and for the obverse only of the half dollar, quarter dollar, and

The following are the conditions under which designs will be considered:

1. They must be presented in the form of models or medallions in plaster, the models to be from 4 to 8 inches in diameter; a separate design to be submitted for the obverse and reverse of the silver dollar, and separate designs for the obverse of the half dollar, quarter dollar, and dime.

2. The models must be in what is known as "low relief," suitable for coins.

3. Each model submitted must be complete, with the denomination of the coin, and only such inscriptions as are required by law, together with the date (year).

4. The models must be submitted under seal to the Director of the Mint on or

before June 1, 1891.

5. An award not to exceed \$500 will be made for each design accepted.

Full facilities will be afforded at the Mint at Philadelphia to artists who may desire to examine coins belonging to the cabinet of that institution.

The following is a list of the coins for which new designs are proposed, with the

diameter and thickness of each:

DIAMETER AND THICKNESS OF THE FOLLOWING SILVER COINS.

	Denominations.		Diameter (20ths of an inch).	Thickness (1,000ths of an inch).
Standard dollar			30	80
Half dollar	••••		24	- 57
Quarter dollar			19	45
Dime	,	•••	14	32

Extracts from the laws prescribing the devices and legends are attached hereto. Very respectfully,

EDWARD O. LEECH, Director of the Mint.

Approved: CHARLES FOSTER, Secretary of the Treasury.

STATUTORY LAWS IN RESPECT TO THE DEVICES AND EMBLEMS UPON THE COINS OF THE UNITED STATES.

SEC. 3517, R.S. Upon the coins there shall be the following devices and legends: Upon one side there shall be an impression emblematic of liberty, with an inscription of the word "Liberty" and the year of the coinage, and upon the reverse shall be the figure or representation of an eagle, with the inscriptions "United States of America" and "E Pluribus Unum," and a designation of the value of the coin; but ou the gold dollar and three-dollar piece, the dime, five, three, and one cent piece, the figure of the eagle shall be omitted.

(Applicable to the half dollar, quarter dollar, and dime.) SEC. 13, act approved January 18, 1837. That upon the coins struck at the Mint there shall be the following devices and legends: Upon one side of each of said coins there shall be an impression emblematic of liberty, with an inscription of the word "Liberty" and the year of the coinage; and upon the reverse of each of the gold and silver coins there shall be the figure or representation of an eagle, with the inscription "United States of America," and a designation of the value of the coin; but on the reverse of the dime and half dime, cent and half cent, the figure of the eagle shall be omitted.

(Applicable to the silver dollar.)

SEC. 18, act approved February 12, 1873. The Director of the Mint, with the approval of the Secretary of the Treasury, may eause the motto "In God we trust" to be inscribed upon such coins as shall admit of such motto, and any of the foregoing inscriptions may be on the rim of the gold and silver coins.

NOTE.—The motto "In God we trust" will be inscribed upon the silver dollar,

the half dollar, and quarter dollar, but not upon the dime.

By invitation of the Secretary of the Treasury the following gentlemen met in the office of the Director of the Mint, in Washington, on June 3, 1891, and passed upon the designs submitted, viz: Augustus St. Gaudens, sculptor, of New York City; Henry Mitchell, engraver, of Boston, and Charles E. Barber, engraver, United States Mint at Philadelphia,

The following is the report of the committee:

TREASURY DEPARTMENT, BUREAU OF THE MINT,
Washington, D. C., June 3, 1891.

DEAR SIR: We would respectfully report that in conformity with your written request we have opened in the presence of the Director of the Mint the new designs or models submitted for the silver coins of the United States, under Department circular of April 4, 1891, and have carefully examined the same.

We are of the opinion that none of the designs or models submitted are such a decided improvement upon the present designs of the silver coins of the United States

we worthy of adoption by the Government.

We would respectfully recommend that the services of one or more artists distinguished for work in designing for relief be engaged at a suitable compensation to prepare for the consideration of the Department new designs for the coins of the United States.

Very respectfully,

HENRY MITCHELL. AUGUSTUS ST. GAUDENS. CHAS. E. BARBER.

I concur in the findings. Edward O. Leech, Director.

Hon. Charles Foster, Secretary of the Treasury.

New designs for the subsidary coins—the half dollar, quarter dollar and dime—have been prepared, under my direction, by Mr. Charles E. Barber, the engraver of the mint at Philadelphia, and with your approval have been adopted.

The consideration of the subject of changing the designs upon our coins naturally calls forth some thought upon the subject of coinage

generally, a subject full of interest.

Coinage may be defined as consisting in the division of a monetary metal into pieces of uniform dimensions and weight, and in the stamping of them by public authority, in order to certify the quantity of fine metal contained in each; while a coin is one of the pieces so stamped.

Coinage is of very great antiquity. Its invention is generally ascribed to Pheidon of Argos, who reigned in the eighth century before

Christ.

When we consider the great antiquity of some of the coins now in a perfect state of preservation, dating back many hundred years before the birth of Christ, they open a vast field of thought.

These metallic monuments, having the portraits and names of the great heroes of the age in which they were struck, bear unequivocal witness to the truth of the historical records which have come down to us, and from which we learn of the wars, religions, and superstitions of past ages.

The earliest specimens of coins of which we have knowledge bore the impression of a die only on the face, the reverse showing the marks of the rude punch used to force the piece of metal into the die. Following this, the first improvement seems to have been an attempt to make the

punch conform somewhat to the shape of the die.

This improvement was carried on until we find the punch almost identical with the design of the die, the result being coins with an impression in relief on one side and an intaglio on the other, or, as these pieces are called, incused coins.

This was a great step in coinage and contributed largely to the production of the high relief which we find in antique coins. come the coins with separate designs for both the obverse (or face) and

FI 91---12

reverse (or back), both sides telling their story; in many cases beauti-

fully executed, considered as works of art.

The idea of relief and abrasion was never considered in connection with antique coinage. The artist indulged his fancy and taste to the fullest extent, and the coins were struck as medals are now, without regard to the amount of pressure required or the number of blows from the hammer or press necessary to perfect the impression in high relief.

The coins of antiquity were for the most part like those of modern times, round, the form best suited to them. Quadrangular, hexagonal, and octagonal, spherical, and spheroid pieces were seldom employed

The names of the oldest coins known, and of many modern ones, point to the connection existing between coins and their weight. Thus the ancient as well as the modern Greek drachma, the pound sterling in England, the pfund in Germany, the livre in France, the lira in

Italy.

During historical times and in civilized countries, since the first invention of coinage, gold and silver have been employed whenever governments were rich enough to obtain them, almost exclusively, in the manufacture of all save token coins. Russia at one time coined platina, but as that substance was not well adapted for coinage purposes the stamping of it was stopped and the pieces issued retired by the Government of the Czar.

The beauty of their appearance, hardness, malleability, susceptibility to the receiving of an impression, fusibility, homogeneity, divisibility, rarity, and the relative stability of their value, during limited periods of time, are the qualities that have insured the choice of gold and silver as the monetary metals of the world during so many centuries, and in all countries in which they have been obtainable, either by mining or

in exchange for other objects of value.

With the growth of technical knowledge, and in order to meet the increased demands of trade, a proportion of base metal was early added to the gold or silver, and coins now are universally manufactured with

an alloy of copper.

The object of mixing gold and silver with a proportion of some other metal, generally copper, in coinage, is to give the pieces greater resist-This proportion is called the alloy. The proance to wear and tear. portion of pure metal in the coin is called its fineness. The proportion

of alloy should not be allowed to exceed certain limits.

Michel Chevalier laid it down as a rule that that proportion of alloy was best which gave the precious metals the greatest resistance to Experience has shown that Chevalier's rule should be modified thus: The best alloy in coinage is that which, in the higher finenesses, offers the greatest resistance to abrasion. It has been clearly demonstrated that the proportion of nine parts of gold or silver to one part of copper best accomplishes this result.

The multiples or submultiples of the monetary unit should be such as to render it easy for the public to make up any sum out of the pieces issued by the Government. They should be of such weight and size as to make their use convenient, and to reduce to a minimum the action

of abrasion and the possibility of alteration.

The mechanical part of the manufacture of coins at the present day is all that can be desired. The same, however, can not be said of the artistic part of the coinage.

To help make the coins of the United States worthy, from the point of view of the beautiful, of our country, at the beginning of the second century of its existence, is the object of my recommendations as to new

and improved designs.

In modern coinage the designs in monarchial governments consist, as a rule, of the portrait of the sovereign for its obverse and the coat of arms or seal for the reverse, thus simplifying the question of design. Republican nations have generally ignored the idea of having the portrait of their Chief Magistrate upon their coins, but have generally used some ideal head or representative; hence our coinage laws prescribe, "Upon one side there shall be an impression emblematic of liberty, with an inscription of the word 'Liberty' * the reverse shall be the figure or representation of an eagle."

The design first adopted was a female head representing liberty for

the obverse and an eagle for the reverse.

Without reviewing all the changes which have taken place in the designs upon our coins it may be interesting, now that a change in the designs upon our subsidiary silver coins (the half dollar, quarter dollar and dime) has been decided upon, to enumerate the changes which

have been made in these particular pieces.

The present obverse of the subsidiary coins first appeared on the dollar of 1836, dime and half dime of 1837, half dollar and quarter dollar of 1838, and all the silver coins of 1840. It was designed by Sulley and engraved by Mr. Christian Gobrecht. The present reverse, with the exception of some minor differences, first appeared on the half dollar of 1807, dime of 1809, quarter dollar of 1815, and half dime of 1829. The dies were prepared by Mr. John Reich, who was appointed assistant engraver in 1807 by the Director of the Mint, Robert Patterson.

FULL DESCRIPTION OF THE TYPES AND VARIETIES OF THE HALF DOLLAR, FROM THE YEAR OF ITS FIRST ISSUE (1794) TO THE PRESENT TIME.

Authorized to be coined, act of April 2, 1792; weight, 208 grains; fineness, 892.4. Fineness changed, act of January 18, 1837, to 900. Weight changed, act of February 21, 1853, to 192 grains, and again by act of February 12, 1873 to 121 grams or 192.9 grains.

1794-95. Obverse: Liberty head facing right, flowing hair, 15 stars; above, "Liberty;" beneath, the date. Reverse: An eagle with raised

wings, encircled by branches of laurel, "United States of America." On the edge, "Fifty cents or half a dollar." Size, 21.

1796-297. Obverse: Bust of Liberty, facing right, hair bound by a ribbon, shoulders draped, 15 stars. Some were struck with 16 stars. Reverse: An eagle with expanded wings standing upon clouds, within a wreath of palm and laurel; "United States of America." 1797, same, with 16 stars.

1798 to 1800, inclusive; none coined.

1801 to 1806 inclusive. Obverse: Same. Reverse: The heraldic eagle bearing the United States shield upon its breast; in beak a scroll inscribed "E Pluribus Unum." A bundle of 13 arrows in the right talon and an olive branch in the left; above are clouds and 13 stars; "United States of America."

1807. No. 1, same. No. 2. Obverse, Liberty head facing left, wearing a cap shaped like a turban, with "Liberty" inscribed on the band; thirteen stars and date. Reverse: An eagle with expanded wings pointing downwards, bearing upon its breast the United States shield, and olive branch in its right talon and 3 arrows in its left; above, in the field, a scroll inscribed "E Pluribus Unum;" beneath "50 C," legend; "United States of America."

1808 to 1815, inclusive, same as No. 2 of 1807.

1816, none coined.

1817 to 1835, inclusive, same as No. 2 of 1807.

1836: No. 1, same as No. 2 of 1807. No. 2. Obverse: Same. Reverse: Same, with reeded edge, the omission of the motto "E Pluribus Unum;" "50 cents" for "50 C." and size 19.

1837. Same as No. 2 of 1836.

1838. No. 1. Obverse same as No. 2 of 1836. Reverse, same; "half dol." for "50 cents." No. 2. Obverse: Liberty seated upon a rock, supporting with her right hand the United States shield, across which floats a scroll inscribed "Liberty," and with her left hand the staff and Liberty cap; beneath, the date. Reverse same as No. 1.

1839 to 1852, inclusive, same as No. 2 of 1838.

1853. Obverse: Same with, an arrow on each side of date. Reverse: Same, with a halo of rays around the eagle.

1854 and 1855, same, without the rays.

1856 to 1865, same, without arrow heads.

1866 to 1872, same, with a scroll above the eagle inscribed "In God we trust."

1873. No. 1, same. No. 2, same, with an arrow head on each side of the date.

1874. Same.

1875 to the present date, same, without the arrow heads.

QUARTER DOLLAR.

Authorized to be coined, act of April 2, 1792; weight, 104 grains; fineness, 892.4. Weight changed, act of January 18, 1837, to 103½ grains. Fineness changed, act of January 18, 1837, to 900. Weight changed, act of February 21, 1853, to 96 grains, and weight changed to 6½ grams or 96.45 grains by the act of February 12, 1873.

1796 same, type as half dollar.

1797 to 1803, inclusive, none coined.

1804 to 1807, same as half dollar of 1801.

1808 to 1814, none coined.

1815, same as No. 2 half dollar of 1807.

1816 and 1817, none coined.

1818 to 1825, same as No. 2 half dollar of 1807.

1829 and 1830, none coined.

1831 to 1837, same as No. 2 half dollar of 1807, with the diameter reduced from size 17 to size 15 and a corresponding increase in the thickness and decrease in the size of devices; the omission of the scroll inscribed "E Pluribus Unum."

1838. No. 1, same: No. 2, same as half dollar of 1839.

1839 to the present time, same as the half dollar.

DIME.

Authorized to be coined, act of April 2, 1792; weight, 41.6 grains; fineness, 892.4. Weight changed, act of January 18, 1837, to $41\frac{1}{4}$ grains, and fineness changed by the same act to 900. The weight was again changed, act of February 12, 1873, to $2\frac{1}{2}$ grams, or 38.58 grains.

1796, same type as half dollar.

1797. No. 1, same, with 16 stars; No. 2, same, with 13 stars.

1798. No. 1, same type as half dollar of 1801 with 16 stars; No. 2, same, with 13 stars.

1799, none coined.

1800 to 1805, inclusive, same.

1806, none coined.

1807, same type as half dollar of 1801.

1808, none coined.

1809, same type as half dollar of 1807.

1810, none coined.

1811, same type as half dollar of 1807.

1812 and 1813, none coined.

1814, same type as half dollar of 1807.

1815 to 1819, none coined.

1820 to 1825, same type as half dollar of 1807.

1826, none coined.

1827 to 1836, same type as half dollar of 1807.

1837. No.1, same. No.2. Obverse: Liberty seated; no stars. Reverse: "One dime" within a wreath of laurel; "United States of America."

1838 No. 1 same as No. 2 dime of 1837. No. 2 same, with thirteen

1839 to 1852 same.

1853 No. 1 same. No. 2 same; with an arrow on each side of the date. 1854 and 1855 same.

1856 to 1859 same, without arrowheads.

1860 to 1872. Obverse: Same, with "United States of America" instead of stars. Reverse: "One dime" within a wreath of cereals.

1873 No. 1 same. No. 2 same, with an arrowhead on each side of the date.

1874 same.

1875 to present time same, without arrowheads.

The new designs which have been adopted for the subsidiary coins may be briefly described as follows: On the obverse is a female head, representative of liberty, looking right, expression calm and dignified, with olive wreath around the head and Phrygian cap on back. On a band over front of head the word "Liberty," and over the head the motto "In God we trust"; around the medallion are thirteen stars, and under, the date of coinage. On the reverse appears the seal of the United States as adopted 1782, and is thus described: An eagle displayed, charged on the breast with a shield argent, six pallets gules, a chief azure, holding in the dexter claw an olive branch of thirteen leaves; in the sinister claw a sheaf of thirteen arrows; in the beak a scroll with the motto "E Pluribus Unum," ensigned above and about the head with thirteen stars. This will be the design of the half dollar and quarter dollar, while the dime will have for obverse same head as half dollar and quarter dollar, but in place of the stars the inscription "United States of America," while the motto "In God we trust" will be omitted. The reverse of the dime will be the same as in present use.

From the description given of the coins of the early issue of this Government it will be seen that the first-described reverse which it is proposed to supersede the old with is a return to the design of almost the first coinage. It has often been said that the design of our early coinage was superior to some more modern. This would seem a case in point, as what can be more appropriate for the design of a coin than the great seal, carrying with it, as it undoubtedly does, the mark of its

genuineness and worth.

As the volume of coinage in modern time is so vast, great numbers of dies are required, and as the work of engraving a die is of necessity a slow and tedious process and would be sure to have some variations if each separate die was engraved, hubs are made from which the working dies are transferred, thus making it possible to produce a large number of dies in a comparatively short time, and also insure perfect simi-The question, What is a hub? is sure to arise in the minds of A hub is a piece of tempered steel, on which is the perfect design in relief of the coin it represents. This hub being hard can be forced by great pressure into a finely annealed piece of steel; thus producing a die for coinage. The work of producing a new coin or series of coins is a very delicate operation. First a design is suggested, then models are made, molds are then prepared and electrotypes are made. The question of curve to be given the face of the die is very important, as this varies with each coin and requires careful adjustment to area and design. Although modern coins look flat, the fact is quite the contrary, as none are so, they being struck from dies the surface of which is always curved. From the electrotypes reductions are made by a beautiful machine most delicate in its actions. These reduced copies of the model are in steel and require the skill of the engraver to give them the delicate finish that coins are expected to have. The engraving department of the United States Mint is at present employing all its energy to have the dies with the new designs ready by January 1, 1892.

THE NEW MINT AT PHILADELPHIA.

In my last fiscal report, as well as in the last report of the Secretary of the Treasury, attention was directed to the crowded condition of the building now occupied by the Mint of the United States at Philadelphia, and the inadequacy of the present ground area for the erection of a suitable building, and the sale of the present site and the purchase of a new site and the erection of a suitable building for the mint at Philadelphia, was strongly recommended.

On January 6, 1890, a bill (H. R. 3910) was introduced in the House of Representatives by Hon. H. H. Bingham, of Philadelphia, providing for the purchase of a new site and the erection of a new building for the

mint at Philadelphia.

On May 2, 1890, the following bill (H. R. 9957), introduced by the same member for the same purpose, was substituted for the bill originally introduced by him:

Δ BILL to provide for the purchase of a site and the erection of a public building thereon at Philadelphia, in the State of Pennsylvania.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, a site and cause to be erected thereon a suitable building, including fire-proof vaults, heating and ventilating apparatus, elevators, and approaches, for the use and accommodation of the United States Mint, in the city of Philadelphia, and State of Pennsylvania, the cost of said site and building, including said vaults, heating and ventilating apparatus, elevators, and approaches, complete, not to exceed the sum of two million dollars.

So much of the appropriation as may be necessary to defray traveling expenses and other expenses incident to the selection of the site, and for necessary survey thereof,

shall be immediately available.

So much of said appropriation as may be necessary for the preparation of sketch plans, drawings, specifications, and detailed estimates for the building by the Supervising Architect of the Treasury Department shall be available immediately upon the selection of the site by the Secretary of the Treasury.

No money appropriated shall be available, except as hereinbefore provided, until a valid title to the site for said building shall be vested in the United States, nor until

the State of Pennsylvania shall have ceded to the United States exclusive jurisdiction over the same during the time the United States shall be or remain the owner thereof, for all purposes except the administration of the criminal laws of said State and the service of civil process therein.

After the said site shall have been paid for and the sketch-plans and detailed drawings for the buildings shall have been prepared by the Supervising Architect, and approved by the Secretary of the Treasury and Director of the Mint, the balance of appropriation shall be available for the erection and completion of the building, including fire-proof vaults, heating and ventilating apparatus, clevators, and approaches, and such balance of the appropriation as may remain available after the building shall have been completed shall be applied to and used in the purchase of apparatus for the purposes of the mint.

The building shall be unexposed to danger from fire by an open space of at least

forty fect on each side, including streets and alleys.

That the Secretary of the Treasury be, and he is hereby, further directed, when the new building herein authorized to be erected shall have been completed, to dispose of the present United States Mint building in the city of Philadelphia and State of Pennsylvania, at private or public sale, and to give a quit-claim deed to the purchaser thereof, and to deposit the proceeds of the sale to the credit of the Treasurer of the United States in the manner prescribed by sections thirty-six hundred and seventeen and thirty-six hundred and eighteen, United States Revised Statutes.

The original bill (H. R. 3910) having been referred by the Committee on Public Buildings and Grounds to the Treasury Department for report, the following communications from the Secretary of the Treasury, the Director of the Mint, and the Supervising Architect of the Treasury were transmitted to the Committee on Public Buildings and Grounds on February 18, 1890:

> TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., February 18, 1890.

SIR: I have the honor to acknowledge the receipt of a letter from the Committee on Public Buildings and Grounds, asking for the views of the Department upon bill H. R. 3910, a copy of which is inclosed, providing for the purchase of a site and the erection of a new building for the mint at Philadelphia.

In reply, I desire to call attention to the statements made in the accompanying

papers from the Director of the Mint, the Supervising Architect, and the principal mint officers at Philadelphia, showing the total inadequacy of the present quarters and setting forth specifically the reasons, which are apparent to those most familiar with the subject, for an enlargement of the present facilities for coining purposes. Every consideration bearing upon an effective and correct working of the mint service points to the necessity of providing at once a sufficient and suitable building. While our legislators of over half a century ago no doubt attempted to make provision for the theory impediate future they never for a moneral intended to exact a building. sion for the then immediate future, they never for a moment intended to erect a building which would accommodate itself to the needs and purposes of the present time, when the number of coins struck at this particular mint is eight times as great as it Every department of the building is crowded to its utmost capacity with machinery and employés. It is impossible to put in force systematic methods, and much confusion and delay are occasioned by the want of space in which to arrange, in an orderly and natural relation, the several processes of the different operations through which the metal has to go in order to produce the perfect coin. The very limited area that can be assigned to the furnaces and other branches requiring the employment of artificial heat makes the temperature at all times almost unbearable, and the upper floor, the ceiling of which is in close proximity to the roof, is filled with lady operatives, who in the summer find in the stifled condition of the atmosphere abundant cause for absence and ill health.

Upon a recent personal inspection of the premises I was fully convinced of the serious difficulties under which all the employés labored, and I am sure that anyone who visits the mint can not fail to be impressed in the same way. In this connection I beg to refer to the recommendation of the assay commission in resolutions herewith transmitted. The members of this commission were gentlemen of high professional attainments and prominent in matters kindred to coinage. They have made manifest the results of their personal observations and have unanimously expressed the opinion that the only remedy for the present disabilities lies in the erection of a more spacious building. An appropriation from last year is available for the enlargement of the present building, but it would be very doubtful economy, if not altogether waste, to expend any large amount in attempting to make the present structure meet the requirements of the service. The walls are of marble, very heavy, and cover nearly all of the ground at that point which belongs to the Government.

The heavy machinery and large amount of metal to be handled, as well as the delicate operations connected with the finer work of coinage, makes it impracticable to use a building many stories in height, and it is very doubtful if any good results would follow the placing of additional stories on the present building. Good public policy at once suggests facilities to be had only in a building of ample proportions, and I most earnestly recommend the subject to the favorable consideration of Congress. I think it would be better, however, to amend the proposed bill in such a way as to make a specific appropriation of \$2,000,000 to purchase a site and erect the building, and after it is finished to provide for the sale of the present site and building, the proceeds of such sale to be covered into the Treasury under the head of "Miscellaneous receipts."

Respectfully, yours,

WILLIAM WINDOM. Secretary.

Hon. S. L. MILIKEN, Chairman of Committee on Public Buildings and Grounds, ${\it House}$ of Representatives.

TREASURY DEPARTMENT, BUREAU OF THE MINT,

Washington, D. C., February 7, 1890.
SIR: Referring to House bill 3910, authorizing the sale of the present site of the mint at Philadelphia and the purchase of a new site, and the erection of a new build-

ing for the mint in that city, I have the honor to present herewith my views in regard to the necessity and expediency of enacting the same into law.

The act establishing the Mint of the United States was approved by President Washington, April 2, 1792. The same year the structure for the mint, a plain brick edifice, was erected on Seventh street near Arch, in the city of Philadelphia. The following October the building was occupied for coinage purposes, and was so used for a period of over forty years. This was the first public building erected in the

United States under the authority of the Federal Government.

By act of May 19, 1829, the mint was permanently located in Philadelphia, and the present mint edifice, which stands at the corner of Chestnut and Juniper streets, on a the forming 150 feet on Chestnut street and extending back 204 feet to Penn Square, was authorized. The cornerstone was laid July 4, 1829, and the building was completed and occupied for coinage purposes in 1833. This building has been used continuously, without any material enlargement, for a period of fifty-seven years, as the principal coinage institution of the United States, although the growth and coinage requirements of the country have long since outgrown its capacity. It will be remembered that this building was planned and erected twenty years before the discovery of gold in California and nearly forty years before the immense silver discoveries The product of the precious metals in the United States in 1833 was inresearch. The product of the precious metals in the Chieff states in 1835 was 31-significant, the total product for the ten years 1834-'44 being only \$7,750,000. The present product approximates annually \$100,000,000.

The coinage executed at the mint in 1833 was 10,370,700 pieces of the value, of \$3,765,710; the coinage of the same institution for the last calendar year (1889) ag-

gregated 94,012,194 pieces, of the value of \$24,804,854.84.

In addition to the coinage of gold and silver in common with the other mints of the United States, the mint at Philadelphia is the only institution in the United States authorized by law to execute minor coinage, the demand for which has become so pressing that for several years past the Government has been obliged to buy the blanks ready for stamping, and for several months past nine large presses have been

used exclusively in the stamping of minor coin.

Moreover, the mint at Philadelphia is the only one in the country which has connected with it an engraving department, where, by statutory requirement, the devices for our coins are engraved, and the dies, both original and working, for all

our mints are made, and medals of a national character are executed.

The building was not planned with any idea of adaptation for many of the me-tanical and metallurgical operations at present carried on in it. When it was chanical and metallurgical operations at present carried on in it. When it was erected many of the processes of metallurgy now employed were unknown. The area in the center of the mint, originally intended for a stack through which the fumes of acid, smoke, etc., could pass off, is now filled to the very roof with wooden structures, which are not only objectionable in themselves, but increase the liability to fire, and take away ventilation and light, while the erection in the immediate vicinity of much higher buildings prevents the free escape of the fumes from the

acid refinery, to the great annoyance of the public.

The process of striking coin was by the screw-press worked by hand, and the introduction of steam for coinage purposes did not take place until 1836, three years

after the building was completed.

It is not my purpose to enumerate in detail the insufficiency of the present building for the proper and safe execution of the immense amount of work now turned out. For detailed information on this point reference is made to the letters of the superintendent and operative officers inclosed. Certain it is that no private manufacturing establishment would have worked continuously for fifty-seven years in the same building, with an increase of 800 per cent in its annual output (as shown by the coinage of pieces at this mint in 1889 as compared with 1833), without largely increasing its capacity.

It has not been practicable to remedy the inadequacy of working space in the mint at Philadelphia by alterations and enlargements of the present building, owing

to the fact that there is not sufficient area.

It is essential for the efficient execution of the delicate and important processes of coinage that the mechanical operations of each department be conducted on the same The work rooms of the coiner's department, for instance—that is, all the rooms for cutting, rolling, milling, and the other coinage operations—should be on one floor.

In 1882 the attention of Congress was directed to the insufficiency of the ground area for the business of the mint, and a bill was favorably reported from the Committee on Coinage, Weights, and Measures authorizing the purchase of adjoining property covering a surface of 100 feet on Chestnut street and extending north 204

feet on Broad street.

Unfortunately this bill failed to become a law, and the magnificent building now occupied by the Girard Life Insurance, Annuity and Trust Company, valued at \$1,000,000, has been built upon it, thus precluding the Government from obtaining possession of it. Nor is there any other property adjoining which it is possible for the Government now to secure; so that it is impracticable to extend the area of the mint in its present location.

If therefore anything is to be done in the way of providing enlarged facilities for the mint at Philadelphia the matter resolves itself into one of two alternatives: either the enlargement of the present building by an attic story or an extension of the building to the line of the portico, or both; or, as the other alternative, the erection of a new mint.

In accordance with estimates prepared by the Supervising Architect an appropriation of \$220,000 was included in the sundry civil bill, approved October 2, 1888, "for the United States Mint at Philadelphia, Pa.; for an additional story to and enlarging the building, including vault, alterations, and other necessary work." Of this appropriation the sum of \$43,399.70 has been expended for the construction of new vaults, leaving \$176,600.30 available for the enlargement contemplated.

Since this appropriation was made further plans and drawings have been prepared by the Supervising Architect contemplating an extension of the floor area by extend-

In my annual report for the fiscal year ended June 30, 1889, I had the honor to recommend that the appropriation available, viz, \$176,600.30, be increased to the sum of \$420,000, that being the estimate of the Supervising Architect of the cost of the extension designated in the last plans. If, then, the mint remain on its present site, an immediate expenditure of \$420,000 will be necessary to afford proper room for its business. The expenditure of even this large sum will remedy the existing state of things to only a limited extent but will not accomplish the pain purpose desired things to only a limited extent, but will not accomplish the main purpose desired, viz, sufficient ground area for the location of the work rooms of the mechanical departments on one floor.

The objections to an additional story are so forcibly pointed out in the letter of

Superintendent Bosbyshell that I shall not repeat them.

The present time is opportune for the purchase of a convenient site for a new mint building in Philadelphia. It is believed that a suitable one, in a convenient section of the city, on one of its most prominent streets, can be procured at a cost not exceeding \$500,000 and that the present site and edifice will sell for a sum approximating \$800,000; so that if this bill should become a law about \$300,000, the probable excess of the amount received for the present site above the cost of a new site, would be available towards the erection of a new mint.

Estimates as to the cost of a new building suitable for the requirements of the mint at Philadelphia will of course be furnished by the Supervising Architect, but I may remark that the mint at San Francisco, finished in 1873, which is a large granite building, one of the most beautiful in that city, perfectly adapted to its purposes, was erected at a cost of \$2,130,512.15 (not including the cost of site, \$100,000). ing allowance for the reduced cost of labor and material at the present date as compared with 1873, and especially in Philadelphia, as compared with San Francisco, it would seem reasonable to say that \$1,500,000 would be the outside cost of a suitable building in Philadelphia, or a net cost of \$1,200,000, against an appropriation of \$420,000 already asked for the enlargement of the mint if it remains in its present location.

I can not too strongly urge upon Congress the advisability of purchasing a new site and erecting a new mint, especially as the opportunity which now presents itself for securing a convenient and suitable location for a reasonable consideration may not

soon occur again.

Surely this great Government, with its growing wealth and population, producing annually from its mines \$100,000,000 of the precious metals, can afford to have the very finest buildings as well as the best appliances and machinery for the important and delicate operations of coining money, and it would seem as if an appropriation of \$1,200,000 for the erection of a suitable structure for its most important mint should not be considered a piece of extravagance, but rather as an act demanded by our national character.

I inclose herewith letters from the superintendent and operative officers of the

mint at Philadelphia, to which attention is invited.

Trusting this matter will receive your favorable recommendation,

I am, very respectfully,

E. O. LEECH, Director of the Mint.

Hon. WILLIAM WINDOM, Secretary of the Treasury, Washington, D. C.

> TREASURY DEPARTMENT, OFFICE OF THE SUPERVISING ARCHITECT, Washington, D. C., February 17, 1890.

Sir: I have the honor to acknowledge the receipt by reference from you of the letter of the 13th instant, addressed to you by the Committee on Public Buildings and Grounds, House of Representatives, requesting to be informed as to the present condition of the United States Mint building at Philadelphia, Pa., in regard to size, convenience, etc., for transacting the public business, the need of a new building for the purposes of the United States Mint, and such other information in Tegard to the subject as may be deemed of use to said committee in connection with H. R. bill 3910, introduced January 6, 1890, by Hon. Henry H. Bingham, to provide for the sale of the present United States Mint building and site, the purchase of land suitable for a site, and the erection thereon of a new public building for carrying on the business of the mint in Philadelphia, Pa., the proceeds of the sale of the present United States Mint property, or so much thereof as may be necessary, to be used for the purpose of purchasing a new site and erecting thereon a new building for said purpose, and to submit the following:

I invite attention to the statements made on pages 62 and 63 of the Annual

Report of the Supervising Architect of the Treasury Department, 1889.

The mint building in Philadelphia has been changed in arrangements and enlarged by minor additions from time to time to meet the demands of the present public business, and practically all of the available ground within the metes and bounds of the site is now occupied by the building.

With the appropriation made by act of Congress approved October 2, 1888, viz, \$220,000, and the additional appropriation of \$200,000 asked for in the annual estimates, it is proposed to build a third story to the present building and extend the wings on each side of the entrance portico out to the street front as further additions

to the structure.

By making a new assignment of the old portion of the structure with the additional floor area to be obtained by such improvements there would be better facilities for the conduct of the business of the mint than there is now afforded in the building.

These improvements, however, would not provide the convenience needed for the proper conduct of the work of the mint, nor secure full economy in the management that could be applied if a structure with sufficient ground area was erected that would enable the work of the goinage of metals to be done continuously on one floor without the necessity of irregular transfers of the metals during the process of its coinage between working rooms not contiguously arranged, and would prevent the inconvenience and delay incident to the necessary use of elevator service between. the different stories of the building.

The metals should be delivered at one station and pass regularly from that point through the several apartments contiguously arranged, properly equipped with the necessary furnaces, machines, plants, etc., and assigned to the different branches of the work incident to its completion, so that after the metals shall have reached the apartment in which the last branch of work thereon is to be done the coins will be

perfected and ready for storage or distribution.

The actual cost of the present United States Mint building in Philadelphia, including the cost of alterations and repairs to June 30, 1889, is \$432,871.48 plus the cost of site—\$31,666.67—which aggregates \$464,538.15, in connection with which must be considered the work now being done under the appropriation of \$220,000 made by act of Congress approved October 2, 1888, and the appropriation asked for in the

annual estimates.

From computations made in the office of the Supervising Architect of this Department based upon information received, it is found that, to construct such a building, with proper lighting, ventilating, and heating facilities, that would afford proper accommodations for the present and prospective needs of the mint in said city, \$1,500,000 will be required in addition to such amount as may be needed for the purchase of land suitably and adaptably located for the purpose.

After duly considering the subject, I am of the opinion that the convenience of the public business done at the mint and the economy of the public service would be best consulted by the acquisition of a new site and the erection thereon of a new

suitable building for the exclusive use of the United States Mint.

I would therefore suggest that, to facilitate a speedy compliance with the provisions of the bill, should it become a law, said H. R. bill should be so modified as to make a specific appropriation for the purchase of land for a site and the erection of the building in addition to the sale of the present site and building, after the completion of the new building, and that the proceeds from such sale be deposited with the Treasurer of the United States as miscellaneous receipts derived from the sale of Government property.

Respectfully, yours,

JAMES H. WINDRIM. Supervising Architect.

Hon. WILLIAM WINDOM. Secretary of the Treasury.

On June 5, 1890, Mr. Darlington, from the Committee on Public Buildings and Grounds, submitted the following report:

[House Report No. 2326, Fifty-first Congress, first session.]

The Committee on Public Buildings and Grounds, having had under consideration

the bill (H. R. 9957) to provide for the purchase of a site and the erection of a public building thereon at Philadelphia, submits the following report:

The necessity for the enlargement and improvement of the Mint of the United States at Philadelphia, for which this bill provides, has been a matter of consideration by Congress since 1880. The House and Senate committees of the Forty-sixth Congress reported favorably upon a similar measure, and the House Committee on Coinage, Weights, and Measures of the Forty-seventh Congress unanimously reported a bill which had originated in the Senate of like import. The necessity for increasing the facilities of the Philadelphia Mint has never been questioned, but from various causes the bills to which reference is made failed of final action in the

In considering the bill submitted, your committee has been greatly aided by information furnished by the Secretary of the Treasury and the Director of the Mint, reënforced by the clear, concise, and intelligent statement of the superintendent and operative officers of the Philadelphia Mint, as well as by a memorial signed by the commissioners appointed by the President to conduct the annual trial of the pyx. for the coinage of all the mints during the year 1889. From these various authorities, all in substantial agreement as regards the embarrassments to which the officers in charge are subjected by reason of confined quarters, entailing lack of machinery, imperfect ventilation and sanitation, your committee is clearly of the opinion that the provision for the enlargement of the present mint building included in the sundry civil bill of 1888 (\$220,000) signally fails to meet the requirements of effective public service. That provision was "for an additional story to and enlarging the building, including vaults, alterations, and other necessary work." Of this proposed enlarge, ment of the building Supervising Architect J. H. Windrim says that, while it would afford somewhat better facilities for the conduct of business than at present existit would not provide the conveniences needed nor secure economy in management that could be secured by a structure with proper ground area. Nor can the enlargement already authorized be made without an additional appropriation.

The present mint was erected and completed for coinage purposes in 1833, and has been used, without material enlargement, fifty-seven years. The coinage executed in 1833, at which time the production of the precious metals in the United States was insignificant, was 10,370,700 pieces, of the value of \$3,765,710, and the total value of the gold and silver product for the ensuing ten years was only \$7,750,000. The present annual product of the precions metals in the United States approximates \$100,000,000. and the coinage of the Philadelphia Mint for the calendar year 1889 aggregated 94,012,194 pieces, of the value of \$24,804,854.84. In addition to the coinage of gold and

silver the mint at Philadelphia is the only institution designated by law to execute minor coinage, for which the demand for small exchanges is cumulative and pressing. So great is the demand for these small coins that the Government has been obliged to purchase the blanks ready for stamping, while 9 presses have been kept busy for many months in the execution of this coinage to supply public demand. The work demanded of this mint has increased 800 per cent since the completion of

the present building in 1833, as is shown by its annual output.

Your committee finds a consensus of opiniou among the officers familiar with coinage matters as respects the remedy, which is increased ground area. This is necessary for the efficient and proper conduct of the delicate and important processes of coinage, which, whether scientific or mechanical, are to be ranked as works of precision. The entire mechanical operation should be on a single floor, the subdepartments of each operative officer being contiguous and continuous. In default of this the work is hindered and the risk greatly increased. This is particularly true in the coinage department, where the various processes for converting the ingot into coin have to be carried on in rooms often widely separated, however related the processes may be, the metal in its several stages passing from ground floor to second story, from second story to basement, and thence to the presses on the ground floor. It is evident that processes so important and so necessarily connected with national credit should be divested of all unnecessary risks. That is a desideratum; and it can be secured only by such an arrangement of the coining department as will admit of the carrying forward of the work continuously in rooms contiguous and at grade, so that the officer in charge may have the metal in its various stages under his eye.

Such necessary supervision of the processes of coining can not be secured in the present structure, even if the entire available ground space should be given up to the coiner. But the processes through which the metals pass before they can go to the coiner are many, and necessarily of absolute accuracy. The coinage laid upon this mint requires the melter and refiner to melt daily from 5 to 7 net tons of silver. This important work, on the accuracy of which the integrity of our coin largely depends, has to be carried on in cramped quarters and at a disadvantage that greatly increases the labor and risk of that officer. The entire Treasury purchases of bullion assigned to this mint for conversion into coin have to be passed in at a window of a department not under control of the melter and refiner, and no modification of the structure yet proposed would remove this difficulty. The room referred to is the deposit melting room, where the bullion of depositors is melted, a room that should be absolutely isolated from every other and from the public. The melter and refiner is, by courtesy and necessity, allowed to receive the Treasury purchases through the window of this room, and through the same window must be taken the fuel for its flurnaces. This involves constant interruptions of the processes, and more or less confusion, alike unjust and detrimental to the operative officers concerned, the efficiency of public service, and to depositors, whose deposits are there prepared for assay.

The exigencies of the other operative departments of this mint confine the melter and refiner to a single room, in which he is required to melt and prepare ingots of gold, silver, nickel, and bronze. It is believed that conditions so incompatible with work that must be absolutely accurate or fail altogether do not exist in any mint of modern structure. No subdivision of any space available in the building can remedy this disability. Beyond these defects the chimney-stacks of the melter and refiner's department are overtopped by the walls of the adjoining buildings to the extent of five stories. This leaves the draft of the melting-furnaces at the caprice of the winds, which from the west impair the draft and from the cast drive the fumes and product of combustion into the windows of neighboring residents. It may be regarded as merely a question of time when the neighboring residents will complain of this

annoyance as a nuisance.

When the present structure was planned many of the processes of metallurgy now employed were unknown. Some improved machinery, operated by steam, was introduced in 1836. Improved appliances have been added from time to time, until now this mint lags behind a quarter of a century in the race of improvement simply because every inch of available space has been exhausted. Machinery of the most advanced order has become a necessity, and it awaits the purchaser who has space for its accommodation and operation. The mint at Philadelphia can not avail itself of such desirable and necessary appliances because its ground space is fully occupied already. The central area, originally intended for ventilating purposes and working space, has, from time to time, as the exigency demanded, been occupied by structures that impair ventilation and lighting and endanger the health, as they decrease the comfort and convenience, of the working force. The high modern structures on either hand prevent the escape and diffusion of the acid fumes from the refinery and cause them to pervade the entire building.

It is proper to note that certain operations by law authorized to be performed at the Philadelphia mint are not performed at any of the other mints. The dies for the coinage of all the mints and for national medals are all designed and prepared at this mint, and all medals of a national character are executed in the same institution. The engraving department, one of the most important of all, because it must maintain uniformity of design in coinage, at present is indifferently accommodated. It can not be relieved by any modification of the present structure. The assayer and the melter and refiner perform intimately related functions, yet they are necessarily located on different floors at present; nor would alterations of the structure enable them to occupy communicating apartments. The assay department of the Philadelphia mint enjoys, and has from an early day enjoyed, an enviable repute for accuracy throughout the commercial world. Such repute is of incalculable value to the nation, since it goes to establish the very foundation of national credit through the

known and invariable integrity of its coinage.

Your committee finds that it is impossible to put systematic methods in force in the present structure. Yet such methods are undoubtedly necessary to secure the highest results at a minimum risk and with economy. It is the parent mint, established early in the nation's career, and located at Philadelphia for reasons quite ob-The location is near the seaboard, yet not exposed to the hazards of invasion; in a great commercial and manufacturing metropolis, and within easy communication of the trade centers of the Atlantic slope. The location is in itself a guaranty of safety for the treasure that naturally flows to the mint. And this is the foremost and richest nation of the world, the greatest producer of the money metals of all, and now, as for years, requiring more service from its mints than any other nation. Your committee submits that the parent mint of the foremost nation on the globe should not be second to any either in working space, appliances, or in that structural excellence and design which conjoined crystallize the history of national progress in adamant. While your committee fully discriminates between what is necessary and appropriate, and what is extravagant and lavish in expenditures, it recommends such a reconstruction of the parent mint at Philadelphia as shall respond to public exigiencies and redound to the credit of the nation.

In this connection it is proper again to refer to the fact that the commission appointed by the President to conduct the annual assay last February, was composed of men eminent in the business, political, and scientific world, many of them distinguished physicists and metallurgists, and that this commission, becoming impressed with the crowded condition of the mint building and its processes, unanimously memorialized Congress in favor of a new structure with greater ground space and approved modern appliances. The gentlemen of that commission represented every section of the Union, from Maine to California, and their unanimous testimouy has

value accordingly

After giving full consideration to the facts submitted by the Secretary of the Treasury, the Director of the Mint, the superintendent of the mint at Philadelphia, and his operative officers, together with the statements of the Supervising Architect of the Treasury Department, the committee is enabled to conclude—
First. The present mint building at Philadelphia is entirely inadequate to the service required both as regards area and appliances.

Second. No enlargement of ground area is possible; to increase height will not

remove the disadvantages under which the operations are performed.

Third. To remedy the disabilities so clearly set forth, a new site with ample ground area is absolutely necessary, and a new building on modern lines, with such modern appliances as experience has proved necessary for good work and precision, be erected and equipped.

The Director of the Mint states that of the sum of \$220,000 appropriated by the sundry civil bill of 1888 for improvements the sum of \$176,600.30 remains available, and that he has recommended, upon an estimate of the Supervising Architect, an increase of this balance to \$420,000. If then the mint remains at its present location,

an immediate expenditure of \$420,000 will be necessary.

The bill submitted with this report provides for the purchase of a site and the erection of a new building at Philadelphia, at a cost not exceeding \$2,000,000, and the sale of the present building and site. The committee believes that a new site the sale of the present building and site. The committee believes that a new site with ample ground space and in a desirable location can be procured at a cost of \$500,000, and that the property now occupied can be sold for at least \$800,000. The net cost therefore of the property would be \$1,200,000, against an appropriation of \$420,000 already asked and in part appropriated for the enlargement of the mint if it remains at its present location. It is probable that the Government can at this time purchase a desirable site at a less cost than at any future time. It failed to avail itself of the option of the entire area from its western foundations to Broad street at a moderate price some years ago, and again in 1882, when the land might have been had for \$400,000, and probably less. The same land can not be purchased to-day for less than \$2,000,000 with the improvements.

The committee assumes that the mint will be permanently located at Philadelphia, and as enlargement is a certainty, true economy points at the present as the proper time to provide therefor. The Philadelphia Mint was the first public building erected in the United States under Federal authority, and the act creating it was approved by President Washington. Its history and the coinage of the nation is one of the many historical associations that cluster around the city of Philadelphia-memorable in every patriotic impulse and action.

The committee recommend the passage of the bill with the following amendments: In line 12 strike out all after the word "dollars" down to and including line 15,

which is the appropriating clause.

In line 26 strike out the words "by this act."
In line 38 strike out the word "said."

In line 41 strike out the word "said."

No action was taken, during the first session of the Fifty-first Congress, by the House of Representatives, on the favorable report, from the Committee on Public Buildings and Grounds on the bill providing for the purchase of a new site and the erection of a new mint at Philadelphia.

During the second session of the Fifty-first Congress, Senate bill No. 5110 (being identical with the bill favorably reported from the House Committee on Public Buildings and Grounds) to provide for the purchase of a site and the erection of a public building thereon at Philadelphia, was taken from the Calendar and passed the Senate February

In the House of Representatives, on March 2, 1891, on motion of Mr. Bingham, the rules were suspended and Senate bill 5110 was passed.

The bill was approved by the President the next day.

The following is the text of the law:

A BILL to provide for the purchase of a site and the erection of a public building, thereon at Philadelphia, in the State of Pennsylvania.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, a site and cause to be erected thereon a suitable building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, for the use and accommodation of the United States Mint, in the city of Philadelphia and State of Pennsylvania, the cost of said site and building, including said vaults, heating and ventilating apparatus, elevators, and approaches, complete, not to exceed the sum of two million dollars.

So much of the appropriation as may be necessary to defray traveling expenses and other expenses incident to the selection of the site, and for necessary survey

thereof, shall be immediately available.

So much of said appropriation as may be necessary for the preparation of sketch plans, drawings, specifications, and detailed estimates for the building by the Supervising Architect of the Treasury Department shall be available immediately upon

the selection of the site by the Secretary of the Treasury.

No money appropriated shall be available, except as hereinbefore provided, until a valid title to the site for said building shall be vested in the United States, nor until the State of Pennsylvania shall have ceded to the United States exclusive jurisdiction over the same, during the time the United States shall be or remain the owner thereof, for all purposes except the administration of the criminal laws of said State and the service of civil process therein.

After the said site shall have been paid for and the sketch plans and detailed drawings for the buildings shall have been prepared by the Supervising Architect, and approved by the Secretary of the Treasury and Director of the Mint, the balance of appropriation shall be available for the erection and completion of the building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, and such balance of the appropriation as may remain available after the building shall have been completed shall be applied to and used in the purchase of apparatus for the purposes of the mint.

The building shall be unexposed to danger from fire by an open space of at least forty

feet on each side, including streets and alleys.

That the Secretary of the Treasury be, and he is hereby, further directed, when the new building herein authorized to be erected shall have been completed, to dispose of the present United States Mint building in the city of Philadelphia and State of Pennsylvania, at private or public sale, and to give a quitclaim deed to the purchaser thereof, and to deposit the proceeds of the sale to the credit of the Treasurer of the United States in the manner prescribed by section thirty-six hundred and seventeen and thirty-six hundred and eighteen, United States Revised Statutes.

Soon after the passage of this law the question was raised as to whether it contained any appropriation for carrying into effect its provisions.

The question was submitted by the Secretary of the Treasury to the Attorney-General for his opinion.

The following is the opinion of the Attorney-General on the subject:

DEPARTMENT OF JUSTICE, Washington, D. C., March 28, 1891.

SIR: By letter of the 7th instant you invited the attention of the Attorney-General to an act of Congress, approved March 3, 1891, entitled "An act to provide for the purchase of a site and the erection of a public building thereon at Philadelphia, in the State of Pennsylvania," and requested his opinion "whether or not said bill carries the appropriation of \$2,000,000 mentioned therein for the purchase of the site named in the bill and the erection of a building thereon." You inclosed a copy of

the act, the important part of which for this discussion is as follows:
"That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire, by purchase, condemnation, or otherwise, a site, and cause to be erected thereon a suitable building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, for the use and accommodation of the United States mint in the city of Philadelphia and State of Pennsylvania, the cost of said site and building, including said vaults, heating and ventilating apparatus, elevators, and approaches, complete, not to exceed the sum of \$2,000,000.

"So much of the appropriation as may be necessary to defray traveling expenses and other expenses incident to the selection of the site, and for necessary survey

thereof, shall be immediately available.

"So much of said appropriation as may be necessary for the preparation of sketch plans, drawings, specifications, and detailed estimates for the building by the Supervising Architect of the Treasury Department shall be available immediately upon the selection of the site by the Secretary of the Treasury.

"No money appropriated shall be available, except as hereinbefore provided, until a valid title to the site for said building shall be vested in the United States, nor until the State of Pennsylvania shall have ceded to the United States exclusive jurisdiction over the same, during the time the United States shall be or remain the owner thereof, for all purposes except the administration of the criminal laws of said State

and the service of civil process therein.

"After the said site shall have been paid for, and the sketch plans and detailed drawings for the building shall have been prepared by the Supervising Architect and approved by the Secretary of the Treasury and Director of the Mint, the balance of appropriation shall be available for the erection and completion of the building including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, and such balance of the appropriation as may remain available after the building shall have been completed shall be applied to and used in the purchase of apparatus for the purposes of the mint."

In my opinion no money is appropriated by this act for the purposes therein mentioned. Its language, just quoted, if taken alone, would probably by implication carry an appropriation; but when we consider it in connection with the rule of construction laid down in the section of the sundry civil act of August 7, 1882 (22 Stats., 305), referred to by you, together with the parliamentary history of this act, and others of the same character passed by the same Congress, it is impossible to escape the conclusion that Congress did not intend by the language above quoted to take the sum of money therein mentioned out of the Treasury. The section in the sundry civil act of 1882 is as follows:

"Provided, That no act passed authorizing the Secretary of the Treasury to purchase a site and erect a public building thereon shall be held and construed to ap-

chase a site and erect a public building thereon shall be field and construed to appropriate money, unless the act in express language makes such appropriations."

Though this is a proviso in an appropriation bill, its language is so general as to affect all future legislation. The act under consideration, therefore, must contain an express appropriation of money. There certainly is no express appropriation of \$2,000,000. There is a reference in the second paragraph of the act to an appropriation. In the third paragraph the reference is repeated, with the words "said appropriation." The word "appropriated" occurs in the fourth paragraph, and "balance of the appropriation" twice in the fifth. It would be natural to refer these words to the appropriation of the appropriation of the appropriation of the appropriation. words to the express authority conferred on the Secretary of the Treasury in the first

paragraph—to acquire by purchase, condemnation, or otherwise, a site, and cause to be erected thereon a suitable building not to exceed the sum of \$2,000,000, and to give to that authority the effect of an appropriation. Such a construction, however, would be an appropriation by implication, forbidden by the section of the sundry civil act of 1882, quoted above.

The parliamentary history of the act will show that the words "appropriation" and "appropriated," wherever they occur in the act, must have reference to a future appropriation to be made in another act, and must be construed to limit the expenditure under such appropriation. It appears that on May 2, 1890 (Congressional Record, vol. 21, part 5, p. 4172), a bill (H. R. 9957) to provide for the purchase of a site and the erection of a public building thereon, at Philadelphia, in the State of Pennand the erection of a public building thereon, at Finhaterphia, in the State of Fehnsylvania, was introduced by Mr. Bingham, was read twice, and referred to the Committee on Public Buildings and Grounds. On June 5, 1890 (Congressional Record, vol. 21, part 6, p. 5670), Mr. Darlington, from the Committee on Public Buildings and Grounds, reported this bill with amendments, and it was committed to the Committee of the Whole House on the state of the Union and ordered to be printed. The bill, as originally introduced by Mr. Bingham, was exactly like the act under consideration except that at the end of the first paragraph were the following words: "Which said sum of two million dollars is hereby appropriated for said purpose out of any moneys in the United States Treasury not otherwise appropriated," and that in the fourth paragraph after the words "no money appropriated" were the words "by this act," and in the fifth paragraph, before the word "appropriation" as it occurs twice therein, was the word "said." The bill as reported back by the committee was accompanied by a report (Report No. 2326) which recommended the passage of the bill, with the following amendments:
"In line twelve, strike out all after the word "dollars" down to and including

line fifteen, which is the appropriating clause. In line twenty-six, strike out the words "by this act." In line thirty-eight, strike out the word "said" In line forty-one,

strike out the word "said."

Nothing else was done with the bill in the first session. On February 19, 1891, Mr. Spooner, for Mr. Cameron, introduced in the Senate a bill exactly in the words of the bill which we have followed in the House, as amended by the Committee on Public The bill was referred in the Senate to the Committee on Public Grounds and Buildings, and on February 26, 1891, was reported back and passed. February 28, 1891, in the House the Senate bill was read twice and referred to the Committee on Public Grounds and Buildings, by whom, on the same day, it was reported with the recommendation that, as it was identical with the House, bill, it be taken as a the recommendation that, as it was identical with the House, bill, it be taken as a substitute for the same and passed (H. R. 4025). It was passed in this form, and was approved on March 3, 1891. The Senate bill is the same bill as the amended House bill, and was introduced as an original bill in the Senate merely to facilitate its passage. The history of the House bill must therefore affect the construction of the Senate bill which finally became the law. The amendments to the original House bill conclusively established the intention on the part of Congress to eliminate the appropriation.

A reference to the Congressional Record, vol. 21, part 5, pp. 2040 to 2049, will disclose an extended debate as to the policy to be pursued by the House of Representatives on bills for the erection of public buildings and will throw light on the sentatives on bills for the erection of public buildings and will know light on the purpose of the House Committee on Public Buildings and Grounds, in striking out the appropriating clause in the bill under discussion. It will there be found that the conclusion reached was, that no public building bill should be allowed to pass containing an appropriation; that the matter of appropriations for the buildings whose construction was authorized should be left to the Appropriations Committee, to be included in the sundry civil bill. The Senate concurred in that plan as will be found by reference to the Congressional Record, vol. 21, part5, pp. 4188 and 4189, where, in discussion over the passage of a bill authorizing the erection of a public building at Lima, Ohio, Mr. Payne, in support of his amendment to the bill, striking out the appropriating clause, in answer to Mr. Sherman's remark that "the words of appropriation ought to be left in" said: "No, the committee of conference have agreed, on the demand of the other House, to strike out all the appropriations in public building bills, and all the bills that go to the House are amended in that way."

Mr. Sherman. "And providing for the appropriations in a separate general bill."

Many of the public building bills passed by the Fifty-first Congress were prepared

with an appropriating clause, and when this was stricken out in accordance with the policy just adverted to, care was not always taken to strike out also in subsequent clauses of the same bills references to the eliminated appropriation. These clauses usually fixed the time at which parts of the appropriation should become available. The only effect which can be properly given to such references in public building acts, is to make them apply to appropriations for the purpose of carrying out the act to be thereafter made.

A consideration of other bills passed by this same Congress for the erection of public buildings, in connection with the appropriations therefor in the sundry civil bill, leaves no doubt of the correctness of this construction. On page 66 of the Pamphlet Laws of the first session, Fifty-first Congress, is an act authorizing the construction of a public building at Baton Rouge, La. The third clause of that bill is: "So much of the appropriation herein made as may be necessary to defray the expenses of advertising for proposals, etc., shall be immediately available."

vertising for proposals, etc., shall be immediately available."

The third clause is: "So much of said appropriation as may be necessary for the preparation, etc., shall be available immediately upon the report of the commission-

ers selecting the site."

Other clauses of a similar character follow. Nevertheless, we find on page 371 of the sundry civil act for the same year an appropriation "for post-office at Baton Rouge, Louisiana; for purchase of site and commencement of building under present limit, thirty thousand dollars." It would be absurd to contend that the bill, authorizing the construction and fixing the limit of \$100,000, contained an appropriation of that amount, and that this appropriation of \$30,000 in the sundry civil bill was in addition thereto. The two acts are only to be reconciled, therefore, on the theory that the first was not intended to carry an appropriation, as its parliamentary history will show, and that the reference to the appropriation made in the original act must be given effect by applying it to the appropriation under the sundry civil bill. The same thing is true of the acts authorizing the construction of public buildings at Martinsburg (Pamphlet Laws, Fifty-first Congress, first session, 127), at Lafayette, Ind., and at Burlington, Iowa, by the same congress (Pamphlet Laws, pp. 111 and 107), appropriations for which will be found in the sundry civil act in the same volume (p. 371 et seq.) of the Pamphlet Laws.

The conclusion necessarily is, then, that there is no appropriation in the act now in question. The fact that Congress failed in the sundry civil appropriation act of 1891 to make any appropriation to which the language in this act can apply, is

not material.

The presumption arising therefrom must be that the Fifty-first Congress deemed it wise to delay the time for carrying out the act until a future Congress should make an appropriation therefor.

Very respectfully,

WM. H. TAFT,
Solicitor General.
W. H. H. MILLER,
Attorney General.

It will be seen that the Attorney-General held that the act in ques-

tion contained no appropriation.

On July 10, 1891, the Secretary of the Treasury addressed a communication to the following-named gentlemen, residing in Philadelphia: Hon. E. H. Fitler, Samuel Gustine Thompson, Anthony J. Drexel, William M. Singerly, James H. Windrim, Alexander K. McClure, and O. C. Bosbyshell.

The communication read:

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., July 10, 1891.

DEAR SIR: The act of Congress approved March 3, 1891, entitled "An act to provide for the purchase of a site and the erection of a public building thereon," directed "That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire by purchase, condemnation, or otherwise, a site and cause to be erected thereon a suitable building, including fireproof vaults, heating and ventilating apparatus, elevators, and approaches, for the use and accommodation of the United States Mint, in the city of Philadelphia and State of Pennsylvania, the cost of said site and building, including said vaults, heating and ventilating apparatus, elevators, and approaches, complete, not to exceed the sum of two million dollars."

vators, and approaches, complete, not to exceed the sum of two million dollars."

It was the very general belief of those interested in the passage of this measure that it was the intention of Congress to appropriate \$2,000,000 for carrying out the purposes of the act, but owing to the absence of express language of appropriation, it has been decided that there is no money appropriated by this act for the purposes mentioned, and consequently that no expense can be incurred in connection therewith. In order, however, that the Department may be in a position to submit for future Congressional action some definite estimate as to the cost of procuring a suitable site for the mint at Philadelphia, I have the honor to request that you will act as a member of a commission of citizens of Philadelphia, designated by me, for the

FI 91----13

purpose of recommending to the Department a suitable site for the new mint build-

ing in that city and an estimate of the probable cost.

It will be understood, of course, that such services will be gratuitous and that no expenses of any kind connected with the work of the commission can be paid by the Department, and that no contract can be made with any person for the purchase of

It will be a public service and I shall be personally obliged if you will act in the

capacity requested.

It is desired that a report in writing should be made to me by the commission not later than November of the present year.

I am sir, very respectfully,

CHARLES FOSTER, Secretary of the Treasury.

On September 8, 1891, the commission designated by the Secretary of the Treasury submitted a unanimous report recommending a suitable site for the mint of the United States at Philadelphia, with an estimate of its cost, not exceeding \$800,000.

I have the honor to recommend that Congress be requested to appropriate \$800,000 for the purchase of a new site for the mint at Phila-

delphia, including the preparation of plans for a new mint.

AMENDMENT TO THE LAW REGARDING PARTING AND REFINING OF BULLION AT THE MINTS AND ASSAY OFFICE AT NEW YORK,

In my last fiscal report attention was directed to the fact that under a decision of the First Comptroller of the Treasury, October 24, 1885, the receipts from the sale of spent acid and blue vitriol, by-products of the acid refineries, which prior to that time had been used in offsetting bills for acid for the refinery, were construed to be sales of old material, and the money so derived was required to be deposited in the Treasury of the United States as a miscellaneous receipt.

In that report letters of the Secretary of the Treasury, the Director of the Mint, and the First Comptroller, recommending a change in the law, by which the amount received from the sale of by-products from acid refineries might be applied as formerly to the expenses of the refineries,

were presented.

These letters were as follows:

TREASURY DEPARTMENT, January 20, 1887.

SIR: I have the honor to transmit herewith, for the consideration of Congress, copy of letter of the Director of the Mint, of the 12th instant, and inclosure, recommending certain legislation in the matter of parting and refining bullion by which the sale of the by-products of acid refineries can be applied to the reduction of the expenses of such refineries.

Respectfully, yours,

D. MANNING, Secretary.

The Speaker of the House of Representatives.

TREASURY DEPARTMENT, BUREAU OF THE MINT, Washington, D. C., January 12, 1887.

Sir: Paragraph 8, page 379, of the Supplement to the Revised Statutes of the United States, provides:

"And refining and parting of bullion shall be carried on at the mints of the United States and at the assay office at New York.

"And it shall be lawful to apply the moneys arising from charges collected from depositors for these operations pursuant to law, so far as may be necessary, to the defraying in full of the expenses thereof, including labor, materials, and wastage. "But no part of the moneys otherwise appropriated for the support of the mints and the assay office at New York shall be used to defray the expenses of refining and

parting bullion."

Under this provision of law, which was passed originally in the appropriation act approved August 15, 1876 (19 Stats., 156, 157), the charges for parting and refining bullion were so fixed at the several coinage mints and the assay office at New York that the receipts should equal, as nearly as possible, the expenses of the operations. The spent acid and blue vitriol resulting from the processes of refining, prior to October 24, 1885, have been credited on the bills for acid, thereby reducing the expenses of the refinery at the New York assay office some \$20,000 a year. On the 24th October, 1885, the first comptroller decided that the receipts from spent acid and blue vitriol must be considered as old material, and, under section 3618 Revised Statutes, deposited in the Treasury. In the report of this Bureau for the last fiscal year, pages 6 and 7, I have referred to the effect of this ruling in the accounts of the assay office at New York. A similar effect will be produced upon the accounts of the whole mint service, in that the expenditure will not appear to have been diminished by regular manufacturing assets.

A still more important effect of this ruling is to render the acid refineries of the mint service, under the present schedule of charges, no longer able to be self-support-

ing, as the law requires.

It will be necessary, therefore, either to increase the schedule of charges imposed upon depositors of bullion or modify the law so as to explicitly provide for the application of the proceeds of the sale of the by-produces of the acid refineries of the application of the proceeds of the United States to the reduction of the expenses of the sale of the by-production of the expenses of the sale of mints and assay offices of the United States to the reduction of the expenses of the operations of such acid refineries.

I have the honor to recommend the latter alternative, and beg to suggest that par. 8, p. 379, of the Supplement to the Revised Statutes, be reënacted in the legislative appropriation bill for the fiscal year 1888, so as to read as follows:

"And refining and parting of bullion shall be carried on at the mints of the United

States and at the assay office at New York.

"And it shall be lawful to apply, pursuant to law, the moneys arising from charges collected from depositors and from the proceeds of the sale of by-products resulting from the operations of the refinery, so far as may be necessary, to the defraying in full of the expenses thereof, including labor, materials, and wastage.

"But no part of the moneys otherwise appropriated for the support of the mints and the assay office at New York shall be used to defray the expenses of refining and parting bullion."

Hoping that you will be pleased to present this matter to the consideration of

I am, very respectfully, yours,

JAMES P. KIMBALL Director of the Mint.

The Secretary of the Treasury.

TREASURY DEPARTMENT, January 14, 1887.

Respectfully referred to the First Comptroller for report.

HUGH S. THOMPSON. Assistant Secretary.

TREASURY DEPARTMENT, FIRST COMPTROLLER'S OFFICE, Washington, D. C., January 15, 1887.

Sir: I have examined the letter of the Hon. James P. Kimball, Director of the Mint, to you, of January 12, 1887, in regard to appending a clause to the bill making appropriations for the legislative, executive, and judicial departments of the Government, for the fiscal year ending June 30, 1888, containing a provision similar to that which was in the bill for 1876, found in 19 Stats., 156, 157, which letter you have referred to me for report.

In reply, I will say I see no good reason why such a clause should not be appended

to the bill in question.

The letter of the Director of the Mint is herewith returned.

Very respectfully,

M. J. DURHAM, Comptroller.

The Secretary of the Treasury.

The following bill, framed to cover the proposed change, was introduced in the Fifty-first Congress:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph eight of chapter three hundred and twentyseven of the Supplement to the Revised Statutes of the United States, which requires that refining and parting of bullion shall be carried on at the mints of the United States and at the assay office at New York, be amended by inserting after the word "law," in the fourth line, the following words: "and from the proceeds of the sale of by-products resulting from the operations of the refinery," so that the paragraph shall read:

"And it shall be lawful to apply the moneys arising from charges collected from depositors for these operations pursuant to law, and from the proceeds of the sale of by-products resulting from the operations of the refinery, so far as may be necessary, to the defraying in full of the expenses thereof, including labor, materials, and

wastage."

I have the honor to again urge the passage of this measure.

SUMMARY OF OPERATIONS OF MINTS AND ASSAY OFFICES.

The precious metals received at the mints and assay offices during the fiscal year 1891 were valued at \$143,255,832, against \$92,793,958 received in the previous year, an increase of \$50,461,874.

The value of the precious metals deposited only partially represents the operations necessary for their metallurgical and mechanical treat-

ment.

The operations of the melting and refining departments of the coinage mints and of the assay office at New York, so far as the value of the metals treated is concerned, is exhibited in the following table:

BULLION OPERATIONS OF THE MELTING DEPARTMENTS, 1891.

Metals.		Standard ounces.	Coining value.
			\$75, 399, 570 88, 681, 500
Total			

The operations of the coining branches of the mints in the manufacture of finished coins from ingots prepared by the melting departments were, in value of the metals operated on, as follows:

BULLION OPERATIONS OF THE COINING DEPARTMENTS, 1891.

•	Metals.	Standard ounces.	Coining value.
			\$48, 136, 204 79, 039, 738
Total	,	70, 512, 097	127, 175, 942

The work of the minor assay offices, which consisted in the receipt and assaying of deposits and the manufacture of unparted bars of goldand silver, was as follows:

OPERATIONS OF MINOR ASSAY OFFICES, 1891.

	Metals.	· .	Standard ounces.	Coining value.
			188, 791 63, 109	\$3, 512, 390 73, 435
Total			251, 900	3, 585, 825

The following is a summary of the three preceding tables, intended to exhibit, as nearly as possible, the value of the precious metals treated in the operations of the mints and assay offices during the last fiscal year:

Bullion Operated Upon in the Melting and Coining Departments of all the Mints and Assay Offices, 1891.

	Metals.	Standard ounces.	Coining value.
GoldSilver		6, 640, 048 144, 135, 442	\$123, 535, 77 4 167, 721, 238
Total		150, 775, 490	291, 257, 012

In quantity the precious metals operated upon in the different departments of the mints and assay offices during the last fiscal year exceeded 228 tons of gold and 4,942 tons of silver.

The value of the precious metals wasted in the metallurgical and

mechanical operations was \$12,287.05.

In addition to operative wastage, a loss of \$15,850.41 was incurred from the sale of sweeps, equivalent to the difference between the value of the precious metals contained in sweeps recovered and the amount realized from the sale of sweeps too base to be treated advantageously in Government refineries.

There was a similar loss of \$84.16 by the sale of leady melts, and a wastage of minor-coinage metal of the value of \$1,188.78.

These wastages and losses aggregated \$29,410.40.

Against these losses there were gains arising from the operations on bullion as follows:

	Character.	Amount.
1	rned by operative officers	
	vered in grains and sweepings	· I
. Gain on bullion ship	ped from the minor assay offices to the mint fo	or coinage
• Total gains		52, 300. 67

Deducting the value of the total operative wastage and loss on sale of sweeps from the value of the incidental gains of bullion, there was a net gain in the operations of the mints during the year of \$22,890.27.

The relative cost of the coinage executed at the four coinage mints is exhibited in the following table:

COST OF COINAGE AT EACH MINT, 1891.

Location of mint.	Pieces coined.	Pieces coined, exclu- sive of minor coins.	Expenses for salaries, wages, and incidentals.	Cost per piece, including minor coinage.	Cost per piece, exclu- sive of minor coinage.
Philadelphia	94, 749, 632	31, 409, 082	\$552, 099. 07	\$0.00582+	\$0.0175+
San Francisco	12, 542, 565	12, 542, 565	299, 585. 31		. 0239 —
New Orleans	9, 870, 913	9, 870, 913	201, 163. 76		.0203+
Carson	2, 384, 767	2, 384, 767	134, 667. 25		.0564+
Total and average	119, 547, 877	56, 207, 327	1, 187, 515. 39	0.00992+	.0211+

While it is inequitable to draw comparisons between the relative cost of coinage at the various mints, as exhibited in the above table, for the reason that the character and amount of the coinages executed at them are so dissimilar, it is gratifying to report that the expenses of coinage was considerably reduced as compared with prior years, the cost per piece last year being slightly less than 1 cent, against a cost per piece exceeding 1 cent the prior year, and, exclusive of minor coinage, $2\frac{1}{10}$ cents per piece during the last fiscal year against $2\frac{1}{2}$ cents in the preceding year.

The following table exhibits the proportion of finished coins produced from ingots operated upon at each of the coinage mints during the

year:

Percentage of Good Coin Produced from Ingots operated upon, for the Fiscal Year 1891.

,	Coinage mints.	Gold.	Silver.
Philadelphia		43.9	46. 2
San Francisco		52. 1	51.1
New Orleans			48.8
Carson		50.7	56.1

MINT AT PHILADELPHIA.

The value of the gold and silver received at the mint at Philadelphia during the fiscal year 1891, was:

Gold	\$7, 613, 486. 19
Silver	50, 338, 474. 33

In addition 482,500 pounds of minor coinage blanks were received. In the assay department the number of assays made during year approximated:

Gold	 	 17, 140
Silver	 	 45, 200

The quantity of precious metals operated upon by the melter and refiner was:

	Sta	naara ounces.
Gold	 	824, 873
		35, 390, 724

The melter and refiner returned in settlement of his accounts a surplus of both gold and silver, as follows:

			Count	ter a cerroom
Gold	••••••		•	115 044
Com	• • • • • • • • • • • • • • • • • • •	 		TIO, OXX
Silver	• •			1, 801, 60

The number of melts made in the same department and the number condemned during the fiscal year were as follows:

MELTS OF GOLD AND SILVER, 1891.

Metals.	For bars.	For ingots.	
metans.		Made.	Condemned.
Gold	309	10	. 0
Silver	769	9, 688	137
Total	1,078	9, 698	137

The operations of the refinery of the mint at Philadelphia are exhibited in the following table:

REFINERY OPERATIONS, 1891.

	Bullion.	Gold (standard ounces).	Silver (standard ounces).
Sent to refinery:	4	 	
Gross weight		 415,881	475, 119
Standard ounces by ass	y	 241, 589	678, 833
Returned from refinery	•	 241, 605	681,059

The operations of the coining department, comprising gold, silver, and minor coinage metal, are exhibited in the following tables:

	Metals operated on.	٠.	Ounces.
Gold			67, 560
Silver			31, 108, 22
Minor coinage			7, 321, 00

WASTAGE OF THE COINER'S DEPARTMENT.

	Description.		Standard ounces.
Gold		, '	2. 268

The wastage of the precious metals in the mechanical branch of the mint was very small as compared with the large amount operated upon.

The coinage executed was as follows:

	Description.	Number of pieces.	Value.
Gold		31, 343, 654	\$537, 002. 50 16, 729, 774. 15 1, 166, 936. 50
Total		94, 749, 632	-18, 433, 713, 15

The percentage of good coins produced from ingots operated upon was: Gold, 43.9 per cent; silver, 46.2 per cent.

The number of medals struck in the same department for the year was as follows:

MEDALS MANUFACTURED, 1891.

•	Character.		Number.
Gold		-	191
Silver		*******	1,502
Bronze			1,600
	•	•	3, 293

Federal Reserve Bank of St. Louis

In my last fiscal report attention was directed to the valuable and material improvements introduced in the mint at Philadelphia, under the efficient management of the present superintendent, Mr. O. C. Bosbyshell, insuring not only greater comfort and convenience, but more efficient service.

During the last fiscal year the addition of needed improvements, the abandonment of obsolete machinery, and the reclamation of room, have added greatly to the convenience of business and the efficiency of the

mint.

Aside from the purchase of new machinery, most of these improve-

ments have been made by the mint force and at slight expense.

A commodious room has been built on the top of the steel vault in the courtyard, which is used for the redemption, sorting, and counting of minor coins, while the space formerly occupied in the basement for this purpose has been utilized for temporary vaults for the storage of silver bars.

The storage capacity has been further increased by lowering the floors of two old vaults to a level with the corridor, while vaults for the cashier and for the custody of silver coins received for recoinage have been constructed by lowering the floor of the custodian's room and re-

moving his office to the upper corridor.

The rooms assigned the cashier and calculating clerks have been enlarged and greatly improved by removing the walls in the east and west corridors and inserting in place thereof glass partitions and counters. This not only affords more space and light, but greater convenience to the public.

In the coining department, a new set of steel rolls with the necessary

shafting has been set up.

The rolls used for finishing the strips were formerly obtained from Krupp, in Germany, but in late years he has declined to furnish them.

American steel rolls have been tried with indifferent success, and recently the shrinkage of hardened sleeves over steel mandrils were

tried, but with little satisfaction.

It is therefore gratifying to report that new steel rolls, manufactured by the Tretheway Company, of Pittsburg, were secured during the past year, which have been found to do the work admirably. They are harder, and retain their face even better than the Krupp rolls, and are superior to any steel rolls yet used in the mint.

Two additional recutting presses and a self-feeding cutting press

have been added to the coining department.

A new turning up lathe has been put in place in the engraving department, and in the machine shop a cutting off lathe, an open side-planer, a twist drill-grinder, and an emery tool-grinder, all of the most approved make.

A 25 horse-power electric motor has been introduced, so that the machine shop, engraving department, hoisting machinery, and coining

presses are now independent of steam-power.

A new circular saw, with adjustable table, has been provided for the

carpenter shop.

New steam pumps of the best pattern, an improved exhaust head in steam pipes, improved methods of ridding the boilers from scale and for disposing of the hot water from condensed steam, have been introduced in the engineer's department.

The furniture of the mint has been overhauled and repaired, and the

entire building has been thoroughly cleaned and brightened up.

The following table exhibits approximately the value of foreign coins deposited at the mint at Philadelphia during the last fiscal year:

Foreign Gold and Silver Coins Melted at the Mint at Philadelphia, Fiscal Year 1891.

Countries of coinage.	Value of gold coins.	Value of silver coins.	Total.
Spain		\$105.60	\$338, 72 105, 60
Mexico Mixed pieces			1,640.68 1,097.01
Total		2, 466. 74	3, 182. 01

At the close of the fiscal year the bullion and coin in the mint at Philadelphia were weighed under the supervision of Mr. Cabell Whitehead, of this Bureau, who reported in writing that they had found on hand all the public money with which the superintendent was charged.

The following table exhibits the denominations of domestic gold coins deposited at the mint at Philadelphia, during the last fiscal year:

United States Gold Coin Melted at the Mint at Philadelphia, Fiscal Year 1891.

Denominations.				
Double eagles		\$51,680		
Half eagles				
uarter eagles				
Chree-dollar pieces				
Total		143, 854		

The following table exhibits the denominations of domestic silver coins melted at the mint at Philadelphia, during the last fiscal year:

United States Silver Coin Melted at the Mint at Philadelphia, Fiscal Year, 1891.

Denominations.	•	Value.
Dollars coined prior to 1878		\$4, 254. 0
Standard dollars		8, 412. 0
Trade dollars		970.0
Half dollars		253, 183. 0
Quarter dollers		323, 445. 0
Twenty-cent pieces		1,807.2
Dimes		85, 758. 6
Half dimes		13, 563. 9
Three cent pieces		944.0
Total		692, 337, 7

The expenditures for the different classes of supplies at the mint at Philadelphia during the past fiscal year were as follows:

MINT AT SAN FRANCISCO.

The weight and value of the gold and silver received at the mint at San Francisco, during the fiscal year 1891, was:

	Metal.		Standard ounces.	Value.
Gold			1, 159, 397, 979	\$21, 570, 194. 95
Silver		 	8, 756, 489, 60	10, 189, 369, 71
Total	· · · · · · · · · · · · · · · · · · ·	 		31, 759, 564. 66

The melter and refiner received, during the fiscal year, bullion containing 2,283,251 standard ounces of gold.

There were made 766 melts of goldingots, of which 3 were condemned. The melter and refiner returned to the superintendent, at the close of the fiscal year, in settlement of his accounts, an excess of 806.219 standard ounces of gold, valued at \$14,999.42.

The same officer received, during the year, bullion containing 17,360,638 standard ounces of silver. There were made 9,625 melts of

silver ingots, of which 17 were condemned.

The melter and refiner returned to the superintendent, at the close of the fiscal year, in settlement of his silver accounts, a surplus of 1,575.29 standard ounces, of the cost value of \$1,426.57.

The operations of the refinery embraced 226,147 standard ounces of

gold and 1,487,305 standard ounces of silver.

There were manufactured during the year 171 fine silver bars, of the value of \$222,420.47.

The number of melts of ingots made and condemned at this mint each fiscal year since 1874 is presented in the following table:

MELTS OF INGOTS MADE AND CONDEMNED AT THE MINT AT SAN FRANCISCO, FROM 1874 TO 1891.

	Gold-i	ngot melts.	Silver-i	ingot melts.

Condemned, per cent		.0057		.001

The coiner received from the superintendent, during the fiscal year, 2,206,879 standard ounces of gold ingots, and manufactured \$21,460,000 in double eagles.

The proportion of finished coin produced from gold ingots operated

upon was 52.1 per cent.

The wastage of gold in the mechanical operations of the mint was 47.822 standard ounces, of the value of \$889.71, a little over 4 per cent of the legal allowance.

The coiner received from the superintendent, 15,956,276 standard ounces of silver ingots, and manufactured into coin 9,350,373 silver dollars and \$211,919 in dimes, a total of 11,469,565 pieces, of the nominal value of \$9,562,292.20.

The proportion of finished coin produced from silver ingots operated upon was 51.1 per cent against 47.3 per cent in the preceding fiscal year

The silver wastage in the mechanical operations of the mint was

2,619.30 standard ounces, of the value of \$2,372.03.

The operations of the coining branch of the mint at San Francisco for a series of years are exhibited in the following table:

OPERATIONS OF THE COINING DEPARTMENT OF THE MINT AT SAN FRANCISCO FOR THE NINE YEARS ENDING JUNE 30, 1891.

	·		·	
Fiscal years.	Cóinage.	Per cent of fin- ished coin produced.		Gain.

REMARKS.—"Assayer's materials" include matresses, pipettes, dishes, etc.; "dry goods" include cost of material for mittens, sleeves, toweling, coin sacks, scale covers, etc.; "labor, and repairs" includes only temporary labor on repairs; "sewing" includes the making of mittens, sleeves, coin sacks, scale covers, towels, etc.; "sundries" includes only such items as can not readily be classified.

At the close of the fiscal year the bullion and coin in the mint were weighed under the supervision of Mr. William E. Morgan, of this Bureau, who reported that he found on hand all the public money with which the superintendent was charged.

Under the act making appropriations for sundry civil expenses of the Government for fiscal year 1890, two steel vaults constructed under con-

tract made February 24, 1890, have been completed.

One of the yaults is 29 feet 4 inches long, 17 feet 9 inches wide, and 11 feet 10% inches high, containing 6,199 cubic feet; and the other 20 feet 3½ inches long, 17 feet 9 inches wide, and 11 feet 10½ inches high, containing 4,288 cubic feet.

The storage capacity of these vaults is about 42,000,000 silver dollars

in sacks of \$1,000 each.

The yaults are lined with three layers of three eighths inch steel, 5-ply welded steel, and iron and Bessemer ductile steel, and furnished with outer and inner doors. The outer door is single, made of six layers of one half inch welded steel, iron and ductile steel, fitted with bolts made of 7-ply welded chrome steel and iron. The inner door is folding, made of four layers of the same material, all hardened drill, saw, and file proof, and each fitted with four tumbler combination locks.

The total cost of the vaults was \$25,196. One of these vaults is at present used for the storage of silver dollars, and the other for the

storage of silver bars.

During the past year the old sidewalks around the mint have been removed and replaced by patent cement sidewalks.

MINT AT NEW ORLEANS.

The precious metals received at the mint at New Orleans during the last fiscal year, were as follows:

Metal.		Standard ounces.	Value.
		6, 933. 067	\$128, 987. 29 12, 991, 560. 27
·····	I		

The work of the assay department consisted of 14,411 silver assays

and 667 gold assays, a total of 15,078 assays.

The melter and refiner received, during the fiscal year, 45,105 standard ounces of gold, melted for ingots 13,546 ounces, and returned to the superintendent at the close of the year, in settlement of his accounts, a surplus of 5.646 standard ounces of gold.

The same officer operated upon 17,642,782 standard ounces of silver.

He made 2,095 melts of ingots, of which 7 were condemned.

He returned to the superintendent at the close of the year, in settlement of his silver accounts, a surplus of 1,903.65 standard ounces of silver.

The operations of the coiner's department during the fiscal year were

confined exclusively to the manufacture of silver dollars.

This Department operated upon 17,382,560 standard ounces of silver ingots and delivered to the superintendent 9,870,913 silver dollars, being 48.8 per cent of finished coin produced from ingots operated upon.

The mechanical wastage was 3,417.63 standard ounces, or about 19.63 per cent of his legal allowance.

The following table exhibits the denominations of United States gold coins melted at the mint at New Orleans during the last fiscal year:

REMARKS.—"Assayer's materials" include matrasses, pipettes, dishes, etc.; "Dry goods" include cost of material for mittens, sleeves, toweling, coin sacks, scale covers, etc.; "Labor and repairs" include only temporary labor on repairs; "Sewing" includes the making of mittens, sleeves, coin sacks, scale covers, towels, etc.; "Sundries" includes only such items as can not readily be classified.

J. Cecil Legaré was appointed by the President to be Melter and Refiner of the mint, vice Leonard Magruder, and took charge May 1, 1891.

Arsemus R. Burkdoll was appointed by the President to be Coiner of the mint, vice Allen Thomas, and entered upon office May 1, 1891,

The bullion in the possession of the operative officers was weighed by Mr. B. F. Butler, the computer of this Bureau, and the wastages of the outgoing officers ascertained and declared.

MINT AT CARSON.

The deposits at the mint at Carson, during the fiscal year 1891, were as follows:

	Metal.	 Standard ounces.	Value.
-		 ,	\$1, 619, 556. 94 2, 431, 947. 23
Total	······································	2, 177, 005. 846	4, 051, 504. 17

The melter and refiner received, during the year, bullion containing 276,851 standard ounces of gold.

There were made 102 melts of gold ingots, of which 12 were con-

demned.

The melter and refiner returned to the superintendent, at the close of the fiscal year, in settlement of his gold accounts, an excess of 225.921 standard ounces.

The same officer received, during the year, bullion containing 3,965,587 standard ounces of silver, from which were made 1,688 melts of silver ingots, of which 26 were condemned, and 374 fine silver bars, valued at \$616,479.45.

There was a silver wastage of 3,458.26 standard ounces.

The wastage of silver by the melter and refiner was due in part to the large number of fine silver bars manufactured, but largely to the fact that a lot of base silver bullion, the accumulation of two years, was worked up.

The coiner received from the superintendent 230,402 standard ounces of gold ingots, from which were coined double eagles of the value of \$593,880, eagles of the value of \$702,320, and half eagles of the value of \$879,000; a total of 275,726 pieces, of the value of \$2,175,200.

The proportion of finished coin produced from ingots operated upon

was 50.7 per cent.

The gold wastage in the mechanical operations was 10.101 standard ounces, valued at \$187.93, being less than 1 per cent of the legal allowance.

The coiner received from the superintendent 3,228,681 standard ounces of silver ingots.

There were coined and delivered to the superintendent, 2,109,041 stand-

ard silver dollars.

The proportion of silver coin produced from ingots operated upon was

56.1 per cent, a very large percentage.

The silver wastage in the mechanical operations was 435.21 standard ounces, costing \$390.62.

The expenditures at the mint at Carson for the different classes of supplies during the fiscal year 1891 were as follows:

EXPENDITURES AT THE MINT AT CARSON FOR THE FISCAL YEAR 1891.

At the close of the fiscal year the bullion and coin in the mint were weighed under the supervision of Mr. William E. Morgan of the mint Bureau, who reported that he found on hand all the bullion and coin with which the superintendent was charged.

ASSAY OFFICE AT NEW YORK.

The business of the United States assay office at New York during the fiscal year 1891 is exhibited in the following table:

	G	old.	Silver.		
Character.	Standard ounces.	Value.	Standard ounces.	Value.	
Bullion deposited	1, 268, 512. 126	\$23, 600, 225. 59	6, 431, 031. 97	\$7, 483, 382. 63	
Partings	84, 969. 538	1, 580, 828. 62	104, 829. 93	121, 983. 92	
Total	1, 353, 481. 664	25, 181, 054. 21	6, 535, 861. 90	7, 605, 366. 57	
Bars prepared by melter and refiner:					
Fine	1, 195, 803. 207	22, 247, 501. 53	4, 304, 883. 64	5, 009, 319. 14	
Mint	212, 254. 275	3, 948, 916. 75	152, 868. 64	177, 883. 51	
Standard	16, 773. 237	312, 060. 22	54, 695. 74	63, 645. 95	
Unparted	11. 184	208. 07	1, 898, 985. 17	2, 209, 728. 20	
Total	1, 424, 841. 903	26, 508, 686. 57	6, 411, 433. 19	7, 460, 576. 80	

The work of the assay department for the fiscal year comprised the testing of some 13,000 melts of bullion, upward of 500 barrels of sweeps, the making of 65,000 cupels, and the stamping of nearly 70,000 bars; also many hundred special assays.

The principal improvement in this department during the year was

the introduction of an electric motor plant.

The amount of bullion operated upon in the acid refinery during the fiscal year was 686,101 standard ounces of gold and 3,472,898 of silver. The result of the year's work was a surplus of 603.085 ounces of gold and 2,034.18 of silver.

A feature of the business not much regarded by the general public is worthy of attention, both as an economy, and as indicating the great progress effected, in recent years, in the refineries of gold and silver ore established in the United States. Formerly the sweepings recovered were sold at an average deduction of about 4½ cents per pound from assay value, and were shipped abroad for reduction. Not only has the shipment abroad ceased, but the average deduction from assay value, made by domestic refineries in buying, has been reduced to about 1½ cents. As 460 barrels of sweeps, containing nearly 200,000 pounds net, were sold from this institution alone during the year, some idea may be formed of the immense saving throughout the country effected by the improvement in refining base bars and bullion.

At the close of the year the gold and silver bullion was weighed and the coin examined by Messrs F. P. Gross, adjuster of this Bureau, and H. C. Stier, of the First Auditor's Office, Treasury Department, who reported that they found on hand all the bullion and coin with which the

superintendent was charged.

The expenditures of the assay office at New York for the different classes of supplies are exhibited in the following table:

EXPENDITURES AT THE ASSAY OFFICE AT NEW YORK FOR THE FISCAL YEAR 1891.

ASSAY OFFICE AT ST. LOUIS.

The business of the assay office at St. Louis, Mo., during the fiscal year 1891, is exhibited in the following table:

	Items.	Amount.
Earnings		1,405.09

Percentage of net expenses to deposits, nine-tenths of 1 per cent.

The deposits for the preceding fiscal year aggregated \$346,284.64, showing a gain in business of \$134,156.62, or $38\frac{7}{10}$ per cent.

Samples from twenty-seven shipments of Mexican ore were received from the United States surveyor of customs at St. Louis and were assayed for him. These require the determination, by three separate assays, of the gold, silver, lead, and copper in each sample, and would have cost the Government \$432 if paid for at the rates formerly charged in this office and prescribed by regulations then in force. No credit is taken for this in the earnings.

There have been added to the equipment of the office during the year one 5 horse-power Westinghouse standard automatic engine and two blowers. These are for use with the bench of gas furnaces purchased during the preceding fiscal year, and have been placed in the quarters which will be occupied by this office in the old custom-house building in this city when completed.

The expenses of the assay office at St. Louis for the different classes

of supplies during the last fiscal year were as follows:

EXPENDITURES AT THE ASSAY OFFICE AT ST. LOUIS, FOR THE FISCAL YEAR 1891.

Expenditures for supplies.	Total.
Acids	\$19.92

St. Louis	480, 441. 26	1, 405. 09	5, 899. 39	0.9
Total	3, 585, 834. 70	11,771.27	73, 061. 60	1.7

MONETARY STATISTICS OF FOREIGN COUNTRIES.

The statistics of the coinage and production of the precious metals in foreign countries, published annually in the reports of this Bureau, are obtained directly from the governments of such countries by our representatives abroad, a fact which invests them with the highest degree of reliability, and explains why it is that the reports of the Mint Bureau have come to be recognized, the world over, as the most exhaustive and trustworthy authority on the statistics relating to these subjects.

The points on which information is sought are embodied in a set of questions in a circular sent through the Department of State to our diplomatic representatives abroad, and the answers are received in the

form of a report direct to this Bureau.

The questions covering the calendar year 1890 were as follows:

(1) What was the amount of gold coined during the calendar year 1890 by denominations and values? What amount was recoined (withdrawn from circulation) during the year, domestic and foreign coins separately?

(2) Same for silver.

(3) What was the import and export of gold during the calendar year 1890? Coin, bullion, and ore should be given separately where practicable.

(4) Same for silver.

- (5) What was the weight, expressed in kilograms, and the value of the gold produced from the mines during the calendar year 1890?
- (6) Same for silver.
 (7) What, approximately, was the stock of gold coin and bullion in the country at the close of the calendar year 1890.

(8) Same for silver.

- (9) What was the amount of Government and bank notes outstanding at the same date?
- (10) Were any laws passed during the year 1890 affecting the coinage, issue, or legal-tender character of the metallic and paper circulation? If so, please transmit copies.

(11) In case the report of the operations of the mint is published, please forward

a copy.

These replies should be in the form of a report, written on one side of the paper only, and transmitted direct to the "Director of the Mint, Treasury Department, Washington, D. C."

Besides the information contained in the official answers to the above questions, the Bureau draws freely from other sources, especially printed documents—some official, others not—courteously transmitted to the Bureau by foreign governments. We have this year to express our acknowledgment for the receipt of: Twenty-first Annual Report of the Deputy Master of the Royal Mint, 1890, London, 1891; Mineral Statistics of the United Kingdom for 1890, London, 1891; Summaries of the Statistical Portions of the Reports of Her Majesty's Inspector of Mines, London, 1891; Report of Mr. C. Leneve Foster, Her Majesty's Inspector of Mines, London, 1891; Government of India, Financial Statement, 1891-'92, Calcutta, 1891; Report on the Administration of the Mints at Bombay and Calcutta for the year 1889-'90, Calcutta, 1891; do. for 1890-'91; Finance and Revenue Accounts and Miscellaneous Statistics Relating to the Finances of British India, Part III, Calcutta, 1891; Report of the Head Commissioner of Paper Currency, Calcutta, to the Secretary of the Government of India, for the year 1890-'91, Calcutta, 1891; Geological and Natural History Survey of Canada, Annual Report, new series, Vol. IV, 1888-'89, Montreal, 1890; Annual Report of the Secretary of Mines of Victoria during the year 1890, Melbourne, 1891; Australian Statistics 1889-'90, by T. A. Coghlan, Government Statistician, Sydney, 1890; Australian Insurance and

Banking Record, 1891; Journal and Proceedings of the Royal Society of New South Wales, Sydney, 1890; Chillagoe and Koorboora Mining Districts (Report of Robert L. Jack, Government Geologist); Report of the Director of the Imperial Mint of Japan, 1890; Republica Mexicana, Noticias del Movimiento Marítimo en el año fiscal de 1888 á 1889, Mexico, 1891; Agencia Mercantil de la República Mexicana, Memoria Estadística de los meses Julio á Diciembre de 1890, Mexico, 1891; República Mexicana, Exportaciones en el año Fiscal de 1889 á 1890, Noticias formadas bajo la direccion de Javier Stavoli, Mexico, 1891; Monatshefte zur Statistik des Deutschen Reichs, Jahrgang 1891, Berlin, 1891; Zeitschrift für Berg-Hütten- und Salinen-Wesen im Preussischen Staate, Jahrgang 1891, Berlin, 1891; Bulletin de Statistique et de Législation Comparée, Paris, 1891; Annales des Mines, 1° et 2° livraisons de 1891, Paris, 1891; Revue des Banques, Paris, 1891; Algemeen Verslag van het Munt College, over 1890, Amsterdam, 1891; Jaarcijfers over 1889 en vorige Jaren, No. 9, Amsterdam, 1891; Bidrag til Finlands Officiela Statistik, XVII Industrie-Statistik 5, Ar 1888, Helsingfors, 1891.

The replies to the interrogatories, which are given in full in the Appendix to this Report, are indicated by the numbers of the questions.

A brief review of the most important facts contained in the various reports received is here appended:

GREAT BRITAIN AND BRITISH COLONIES.

Great Britain and Ireland,

Items reported for 1890.	£.	Value in United States money.
Gold coinage	7, 680, 156	\$37, 375, 479

Worn silver coin (recoinage)	296, 896	1, 444, 844
Gold imported.	23, 606, 128	114, 879, 222
Gold exported.	14, 309, 626	69 , 637, 7 95
Gain of gold by imports	9, 296, 502	45, 241, 427
Silver imported	13, 022, 891	63, 375, 899
Silver exported	10, 989, 895	53, 482, 324
Gain of silver by imports	2, 032, 996	9, 893, 575
Gold produced from ores produced in the Kingdom	675	3, 285
Silver obtained from ores produced in the Kingdom	58, 024	382, 374
Estimated stock of precious metals in the Kingdom December 31, 1890:		1
Gold	105, 000, 000	510, 982, 500
Silver	22, 000, 000	107, 063, 000
agia, againg again 197	40, 962, 791	199, 345, 422

The gold coinage of Great Britain in 1890 comprised, in addition to sovereigns, £1,121,600 in half sovereigns, the coinage of which had been practically suspended since 1885.

Under the terms of the royal proclamation, dated November 26, 1890, issued in conformity with the coinage act of 1889, calling in the gold coins of former reigns, and declaring that such coins shall not be legal tender after February 28, 1891, the operations have resulted in the withdrawal from circulation of £2,334,573 in sovereigns and £128,575 in half sovereigns, a total of £2,463,148.

The expenses of the operation, which amounted to £51,299, are exhibited in the following table, presented in the report of the deputy master of the mint:

	İ	Va	lue	of	đe	ficie	nc	y i	n y	reig	ht.		Valu	ıe o	fd	lefic	ien	cy i	n st	an	da	rd.

Withdrawals	250, 000	1, 914, 700	19, 700	572, 164	27, 197	381, 002	
Net increase of currency	865, 175	2,765,600	205, 300	992, 876	327, 118	2, 229, 863	

^{*}Under the heading "Colonies" is included all imperial coin shipped in aid of Treasury chests abroad.

† Including fourpences of the value of £2,000 specially struck in 1888 for British Guiana.

These statistics show a net increase of silver as currency within the st eleven years, as follows:

. Countries.	₽.	Value in United States money.
In England and Wales	3, 630, 775	\$17, 669, 167
In Scotland and Ireland	1, 198, 176	5, 830, 923
In Colonies	2, 556, 981	12, 443, 548
Total	7, 385, 932	35, 943, 638

Colonial coinages were executed at the Royal mint as follows:

For Hong-Kong, in silver pieces of 20, 10, and 5 cents For Hong-Kong, in half dollars	\$250,000 25,000
Total	275, 000
For Newfoundland, in silver pieces of 20, 10, and 5 cents	38, 000

The colonial coinages struck by "The Mint Birmingham" were as follows:

For Hong-Kong, a silver coinage of \$155,000 in 50, 25, 10, and 5-cent pieces; for the British East Africa Company a silver coinage amount-

ing to 61,116 rupees (\$28,951).

Australasia.—The coinage at the mint at Melbourne, during the year 1890, all sovereigns, was £2,473,537, and of the mint at Sydney £2,808,000, all in sovereigns, a total gold coinage for Australia of £5,281,537.

Light-weight gold coins, of the value of £44,601, were received for

recoinage at the mint at Sydney.

The withdrawal of pre-Victorian gold coins, in the colony of Victoria, was £32,183.

The total light-weight gold coin withdrawn in Australasia was £76,784.

Through the kindness of Mr. George Anderson, deputy master of the Melbourne branch of the royal mint, I am able to present the statistics of the product of gold in Australia and New Zealand for the calendar year, 1890.

Making the usual deduction of about 8 per cent in order to obtain the amount of pure gold actually produced, the product of gold in Australasia during the calendar year 1890, was, approximately, 1,471,402 ounces, value \$30,413,879.

India.—The silver coinage at the mints at Calcutta and Bombay dur-

ing the calendar year 1890, amounted to 122,295,383 rupees.

Canada.—According to the "monetary statistics of the United Kingdom, 1890" the amount of gold and silver produced in Canada during the year 1889 was as follows:

Gold	Metals.	£ .	Ounces.	Value in United States money.

ROUMANIA.

Roumania adopted the gold standard in March, 1890, the law requiring the replacement of 40,000,000 francs of the 5 lei silver currency with gold coin.

About 25,000,000 francs in silver have been withdrawn from circula-

tion and sold.

The holders of silver 5 lei pieces have the right to demand gold in exchange for a period of a year from the date of the law, after which period silver coins are a limited tender.

TURKEY.

A gold coinage of the value of 10,200 Turkish pounds was struck at the imperial mint during the year 1890. (Value in United States money \$44,880.)

A very valuable table will be found in the Appendix,* prepared by Dr. Vicente Restrepo, upon the production of gold and silver in Colombia from 1887 to 1890 inclusive.

This eminent statistician places the product of 1889 at \$4,042,000, of which \$612,000 were silver; in 1890, at \$4,430,000, of which \$735,000 were silver.

CHINA.

It is reported that silver coins, consisting of dollars of the fineness of .900, and half-dollars, and 20, 10, and 5 cent silver pieces of a lower grade of fineness were struck at the mint at Canton during the year 1890.

According to the assays of the coins, published in the report of the Deputy Master of the Royal Mint, London, the degrees of fineness were: for the dollar, 884.2; half-dollar, 848.2; and of the smaller denominations 807.3, 808, and 811.1, respectively, showing that the coins differ very largely in fineness from standard, and the weights of the coins are said to be fairly correct.

WORK OF THE BUREAU OF THE MINT.

The work of the Bureau of the Mint during the last fiscal year was

well and faithfully performed.

Owing very largely to the importance which coinage and currency questions have assumed in national legislation, the work of the Bureau has been unusually heavy, requiring, in addition to the regular work, the compilation of a vast amount of statistical matter.

All of this work has been cheerfully met and promptly performed by the small clerical force at my disposal without any increase of force.

I am, very respectfully, yours,

EDWARD O. LEECH,

Director of the Mint.

Hon. Charles Foster, Secretary of the Treasury.

REPORT OF THE COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, D. C., December 7, 1891.

SIR: I have the honor to submit for the consideration of Congress, in compliance with the provisions of section 333 of the Revised Statutes of the United States, the twenty-ninth annual report of the Comptroller of the Currency.

The year covered by this report ended October 31, 1891. During the larger part of this period severe depression was experienced in all sections of the country, and business in its various forms was con-

tracted in volume and unsatisfactory in results.

At the opening of the report year the stringency which characterized the money market during the autumn of 1890 was at its height, its most disastrous effects having been felt during the month of November. A period of liquidation then set in which had hardly spent its force

when the bountiful harvest of 1891 brought much needed relief.

Notwithstanding the unfavorable conditions indicated, 193 new banks were organized during the year, located in 41 States and Territories, and possessing an aggregate capital of \$20,700,000. The accessions are numerically in excess of the average and have been exceeded in only seven out of the twenty-nine years during which the system has been in operation. During this twelvemonth 41 banks went into voluntary liquidation and 25 became insolvent, leaving as a net gain for the report year 127 associations, with a capital of \$12,553,000, which is, as to number of banks, precisely the net average yearly increase during the life of the system.

The number of banks now in operation is greater than at any former period. There has been a satisfactory increase in the totals of capital stock, surplus fund, and undivided profits, and this is also true of de-

posits, loans and discounts.

The number of banks in existence October 31, 1891, was 3,694, having in capital stock \$684,755,865; bonds deposited to secure circulation, \$152,113,850; bank notes outstanding, \$171,368,948, including \$35,430,721 representing lawful money deposited to redeem circulation still outstanding. The amount of circulation secured by the piedge of United States bonds has increased during the year \$11,795,101.

The following table gives the number of banks organized during the year ended October 31, 1891, in each State and Territory, with their aggregate capital:

States and Territories.	No. of banks.		States and Territories.	No. of banks.	Capital.
Texas Pennsylvania Washington Illinois Iowa Nebraska New York Kansas Kentucky Maryland Minnesota Montana Wisconsin Missouri Ohio South Dakota Virginia Florida North Carolina	17 17 11 11 10 10 9 6 6 6 6 6 5 5 5 5	\$1,510,000 1,050,000 2,830,000 775,000 910,000 2,200,000 1,150,000 1,150,000 1,50,000 1,50,000 1,50,000 2,00,000 2,00,000 2,00,000 200,000 250,000 350,000	Tennessee West Virginia Georgia Colorado Louisiana Maine Michigan New Mexico Utah District of Columbia Alabama Arkansas Idaho Indiana Indian Territory Mississippi New Hampshire New Jersey Wyoming Total	332222222111111111111111111111111111111	\$450, 000 285, 000 300, 000 300, 000 100, 000 125, 000 100, 000 100, 000 200, 000 50, 000 50, 000 50, 000 50, 000 50, 000 50, 000 50, 000 50, 000 50, 000

It will be observed that Texas and Pennsylvania still stand at the head of the list, as they have during the past two years, with 17 new associations in each, Texas, however, having the larger capital. Following these come the States of Washington, Illinois, and Iowa with 11 banks each, and Nebraska and New York with 10 each. Kansas shows 9 new associations and ranks next to New York. It will be observed that notwithstanding the fatality attending banking operations in Kansas and Nebraska these States take prominent places in point of new organizations.

Of the associations entering the system during the year, 99, or slightly more than one-half in number, are located west of the Mississippi River

and 59 in the Southern States.

Of the total number of banks in operation Pennsylvania has the greatest number of associations, Massachusetts the greatest aggregate capital,

and NewYork leads in amount of deposits.

The accessions to the system are widely distributed, both old and new States being prominent in the list. It will be noticed, however, that in proportion to population the increase is greater in the newer States west of the Mississippi River.

The following table exhibits the number of banks organized, failed, and in voluntary liquidation, and the net increase numerically each year

since 1863:

Number and Authorized Capital of Banks Organized and the Number and Capital of Banks Closed in each Year ended October 31 since the Establishment of the National Banking System, with the Yearly Increase or Decrease.

Total net increase							*3, 693	†544, 411, 282		

*One bank restored to solvency, making 3,694 going banks.
†The total authorized capital stock on October 31 was \$684,755,865; the paid-in capital,\$683,248,175, including the capital stock of liquidating and insolvent banks which have not deposited lawful money for the retirement of their circulating notes.

The most notable feature of the foregoing table is the large number of associations which have become insolvent during the year. They aggregate 25 banks, with a capital of \$3,662,000. The year 1873, however, appears to have been the most disastrous in point of capital, as during that period the failure of 11 banks, with a capital of \$3,825,000, is recorded. The next in point of importance was 1877, when ten failures occurred, representing a capital of \$3,344,000.

If we consider the relative proportions existing between the liabilities of failed and active banks during various periods, it will be found that seven years have been more disastrous than the one just closed, to wit: 1867, 1872, 1873. 1877, 1878, 1882, and 1884. The liabilities of banks closed on account of insolvency in each of these seven years constitutes a larger percentage of the total liabilities of all existing banks than is shown by the record of the year covered by this report.

Of the 25 failed banks, having an aggregate capital of \$3,662,000, 13, representing \$1,137,000 of capital, were located in Kansas and Nebraska.

The larger part of the failures in these two States were attributable to four successive crop failures, and seem to be the result of unavoidable misfortunes rather than the lack of honest and efficient management. In many cases, however, the unfavorable conditions were greatly aggravated by the collapse of unwise speculation in real estate, more

especially in city and suburban property.

The Comptroller endeavored by correspondence with various State officers, receivers, and assignees to ascertain the number of failures of banks and bankers other than national during the past twelve months, but was unable to thus secure data upon which reliance could be placed. He has been supplied, however, through the courtesy of a commercial agency,* with a list of failures in the United States of bankers, brokers, trust companies, and savings banks for the year ended June 30, 1891. These number in all 117 institutions, having liabilities estimated at \$38,271,511, and assets valued at \$20,794,092.

No reliable data in relation to the losses to creditors by reason of the failure of banks other than national for recent years is accessible. In order that a comparison may be made between the comparative safety of national and State systems I am led to quote from the report of Hon. John Jay Knox, then Comptroller of the Currency, for the year 1879,

where the subject is discussed. He says:

There is no means of definitely determining the amount of losses sustained through the failures of banks operating under systems in vogue during the earlier periods of the history of this country. The losses under those systems, both to the noteholders, to whom there can be no loss under the national system, and to their general creditors and shareholders, are known to have been large. The loss to noteholders alone is estimated to have been 5 per cent annually upon the total amount of circulation outstanding. In Elliot's Funding System, on page 1176, it is stated that fifty-five banks with an aggregate capital of \$67,036,265 and circulation of \$23,577,752, failed in 1841. The total bank capital of that year is stated by the same authority to have been \$317,642,692, and the circulation at \$121,665,198; and it is also stated in the same connection that in nearly every instance the entire capital of the banks which failed was lost.

Numerous failures of private banking firms have occurred in this country within the last six years, and the losses consequent upon three or four of them are equal to

the total losses which have occurred under the national system.

For the purpose of comparing the losses to creditors of insolvent national banks with those sustained by the creditors of insolvent banks other than national, much pains have been taken by the Comptroller to obtain as reliable and complete statistics as possible relating to the failures of State and savings banks and private bankers in the different States during the three years ending January 1, 1879. The results of his labors in this direction are to be found in the following table:

State and city.	No. of banks.	Claims.	Amount paid and to be paid.	\$757, 471 1, 241, 412 1, 706, 299 1, 561, 387 1, 855, 270 1, 894, 016 904, 486 5, 793, 152 567, 083 1, 319, 755 164, 190 1, 916, 50 1, 916, 50 1, 92, 63 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 1, 23, 65 5, 50 5,

^{*} Bradstreets.

The amount of claims of five banks in Missouri, one in Kansas, and two in Ne-

braska could not be obtained.

In the foregoing table it has been found impossible to give the capital, or the exact amount of dividends paid to creditors, the liabilities and the losses only having been ascertained with any degree of accuracy. The differences between the two items last named represent the amount which it is assumed will eventually be paid to creditors. The average annual loss sustained by creditors during the past sixteen years by the insolvency of national banks throughout the United States has been \$390,012, and that occasioned by the failures of banks other than national, as shown by the incomplete data obtained by the Comptroller, has for the last three years been not less than \$10,872,220.

In the States of Ohio and Illinois alone the losses during the last three years, through the failure of State, savings, and private banks and bankers, aggregated \$8,039,102, of which \$1,916,050 were in Ohio, and \$6,123,052 in Illinois. The total loss in these two States is greater by \$1,798,913 than the total loss to creditors by all the

national bank failures which have ever occurred.

The failures for the current year have been numerous, many having been characterized by gross mismanagement and some by criminality of an aggravated character, yet nothing has been developed which indicates that the confidence in national banks on the part of the general public, which is the outgrowth of an experience of twenty-nine years, has been ill founded.

It is idle to suppose that absolute immunity from failure can be secured by the operation of any law which fails to provide for absolute and complete governmental guaranty. That failures will be far more numerous during some years than others is to be expected. This is true of every variety of business activity. The banks of the country are mere agencies through which the commercial and business operations of the people are conducted, and of necessity the losses which attend these operations are reflected in the profit and loss accounts of these agencies. The net earnings of the banks afford a good criterion for judging as to the measure of success which has attended the business operations of their customers.

It is a well-known fact that periods of business activity and depression follow each other at reasonably well-defined intervals, and that no means have been found for preventing the regular recurrence of what were under other conditions, known as years of panic. There is no doubt that the introduction of the national banking system and a well-secured currency of uniform and certain value, has served to greatly modify the severity of these periodical visitations and convert what were formerly panics into more or less severe depressions. condition we have just experienced, and it is not remarkable that during the past twelve months while the country was suffering from a monetary stringency which has seriously affected the entire commercial world, we should have witnessed the failure of 25 banks out of a total of 3,694.

That the law under which these associations operate is absolutely perfect no one well informed will claim, but that it has afforded greater security to its depositors and creditors than any other system is indis-

Since the foundation of the system 4,648 associations have been organized, of which 164 have become insolvent, equal to about 3½ per cent for a period of twenty-nine years. Of this number the affairs of 102 have been finally settled, representing \$28,544,992 of proved claims, upon which the claimants have received on an average 74.17 per cent, constituting a net loss to depositors of \$7,372,036. The affairs of 62 banks are still unsettled, representing claims proved to the amount of \$29,247,036, on which have been paid \$17,456,167, leaving assets estimated at \$3,702,925 yet to be distributed, which would represent a loss to creditors

of \$8,087,944.

It will be observed that losses to creditors of national banks during the twenty-nine years of the existence of the system, taking the amounts ascertained and the amounts estimated, aggregate \$15,459,980, or an average of \$533,103 per annum during the life of the system.

The average amount of liabilities of all the banks since 1863 approximates \$1,055,434,022, indicating that the annual average loss to the creditors of national banks for the period of twenty-nine years has been

only one-twentieth of 1 per cent.

In order to illustrate the increasing economy and efficiency which has characterized the administration of insolvent banks by the Bureau, the following table has been prepared, which covers all insolvent associations whose affairs have been finally closed:

72.4	No. of Total col-	Legal expenses.		Receivers' sala- ries, and all other expenses.		Amount	Percent- age of divi-

It will be observed that the banks have been classified into semidecades, having regard to the date of insolvency. The conspicuous relative reduction in legal expenses is worthy of remark. The first semidecade shows an average disbursement for legal expenses of \$4.03 on each \$100 collected, while the same item during the last semi-decade is stated at only 81 cents.

The average expenses to each \$100 of collections for receivers' salaries and all other expenses decreased from \$9.13 during the first semi-decade to \$3.27 during the last. Taking into account all the expenses of administration, we find that the cost per \$100 during the last period is \$4.08, as against \$13.16 during the first. A corresponding increase in the percentage of dividends paid to the creditors of insolvent banks is also to be noted.

During the first period, claimants received on the average 62.84 per cent; during the last period 90.65 per cent, and for the entire life of

the system 74.17 per cent.

The increase in dividends and decrease in expenses go hand in hand. The increase in rate per cent paid to creditors is due in part to greater efficiency and economy in conducting the liquidations, and partly to the fact that recent failures are less disastrous than in the earlier years of the system. These results indicate that governmental supervision is growing more effective as new and improved methods are evolved from experience. Certainly no other system of liquidating insolvent banks has ever proved so effective and economical; the record of the past five years showing average dividends to creditors of 90.65 per cent, and average expenses of only 4.08 per cent is in both respects believed to be without a parallel.

AMENDMENTS TO PRESENT LAW.

The Comptroller desires to repeat in substance the recommendations contained in his report for 1890.

In his opinion the present law should be so amended as to provide:

(1) That no association shall be required to maintain a bond deposit of more than \$1,000 to secure circulation.

(2) That every association may issue circulating notes equal to the

par value of the bonds so deposited.

(3) That the monthly withdrawal of bonds pledged to secure such notes shall not exceed \$3,000,000 in the aggregate.

(4) That the semi-annual duty on circulation be so reduced as to

equal one-fourth of 1 per cent per annum.

These recommendations are made upon the supposition that Congress will not favorably consider measures looking to any considerable increase of circulation through further note issues by national banks. While the Comptroller is of the opinion that bank notes possess certain qualities not found in any form of governmental issues, but which are necessary to a perfect circulating medium, he is, nevertheless, aware that the present is not an opportune time for presenting his views upon that subject. He deems it wise to accept the situation, so far as note issues are concerned, and ask for such legislation as will relieve national banks so far as possible from the enforced and unremunerative issue of circulating notes, so that they may be unembarrassed in their efforts to faithfully serve the public as banks of discount and deposit.

Inasmuch as the secured circulation of national banks has increased \$11,795,101 during the report year and is now much above the present minimum requirement, no rapid contraction of circulation need be

apprehended.

The limitation provided in the third proposition would in any event prevent a retirement beyond \$3,000,000 per month. Such reduction as might otherwise take place would be neutralized for five months at least by the immediate additional issue of \$15,211,385 under the second proposition.

The reduction of the semi-annual duty is both just and expedient. No adequate reason can be given for the taxation of a valueless and unwelcome franchise for the purpose of swelling redundant revenues.

MONETARY STRINGENCY OF 1890.

The previous report year, which ended November 1, 1890, showed a comparatively small number of failures of national banking associations. Up to Midsummer of 1890 that year had been one of more than average business activity. It was, however, apparent in the early Spring, to those who were most observant of passing events, that unfavorable conditions existed, the evil effects of which would appear in the near future. This arose from consideration of the fact that agricultural interests were in an unsatisfactory condition, and also that overtrading and unhealthful expansion were everywhere apparent. During the year the building of railroads had been prosecuted with unusual vigor, making necessary the placing of unusually large lines of securities.

Immense sums heretofore available as loanable capital in the New England and Middle States had taken a fixed form by reason of investments in the Mississippi Valley and upon the Pacific coast in city and suburban property, in loans represented by farm mortgages, and in the stocks and bonds of unnumbered corporations organized for the purpose of conducting various kinds of manufacturing operations, and supplying water, light, and rapid transit to the inhabitants of the many rapidly growing cities and villages in the regions named. Not only did these enterprises attract capital from the Atlantic States, but English investors brought to this country vast sums for the purpose of grouping together and recapitalizing corporations engaged in manufacturing, industrial, and commercial pursuits.

This unexampled movement of capital toward the West not only divested the Atlantic States in a large degree of the loanable funds here-tofore available for the relief of those engaged there in manufacturing and in business in its various forms, but it also had its effect upon the West in unduly stimulating speculative operations in real estate and laying the groundwork for the future collapse in prices which it was apparent must follow whenever the flow of money toward the field of these operations should for any cause be greatly diminished or entirely

arrested.

The various banking institutions located in the region of country affected by the speculative spirit thus incited became necessarily more or less involved in the operations of their local customers. They found themselves early in the Summer of 1890 carrying large lines of loans representing investments in various forms of corporate enterprises, which were in a large degree in untried fields and dependent for success upon the rapid growth of towns and cities, yet unrealized. The banks of the country were therefore in an unduly extended condition upon the approach of Midsummer, and dependent in many cases upon rediscounts with their correspondents in the reserve cities in order to enable them to carry the heavy lines with which they were burdened. While in this condition the transfer of funds to this country from England and the Continent became at first greatly reduced in volume, and finally ceased. Not only was the supply of fresh funds from this source cut off, but it was discovered that during the late Spring and early Summer months, as well as later on, vast amounts of American securities held abroad were forced upon the New York market by European holders for the purpose of preparing for a collapse which was expected to result from similar conditions of undue expansion existing abroad. The Continental countries had already passed through a period of liquidation and loss consequent upon the failure of the Panama Canal Company and the French Copper Syndicate. England, by reason of unusually large investments in all parts of the world, and especially in the Argentine Republic, was gradually but surely approaching an exceptionally severe monetary stringency.

As an evidence of this and the consequent disposition to increase the stock of gold there held, in order to strengthen their cash resources, it is noted that during the months of June, July, and August of last year the net exportation from the United States of gold coin and bullion exceeded \$14,000,000, and for the period extending from January 1, 1890, to August 31, 1891, the net exportations of gold amounted to \$75,405,613. While these causes were operating to prevent the necessary relief from reaching us from Europe, the demands upon the banks in New York and other large reserve cities rapidly increased, producing a reduction in the amount of deposits and an increase in the amounts loaned to and

rediscounted for the interior banks.

The gross deposits of forty-six national banks in the city of New York show a falling off of \$44,831,356 between the 28th of February and 17th

of May, 1890; \$13,519,527 of this representing a reduction in balances due to interior banks and those located in other reserve cities, while the reduction in loans and discounts was less than \$10,000,000. The New York banks, however, were enabled to so strengthen their positions during the months of June and July that the marked stringency was delayed until August. It culminated about the middle of November, when the failure of a leading firm of brokers, the embarrassment of one large State bank, and the failure of another occurred in New York. These events were simultaneous with the announcement of the embarrassment of the Baring Brothers, of London, and the fact that a syndicate had been formed, headed by the Bank of England, through whose agency Baring Brothers' obligations were guaranteed to the extent of about \$75,000,000.

The unsatisfactory condition of monetary affairs in England, and the desire to be prepared for the effect of the announcement of the embarrassment of the Baring Brothers, induced the Bank of England to borrow £3,000,000 in gold from the Bank of France, in addition to £1,500,000 received from Russia upon sale of treasury bonds. This extraordinary transaction is an evidence of the serious character of the monetary stringency in England, aggravated by the unsatisfactory conditions apparent in almost every civilized country where English

capital has heretofore found investment.

Among the unfavorable conditions existing in our own country, in addition to the undue expansion and resulting speculative investments which have been heretofore noted, should be mentioned the greatly reduced yield last year of wheat, oats, and corn, and the low prices which prevailed for the same. It is also to be observed that the importation of foreign commodities in 1890 exceeded in value that of any previous year. This was due, to some extent, to the passage of the new tariff act, which was made to take effect on the 6th of October, 1890. This undoubtedly greatly stimulated importations, in order that their arrival prior to the date mentioned might enable them to escape the higher

rate of duty supposed to be imposed by the new act.

To relieve this severe monetary stringency the Secretary of the Treasury increased his purchase of United States bonds to such an extent as to almost entirely exhaust the available surplus in the Treasury. During the three and one-third months from July 19 to November 1, 1890, over \$99,000,000 were disbursed in payment for United States bonds and interest thereon. It is apparent, however, that while the relief afforded was timely and the sums disbursed very large, the unfavorable and threatening conditions were caused to a greater degree by want of confidence and a curtailment of credits than by lack of circulating medium. That this large disbursement had the effect of allaying excitement and promoting a return of confidence on the part of the

general public is no doubt true.

As has been noted, the monetary stringency culminated on the 15th of November, 1890, and its effects within thirty days thereafter had to a considerable extent passed away, so far as could be observed in the larger cities. Its effect upon the country at large, however, still continued. Inability to place securities and to borrow money had arrested the operations of a great multitude of corporations scattered all over the country, and insolvency and failure had in a large number of cases ensued. Where failure did not take place new work was stopped, all credits were curtailed, and business in its different forms became greatly depressed. The growth of cities and villages was in many

cases arrested, and the prices of city property, especially of a suburban

character, became greatly reduced.

Corporations newly organized, with insufficient capital and inexperienced management, generally became insolvent, and speculative operations of every kind and character were prostrated. Liquidation took place in all branches of business, resulting in the failure and extinction of a large number of business enterprises which were never entitled to credit and in the curtailment of the operations of many possessing ample capital and skillful management.

The process of liquidation above referred to did not end with the monetary stringency in December, 1890, but has continued since that date, and its influences are still felt and its effects observed. The subject is here discussed because of its intimate connection with the bank

failures of 1891.

CLEARING-HOUSE LOAN CERTIFICATES.

The effect of a general monetary stringency is felt first and most seriously by banks located in the larger of the reserve cities. Whenever financial affairs are in a normal condition the surplus funds of the local banks find their way to the vaults of their correspondent banks located in the great centers of business activity. This is undoubtedly due in part to the fact that these deposits may be made available for lawful money reserve and that a small rate of interest is, as a rule, paid upon bank balances by associations in the larger cities, and to the further fact that the maintenance of a good balance with their city correspondents strengthens the claim of the interior banks upon the former for rediscounts when the temporary condition of redundancy passes away and the increased demand for money is greater than the interior banks from their resources can conveniently supply.

Thus it results that the wants of a continent in case of general depression are at last brought through various channels of business activity, by way of withdrawals or loans, to the bankers of the great metropolitan cities for relief, and they are presented in such a form, in many cases, as to preclude the possibility of refusal, if general bank-

ruptcy is to be avoided.

During the period of the stringency above discussed the cities of New York, Philadelphia, and Boston were subjected to the most pressing demands, and after very careful consideration it was decided by the associated banks that the exigency made necessary a resort to the issuing of clearing-house loan certificates, for the purpose of settling clearing-house balances. This expedient had been successfully resorted to during the panics of 1873 and 1884.

At a meeting of the New York Clearing-House Association on the 11th day of November, 1890, the following resolution was unanimously

adopted:

Resolved, That a committee of five be appointed by the chair, of which the chairman shall be one, to receive from banks members of the association bills receivable and other securities, to be approved by said committee, who shall be authorized to issue therefor, to such depositing banks, loan certificates bearing interest at 6 per cent per annum, and in addition thereto a commission of one-quarter of 1 cent for every thirty days such certificates shall remain unpaid, and such loan certificates shall not be in excess of 75 per cent of the market value of the securities of bills receivable so deposited, and such certificates shall be received and paid in settlement of balances at the clearing house.

No. -

Under this resolution a committee of five was appointed, and they proceeded, upon deposit of proper securities, to issue to applying banks loan certificates in the following form:

Loan committee of the New York Clearing-House Association, New York, -

\$20,000

Committee.

1890.
This certifies that the ——————————————————————————————————
,

These certificates were, by unanimous agreement upon the part of the clearing-house banks, accepted in lieu of money in the settlement of clearing-house balances.

In order to provide for the retirement of these securities in case the collaterals pledged were found insufficient, the several boards of directors of the associated banks were requested to, and did, pass a resolution in the following form:

Resolved, That any loss resulting from the issue of loan certificates shall be borne by the banks comprising the Clearing-House Association pro rata of capital and surplus, and this resolution shall be ratified by the boards of the respective banks, members of the association, and a certified copy of such consent delivered to the chairman of the loan committee.

This committee, acting under the authority granted by the above resolution, issued to the associated banks loan certificates aggregating \$16,645,000. The first issue was made November 12, 1890, and the entire issue was retired on February 7, 1891. The largest amount outstanding at any one time was \$15,205,000, on the 13th of December, 1890.

On the 17th of November, 1890, similar proceedings were had by the Boston Clearing-House Association. On that day, at a meeting of the association, the following resolution was unanimously adopted:

Resolved, That a committee of five be appointed by the chair, of which committee the chairman shall also be a member, to receive from banks, members of the association, bills receivable and other securities, to be approved by said committee, who shall be authorized to issue therefor, to such depositing banks, loan certificates bearing interest at 7.3 per cent per aunum, and such loan certificate shall not be in excess of 75 per cent of the market value of the securities or bills receivable so deposited, and such certificates shall be received and paid in settlement of balances at the clearing house.

It is observed also that the ultimate payment of the certificates, in case the pledged collaterals proved to be insufficient, was provided for through the ratification, by the boards of directors of the respective banks, of the following resolution passed by the Boston Clearing House Association at the meeting above noted:

Resolved, That any loss arising from the issue of loan certificates shall be borne by the banks comprising the Clearing-House Association pro rata, according to the average daily amount which each bank shall have sent to the clearing house during the preceding year. It was also voted that this resolution shall be ratified by the boards of directors of the respective banks, members of the association, and a certified copy of such consent delivered to the chairman of the loan committee.

The form of the loan certificates issued under the resolution alluded to is as follows:

No. -

Loan committee of the Boston Clearing-House Association. Boston, -- 189-. This certifies that the has deposited with this committee securi-

ties in accordance with the proceedings of a meeting of the association held November 17, 1890, upon which this certificate is issued.

This certificate will be received in payment of balances at the clearing house for the sum of five thousand dollars from any member of the Clearing-House

Association.

On surrender of this certificate by the depositing bank above named, the committee will indorse the amount as a payment on the obligation of said bank held by them, and surrender a proportionate share of the collateral securities held therefor.

\$5,000.

Committee.

When a bank applied for and received loan certificates it was required to deposit the necessary securities and to also execute and deliver an obligation, of which the following is a copy:

The ———— Bank has this day received of, ————, loan committee of the Boston Clearing-House Association loan certificates issued by said committee in pursuance of a vote of said association, passed November 17, 1890, to the amount of -ficates, with interest thereon, as provided in said vote.

Under the operation of the resolution of authority granted by the clearing-house committee, as above noted, loan certificates were first issued on November 19, 1890, and the last were issued on December 6, On the latter date the issue reached its maximum of \$5,065,000. The last of the issue was retired on January 6, 1891.

The Clearing-House Association of Philadelphia took action on November 18, 1890, at which time, at a meeting of the Clearing-House Association, the following resolution was adopted:

Resolved, That, in accordance with resolution of September 24, 1873, as amended October 18, 1873, the clearing-house committee will issue loan certificates to banks applying and receive them in payment of balances.

The resolution of September 24, 1873, as amended October 18, 1873, reads as follows:

For the purpose of enabling the banks, members of the Philadelphia Clearing. House Association, to afford proper assistance to the mercantile and manufacturing community, and also to facilitate the inter-bank settlements resulting from their daily exchanges, we, the undersigned, do bind ourselves by the following agreement on the part of our respective banks, viz:

First. That the clearing-house committee be, and they are hereby, authorized to issue to any bank member of the association loan certificates bearing 6 per cent interest on the deposits of bills receivable and other securities to such an amount

and to such percentage thereof as may in their judgment be advisable.

These certificates may be used in settlement of balances at the clearing house, and they shall be received by creditor banks in the same proportion as they bear to the aggregate amount of the debtor balances paid at the clearing house. The interest that may accrue upon these certificates shall be apportioned monthly among the banks which shall have held them during that time.

Second. The securities deposited with the said committee shall be held by them in trust as a special deposit, pledged for the redemption of the certificates issued thereupon, the same being accepted by the committee as collateral security, with the express condition that neither the Clearing-Honse Association, the clearing-house committee, nor any member thereof shall be responsible for any loss on said collaterals arising from failure to make demand and protest, or from any other neglect or omission, other than the refusal to take some reasonable step which the said depositing bank may have previously required in writing.

Third. On the surrender of such certificates, or any of them, by the depositing bank, the committee will indorse the amount as a payment on the obligation of said bank held by them, and will surrender a proportionate amount of securities, except in case of default of the bank in any of its transactions through the clearing house; in which case the securities will be applied by the committee, first, to the payment of outstanding certificates, with interest; next, to the liquidation of any indebtedness of such bank to the other banks, members of the Clearing-House Association.

Fourth. The committee shall be authorized to exchange any portion of said securities for others, to be approved by them, and shall have power to demand additional security, at their own discretion.

Fifth. That the clearing-house committee be authorized to carry into full effect

this agreement, with power to establish such rules and regulations for the practical working thereof as they may deem necessary; and any loss caused by the non-payment of loan certificates shall be assessed by the committee upon all the banks in the ratio of capital.

Sixth. The expenses incurred in carrying out this agreement shall be assessed

upon the banks in equal proportion to their respective capital.

Seventh. That the clearing-house committee be, and they are hereby, authorized to terminate this agreement upon giving thirty days' notice thereof at any stated meeting of the Clearing-House Association.

PHILADELPHIA, November 18, 1890.

At a meeting of the clearing-house committee, held this day, it was, on motion: Resolved, That in accordance with resolutions of September 24, 1873, as amended October 18, 1873, the clearing-house committee will issue loan certificates to banks applying, and receive them in payment of balances.

The form of loan certificate issued by the Clearing-House Association of Philadelphia is here given:

\$5,000.

-, 1891. 🔾 Clearing-house committee of the Philadelphia banks, Philadelphia, -

This certifies that the - Bank has deposited with this committee, securities in accordance with the agreement of a meeting of bank officers held September 24, 1873. This certificate will be received during the continuance of said agreement and of any renewals of the same, in payment of balances at the clearing house, for the sum of five thousand dollars, only from a member of the

Clearing house, for the sum of five thousand dollars, only from a member of the Clearing-House Association to whom the same may have been issued, or to whom it may be indorsed by the manager of the clearing house.

On the surrender of this certificate by the depositing bank above named the committee will indorse the amount as a payment on the obligation of said bank held by them, and surrender a proportionate amount of the collateral securities except in case of default on the part of said bank in its transactions through the

Clearing-House Association of Philadelphia.

Committee.

It will be observed that the original agreement under which the committee proceeded in this case was adopted during the panic of 1873 and after that subsided no further action was had under it until November, 1890, but the machinery was kept standing during the whole intervening period ready for immediate use whenever required.

The clearing house committee having, by the agreement aforesaid, been authorized to issue loan certificates resolved, on November 5, 1890, to exercise this power, whereupon the banks desiring to take out loan certificates were required to adopt a resolution empowering the hypothecation of securities, under which the issue of loan certificates, signed by not less than three members of the committee, was commenced on November 19, 1890, and ceased on May 22, 1891, the total issue being \$9,655,000. The maximum issue, \$8,870,000, was reached on January The certificates have all been retired excepting \$170,000 issued to the Keystone and Spring Garden National Banks.

DOMESTIC EXCHANGES.

In his annual report for 1890 the Comptroller published certain data in relation to domestic exchanges in the United States, which exhibited the amounts of drafts drawn during the year ended June 30, 1890, (1) upon national and other banks in the cities of New York, Chicago, and St. Louis, separately stated; (2) upon banks located in other reserve cities, and (3) upon all other banks.

Out of the 3,438 national banks in operation on the 30th day of June, 1890, 3,329 furnished the desired information. While the facts thus elicited attracted wide attention and proved valuable as illustrating the magnitude of the transactions liquidated through transfers of bank credits, it fell short of all that might be desired from the fact that drafts drawn upon reserve cities other than New York, Chicago, and St. Louis

were not separately stated but were given in the aggregate only.

It was thought desirable to again call for this information for the purpose of instituting comparisons as between the operations of the two years, and also for the purpose of ascertaining the magnitude of the transactions with each of the reserve cities, to the end that similar calls following this at suitable intervals might afford the means of ascertaining the relative growth of the banking operations of the several reserve cities of the United States. For this purpose circular letters were addressed to each active bank in the system, and replies were received from 3,637, that being the number in operation on the 30th day of June, 1891, exclusive of 22 associations that drew no exchange. This cheerful cooperation on the part of every bank in the system is worthy of special commendation, as last year 109 banks failed to make the necessary report.

In comparisons made between the operations of the year ended June 30, 1890, and the year ended June 30, 1891, it will be remembered that the former year covered the operations of 3,329 banks, and the latter year 3,637 banks. The total amount of drafts drawn by these 3,637 associations during the year ended June 30, 1891, was \$12,782,212,495. We find that of this amount there was drawn on New York \$7,836,208,250, on Chicago \$1,254,693,941, on St. Louis \$237,908,010, and on other reserve cities \$3,101,005,735, and on all other banks and bankers

\$352,396,559.

Among the other reserve cities Boston leads with \$1,492,266,242,

followed by Philadelphia with \$541,333,463.

From this statement it appears that of the total sum 61.31 per cent was drawn on banks in the city of New York; 9.82 per cent on Chicago; 1.86 per cent on St. Louis; 11.61 per cent on Boston, and 4.24 per cent on Philadelphia. The total sum drawn upon the reserve cities, excepting New York, Chicago, and St. Louis, was 24.25 per cent and 2.76 per cent on banks located elsewhere.

In order to exhibit these movements in detail the following table has been prepared:

Table showing the amount of drafts drawn by National Banking Associations upon New York, Chicago, St. Louis, the other reserve cities, and on all other locations, the number of banks drawing upon each city and the percentages of drawings, in 1891 and 1890.

		1891.			1890.

^{*}The total amount of drafts drawn upon other reserve cities (not shown in detail in 1890) is \$3,101,005,735 and the percentage 24.25.

In order to facilitate a comparison between the operations of the year ended June 30, 1890, and those of the year ended June 30, 1891, the totals and percentages for the former year are included in the table.

It will be observed that in the total amount of drafts drawn there has been an increase in each of the three central reserve cities and in the amounts drawn upon all other reserve cities, but that the total of drafts drawn upon all other banks has fallen off to a marked degree.

It will be noticed that the grand aggregate for all banks shows an increase of \$1,231,314,240, being slightly in excess of 11 per cent. So far as the percentages show the relative importance of the several reserve cities the changes do not appear important. New York City, relatively, has slightly fallen off while Chicago and St. Louis each show a slight increase in percentages. Other reserve cities have increased from 21.88 to 24.25 per cent, indicating the growing importance of the business tributary to the inland cities.

In the following table is exhibited the amounts of exchange drawn by all the national banks, classified by States and arranged in the order of the total amounts drawn, further subdivided so as to show the operations of the banks in reserve cities and other banks separately during the year ended June 30, 1891, to which has been added a column giving corresponding totals for the previous year.

Amount of Drafts Drawn by all Reporting Banks in 1891 and 1890.

It will be noticed that some changes have taken place in the relative importance of the several States during the year. Those whose relative increase is most conspicuous are Texas, Tennessee, Washington, Wisconsin, Nebraska, and Iowa.

In order to further illustrate the operations of banks covered by the foregoing statement the following table is introduced, which exhibits the amount drawn by banks in the several reserve cities:

AMOUNT OF DRAFTS DRAWN BY BANKS IN THE SEVERAL RESERVE CITIES, 1891.

Tables are given in the Appendix,* pp. 220, showing (1) the amounts of drafts drawn by national banking associations located in the reserve cities, upon all banks in each reserve city; (2) similar information in respect to banks outside of reserve cities; and (3) a tabular statement showing by geographical divisions the amount drawn by national banking associations in each State, reserve city, and geographical division, upon each reserve city.

Notwithstanding that the total amount of drafts drawn by the national banks of the United States during the year ended June 30, 1891, shows a satisfactory increase over the operations of the year immediately preceding that under consideration, it should be remembered that the year ended June 30, 1891, has been one of great depression on account of the monetary stringency which prevailed for the greater part of that period, and the consequent liquidations which have been in progress. While by far the larger part of the banking business is conducted through associations belonging to the national system, it is necessary to take into consideration the operations of banks other than national in order to arrive at a proper estimate of the magnitude of the business liquidated through the agency of the banking institutions of the country.

In the collection of statistics required by the statute the Comptroller has this year received reports from 4,342 corporations or firms other than national banks which do a commercial banking business, in whole or in part. Of these 2,572 are State banks, 171 loan and trust companies, 364 are savings banks having capital stock, and 1,235 are private bankers. These represent a capital of \$356,749,315. If the domestic exchange drawn by these banking institutions bears the same relation to their capital stock as in the case of national banks, it will be found that the amount of drafts drawn by banks and bankers other than national will amount to \$6,743,157,040.

In order to arrive at the grand total of domestic exchange drawn by all the banks and bankers of the United States the following statement has been prepared, exhibiting the amounts of drafts drawn by—

3.637 national banks, officia	1	\$12,782,212,495
	banks, etc

^{*}This appendix, which is omitted for want of space, will be found in the separate volumes of the Comptroller's report.

As there are many banks other than national that do not report to the Comptroller of the Currency, with regard to which no statistics are accessible, it is probable that the amount estimated as drawn by

these institutions in the above table is understated.

The magnitude of the operations thus indicated illustrates how indispensable banks are to the safe and economical conduct of the business of the country. This immense total of nearly \$20,000,000,000 represents simply the net balances between various localities adjusted through the agency of banks, and bears a very small proportion to the gross transactions which are taking place between the banks and their customers. Some idea can be formed of the magnitude of the total transactions of national banks by consideration of the fact that on the first day of July, 1890, the receipts by 3,364 national banks of the United States aggregated \$421,824,726. If we take \$421,000,000 as the average daily transactions of the national banks, and multiply this by 307 as the number of business days in the year, it will be found that the total receipts of these banks for a single year would amount to \$129,247,000,000,000, or a sum greatly in excess of the estimated value of all the real and personal property of Great Britain and the United States combined.

When we come to realize with what economy and safety this immense business is transacted the importance of perpetuating and perfecting

the national banking system can not fail to command attention.

In another part of this report will be found a statement of the average annual losses by reason of the failure of national banks. When this comparatively small loss is placed against the immense transactions which have taken place through these agencies the conspicuous fidelity of the associations constituting the system must be recognized by every impartial observer.

EXAMINATIONS.

The national bank act was perfected with great care, and in its provisions were embodied all those salutary restraints which previous legislation and the banking experience of the world for many centuries had demonstrated to be conducive to the safe and successful conduct of banks organized for commercial business. The wisdom of those who were responsible for its preparation has been vindicated by the unexampled success which has attended banks organized under it during the past twenty-nine years. No system has ever issued notes circulating at par over so wide an area of country, absolutely without loss to holders; nor has any other afforded such complete security to depositors and creditors.

The administration of this act was committed to a Bureau of which the Comptroller of the Currency is the chief officer, and all the provisions incident to the organization, supervision, and closing of associations are designed to be executed through the operation of the agency so created. The duties of the Comptroller of the Currency, as the chief executive officer, are set forth with great clearness and particularity. So far as the proceedings incident to the organization of new associations are concerned, up to and including the certificate authorizing them to begin business, they are so conducted as to make it possible for the Comptroller to personally supervise the details and see that the law is obeyed.

It is impossible, however, for him to personally visit the various associations after organization is completed and ascertain for himself that

the conduct of their affairs is in every particular in conformity with law. His information in relation to matters incident to the internal management of a bank reaches him through two channels. First, through what are known as "reports of condition," which are required to be made by each association, upon call of the Comptroller, for some past date, at least five times a year, and, secondly, through reports made by national bank examiners. Reports of condition are made upon the oath or affirmation of the president or cashier, attested by at least three directors, and are required to be published in some news-

paper issued in the locality where the bank is situated.

The report prepared in these cases is substantially a trial balance from the general ledger, under such classifications as the Comptroller directs, showing in detail the entire resources of the association upon the one hand, and its entire liabilities upon the other. If correctly and honestly made, these published reports afford to the shareholders and creditors of the association an opportunity to form a reasonably correct judgment as to its solvency, its earnings, and the value of its shares. Certain schedules accompany these reports, which are designed to disclose such facts as will indicate whether or not any provision of the national bank act has been violated. This system of reports, especially so far as it applies to banks under honest management, is no doubt to a certain degree effective in preventing unwise and unlawful acts on the part of those directly charged with the management.

As severe penalties are imposed upon any officer or employé who makes or aids or abets others in making any false report or statement of the association with intent to defraud or deceive, even those whose honesty may be brought in question are constrained through fear to make truthful reports. It sometimes occurs, however, that banks fall under the management of those who are utterly wanting in integrity and are undeterred by the penalties of the law. Occasionally the active officers of the bank enter into such collusion as renders it comparatively safe, in their opinion, to make reports which are designed to cover up unlawful practices, and to either overstate the value of the bank's resources, or understate its liabilities, so that the published report thus made serves to grossly deceive those for whose benefit the publication has been wisely ordered.

As banks under honest management are usually conducted in obedience to law, it is clear that the value of governmental supervision is determined by the success it may achieve in ascertaining facts hidden from view by bank managers whose purpose it is to keep from the knowledge of the Comptroller conditions which might involve impairment of capital, insolvency, or criminality. The agency provided by law for ascertaining with greater certainty the condition of these associations is through

the periodical visits of examiners appointed for the purpose.

The authority for the appointment of national-bank examiners is found in section 5240 of the Revised Statutes of the United States, wherein it is provided that—

The Comptroller, with the approval of the Secretary of the Treasury, shall, as often as shall be deemed necessary or proper, appoint a suitable person or persons to make an examination of the affairs of every banking association, who shall have power to make a thorough examination into all the affairs of the association, and, in doing so, to examine any of the officers and agents thereof on oath; and shall make a full and detailed report of the condition of the association to the Comptroller.

This brief paragraph contains the only provision of law for the appointment of national bank examiners, and is the only place where

his rights, powers, and duties are set forth. It is apparent that these examiners were to be the confidential agents of the Comptroller, and as such to have such duties and to exercise such powers, within the law, as the Comptroller might from time to time direct.

As has been said, these examiners have always been regarded as the confidential agents of the Comptroller, and the various communications and reports transmitted by them to him have always been considered

as confidential and privileged.

The relations existing between the Comptroller and his examiners is of such a character that they must necessarily possess his entire confidence. Any information which might lead him to entertain a reasonable doubt as to the skill or integrity of an examiner would make it his duty to immediately suspend him, even though the information might be of such a character as could not be substantiated by competent proof, or of such a confidential nature as would make it necessary for the Comptroller to withhold the character of the charges from the examiner himself. The Comptroller would be derelict in duty who would continue to employ the services of an examiner who had so conducted himself as to impair that complete confidence which must from the necessities of the case exist on the part of his superior officer.

Inasmuch as the original purpose of those who framed the national-bank act was to make a market for the securities of the United States, to provide notes for circulation, and to create fiscal agencies for the service of the Government, it is fair to presume that they had in view such an examination as would enable the Comptroller to ascertain whether or not the various provisions of law had been complied with, and to see that the interests of the Government were protected, so far as they were involved in deposits of public moneys or the issuing of cir-

culating notes.

Among other requirements the national bank act provides that the capital stock of an association shall be fully paid in cash, and that each director shall be a citizen of the United States and the bona fide owner of at least ten shares of the capital stock; that loans shall be made only on personal security; that real estate, when lawfully held, shall be disposed of within the period of five years; that a list of shareholders shall be correctly prepared and kept subject to the inspection of creditors and shareholders; that a reserve of lawful money shall be held against deposits; that dividends shall not be made until earned; that loans to any one person, corporation, or firm shall not exceed in amount 10 per cent of the capital paid in; that the liabilities of the association under section 5202 of the Revised Statutes of the United States shall not exceed the amount of its capital stock actually paid in; that checks shall not be certified in excess of the drawer's deposit, and that loans shall not be made while the lawful money reserve is deficient.

It would seem to be the duty of an examiner in making an official visit to an association to ascertain whether or not these requirements had been fully complied with and to report any disobedience of these provisions of law brought to his attention. He is also expected upon occasion to ascertain and report to the Comptroller as to whether or not the latter can properly approve a proposed increase or reduction of capital, and as to the propriety of permitting an association desiring to do so to extend its corporate existence or go into voluntary liquidation.

Inasmuch as the Comptroller is authorized to require any association whose capital becomes impaired to pay the deficiency by assessment upon its shareholders and to appoint a receiver to close up its business in case it fails to make good its capital within three months after being

notified so to do, and inasmuch as the Comptroller is further authorized to appoint a receiver for any association which he shall become satisfied is insolvent, it would appear to be the duty of an examiner to not only ascertain but verify the liabilities and resources of an association and make such an estimate of the value of the latter as will enable the Comptroller upon his report to determine with reasonable certainty

whether or not impairment of capital or insolvency exists.

So far as can be deduced from the provisions of the act under which national-banking associations are organized and operated, an examiner's duties are above substantially set forth. In the letter of instructions addressed to examiners, and upon the blank reports furnished for their use are found directions covering the requirements of the law as above expressed. Much, however, must be left to the discretion and intelligence of the examiner himself. No cast-iron rulés, covering minute details, can be issued to examiners as a class, for the reason that what would be practicable, proper, and necessary in the case of a small bank located in some obscure hamlet, would not be applicable in the case of

a large association in a central reserve city.

As a rule examiners find the greatest difficulty in so directing their efforts as to ascertain whether or not impairment or insolvency exists. They are directed to verify every credit and debt balance, to personally count the cash, and to list and verify the loans and discounts and other assets of the association. This verification can not, of course, be exhaustive, for the reason that the compensation awarded examiners by law would not cover the time necessarily employed to this end. would national banks, as a class, be willing to surrender their books and suffer interference with their business for a sufficient length of time to permit the examiner to make a complete audit of their affairs, even if they were willing to submit to the expense necessarily attending it.

The liabilities of a bank are represented to a large extent by pass books in the hands of a multitude of depositors, by drafts issued to a large number of purchasers and by them transmitted to distant points, a large amount (several days' issue at least) always being in transit and unpaid; in certificates of deposit and other like evidences of indebtedness held by persons unknown and inaccessible to the examiner, in balances due to other banks, and in bills payable and rediscounts, usually in the hands of distant correspondents of the association.

It is obvious, therefore, that it would be absolutely impracticable for the examiner to make such a complete verification as would demonstrate beyond question that the entries stating these liabilities upon the books of the bank precisely correspond with the amounts represented by these various evidences of indebtedness. Some of these accounts may in a certain degree be verified by correspondence with the distant creditors, but to call in all the pass books, certificates of

deposit, and drafts in transit would be obviously impracticable.

The examinations, and reports based thereon, have undergone a gradual process of evolution during the more than quarter of a century that the national-banking system has been in existence. year to year the attention of the Comptroller has been called to new and novel devices adopted by those who sought to cover up their criminality or prevent the discovery of serious losses. This has led to increased vigilance upon the part of examiners and to the adoption of such measures as would, so far as possible, prevent the success of such devices in the future. So, under the exigencies of the service the scope and details of examinations have undergone gradual transformation and enlargement, making them more and more effective and valuable as the age of the system and experience in the wiles of dishonest bank officials increase.

The small losses suffered by creditors of national banks in the past have led some part of the general public to feel that governmental supervision should be of such a character as to absolutely prevent these associations from becoming insolvent, and that in case such failures occur those charged with the administration of the law are necessarily derelict in duty. It is apparent, however, that such is very far from being the case. It will be observed that the duties of the Comptroller, and in some sense the examiners, are largely negative; that the law consists in large part of necessary limitations and restrictions upon the operations of the associations organized under its authority. The Comptroller is therefore mainly charged with the responsibility of indicating to bank managers what they shall not do.

The affairs of each association are, however, wisely placed under the control of a board of directors elected by the shareholders, which is alone vested with the power to direct its management. It is apparent that it would be impracticable for any Bureau of the General Government to undertake to participate to any degree in the receiving of deposits, in the making of loans, and in the thousand details incident to the management of each particular bank. It would be in the highest degree unfortunate and unwise for the Government to attempt to usurp in any manner the duties which are and must be devolved upon the representatives of the shareholders of the various banks—

upon its directors and officers.

That the limitations and restraints imposed by the national bank act, supplemented by the periodical reports required and published, have done much to promote the success of the banks constituting the national system, and the security of the various creditors is demonstrated by its history. It is, however, indisputable, and conceded by all those informed as to the facts, that the system of examinations provided for in the brief paragraph quoted at the beginning of this article is of paramount importance and absolutely indispensable to the conspicuous success which has attended the operations of these associations from

the inauguration of the system.

The officers directly in charge of the various banks and the employés to whom are committed the details incident to the proper conduct of the business, are actuated by the same motives which inspire humanity generally and are subject to the same temptations and the same ambitions. In the opinion of the Comptroller, every such officer and employé will admit that the expected visit of a skilled examiner who is to inspect and criticise the work upon which he is engaged incites him to greater diligence, promptness, and accuracy, tends to deter him from entering upon operations inconsistent with good banking, and strengthens him in his efforts to overcome those temptations to disobey the law which come to every bank manager through the pressure of customers in the most varied and insidious forms.

That the visits of an examiner should be always welcome to those in charge of a bank is not to be expected. Those, however, who are conscious of having discharged their duties with fidelity and ability gladly welcome the inspection of an expert who can properly appreciate the results of their faithfulness. The officer in charge who earnestly desires an honorable and successful career will gladly accept the services of one who can aid him in verifying the various accounts of the bank and in establishing the fidelity and ability of those subordinates who are en-

trusted with the details of business. The directors of any association who are disposed to fulfill the important duties imposed by law and to merit the confidence reposed in them by their shareholders, hail with pleasure the visit of one whose sole object is to reinforce their efforts to contribute to the safety and success of the institution which has been committed to their care and direction.

Unfortunately dereliction of duty on the part of directors is the chiet cause of failure upon the part of corporations generally and of national banks particularly. It is this inattention to duty upon the part of those chosen to represent the shareholders in the management of national banks which has made the visits of the examiner an absolute

necessity.

It has become a habit on the part of the general public whenever the failure of a national bank occurs to at once challenge the integrity or skill of the examiner charged with its supervision, oblivious of the fact that his energy, his experience, and his devotion to duty may have prevented the failure of a score of more or less embarrassed institutions as to whose mismanagement they are of necessity entirely uninformed.

The bank examiner as a rule faithfully discharges his duty. Every disobedience of law, and everything indicating impairment of capital, insolvency, or criminality are in most instances faithfully reported to the Comptroller of the Currency. In every such case the Comptroller applies the remedy named in the law. If the report indicates a minor disobedience of law or of the rules of sound banking, caution or reproof is administered. If impairment of capital is indicated he immediately issues a notification that it be made good by assessment upon the shareholders. In case insolvency is shown to his satisfaction a receiver is appointed.

The great service performed through the agency of bank examiners consists largely, however, in meeting dangerous and unlawful practices at the threshold. The number of cases of this kind which have been arrested at the beginning, and severe loss, if not insolvency, prevented by the prompt and timely action of bank examiners is very great, although necessarily unknown to the general public, and hence

unappreciated by those whose interests have been protected.

The Comptroller feels the need continually of one or more supervising examiners of approved skill and unquestioned integrity who might visit the various examiners in the field and bring the work into greater uniformity and in many ways increase its efficiency. Although the instructions are explicit and the blanks so arranged as to constantly remind these officers of what a complete examination should consist, yet the Comptroller can not always feel assured that these are fully understood and faithfully obeyed. And, again, when failures multiply and exigencies arise making extra precautions necessary, the services of one or more conspicuously capable examiners who are not permanently assigned to any particulary district would be invaluable.

The Comptroller also calls attention to the fact that assistant examiners are needed in all the large cities, and that no such office now exists.

He therefore recommends that the law be so amended as to provide for the appointment of not more than three supervising examiners who shall receive an annual salary to be paid from the public funds; that the Comptroller be empowered to appoint as many assistant examiners as may in his judgment be necessary, to be paid such compensation as may be fixed by the Comptroller from the fees of the examiners by whom they are employed. That each supervising examiner, examiner, and assistant examiner be required to take an oath before entering upon the discharge of his duties, and also to give bonds in such amount and with such sureties as may be satisfactory to the Comptroller.

CERTIFICATES OF STOCK.

Section 5139 of the Revised Statutes of the United States provides that "The capital stock of each association shall be divided into shares of one hundred dollars each, and be deemed personal property, and transferable on the books of the association in such manner as may be prescribed in the by-laws or articles of association."

The reports of examiners indicate that too little care is taken in the transfer of stock and in the issuing of certificates. In many cases boards of directors neglect to prescribe in the by-laws the manner in which the transfers are to be made, and, as a rule, the articles of associa-

tion are silent upon the subject.

In other instances the by-laws set forth in general terms the manner in which such transfers shall be effected, but it is frequently found that they are not obeyed, and that the transfers are of a very irregular character, and in many cases not lawfully executed. In some banks no stock ledger is found; in others, certificates are signed in blank and left for some subordinate to fill out and deliver when occasion shall require. In other banks certificates surrendered for transfer are not properly cancelled and preserved, and in newly organized banks they are occasionally issued to shareholders prior to their having paid in full for the same. Where banks are increasing their capital, certificates are sometimes issued before the increase has been submitted to and approved by the Comptroller.

These are a few examples of irregular practices on the part of banks which have been brought to the attention of the Comptroller by recent

examinations.

The shareholders of national banks are its proprietors and the certificates of stock issued to them are the evidence of their proprietorship. The importance of preserving the record of such ownership is evidently not sufficiently appreciated. While it is true that overissues of stock are comparatively infrequent it is nevertheless the fact that examiners often find difficulty in verifying trial balances taken from stock ledgers. While in most cases this is simply an evidence of carelessness and lack of system, yet, the examiner can not always be sure that the future

may not develop that a more serious condition exists.

One remedy suggested for this state of things is that all transfers of stock be registered by a corporation acting in the capacity of an agent for that purpose. This is a very valuable safeguard, and is comparatively convenient and inexpensive for banks situated in large cities. This plan is certainly worthy of investigation by all boards of directors, and it is recommended to their favorable consideration. The added value attached to shares by reason of this registration would, in the opinion of the Comptroller, exceed the slight cost which such registration would involve. As the system is, however, largely composed of banks with small capital, located outside of the larger cities, in a great majority of cases this plan would not be deemed feasible, and therefore the remedy, so far as it applies to the system generally, must be found in the greater care and activity of the directors of the several associations. They should first see that proper by-laws regulating the transfer of shares are adopted. Proper books should be furnished for recording the transfer of shares, in accordance with the terms of the by-laws, and

provision made for the frequent examination of the certificate book, stock ledger, and transfer book by a committee charged with this special

duty.

The signing of certificates in blank should be forbidden, and great care should be exercised in the cancellation and preservation of surrendered certificates. As it is important in the enforcement of the individual liability of shareholders in the case of insolvent banks whose assets prove insufficient to pay their debts that the question of proprietorship should be definitely determined, it is recommended that a receipt be taken from each shareholder upon delivery to him of the certificate representing the stock of which he is the owner.

OFFICERS AND DIRECTORS AS BORROWERS.

While the failures of the year just closed have been in large part due to well-defined causes, which have been operating with more or less severity in all parts of the civilized world, supplemented by the local influences to which allusion has been made, it is evident that some features of the more important ones are suggestive of needed changes in the national-bank act. In almost every instance an investigation of the affairs of an insolvent bank discloses the fact that the officers and directors have too freely used the funds of the association for their own purposes, either in a lawful or unlawful manner.

The facility with which the active officers of a bank may borrow its funds seems to make it necessary that some added restriction should

be placed upon transactions of this kind.

In the organization of a national bank those who contribute the funds which constitute its capital should dedicate the same to the business of banking, and not to the creation of an instrumentality through which they may proceed to borrow to an amount largely in excess of the sum contributed by them to the original capital.

The principal limitation as to loans and discounts is found in section 5200 of the Revised Statutes of the United States, which reads as

follows:

The total liabilities to any association, of any person, or of any company, corporation, or firm, for money borrowed, including in the liabilities of a company or firm the liabilities of the several members thereof, shall at no time exceed one-tenth part of the amount of the capital stock of such association actually paid in. But the discount of bills of exchange drawn in good faith against actually existing values, and the discount of commercial or business paper actually owned by the person negotiating the same, shall not be considered as money borrowed.

This limitation is found to be wholesome in its general application, but recent events indicate that additional safeguards are needed.

In my opinion some limitation should be placed upon the amount of commercial or business paper which may be discounted by an association for any person, company, corporation, or firm, and a similar restriction should be placed upon indirect liabilities resulting from guaranty or endorsement. If it is deemed necessary to limit direct loans to 10 per cent of the capital paid in it would for the same reason follow that indirect liabilities should be subject to some limitation. Just what the extent of the restrictions should be is not so easily determined, but, in my judgment, the direct and indirect liabilities, in the case of a director, should not exceed 20 per cent of the capital paid in.

The active officers of the bank, who are charged with the custody of its assets and the handling of its funds, should not, in my opinion, be permitted to appear as borrowers or become in any way liable to the association with which they are connected. While this might work hardship in exceptional cases it would without doubt add greatly to the se-

curity of the creditors of the banks as a whole. It would be unwise to forbid an association to loan to or discount for its several directors, as they are usually selected from among the leading men in the various branches of business, for the reason that they possess information which is of great value in passing upon paper offered by those engaged in the same line of trade with themselves.

There seems to be no serious objection, however, to placing some limit upon their indirect as well as direct liabilities. The Comptroller, therefore, takes this opportunity to recommend that the active officers of a bank be excluded from incurring liabilities to the association with which they are connected, and that the direct and indirect liabilities of a director be confined to 20 per cent of the paid-up capital, leaving the limitations contained in section 5200 United States Revised Statutes intact. The Comptroller is also of opinion that the publication of the liabilities of officers and directors would afford a valuable safeguard.

The Comptroller also desires to call attention to the fact that no suitable penalty is provided by law for violations of section 5200 United

States Revised Statutes.

Aside from the power to bring suit for forfeiture of franchise under the general provisions of law laying the groundwork for enforcing the liability of directors, the Comptroller is without the power to enforce obedience to the limitations of the section quoted. The remedy provided is so severe as to make it entirely useless, no Comptroller having ever brought suit to forfeit the franchise of an active bank. The reason for this is obvious, as such a proceeding would destroy the bank, thereby greatly aggravating instead of affording a remedy for the evil complained of. The Comptroller should be empowered by law to inflict such a penalty, by way of fine or assessment, as would make excessive loans highly unprofitable, and yet not so severe as to prevent its being promptly and invariably imposed in every case brought to his notice.

BONDS OF BANK OFFICERS.

Circumstances attending recent failures have served to call the atteution of the Comptroller to the fact that much greater care should be exercised by boards of directors in the matter of the official bonds of

the officers and employés of their several banks.

The general verdict of those most experienced in the management of banks is in favor of requiring official bonds from all who occupy places of trust, and especially those who handle cash or convertible securities. Under the national bank act it is left discretionary with boards of directors whether or not they shall require official bonds. This matter should be taken up, fully discussed, and definitely decided by each board of directors.

At the time of organization the matter usually has attention and certain requirements are decided upon but are inefficiently carried out. Frequently the by-laws of an association contain all that is necessary in relation to bonds, but the reports of bank examiners disclose the fact that these by-laws often become obsolete by reason of inattention to

their enforcement.

There are various phases of this subject which should be considered by those responsible for the management of a bank. In the first place it is necessary that the board of directors should decide as to the particular officers and employés who shall give official bonds and determine upon the amount in each case. Ordinarily this covers the entire action of the board in relation to the matter. This, however, does not constitute the full measure of their duty. Great care should be taken in preparing the form of the bond required so that in case it becomes forfeited the penalty can be enforced. Not only should the form of the bond have careful attention but its terms should be such as to cover not only criminal acts but such as involve a lack of due diligence on the

part of the officers or employés.

In this connection it is proper to say that the Comptroller is in receipt of information, from a source which entitles it to the highest consideration, that bonds are habitually offered and frequently accepted which guarantee the bank only against such misconductof the officer as amounts to embezzlement or larceny and do not secure it against gross carelessness or against connivance at or the overlooking of its spoliation by others.

This warning should be heeded and every board of directors should promptly order an examination of all official bonds in their custody by competent counsel so that their bank may not suffer through their

neglect when an exigency arises.

Again, it is important that the sureties should be of such a character as to insure the collection of the penalty in case of forfeiture. If the surety is an incorporated company, as is common now, its solvency should be fully ascertained, and the necessary information procured as to its right to enter into such a contract under its charter. It is also important that this class of bonds should be examined with especial care as to whether they are broad enough in their terms to properly protect the bank in case of the unfaithfulness of the principal.

In case natural persons are accepted as surety similar care should be exercised. No one should be accepted as surety upon such a bond whose responsibility for the penalty is not fully established. In addition to this it is well to reject all those who are not of such high character and established integrity as to unhesitatingly meet any losses which

may occur, regarding it as a moral as well as a legal obligation.

It is quite frequently the case that a bond prepared and executed, with satisfactory sureties, is found in the custody of or accessible to the identical officer for whose faithful performance of duty it is the bank's only security. It is the duty of every board of directors to see that the custody of these bonds is committed to those who can have no interest in their becoming mislaid or destroyed, and who will faithfully keep and produce them when wanted.

The bond having been properly prepared and executed, signed by sureties known to be responsible and deposited in secure hands, it remains for the board of directors to make a periodical examination in order that their existence and safety may be verified, and for the further purpose of ascertaining that the security once deemed satisfactory has not become impaired by death, removal, insolvency, or some other cause

which would put the interests of the bank in jeopardy.

At the regular annual visit of the examiner inquiry is made as to whether the by-laws require official bonds, and if so whether or not they have been executed in accordance therewith, and also as to their custody. He is instructed to call the attention of officers to any circumstances developed by his examination which would tend to impair the security of the association. His suggestions in relation to this matter, however, are usually necessarily made to the active officers of the bank, who are the identical persons from whom official bonds are required. It is often impracticable for him to call the attention of the board of directors of the bank to the necessity for the desired action in a given case.

The danger lurking here is greatly aggravated by the fact that, as a rule, the active officers possess the unbounded confidence of the board

of directors, and this confidence generally remains unshaken until the commission of some act which makes necessary a resort to the sureties upon the official bond.

Unless the precautions above alluded to have had attention prior to the discovery of the unfaithfulness of the trusted officer or employé the directors awaken too late to the fact that they have been derelict in duty.

CLOSED NATIONAL BANKS.

The following statement exhibits the title, capital, and circulation is sued, redeemed, and outstanding of associations which were closed to business during the year ended October 31, 1891. Of these 66 associations 41 went into voluntary liquidation and 25 into the hands of receivers.

RESUMPTION OF BUSINESS BY CLOSED BANKS.

A conspicuous feature of the operations of this Bureau for the report year has been the resumption of business by banks which had volun-

tarily closed their doors to business.

Ordinarily the closing of a national bank serves to so greatly impair its credit as to render its resuscitation both impracticable and unde-In most cases the dishonesty or mismanagement which necessitates the closing of its doors causes such an impairment of confidence as to prevent the bank, even under new and competent management, from regaining its former position and securing the necessary support from the general public.

Ordinarily it is deemed better to organize a new association, with an entirely new title, than to endeavor to reopen one which has been closed. Occasionally, however, it occurs that the closing of a bank may result from causes which neither seriously affect its credit nor greatly impair its capital. In some such cases the confidence of the community is not withdrawn, and the good will of the association, which may have had a long and honorable career, is deemed by its shareholders worthy of

preservation.

It has been the policy of the Comptroller in every such case to encourage the adoption of measures that would enable him to withdraw the examiner or receiver and permit the bank to resume business at as early a date as possible. He has, however, invariably made it a condition precedent that the affairs of the association should be put in a satisfactory condition. This would imply that its capital should be unimpaired, that its cash should be substantially equal to its demand liabilities, and that all doubtful and worthless assets should be eliminated; that all its affairs should be placed in strict compliance with law and such changes made in its board of directors and officers as would exclude those who had been guilty of mismanaging its affairs, and generally such measures enforced as would insure a prudent, conservative, and law-abiding course in the future.

This policy has only been adopted in cases where the Comptroller was led to believe that the conditions were, to a marked degree, favorable

to a successful future career.

The failure of a bank is always a calamity, even where the assets of the failed institution are sufficient to ultimately pay in full its liabilities. The delay necessarily incident to converting these assets into cash and dividing them among the several claimants is the cause of much incon-

venience and loss to a large number of depositors.

A national bank is organized for the purpose of conducting a commercial business, and is ordinarily the depositary for the current cash receipts of persons engaged in every form of manufacturing, industrial, and commercial business. Most of these enterprises are conducted with capital barely sufficient to form a basis of credit, the latter being mainly relied upon and of, by far, the greater importance. Every such firm engaged in business is liable to have its credit destroyed by the locking up of its cash resources, resulting in the dishonoring of its paper and subsequent failure.

All classes; however, are represented among the creditors of these insolvent banks. The desire to find a safe-depository for funds temporarily idle moves all alike. The rich and the poor, young and old,

capitalist and laborer, all appear as claimants.

An investigation of the affairs of an insolvent bank invariably discloses cases of peculiar hardship and frequently brings to light such misfortunes as are calculated to arouse the sympathies of the most indifferent. It is therefore a matter of great importance to the creditors of a failed association that their balances be made available at the

earliest date practicable.

Not only are the creditors of a failed association greatly benefited by its being speedily reopened for business but shareholders also, for it is a well-established fact that the assets of such an association are much more valuable to it as an active bank than if in liquidation or in the hands of a receiver.

As a result of the policy outlined above six national banks, which closed their doors to business, possessing an aggregate capital of \$2,225,000 and having liabilities amounting to \$3,756,362, have been permitted to resume business since the 1st day of January, 1891. One other bank, closed by order of the Comptroller, having a capital of \$300,000 and liabilities amounting to \$622,221, was permitted to go into voluntary liquidation, the directors and principal shareholders of the bank having provided the necessary funds to meet all liabilities.

The following table gives the title of these banks, date of closing,

date of resumption, and amount of capital and liabilities.

PERMITTED TO RESUME BUSINESS.

· ·		•	_		

^{*} Exclusive of capital, surplus, earnings, and circulation. † Date of liquidation.

Of these banks the Newton National Bank of Newton, Kans., and the Farmers and Merchants' National Bank of Clarksville, Tenn., were in the hands of receivers. In the other cases no receiver had been appointed, a bank examiner being in charge between the date of closing and reopening of the bank for business.

In each of the cases above mentioned the banks when reopened were reported by the officer in charge to possess an unimpaired capital, cash in hand sufficient to meet all demand liabilities, and under such management as gave reasonable assurance of an honorable and successful career. All these banks are still in operation, having promptly met all their obligations according to their terms, excepting the Washington National Bank of New York, which was permitted to go into voluntary liquidation and has paid in full all liabilities.

So far as the Comptroller is informed the records of the Department disclose but one case in the history of the system prior to 1891 where a bank once placed in the hands of a receiver was permitted to reopen.

It is hoped and believed that the future success of these banks will be such as to warrant the Comptroller in continuing a policy which has led to their rehabilitation.

COMPARATIVE STATEMENTS OF THE NATIONAL BANKS.

The resources and liabilities of the national banks for thirteen years, at nearly corresponding dates, from 1879 to 1891, inclusive, are exhibited in the following table, and the same information with respect to preceding years will be found in the Appendix,* page 124.

For several years a statement has been presented, showing in condensed form the changes occurring in the principal items of resources and liabilities of the national banks from January 1, 1866, the data being obtained from an abstract prepared from reports of condition of all national banks at the date of the last call preceding the current annual report. The following statement is perpetuated for purposes of comparison. Aggregates are expressed in round numbers and the dates corresponding with highest and lowest points are given.

FI 91---23

HIGHEST AND LOWEST POINTS REACHED IN THE PRINCIPAL ITEMS OF RESOURCES AND LIABILITIES SINCE THE ESTABLISHMENT OF THE SYSTEM.

	January 1,	September	Highest poi	int reached.	Lowest point reached.		
	1866.	25, 1891.	Amount.	Date.	Amount.	Date.	
Capital, surplus and un- divided profits	475, 330, 204	1, 008, 288, 030	\$677, 426, 870 1, 008, 288, 030	do	475, 330, 204	Do.	
Circulation Total investments in United States bonds Individual deposits Loans and discounts	440, 380, 350 520, 212, 174	174, 907, 550 1, 588, 318, 081	341, 320, 256 712, 437, 900 1, 588, 318, 081 1, 989, 354, 239	Apr. 4, 1879 Sept.25, 1891	170, 653, 050 501, 407, 586	Oct. 2, 1890 Do. Oct. 8, 1870 Jan. 1, 1866	
Cash: National-bank notes Legal-tender notes Specie		19, 991, 167 97, 615, 608	28, 809, 699 205, 793, 579	Dec. 31, 1883 Oct. 1, 1886 Oct. 2, 1890	11, 841, 104 .52, 156, 439	Oct. 7, 1867 Mar.11, 1881 Oct. 1, 1875	

It will be seen that capital, surplus, undivided profits, and deposits have increased from \$995,542,378 in January, 1866, to \$2,596,606,111 on September 25, 1891, and that loans and discounts amounting to \$500,650,109 have reached the sum of \$1,989,354,239, which is nearly quadruple, and upon reference to other pages in this report that the number of active banks has increased from 1,582 to 3,677. The holdings in bonds have decreased from \$440,380,350 to \$174,907,550, but on April 4, 1879, an intermediate period, the banks held \$712,437,900. The specie held by the banks on January 1, 1866, amounted to \$16,909,363, was only \$8,050,330 in 1875, and amounted to \$183,515,076 on September 25, 1891, which was a falling off of more than \$12,000,000 since October 2, 1890, on which date the highest point was reached.

The following comparative statement gives the percentages of loans and discounts, United States bonds, and specie to the entire fund with which the banks do business, which is made up of capital, surplus, undivided profits, circulation, and deposits.

In 1866 the percentage of circulation to capital, surplus, and undivided profits was about 45 per cent, and is now about 13 per cent, the same as last year.

	1866.	1887.	1888.	1889.	1890.	1891.

EXTENSION OF THE CORPORATE EXISTENCE OF NATIONAL BANKS.

Under the provisions of the act of July 12, 1882, ninety-seven associations applied for and obtained an extension of their corporate existence during the past year. The following table shows the number and capital of all extended banks and their geographical location:

States and Territories.	No of banks.	Capital.	States and Territories.	No. of banks.	Capital.
Alabama Arkansas California Colorado Conuecticut Delaware District of Columbia Georgia Illinois Indiana Iowa Idaho Kansas Kentucky Louisiana Maine Maryland Massachusotts Michigan Minnesota	1 1 4 73 11 3 8 68 39 37 1 4 19 5 53 29 201 201	\$785,000 250,000 1,500,000 760,000 22,450,820 1,503,185 800,000 1,750,000 8,793,000 5,077,000 3,460,000 100,000 2,300,000 2,300,000 12,080,000 8,630,000 12,050,000 2,075,000 2,075,000 2,075,000 2,555,000	Missouri Montana N braska New Hampshire New Jersey New York North Carolina South Carolina Onio Oregon Pennsylvania Rhode Island Tennessee Texas Vermont Virginia West Virginia Wisconsin	1 6 37 50 224 4 5 85 1 170 59 8 5 31 13 20	\$3, 575, 000 1, 200, 000 1, 200, 000 4, 805, 009 10, 133, 350 72, 772, 460 8, 500 1, 100, 000 15, 554, 000 45, 154, 390 19, 959, 900 675, 000 2, 291, 000 1, 491, 000 1, 493, 505 1, 491, 000 1, 935, 600

The following table shows how many associations will reach the expiration of their corporate existence during a period of ten years from 1892 to 1901, inclusive, with their capital and circulation:

Year.	No. of banks.	Capital.	Circulation.	Year.	No. of banks.	Capital.	Circulation.
1892. 1893. 1894. 1895. 1896.	96 38 57 76 22 25	\$13, 951, 100 4, 701, 000 6, 768, 000 11, 259, 000 2, 123, 800 3, 534, 000	\$3, 570, 975 1, 982, 925 2, 585, 470 4, 431, 610 975, 400 1, 198, 295	1898	24 34 47 104 523	\$2, 479, 000 4, 595, 000 7, 307, 100 13, 503, 150 70, 221, 150	\$1, 153, 350 2, 106, 450 2, 040, 830 3, 485, 000 23, 530, 305

The number, capital, and circulation of the national banks of which the corporate existence expired between October 31, 1890, and October 31, 1891, are shown in the following table, and the number of extended banks is also indicated. The corporate existence of five associations expired by limitation:

Date.	No. banks expired.	Capital.	Circula- tion.	No. banks extended.	Capital.	Circula- tion.
1890. November December 1891. January February March April ? May June July August September Oetober	12 4 7 9 4 7 12	\$1,400,000 2,225,000 2,150,000 400,000 565,000 1,650,000 375,000 1,075,000 2,590,000 1,015,000 1,015,000 1,015,000	\$553, 050 427, 500 112, 500 198, 000 275, 625 84, 375 174, 375 508, 500 262, 125 196, 200 247, 500	11 10 10 4 6 9 4 6 12 13 7	\$1,400,000 1,975,000 1,850,000 400,000 715,000 1,650,000 375,000 2,590,000 1,015,000 \$20,000 1,800,000	247, 500
Total	102	16, 365, 000	3, 467, 250	97	15, 465, 000	3, 276, 000

The corporate existence of ninety-six national banks, with an aggregate capital of \$13,951,100, bonds \$3,967,750, and circulation \$3,570,975, will expire during the year 1892, as shown in the following table:

NATIONAL BANKS OF WHICH THE CORPORATE EXISTENCE WILL EXPIRE DURING THE YEAR 1892, WITH THE DATE OF EXPIRATION, THE AMOUNT OF CAPITAL STOCK OF EACH BANK, THE UNITED STATES BONDS ON DEPOSIT WITH THE TREASURER, AND THE AMOUNT OF CIRCULATION ISSUED THEREON.

CIRCULATING NOTES.

The actual circulation outstanding on September 25, 1891, for which the banks were responsible was \$134,897,243, this amount being exclusive of \$37,002,875 also in circulation but represented by lawful money deposited by the banks for redemption purposes whenever the notes are received by the Treasurer.

The minimum deposit of the bonds required of the 3,677 national banks in operation September 25, 1891, was \$104,933,987, upon which only \$94,440,589 of national bank circulation could be issued. These banks held, on September 25, \$150,035,600 of bonds, and were actually responsible for \$40,456,654 of circulation more than the minimum. Some banks do not take circulation.

Of the 3,677 banks 2,651 have a capital not exceeding \$150,000 nor less than \$50,000 each, which is the lowest amount any bank in the system may have, the aggregate capital amounting to \$214,126,010. The remaining 1,026 have a capital of over \$150,000 each, the aggregate amounting to \$463,300,860. If an amount of bonds equal to the total capital were deposited to secure circulation the whole body of banks might have a circulation amounting to \$609,684,183, or \$515,243,594 more than the present minimum. A table in the Appendix,* page 141, shows, by States and geographical divisions, this information in detail.

The following table shows the number of banks organized, by fiscal years, from July 1, 1882, to July 1, 1891, capital stock, amount of bonds deposited, and circulation issued thereon:

Year.	Ņo.	Capital.	Minimum bonds required.	Bonds actually deposited.	Unit per cent of excess.	Circulation issued.
July 1, 1882, to July 1, 1883 July 1, 1883, to July 1, 1884 July 1, 1884, to July 1, 1885. July 1, 1885, to July 1, 1886. July 1, 1886, to July 1, 1887. July 1, 1886, to July 1, 1887. July 1, 1888, to July 1, 1888. July 1, 1888, to July 1, 1889. July 1, 1889, to July 1, 1890. July 1, 1880, to July 1, 1890. July 1, 1890, to July 1, 1891.	142 163 217 164 156	\$26, 552, 300 19, 944, 000 15, 205, 000 17, 553, 000 16, 734, 000 15, 970, 600 36, 655, 000 27, 630, 000	\$5, 155, 500 4, 016, 000 3, 061, 250 3, 404, 500 4, 986, 000 3, 308, 500 6, 251, 250 5, 082, 500 38, 420, 500	\$7, 116, 400 4, 676, 100 3, 332, 800 3, 715, 500 5, 051, 300 3, 324, 750 3, 166, 300 6, 262, 750 5, 088, 500 41, 734, 400	28 14 8 8 . 1 0. 5 . 36 . 18 . 12	\$6, 404, 760 4, 208, 490 2, 999, 520 3, 343, 950 4, 546, 170 2, 992, 275 2, 849, 670 5, 613, 915 4, 579, 650 37, 853, 400

The foregoing table is perpetuated to show by comparison the falling off in the amount of bonds deposited in excess of the requirement, and it will be seen that the percentage of excess has fallen from 28 in 1882-'83 to .12 in 1889-'90. Of the 239 banks organized during the past fiscal year 143 have a capital of \$50,000 each, amounting to \$7,150,000; 56 have a capital of over \$50,000 and not exceeding \$150,000, aggregating \$5,280,000, and 40 have an aggregate capital of \$15,250,000. The 40 largest banks deposited the exact amount of bonds required by law, and of the remaining 199 banks only 4 deposited bonds in excess of the requirement.

Notwithstanding the continuous accession of new banks to the system, more than counterbalancing the number which fail or are placed in voluntary liquidation from year to year, the outstanding circulation

steadily decreases.

The anomaly, however, is presented, as a result of operations during the past year, of an increased circulation for which the banks are responsible. This increase amounted to \$9,720,287, and was caused by the organization of new banks and additional deposits of bonds by banks already organized. The aggregate outstanding circulation, however, was reduced by the redemption of \$19,400,679, for which lawful money had been deposited, leaving a net decrease of \$9,680,392.

By referring to page 366 it will be observed that the total withdrawal of bonds, for transfer to the Secretary for purchase or redemption, amounted to \$32,378,800, nearly the whole amount being substituted

by other bonds.

The following table shows by comparison for eight years the amounts of lawful money deposited and the consequent decrease of circulation:

DECREASE OF NATIONAL BANK CIRCULATION DURING EACH OF THE YEARS ENDED OCTOBER 31, FROM 1884 TO 1891, INCLUSIVE, AND THE AMOUNT OF LAWFUL MONEY ON DEPOSIT AT THE END OF EACH YEAR.

The gross decrease of circulation, including the notes of gold banks and those of failed and liquidating associations, was \$7,571,085.

BANKS WITHOUT CIRCULATION.

A number of national banks did not originally take circulating notes for issue, and others eventually deposited lawful money and surrendered their circulation.

The following is a list of these banks, the amount of capital and bonds being given:

Title of bank.	Capital.	Bonds.
Chemical National Bank, New York, N. Y. Mechanics' National Bank, New York, N. Y. Merchants' National Bank, New York, N. Y. National City Bank, New York, N. Y. National Park Bank, New York, N. Y. Total		12, 500 387, 500

SECURITY FOR CIRCULATING NOTES.

The security for circulating notes of national banks is limited, by the Act, to United States registered bonds bearing interest, and the following table shows the amount of such bonds held by the Treasurer of the United States as security on June 30 of each year from 1865 to 1891, inclusive, and the amount owned and held by the banks for other purposes, including those deposited with the Treasurer to secure public deposits:

	United	l States bonds l	ield as securi	ty for circula	tion.	United States

The following table gives similar information for the years ended October 31, from 1882 to 1891, inclusive. An examination of this and the foregoing table will disclose the changes which have occurred in the holdings of the several classes of bonds by the banks:

		United	States bonds	United States					
Year. Number of banks.		4½ per cent bonds.	4 per cent bonds.	3 per cent bonds.	Pacific 6 per cent bonds.	Total.	bonds held for other purposes at nearest date.	Grand total.

^{*} Three and one-half per cent.

A table will be found in the Appendix*, page 125, showing on the first day of each mouth, from January 1, 1870, to November 1, 1891, the amount of authorized capital stock of the national banks, the amount of bonds on deposit to secure circulation, the amount of circulation secured by the bonds, the amount of lawful money deposited to redeem outstanding circulation, and the total amount outstanding including notes of gold banks.

INTEREST-BEARING FUNDED DEBT OF THE UNITED STATES.

The following statement is made to preserve continuity with respect to changes in the funded debt of the United States. The effect upon the holdings of bonds by national banks will be observed elsewhere. The public debt reached the maximum August 31, 1865, and then amounted to \$2,844,649,626, the non-interest-bearing obligations amounted to \$461,616,311, the interest-bearing debt being \$2,383,033,315. On October 31, 1891, the interest-bearing debt amounted to \$649,650,232.

^{*} See footnote, p. 337.

The classes of bonds available as security for the circulating notes of national banks are shown in the following table, dates of authorizing acts, maturity of bonds, and rates of interest also being given.

Funded loan 1891; authorizing act July 14; 1870, and January 20, 1871; date of maturity, 1891.
†Funded loan 1907; authorizing act July 14, 1870, and January 20, 1871; date of maturity, 1907.
†Pacific railroad bonds; authorizing act July 1, 1862, and July 2, 1864; date of maturity, 1895 to 1899.
The Navy pension fund, amounting to \$14,000,000 iu 3 per cents, the interest upon which is applied to the payment of naval pensions exclusively, and \$39,070 of refunding certificates are not included in the table.

MARKET PRICES OF UNITED STATES BONDS.

The investment value of United States bonds increases as the relative market price of such bonds declines. The $4\frac{1}{2}$ percents matured September 2, 1891, and it will be observed that the market price declined very regularly up to date of maturity. The fluctuation in prices of 4 percents was not considerable, the decline, however, being about double that during the previous year. The following table, prepared by the Acting Actuary of the Treasury, will show the movements in prices of the two classes during the year ended October 31, 1891:

OPENING, HIGHEST, AND LOWEST PRICES OF UNITED STATES REGISTERED 4½ PER CENT AND 4 PER CENT BONDS, IN NEW YORK, FOR EACH WEEK FROM NOVEMBER 7, 1890, TO OCTOBER 30, 1891.

BOND PURCHASES AND REDEMPTIONS BY THE TREASURY.

During the past report year, the purchase of 4 per cents was discontinued by the Government in the month of January, the total purchases amounting to \$8,645,850. Under Treasury circular dated October 9, 1890, the redemption of 4½ per cents commenced, interest being added to the face of the bond up to and including August 31, 1891. Under the various circulars issued, the total redemptions of 4½ per cents amounted to \$33,966,150, and the total purchased and redeemed of both classes to \$42,612,000. The total purchases and redemption of these two classes of bonds amounted to \$373,484,150 since the issue of circular dated April 17, 1888. Circular dated July 2, 1891, provided that any of the 4½ per cents theretofore called for redemption might be presented for continuance during the pleasure of the Government, with interest at the rate of 2 per centum per annum, in lieu of redemption. A subsequent circular extended the time for presentation for continuance to September 30.

The amount of bonds so continued was \$25,364,500. On November 1, there were \$4,601,500 of this class of bonds which had not been presented for redemption or continuance. Of this amount the national

banks had on deposit to secure circulation \$199,400. The statutes require in the organization of a national bank a deposit of United States registered bonds bearing interest, and the few banks holding these bonds, being either indifferent or recalcitrant, were addressed by circular to substitute interest-bearing bonds without delay. The question had heretofore arisen as to the legal status of a bank having bonds on deposit which did not comply with the statutes, and the question, upon being referred to the Department of Justice, was decided adversely to the banks declining to withdraw non-interest-bearing bonds and substitute others.

STATEMENT SHOWING THE AMOUNTS OF 4 AND 4½ PER CENT BONDS PURCHASED AND REDEEMED EACH MONTH FROM NOVEMBER 1, 1890, TO OCTOBER 31, 1891, INCLUSIVE, ALSO THE AMOUNT OF 4½ PER CENT BONDS CONTINUED AT 2 PER CENT FROM SEPTEMBER 2, 1891.

BOND WITHDRAWALS BY NATIONAL BANKS.

The effect of the purchase and redemption of bonds during the year by the Treasurer upon the volume of circulation was inconsiderable; for, of the \$3,926,050 bonds withdrawn by the banks, and substitution not made upward of \$1,553,000 were withdrawn on account of failed and liquidating banks. Notwithstanding the withdrawal of \$2,372,500 on account of reducing banks, there was an actual increase in the amount of circulation, for which the banks are responsible, as will be seen elsewhere.

The following table shows the class and amount of bonds withdrawn by the banks, for purchase or redemption under Treasury circulars of October 9, December 6, 1890, June 2, July 2, August 24, September 2, and September 16, 1891, and the class and amount of bonds deposited from October 31, 1890, to November 1, 1891, together with the total withdrawals, on the deposit of lawful money, for which substitution was not made.

The discrepancy in the amount of circulating notes outstanding October 31, which will become apparent when the several statements in this report are compared, is explained as follows:

In the table on this page notes of national gold banks amounting to \$116,837 are not included, and the table on page 358 includes \$62,760, representing notes redeemed and destroyed to be reissued.

The total issues of incomplete currency during the year are shown by the vault account, as follows:

National-bank currency in vault October 31, 1890	. , ,
the year ended October 31, 1891	91, 132, 780
Amount issued to banks during the year	,
Balance in vault October 31, 1891	

The following table shows the amount of new currency issued to replace notes redeemed and destroyed under the provisions of the act of June 20, 1874, the amount issued to replace notes redeemed by lawful money deposited under the act of July 12, 1882, and the amount issued to both old and new banks upon bonds deposited for the purpose of obtaining additional circulation. The table also shows the amount of circulation redeemed under the act of June 20, 1874, establishing the national bank redemption agency of The Treasury at Washington:

Notes of gold banks are not included in the above table.

Of the above \$15,346,940 there were issued to banks organized during the year \$4,144,590, and to banks already existing and increasing their circulation \$11,202,350. No changes have been made during the past year in the provisions of law relating to the redemption of nationalbank circulation, and the banks are substantially relieved from all requirements relating to redemptions, except those of keeping good a deposit of lawful money with the Treasurer equal to 5 per cent of their circulation, and the payment of a pro rata annual assessment for the cost of redemption.

During the past year the receipts of the National Bank Redemption Agency amounted to \$69,679,242, of which amount \$32,471,599, or 46 per cent, was received from New York City, and \$7,407,440 from the banks in the city of Boston. The amount received from Chicago was \$4,672,057; from Philadelphia, \$4,556,442; from Baltimore, \$1,781,695; from St. Louis, \$1,275,755; from Cincinnati, \$1,489,079; from New Orleans, \$1,015,000; from Providence, \$815,770, and from Pittsburg,

\$517,127.

A certain proportion of notes received for redemption are fit for circulation, and are returned to the issuing banks. These notes amounted

during the year ended October 31, 1891, to \$12,821,000.

The following table exhibits the amount of national bank notes received monthly for redemption by the Comptroller of the Currency during the year ended October 31, 1891, and the amount received during the same period at the Redemption Agency of the Treasury, together with the total amount received since the passage of the act of June 20, 1874:

REDEMPTION OF NOTES OF BANKS REDUCING CIRCULATION, OF THOSE IN VOLUNTARY LIQUIDATION, AND OF FAILED BANKS UNDER THE ACT OF JUNE 20, 1874.

This act provides for a reduction of the outstanding circulation of an association upon the deposit of lawful money with the Treasurer of the United States in sums of not less than \$9,000, and the act of July 12, 1882, requires a deposit of lawful money for the retirement of the old circulation of banks whose corporate existence has been extended.

Under these acts, and on account of liquidating and insolvent banks, \$454,844,949 of lawful money has been deposited with the Treasurer, including \$2,663,720 deposited for the redemption of notes of national gold banks, and \$97,756,232, for the redemption of national-bank notes under the act of July 12, 1882.

During the year ended October 31, 1891, \$3,545,358 in lawful money was deposited, \$1,878,282 of which was by banks reducing circulation, \$1,352,926 by banks in voluntary liquidation, \$70,398 by banks retiring old circulation issued prior to the extension of their corporate

existence, and \$243,752 by insolvent banks.

The total amount deposited prior to and under the acts of June 20, 1874, and July 12, 1882, is \$469,089,759, and of this sum \$72,397,467 was deposited by banks in liquidation. Deducting from the total deposit the amount of circulating notes redeemed and destroyed without reissue, which was \$433,659,038, there remained in the hands of the Treasurer on October 31, 1891, \$35,430,721 in lawful money for the redemption and retirement of national-bank circulation, including \$116,837 for the redemption of the circulating notes of national gold banks.

Prior to June 20, 1874, national bank notes amounting to \$10,431,135 were redeemed and destroyed without reissue, \$423,227,903 having been redeemed, destroyed, and retired since that date. The latter amount includes \$2,546,883 of the notes of national gold banks and \$78,121,644 of the notes of national banks whose corporate existence has been extended.

FI 91-24

There are no national gold banks now in existence, and the lawful money on deposit with the Treasurer of the United States, amounting to \$116,837, represents the remaining outstanding circulation of these banks.

TAX UPON CIRCULATION, REDEMPTION CHARGES, AND ASSESSMENTS.

United States statutes subject national banks to the payment of a semiannual duty of one half of 1 per cent upon the average amount of notes in circulation issued upon deposits of interest bearing bonds of the United States, and the banks are required under the provisions of the act approved June 20, 1874, to pay the expenses incident to the redemption of their notes to the Treasurer of the United States. The banks are also required to pay the expenses of preparing plates from which their circulating notes are printed. The fees allowed to national bank examiners are paid by the banks at rates fixed in accordance with the provisions of section 5240 of the Revised Statutes, as amended by the act approved February 19, 1875. The amount of tax upon circulation and assessments collected during the past year were as follows:

Semi-annual duty on circulation	\$1, 216, 104, 72
Cost of redemption of notes by the United States Tréasurer	99, 366, 52
Assessment for cost of plates, new banks	
Assessment for cost of plates, extended banks	
Assessment for examiners' fees (sec. 5240, Revised Statutes)	138, 969. 39
Tetal	1 400 015 69

The following table is a comparative statement of taxes assessed as semi-annual duty on circulation, cost of redemption of notes, cost of plates, and examiners' fees for the past nine years:

Years.	Semi-annnual duty on cir- culation.	Cost of redemption of notes by the United States Treasurer.	Assessment for cost of plates, new banks.	Assessment for cost of plates, ex- tended banks.	Assessment for exam- iners' fees (sec. 5240, R. S.).	Total.

Formerly national banking associations were required to pay a separate tax on both capital and deposits. The act approved March 3, 1883, abated all taxes except that on circulation.

The total tax collected from the national banks up to July 1, 1891, amounted to \$7,855,887.74 on capital, \$60,940,067.16 on deposits, and \$71,339,125.04 on circulation, making a total of \$140,135,079.94.

LOANS.

The following table gives a classification of the loans of the national banks in each of the central reserve cities of New York, Chicago, and St. Louis, in other reserve cities classified in groups, and in the rest of the country at nearly the same dates in each of the last five years:

In the preceding tables the specie held represents the aggregate of gold and silver coin, Treasurer's certificates, and clearing house gold certificates. A table will be found in the Appendix,* page 148, showing the amount of each kind of coin and certificates held by the banks in each State and reserve city in October, 1888, September, 1889, October, 1890, and September, 1891.

FAILED BANKS.

Twenty-five national banks, with an aggregate capital of \$3,662,000, were placed in the hands of receivers during the year, as shown in the following statement. In one case creditors have received 55 per cent of the principal, in another 45 per cent, in three cases 20 per cent, and in three cases 15 per cent.

^{*} See foot note, p. 337.

CAUSES OF FAILURE.

The First National Bank of Meade Center, Kans., closed its doors October 17, 1890, being unable to satisfy demand liabilities presented for payment.

Injudicious loans had been made which were not readily convertible, and a sudden demand for the payment of a county deposit precipitated

suspension. The remote causes of failure were negligence of directors, general stagnation of business, and decrease in values, resulting from

continuous failure of crops.

The First National Bank of Alma, Kans., for several months prior to suspension of business had received more than ordinary attention from the national bank examiner, two examinations having been made within a period of six months. The president of the bank was accused of borrowing money on the strength of the bank's indorsement for personal use and investment in private enterprises, and of issuing certificates of deposit in blank sums to be sold under contract by outside parties. Judgments were resting against the president individually, and judgment had been obtained against the bank by a correspondent, the sheriff levying upon the real and personal property. The amount of demand liabilities was very small and voluntary liquidation was contemplated, but an examiner, who visited the bank with special instructions, closed the doors on November 10, 1890, after due examination.

The First National Bank of Belleville, Kans., closed its doors Decem-

ber 2, 1890.

The president was a large borrower, and used the bank for individual purposes. The banking house was destroyed by fire October 28, and from that date deposits gradually diminished, seriously limiting the business of the bank. The president was active in promoting local enterprises, some of which were total failures, and there was no return from investments.

The creditors have been paid 55 per cent on the principal of claims

proved.

The American National Bank of Arkansas City, Kans., closed its doors

December 8, 1890.

The condition of affairs was complicated. The officers of the bank had used assets to further personal interests, and created large and excessive loans. The immediate cause of suspension was inability to pay a demand certificate of deposit. There was an unwarranted extension of business in attempting to sustain enterprises in which the officers were interested, and large sums of money were borrowed upon certificates of deposit at high rates of interest. Dividends were paid to shareholders not justified by the earnings of the bank, and the directors were guilty of gross inattention to duty, disregard of the law and advice from the Comptroller.

Dividends have been paid amounting to 20 per cent on the principal of claims proved, and the assets may prove to be sufficient for payment

in full.

The Spokane National Bank of Spokane Falls, Wash., closed its doors

December 18, 1890.

The entire management of affairs was committed to the cashier and the vice-president, who were the moving spirits in speculative enterprises, which were carried on without interference or control by the directors, the latter never giving the bank any attention, but lending their names in support of the reckless operations of the cashier. About one-half of the deposits were locked up in private banks and mining interests. This condition of affairs made it impossible for the bank to meet its demand obligations, and was the immediate cause of suspension.

A dividend of 15 per cent has been paid to creditors on the prin-

cipal of claims proved.

The City National Bank of Hastings, Nebr., closed its doors Decem-

ber 27, 1890.

On October 17 an assessment upon the shareholders, amounting to

50 per cent of the capital stock, was levied by the Comptroller, and remained unpaid. The examiner upon taking charge discovered the fact that more than one-half of an increase of capital certified to the Comptroller as having been paid in, and authorized by him in accordance with law, was represented by the notes of subscribers, the obligations remaining unpaid at date of suspension.

Notes had been rediscounted for persons to whom the president had transferred real estate at fictitious values. High rates of interest were paid on certificates of deposit and bills payable to non-resident capitalists for several years prior to the suspension, and dividends not earned were declared and paid to shareholders. The board of directors was inattentive to duty, which made reckless mismanagement possible.

A dividend of 15 per cent has been paid to creditors on the prin-

cipal of claims proved.

The People's National Bank of Fayetteville, N. C., closed its doors December 31, 1890, the immediate cause being a slight run by depositors. 'The condition of affairs, as reported by the examiner upon taking charge, showed gross irregularities by the president and criminal violation of law. As a critical examination progressed, it was found that the bank had been practically insolvent for many years, the Comptroller and the examiners having been deceived through systematic and successful attempts to carry among the assets a large amount of notes and bills as alive and secured which were in fact past due and worthless.

The president was permitted to abstract funds of the bank upon the indorsement of notes taken by him in connection with an outside enterprise, and which were represented as being secured by chattel mortgage. Fictitious drafts were drawn and carried by the bank as bills of exchange. The president was thoroughly dishonest; but, because the directors and other officers either did not know their duties or utterly failed to perform them, he was enabled to completely wreck the bank.

All the facts were promptly reported to the United States district attorney. The president was arrested, but the grand jury failed to

find an indictment.

A dividend of 20 per cent has been paid to creditors on the principal

of claims proved.

The First National Bank of Ellsworth, Kans., closed its doors January Suspension was inevitable as the result of injudicious and reckless loans to the cashier and his friends, the funds being used and lost in speculation. A dividend of 15 per cent has been paid to cred-

itors on the principal of claims proved.

The Pratt County National Bank, of Pratt, Kans., closed its doors February 26, 1891. The president was a large borrower and a wild The bank was compelled to take mortgages to secure his indebtedness, which were not valuable as live assets, the aggregate amount representing more than one-half of the capital of the bank. The bank also suffered large losses in the earlier period of its existence, but the management undertook to conduct a successful business by borrowing on bills payable and bills receivable and paying excessive rates of interest on deposits. Upon sudden demand for the payment of the deposit of the county treasurer, the bank was forced to suspend.

A dividend of 20 per cent has been paid to creditors on the principal

of claims proved.

The Second National Bank of McPherson, Kans., closed its doors March 2, 1891. The failure of this bank was due to the reckless management of its president, who squandered the assets. When the bank suspended he committed suicide.

The Keystone National Bank of Philadelphia, Pa., was closed to business on the morning of March 20, 1891, by order of the Comptroller

of the Currency, the examiner immediately taking charge.

An assessment upon the shareholders had been previously levied to make good an impairment of the capital, as such impairment was then estimated. The assessment was not responded to by the shareholders, and upon disclosures made by the president of the bank in person to the Comptroller, on the evening of March 19, immediate action was taken and the bank was closed. According to the records of the bank as then disclosed, the capital had not been entirely lost, but subsequent investigation developed the fact that collusion among the officers and employés had resulted in successfully deceiving the examiner and the Comptroller with respect to the true condition of the bank.

The causes of the failure were reckless and criminal use of funds belonging to the bank, the bookkeeper having aided the president, who is a fugitive from justice, in deceiving the examiner by false entries, such entries being made at or about the dates of examination. This bookkeeper, after the suspension, admitted his guilt, and was arrested, brought to trial, and sentenced to imprisonment for a term of seven years. Subsequently three other persons connected with the bank were arrested upon information and are now held under bail for col-

lusion.

A thorough investigation has progressed since the date of suspension, for the purpose of ascertaining all the facts and fixing personal liability. The city treasurer of Philadelphia appeared to be a large creditor, and permission was granted State and city authorities to investigate the records of the bank for the purpose of ascertaining the precise facts.

The Treasury Department also instituted an investigation of all the records of the bank, with the view of ascertaining who is liable, crimi-

nally or otherwise, for the failure, which is still in progress.

The Spring Garden National Bank of Philadelphia, Pa., closed its doors on the morning of May 8, 1891, being unable to settle with the clearing house. This suspension closely followed that of the Keystone National Bank, and as investigation proceeded it became evident that there had been criminal violations of law. On May 28 the president and cashier were arrested upon information and brought to trial. They were found guilty and relegated to the penitentiary for a term of ten

vears each.

The First National Bank of Red Cloud, Nebr., was closed by the examiner May 22, 1891, payment of a certificate of deposit having been refused, and in obedience to telegraphic instructions from the Comptroller. Upon investigation it was discovered that the bank had been in an insolvent condition for a considerable period of time, such condition having been caused by irregularities of former officers and general mismanagement. No meeting of the shareholders had apparently been held for more than two years, and the officers and employés immediately in charge were permitted to conduct its affairs. The funds of the bank were largely loaned to its officers and their relatives, the loans not being properly secured.

loans not being properly secured.

The National City Bank of Marshall, Mich., closed its doors June 3, 1891. On June 2 the Comptroller was advised that the assistant cashier had embezzled a large sum of money, but that the bondsmen were able and willing to make good the entire loss without delay.

The cashier was very inattentive to duty, and the directors, having unbounded confidence in the integrity of the employés, grossly neglected the interests of the bank. As investigation proceeded the embezzlement was found to equal the entire capital stock. On May 27 the examiner discovered the defalcation and informed the directors, but as the bank was still considered solvent, no action was taken to secure arrest, and the embezzler escaped before the doors were closed and the examiner took charge.

A dividend of 50 per cent has been paid to creditors upon the prin-

cipal of claims proved.

The Red Cloud National Bank of Red Cloud, Nebr., was closed by order of the Comptroller June 26, 1891. All of its capital was represented by unconvertible securities, and the funds of the bank had been invested in local enterprises, at great loss.

The condition of the bank was due to bad management and a total

disregard of sound banking principles.

The Asbury Park National Bank of Asbury Park, N. J., was closed by order of the Comptroller July 1, 1891. During the period of the bank's existence a sufficient amount of individual deposits were not obtained to make a profitable business. A large and costly building was constructed, and as an asset was not consistent with the volume of business. The president borrowed large sums, bad loans were made, and excessive interest was paid. Expenditures and losses were in excess of earnings, the directors were negligent of duty, and false statements of condition were made. The public and correspondent banks lost confidence and suspension became inevitable.

The Central Nebraska National Bank of Broken Bow, Nebr., was closed by the examiner on the morning of June 12, 1891, upon receipt of instructions from the Comptroller. The immediate and remote causes for this action were the heavy loans made to individual directors, aggregating three-fifths of the capital of the bank, and the heavy loss sustained upon bills receivable, which had been foisted upon the bank through questionable methods adopted by the officers in endeavoring to aid outside enterprises wholly foreign to the locality. Large sums of money were borrowed at high rates of interest, for which nearly all

of the good paper of the bank had been pledged as security.

The Florence National Bank of Florence, Ala., closed its doors June 22, 1891, the entire capital having been lost. The former president had absolute control, improperly used the funds of the bank to sustain outside enterprises, and was forced to resign; but his management had placed the bank in a position from which it could not recover. The suspension of the bank was precipitated by the protest of drafts aggregating an inconsiderable amount drawn upon a correspondent bank.

The Ninth National Bank of Dallas, Tex., was closed by the examiner July 1, 1891, upon receipt of telegraphic instructions from the Comptroller. The bank commenced business in September, 1890, and was controlled by the cashier, who had previously become indebted for a large amount to another national bank, of which he was an officer, and funds of the Ninth National Bank were used to liquidate his indebtedness. The directors held meetings only on call, and were not attentive to duty. A large proportion of the loans were made to irresponsible parties without sufficient security, and the proceeds were subrogated to the uses of the cashier. A new management was effected, but the capital had become so impaired that suspension was inevitable. After the examiner took charge an attempt was made to control sufficient funds

for the payment of creditors in full, so that the bank might be placed in voluntary liquidation, but the effort did not succeed. From the records it would appear that the failure was almost entirely due to the

wild speculations and dishonest practices of the cashier.

The First National Bank of Kansas City, Kans., closed its doors July 16, 1891, upon demand for the payment of the city deposit. A former president, in conjunction with the vice-president, were active speculators in real estate and the promoters of outside enterprises. These officers, and other real estate dealers, became indebted to the bank for large sums, and when a reaction from abnormally high prices resulting from a so-called "boom" occurred, were unable to meet their obligations or secure them with convertible collaterals. Settlements were forced upon the bank by transfers of real estate, to such an extent that the assets were tainted with a doubtful or worthless character. The credit of the bank having become impaired, confidence was destroyed, and stringency in the money market caused a withdrawal of deposits. The bank was unable to borrow from correspondents, not being able to pledge sufficient security, and finally could not meet demand obligations.

The First National Bank of Palatka, Fla., closed its doors July 17, 1891. The president was connected with a city banking institution which failed. Public confidence was destroyed, which resulted in a considerable withdrawal of deposits. A large amount of stock, bonds, and real estate mortgages were among the assets, which at date of suspension represented a large loss. Serious depreciation of values and stagnation of business were general in the locality. Formerly, the management having been left entirely to the president, loans and investments were made in outside enterprises, dependent wholly upon the duration of exceptional local prosperity. The president and his relatives were large borrowers, and invested the funds in sustaining local schemes. Finally the bank was unable to borrow from correspondents, or rediscount paper, and could not meet demand obligations.

The Farley National Bank of Montgomery, Ala., closed its doors August 21, 1891. The immediate cause of the suspension was the protest of drafts, aggregating in amount a sum greater than the capital of the bank, which had been cashed in the interests of a railroad company, collateral security being held, but not readily convertible. Efforts are being made to realize upon the security, so that the bank may resume

business.

The Rio Grande National Bank of Laredo, Tex., was closed by examiner upon receipt of instructions from the Comptroller September 14, 1891. The principal cause of failure was the use of the bank's funds in sustaining an improvement company which owned a large area of land in the locality. The bank was doing no business, its capital was seriously impaired, and its resources locked up in unconvertible securities. The depositors were few; the aggregate amount due was insig-

nificant, and there was no money in the bank to loan.

The First National Bank of Coldwater, Kans., was closed by a national bank examiner, upon receipt of instructions from the Comptroller, September 21, 1891. An assessment upon the capital had been made, but the shareholders did not respond. Former officers of the bank were reckless speculators in real estate, and failed, owing the bank large amounts. Their successors were large borrowers for similar purposes. The general causes which resulted in suspension were bad and careless management and indifference to duty on the part of the directors, who left the management entirely in the hands of the cashier. A movement

to raise sufficient funds to pay creditors in full, so that the bank might

be placed in voluntary liquidation, was abandoned.

The First National Bank of Clearfield, Pa., closed its doors September 29, 1891. The entire capital had been lost. The management of the bank rested wholly with the president, who had large interests in outside enterprises and a State bank, using the national bank for individual purposes. Excessive loans were made in sustaining outside deals. Good assets were systematically abstracted, and worthless assets substituted. Loans not represented by the obligations of firms and companies in some form or other, in which the president was interested, were based upon accommodation paper. Large loans were floated, represented by paper made by persons and firms of doubtful The bank acquired control of a mill property, which locked up large sums of money in the purchase and operation, and was a losing investment. The directors were either negligent or guilty of collusion. The irregularities already discovered strongly indicate fraudulent and gross violations of law. The president was promptly arrested and held for trial.

The Washington National Bank of New York City was organized June 5, 1890, with a capital of \$300,000. Injudicious loans were made, and the capital became seriously impaired. The doors were closed to business March 24, 1891, but the assets being sufficient to pay all liabilities, the bank was permitted to go into voluntary liquidation.

The Newton National Bank of Newton, Kans., closed its doors November 20, 1890. A few months prior to this date an increase of capital stock had been approved by the Comptroller, the affairs of the bank, according to reports, being in good condition. A considerable number of shares of stock were owned by non-residents, who regarded the investment as secure without inquiry as to the conduct of the bank with respect to its management.

After suspension the fact was developed that most of the increase had been collected prior to authorization by the Comptroller, and was represented substantially by loans made to a bank in Guthrie, Okla., which had failed. The cashier of this bank was the cashier of the Newton National Bank and co-manager. The management of the Newton National Bank practically rested with the vice-president and cashier.

Only one-third of the capital stock was held by local shareholders, so that unusual facilities were afforded these officers for using the funds of the bank uncontrolled, as they owned about two-thirds of the stock locally held. The officers borrowed largely from the bank, and pledged a majority of the good bills as collateral security for rediscounts. The Eastern shareholders were prompt in taking steps looking to a repairment of the capital, and their efforts resulted in a deposit of sufficient fresh capital in cash to place the bank upon a solvent footing. The receiver was withdrawn, and the bank was permitted to resume business July 1, 1891.

The Farmers and Merchants' National Bank of Clarksville, Tenn., closed its doors December 10, 1890, on account of the embarrassment created by the failure of a private bank and firms indebted to it in large sums. Reports indicated that the embarrassment was temporary, and immediate steps were taken by the shareholders to repair the capital, so that, if permitted, the bank might resume business. Their efforts were successful, a voluntary assessment was levied and paid, bad debts were charged off, and as a result there became available funds sufficient to pay all liabilities, leaving the capital intact. The bank was permitted to resume business April 20, 1891.

The affairs of three national banks have been closed during the past year and final dividends have been paid to their creditors.

Name and location of bank.	Date of appointment of receiver.	Total divi- dends on principal.	Proportion of interest paid.
State National Bank, Raleigh, N. C. National Bank of Sumter, S. C Lancaster National Bank, Clinton, Mass.	Mar. 31, 1888 Aug. 24, 1887 Jan. 20, 1886	Per cent. 53 100 100	Per cent.

Out of 4,648 national banks organized since February, 1863, only 164, or about 3.53 per cent, have been placed in the hands of receivers; this includes 9 which had been previously placed in liquidation by the shareholders, but upon their failing to pay depositors the Comptroller appointed receivers to wind up their affairs. Of the 164 failed banks, 35 have paid creditors in full, principal and interest, 6 have paid principal and a part of the interest, and 12 have paid the principal only. The affairs of 102 of the 164 banks have been finally closed, leaving 62 in process of settlement, of which 15 are virtually closed, with the exception of pending litigation, leaving 47 receiverships in active operation.

The total amount so far paid to creditors of insolvent national banks has been \$38,629,123, upon proved claims amounting to \$57,792,028. The amount paid during the year has been \$1,725,883, besides \$15,903 paid for dividends declared prior to November 1, 1890, on claims proved since that date. Assessments amounting to \$15,173,050 have been made upon shareholders of insolvent national banks under section 5151 of the Revised Statutes of the United States. From this source the gross collections amount to \$6,621,409, of which there has been received during the past year \$257,734. Suits are pending in some cases.

In the Appendix,* page 208, a table will be found showing, under various heads, amounts collected from the assets of each of the 164 insolvent national banks, the amounts disbursed, and the purpose. All moneys and assets are accounted for, and the figures supply all information necessary to the ascertainment of percentages and loss.

^{*} See foot note, p. 337.

INACTIVE RECEIVERSHIPS.

Fifteen banks remain in the hands of receivers, the affairs of which are practically wound up, and the trusts are kept on the inactive list because of pending litigation or of the possession of assets, an immediate disposition of which would entail unnecessary sacrifice. The expenses of a trust in this condition are nominal and limited to what is actually necessary to proper and careful attention to the matters in abeyance. Titles to property pass through a receiver and the courts, but final dividends are sometimes paid from the office of the Comptroller, especially in the event of a considerable lapse of time after a receiver has realized upon all available assets.

By comparison with the report of 1890 it will be observed that only one of the banks then reported on the inactive list has been stricken out. It is expected that the unsettled affairs of most of those in the list will be disposed of within the next year and the receiverships

formally terminated.

The following is a list of receiverships in an inactive condition:

BANKS IN VOLUNTARY LIQUIDATION.

National banks complying with United States statutes are permitted to go into voluntary liquidation, and in some instances, when affairs

^{*}Forty-four of these have been reorganized.

nave been partially closed, the Comptroller has been requested to permit resumption of business, the same title and charter number being retained. The reasons for such requests are generally based upon an unexpected appreciation in the value of assets, a desire to avoid sacrifices seemingly unnecessary, a change of management found to be important, and a desire to retain the title for its business value.

The Supreme Court of the United States has held that a national bank in voluntary liquidation is not dissolved as a corporation, and may bring suit or defend for the purpose of winding up its business (Bank vs. Insurance Company, 104 U. S., 54), and section 7 of the act ap-

proved July 12, 1882, provides:

That national banking associations whose corporate existence has expired or shall hereafter expire, and which do not avail themselves of the provisions of this act, shall be required to comply with the provisions of sections 5221 and 5222 of the Revised Statutes in the same manner as if the shareholders had voted to go into liquidation, as provided in section 5220 of the Revised Statutes; and the provisions of sections 5224 and 5225 of the Revised Statutes shall also be applicable to such associations, except as modified by this act; and the franchise of such associations is hereby extended for the sole purpose of liquidating their affairs until such affairs are finally closed.

It has been held by the courts that under act of Congress approved July 12, 1882, extending for the purpose of liquidation the franchises of such national banking associations as do not request an extension of their corporate existence, and making applicable to them the statutes relating to the liquidation of similar banking associations, the shareholders may continue to elect officers and directors for the purpose of effecting liquidation. In the case referred to, the court held that the right to elect directors and such other officers as are usually chosen by a business corporation is a part of the corporate franchise, and that when the franchise is extended, although for a limited purpose, the corporation may exercise all the powers originally conferred upon it which are appropriate for that purpose, among which is the election of directors, the right to manage its own affairs belonging to the bank through the shareholders, and not to those who by accident are found to be directors in possession.

In 1368 the question arose as to whether the Comptroller of the Currency had authority to permit a national bank in voluntary liquidation to resume all its corporate powers, the request having been made by a bank which had been, permitted to go into voluntary liquidation, the shareholders having rescinded a former resolution, and requesting leave to withdraw notice to the Comptroller of a desire to liquidate the affairs of the bank. The matter was referred to the Department of Justice, and the opinion was rendered that resumption of business under such circumstances would involve too many grave consequences to admit of the supposition that such an event was contemplated by Congress, or

that it was consistent with the law.

It has been strongly urged, however, that inasmuch as the association does not lose its corporate entity prior to a disposition of the last remaining asset, title and charter number having been preserved, and the association having been inactive as to new business only, retroactive action by shareholders owning two thirds of the stock, relative to resumption of business, should be equally potential with the original resolution as to voluntary liquidation, inasmuch as the Comptroller is not inhibited by the law from taking cognizance of such action.

By reference to the statute above quoted it will be seen that associtions which do not avail themselves of the provisions of the act for

FI 91----25

extension of corporate existence are required to comply with the provisions applicable to associations in voluntary liquidation consequent upon the action of shareholders, and that the franchises of the class first mentioned are extended for the *sole* purpose of liquidation. It seems improbable that Congress intended to make a distinction between associations in liquidation by reason of the action or non-action of shareholders, although in the first instance the language of the statute is that the association may be closed, and in the other it is more

clearly indicated that the association is to be closed.

Even if it could be conclusively shown that the Comptroller can legally permit a bank in voluntary liquidation to resume business, there would be insuperable objections to the exercise of such authority, arising out of a consideration of those principles which underlie a sound public policy with respect to the security of the depositors and creditors of national banks under existing law. Whenever depositors and creditors are paid in full, shareholders are released from the stock liability prescribed by section 5151 of the Revised Statutes; and, if the association should be resuscitated, by what process could this liability be reassumed or enforced? Furthermore, the convertible assets having been realized to liquidate indebtedness, the doubtful alone remain to represent the interests of shareholders, and as constituting a part of the capital would be a constant menace to the welfare of the association.

DIRECTORS.

All the powers of a national banking association are exercised through its board of directors. As a general rule it may be said that associations will prosper just in proportion as their directors are intelligent and faithful. The details of the business must of course be in charge of its officers, and the duty of selecting these is one of the greatest responsibilities devolved upon the board, for unless the active managers are skillful, honest, and attentive the affairs of the association can not prosper.

With the selection of a proper corps of officers the duties of the directors are well begun, but this is far from constituting all that is re-

quired of them.

A recent decision of the Supreme Court of the United States has attracted attention to the fact that the duties and responsibilities of directors of national banks are now ill defined. Without any purpose to enter into a discussion of the decision in the case mentioned (Briggs vs. Spaulding, et al), the Comptroller desires to say that legislation should make these duties so clear and unequivocal that no person of intelligence could plead ignorance of the requirements of the position.

National banks deriving their franchises from the General Government have in the past been conducted with conspicuous fidelity and have afforded unexampled security to those who have made them the depositary of their funds. While these facts are well known to all who have access to statistics upon the subject, there is still room for progress in the direction of security. No matter what safeguards are provided their enforcement must necessarily be committed to human agencies, and these are often unskillful and occasionally corrupt.

Experience shows that governmental supervision of national banks has been in the past of very great service in promoting safe and conservative banking, although its value is neither fully understood nor

Upon the directors, however, properly rests the responsibility of management, and any plan which contemplates relieving them in this respect is false in principle and will be found vicious in practice. Neither can they be safely permitted to delegate their powers and responsibilities to others, nor neglect them with impunity. If the provisions of existing law permit directors of national banks to escape liability for losses resulting from transactions forbidden by the national bank act by pleading ignorance of such transactions, while such ignorance is the result of neglect of the affairs of the associations committed to their charge, it will be useless to expect in the future any better results than have been experienced in the past. As a matter of fact the greatest difficulty experienced by the Comptroller in promoting the successful management of the associations coming under his supervision has resulted from his inability to inspire the directors of national banks with a proper realization of the duties which they owe to the shareholders whom they have consented to serve and the creditors whom they have engaged to protect. The greatest obstacles to be overcome are neglect and inattention. In far too many associations boards of directors never meet except upon the occasions when dividends are to be declared, and even this is sometimes unlawfully attempted without necessary action upon their part.

In other cases there is a disposition exhibited by directors to monopolize the loans and discounts of the bank, thus converting to their own use the funds of others entrusted to their keeping, thereby exposing the bank to losses by reason of want of proper distribution of its loans and subjecting to inconvenience those customers of the bank who are not favored with a place at the directors' table. Such inattention and selfishness are too often the characteristics of bank directors and are productive of serious consequences, but when accompanied, as they sometimes are, by lack of integrity the most direful results are realized.

In relation to no matter connected with the conduct of national banks is legislation more imperatively demanded than in making plain the

duties of those who accept the position of directors.

If to absent themselves from the bank and from the meetings of the board affords safe grounds of defense when it is sought to hold them accountable for losses which their presence and reasonable oversight would have prevented, then the public have been grossly deceived as to the measure of duty which shareholders and creditors may properly demand of officers to whom such important trusts have been committed. If the board of directors may safely neglect everything connected with the conduct of a bank except the election of officers and the declaration of dividends, then the law is greatly at fault. Such a complete abdication of powers ought not to go unrebuked and unpunished. All other saleguards will prove of little value if the chosen and only representatives of the shareholders may lawfully refuse and neglect to give the interests committed to their care such attention and supervision as successful proprietorship has at all times demanded.

LEGAL DECISIONS.

A digest of the most prominent national bank cases will be found in the Appendix,* page 91, decisions by the courts having been added from year to year. This digest is intended to furnish the management of national banks with a convenient source of reference and to accommodate

^{*} See foot note, p. 337.

the general public, much correspondence with the office being thus avoided which would otherwise be necessary.

A very important case was decided by the Supreme Court of the United States during the last term affecting the liability of directors of national banks with respect to negligence and inattention to duty.

TRANSACTIONS OF THE NEW YORK AND OTHER CLEARING-HOUSE ASSOCIATIONS.

The present membership of the New York Clearing-House Association comprises 45 national banks, 18 State banks, and the subtreasury at New York; sixty-four members in all. There are 50 national and 44 State banks in New York City, and 5 national and 26 State banks not being members, clear through other banks which are members of the association.

The following information with respect to the operations of the clearing-house associations in the United States has been kindly furnished, upon request, by Mr. W. A. Camp, manager of the Clearing-House Association at New York City:

Comparative Statement for Two Years of the Transactions of the New York Clearing-House, Showing Aggregate Amount of Clearings, Aggregate Balances, and the Kinds-and Amounts of Money Passing in Settlement of these Balances.

The following table shows the transactions of the clearing houses located in forty-seven cities for the year ended September 30, 1891, from official returns received from the manager of the New York Clearing-House Association, comparisons being made with the year ended September 30, 1890, the increase or decrease in the exchanges being indicated. Similar information with respect to balances was not obtainable:

COMPARATIVE STATEMENT OF THE EXCHANGES OF THE CLEARING HOUSES OF THE UNITED STATES FOR THE YEARS ENDED SEPTEMBER 30, 1891, AND SEPTEMBER 30, 1890.

It will be observed that as compared with the previous year there was a decrease in the volume of exchanges amounting to over \$3,000,000,000, and that nearly the whole of such decrease occurred in the three principal eastern cities. The exchanges in New York amounted to about 60 per cent of the whole sum for the United States.

A table will be found on page 171 of the Appendix,* compiled from returns made to the Clearing House by the national banks in New York City, exhibiting the movement of their reserve, weekly, during October, for the last fifteen years.

STATE, SAVINGS, PRIVATE BANKS, LOAN AND TRUST COMPANIES.

In addition to reporting the condition of associations organized under national authority, the law provides that the Comptroller of the Currency shall procure and publish in his annual report to Congress statements exhibiting the condition of banks, banking companies, and savings banks organized under State and Territorial laws; and through the courtesy of public officials, in all but 18 of the States and Territories, this Bureau has been favored with statements of condition of such banking institutions. It has been the custom for the past few years to add to information of that character similar returns from banks in States in which examinations are not authorized by law and reports of condition exacted. Such information is procured through direct correspondence with each bank and banker, over 5,500 having been requested to furnish statements for this report.

While there is an apparent reluctance upon the part of proprietors of private banks to submit reports of their condition, officers of incorporated institutions report so generally that the returns herewith given represent over 93 per cent of these institutious stated to be in operation, and unquestionably a larger percentage of their total banking resources. During the year ended January 1, 1891, there was an increase of 606 over the prior year in number of banks organized, and an increase of 583 in the number from which reports have been received this year, indicating that the field is practically covered by the returns herewith published. Deviating in a measure from the plan of tabulating these reports as heretofore given (official and unofficial returns having been abstracted and compiled separately), it has been deemed best to consolidate all reports of each class of banks by States, simply indicating official and unofficial returns by proper references.

Including reports made by private banks and bankers, statements representing the resources and liabilities of 4,989 incorporated and private banking institutions have been received, the aggregate resources amounting to \$3,448,785,431, the principal items of assets being \$805,901,113, loans on real estate; \$413,938,942 on collateral security other than real estate; \$840,567,612 other loans and discounts; \$157,933,522 United States bonds; \$327,172,153 State, county, and municipal bonds; \$384,888,905 railroad, bank, and other stocks and bonds; \$212,520,844 due from banks and bankers; \$85,804,914 real estate, etc.; \$165,634,081 cash on hand. The aggregate capital employed amounts to \$356,749,315; surplus and undivided profits, \$304,624,493; deposits, \$2,661,752,961.

Of the 4,989 reports, 2,572 are made by commercial institutions, classified in this compilation, as State banks, having an aggregate capital of \$208,564,841; surplus and undivided profits, \$81,116,533; deposits, \$556,637,012.

Reports from 171 loan and trust companies show their aggregate resources to be \$536,628,202. The capital of these companies is \$79,-292,889; surplus and undivided profits, \$55,503,845; and deposits, \$355,330,080.

Especial interest attaches to the operations and condition of savings banks, the repositories of the accumulations of the wage-earners, in view of the extent of the obligations of these institutions and partic-

^{*} See foot note, p. 337.

ularly as their deposits represent nearly 90 per cent of their entire liabilities. Including the 364 stock savings banks, reports of condition have been received from 1,011 savings banks and savings institutions. Of the 647 non-capitalized institutions, classed as mutual, all but 11 are located in the New England and Middle States, while of those with capital but 28 are to be found in that section, the remainder, 336, being in the Southern and Western States and Territories.

The aggregate resources of all savings banks amount to \$1,854,517,069, of which loans on real estate amount to \$687,583,977; loans on collateral security other than real estate, \$93,679,153; and other loans and discounts, \$198,134,045. The following figures represent their investments in bonds, stocks, etc.: In United States bonds, \$139,267,045; State, county, and municipal bonds, \$320,278,708; in all other bonds and stock, \$268,994,583. The amount invested in real estate is \$30,438,232, and the funds with other banks and cash on hand, \$70,660,882 and \$29,720,473, respectively. Of the liabilities of these 1,011 institutions, \$32,106,127 represents their capital, \$155,857,493 surplus and undivided profits, \$1,623,079,749 savings deposits, and \$31,746,393 other deposits. The interest paid by mutual institutions ranges from 2 to 4 per cent, and by stock savings banks from 2 to 6 per cent, the average rate paid by the latter slightly exceeding, apparently, the rate paid by mutual institutions, while the deposits held by the mutuals are about 75 per cent of the total deposits in both classes.

Of the 2,500 reports of condition made to this Bureau directly, 1,235 were submitted by private banks and bankers, having an aggregate capital of \$36,785,458; surplus and undivided profits, \$12,146,622; deposits, \$94,959,727.

The distribution of the circulating medium of the country as shown by the cash holdings of national and other banks on or about the close of the fiscal year ended June 30, 1891, is exhibited in the following table.

The total cash on hand held by banks other than national, 4,989 in number, was \$165,634,081, of which \$8,883,552, was gold, \$1,939,647 silver, \$45,456,720 paper currency, \$15,713,390 specie not classified, and \$93.640,772 cash not classified. The total amount held by national and other banks was \$479,085,588.

In the Appendix,* p. 236, tables will be found showing by States and Territories the condition of banks other than national, as obtained from both official and unofficial sources; aggregate resources and liabilities of each class; comparative statements of condition of State banks, 1872 to 1891; loan and trust companies, 1886–'87 to 1890-'91; savings banks, 1886-'87 to 1890-'91; private banks, 1887-'91; deposits in savings banks, number of depositors and average amount due each, by States, in 1889-'90 and 1890-'91; and a summary of condition of the chartered banks in the Dominion of Canada. On page 234 of the Appendix* will be found a table showing by States and Territories the estimated population of each on June 1, 1891, based on thece ensus of 1890, and the aggregate capital, surplus, undivided profits, and individual deposits of national and State banks, loan and trust companies, and savings and

^{*} See foot note, p. 337.

private banks of the United States at date of reports of the various classes, nearest thereto, the average of these per capita and the per capita average of such resources in each class of banks. It appears that the population of the country on the date in question was 64,156,300, and the total banking funds \$5,840,438,191, an average of \$91.03. The per capita averages of such resources in each class of banks are: National banks, \$39.32; State banks, \$13.13; loan and trust companies, \$7.63; savings banks, \$28.72; and private banks, \$2.23.

LOAN AND TRUST COMPANIES IN THE DISTRICT OF COLUMBIA.

During the first session of the Fifty-first Congress an act passed entitled, "An act to provide for the incorporation of trust, loan, mortgage, and certain other corporations within the District of Columbia." This act was approved on the 1st day of October, 1890. Under its provisions companies can be formed for the purpose of carrying on within the District of Columbia any one of the three classes of business specified as follows:

Rirst. A safe deposit, trust, loan, and mortgage business. Second. A title insurance, loan, and mortgage business.

Third. A security, guaranty, indemnity, loan, and mortgage business. It is further provided that the capital stock of said companies shall not be less than \$1,000,000, and that any of these companies may conduct a storage business when its capital stock amounts to the sum of not less than \$1,200,000.

Two methods are provided whereby companies may come under the

provisions of the act.

(1) By an association of not less than twenty-five natural persons to form a company, which shall receive its original charter from the Commissioners of the District of Columbia and thereby become a body corporate and politic, and as such vested with all the powers and charged with all the liabilities conferred and imposed by the act upon companies organized under the provisions thereof.

(2) Provision is made that any safe deposit company, trust company, surety or guaranty company, or title insurance company, incorporated and operating under the laws of the United States or the District of Columbia, or of any of the States, and doing business in said District at the time of the passage of said act, may avail itself of the provisions

of the act.

No charters have been issued by the Commissioners of the District of Columbia to corporations formed by the association of natural persons under the first method provided for in the act, but three companies, incorporated previous to the passage of the act and at that time doing business in said District, have availed themselves of its provisions, to wit: The American Security and Trust Company, the Washington Loan

and Trust Company, and the National Safe Deposit Company.

The American Security and Trust Company was originally chartered under the laws of the State of Virginia, on the 12th day of October, 1889, with a capital stock of \$1,250,000, divided into shares of the par value of \$100 each. This company executed a certificate of its intention to avail itself of the provisions of the act of Congress, on the 11th day of November, 1890, and filed the same with the Comptroller of the Currency. It having complied with all the provisions of law applicable thereto, on the 17th of November, 1890, the Comptroller issued to said company the certificate contemplated by section 5 of the act approved October 1, 1890, and the company has since that date been operating under its provisions.

The Washington Loan and Trust Company was incorporated under the laws of the State of West Virginia on the 15th day of August, 1889. This company has a capital of \$1,000,000, divided into shares of \$100 each, and was doing business in the District of Columbia at the date of the passage of the act of Congress above referred to. It having filed with the Comptroller of the Currency a certificate of its intention to avail itself of the provisions of the act aforesaid and having complied with the other requirements of the act, the Comptroller issued to said company, on the 13th day of December, 1890, a certificate that it was

entitled to transact the business of a trust company.

The National Safe Deposit Company of Washington was at the date of the passage of the act of Congress first above mentioned doing business in the District of Columbia as a safe deposit company, incorporated by act of Congress approved January 22, 1867. On the 17th of March, 1891, this company executed a certificate of its intention to avail itself of the provisions of the act of Congress approved October 1, 1890. It having complied with the provisions of law, the Comptroller issued to said company, on the 3d day of April, 1891, the certificate contemplated by the provisions of section 5 of said act, under which it was authorized to enter upon the business of a trust company. It also has a capital of

\$1,000,000.

Each of these companies has declared its intention to avail itself of the provisions of the act of Congress aforesaid for the purpose of carrying on the kind or class of business described in subdivision 1 of section 1 of said act; that is to say, a safe deposit, trust, loan, and mortgage business, in addition to the powers lawfully exercised at the time they severally came under the operations of the act of Congress above Each of these companies has also deposited with the Comptroller of the Currency securities equal in actual value to onefourth of the capital stock paid in, and is therefore entitled to become and act as administrator, executor, guardian of the estate of a minor, or undertake any other kindred fiduciary duty authorized by the act. One, the American Security and Trust Company, is also authorized to do a storage business, in accordance with the second proviso to the third paragraph of section 1 of the act above referred to.

These several companies have each been duly examined, and have made and published reports of condition from time to time as contemplated by the provisions of sections 5211, 5212, and 5213 of the Revised Statutes of the United States. A statement of condition at date of last

report will be found in the Appendix,* pages 251-253.

Aside from associations formed under the national bank act and those above enumerated, only one other corporation located in the District of Columbia comes in any manner under the supervision of the

Comptroller of the Currency.

The institution herein referred to is the National Savings Bank of the District of Columbia. This institution was chartered May 24, 1870, and has since been in operation. It is now, however, practically in process of liquidation, its business being gradually transferred to and absorbed by the National Safe Deposit Company, above referred to. A report of its condition on the 25th of September is published in the Appendix,* page 250, which will show its condition at that time. It is understood to be the purpose of the directors of this bank to complete the transfer of its business to the National Safe Deposit Company and to finally close its affairs at the earliest practicable date.

^{*} See foot note, p. 337.

CONCLUSION.

During the year covered by the report the country has been passing through a financial crisis, unique in its character but of great severity. In no country are the conditions more favorable to the success of well directed enterprise than in this, and in none can the speculative operator find a more tempting and fruitful field. These conditions necessarily tend toward overtrading and undue expansion of credits, and these in due time result in collapse and general financial distress.

Although periods of business disaster follow each other at reasonably well-defined intervals, the multitude, oblivious of the past, are always taken unawares. Those charged with the management of national banks are not free from the optimistic spirit which characterizes their fellows, and hence the associations under their control invariably suffer whenever these periods of depression recur. The failures witnessed during the year just closed exemplify the operations of the forces to

which allusion is made.

Whenever we consider the immense shrinkage of values which the liquidations of the past twelve months involves, we are surprised that the associations constituting the national system have not suffered more severely. The growth of this system in recent years must not be overlooked when we are called upon to consider the degree of success that

has attended its operations.

It is rapidly becoming popularized and for that reason more intimately connected with the business enterprises of the common people, reflecting with increasing faithfulness the degree of success or failure that attends their various commercial and industrial pursuits. So long as banking remains free, associations will be formed by inexperienced men whose management will sometimes prove unskillful and disastrous. So long as dishonest men exist banks must not expect to entirely escape the defalcations and embezzlements which occasionally startle the public. Failures are inevitable under any system which stops short of governmental guaranty, and the latter is, of course, impracticable. That system, then, is best, all else being equal, which is found upon trial to exhibit the minimum of failures. In this respect, the national system stands unapproached and indisputably superior to all which have preceded it. It is confidently hoped therefore that such measures will be taken by Congress as will serve to perfect a system which has proved so effective in the past, and which is so necessary to the future welfare of the people.

The Comptroller desires in closing to say that the past year has devolved upon the Currency Bureau an amount of labor and responsibility which is entirely unprecedented. To those associated with him in the conduct of the affairs of the Office he is greatly indebted for the intelligent and faithful service which has made it possible to meet these increased responsibilities. He also desires to gratefully acknowledge the valuable assistance rendered him by those charged with the preparation

of the statistical matter contained in this report.

EDWARD S. LACEY, Comptroller of the Currency.

The Speaker of the House of Representatives.

REPORT OF THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE, Washington, D. C., November 2, 1891.

SIR: In compliance with the instructions contained in your letter of September 2, 1891, I have the honor to submit the following report of the operations of the Bureau of Internal Revenue for the fiscal year ended June 30, 1891, together with certain additional information relating to the collections made and the work performed during the first three months of the current fiscal year.

The tables contained in the appendix* to the bound volume of this

report are printed in the following order:

Table A, showing the receipts from each specific source of internal revenue and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1891.

Table B, showing the number and value of stamps for special taxes, manufactured tobacco, snuff, cigars, cigarettes, distilled spirits, fortified sweet wine, fortified wine for export, fermented liquors, oleomargarine, and opium manufactured for smoking purposes; also the number and value of certificates of extension of special-tax stamps for May and June, 1891, and the number of the different kinds of certificates of registry; also the number and value of documentary stamps used for validating unstamped instruments, issued to collectors of internal revenue during the fiscal year ended June 30, 1891.

Table C, showing the percentages of receipts from the several general sources of internal revenue now taxable in each State and Territory of the United States to the aggregate receipts from the same sources, by

fiscal years, from July 1, 1863, to June 30, 1891.

Table D, showing the aggregate receipts of internal revenue in each collection district, State, and Territory of the United States, by fiscal

years, from September 1, 1862, to June 30, 1891.

Table E, showing the receipts from specific and general sources of internal revenue, by fiscal years, from September 1, 1862, to June 30, 1891.

Table F, showing the ratio of receipts from specific sources of internal revenue to the aggregate receipts of the same, by fiscal years, from July 1, 1863, to June 30, 1891.

Table G, showing the returns of distilled spirits, fermented liquors manufactured tobacco, snuff, cigars, and cigarettes, under the several

Digitized for FRASER

^{*} Omitted from this edition for want of space,

acts of legislation and by fiscal years, from September 1, 1862, to June 30, 1891; also statement of the production of distilled spirits and fermented liquors in the several States and Territories, by fiscal years, from July 1, 1877, to June 30, 1891.

Table H, showing the receipts from special taxes in the several States

and Territories for the fourteen months ended June 30, 1891.

Table I. Abstract of reports of district attorneys concerning suits and prosecutions under the internal-revenue laws during the fiscal year ended June 30, 1891.

Table K. Abstract of seizures of property for violation of internal-

revenue laws during the fiscal year ended June 30, 1891.

Table L, showing the collections, expenses, and percentage cost of collection in the several collection districts during the fiscal year ended June 30, 1891.

COLLECTIONS FOR THE CURRENT FISCAL YEAR.

I estimate that the receipts from all sources of internal revenue will

aggregate \$150,000,000 for the current fiscal year.

In order that the receipts shall reach this figure there will have to be a very considerable increase in the collections from distilled spirits, fermented liquors, and cigars. During the first six months of the current fiscal year there will be a decrease of about \$2,500,000 in the tax received from manufactured tobacco and snuff, as compared with the same period of the fiscal year ended June 30, 1890. In my last annual report I estimated that the reduction in the receipts from manufactured tobacco, for the six months ending June 30, 1891, would amount to \$2,290,685.17. The actual decrease was as follows:

One hundred and nineteen millions nine hundred and ninety-one thousand seven hundred and fifty-nine pounds of tobacco were tax-paid at 6 cents per pound from January 1, to June 30, 1891, upon which the

reduction of 2 cents per pound amounted to \$2,399,835.18.

I also estimated that the reduction in the receipts from snuff for the six months would be \$92,216.41, but 5,253,008 pounds of snuff were taxpaid at 6 cents per pound from January 1 to June 30, 1891, and the reduction of the tax upon this quantity from 8 to 6 cents per pound resulted in a decrease in the receipts from this source of revenue of \$105,060.16.

The aggregate decrease in the receipts from manufactured tobacco and snuff for the six months ended June 30, 1891, was \$2,504,895.34.

Taking these figures as a basis, it is probable that the reduction of the tax on manufactured tobacco and snuff from 8 to 6 cents per pound will decrease the receipts from this source about \$5,000,000 annually.

I also estimated in my last report that 500,000 gallons of grape brandy, free of tax, would be required to fortify sweet wines, under the provisions of the act of October 1, 1890. The vintage season had commenced, however, before the passage of that act, and the provisions of the law were not fully understood, so that the wine producers did not use as much grape brandy as was anticipated. The actual number of gallons of grape brandy used in the fortification of sweet wines during the fiscal year ended June 30, 1891, was 193,557, the tax upon which, at 90 cents per gallon, would have amounted to \$174,201.30.

It is probable that about double the above quantity of grape brandy will be used for the fortification of sweet wines during the current fiscal

year.

RECEIPTS FOR THE PAST SIX FISCAL YEARS.

Fiscal year ended—	
June 30, 1891	\$146, 035, 415, 97

COLLECTIONS FOR FISCAL YEAR ENDED JUNE 30, 1891.

In my last annual report I estimated that the receipts of this Bureau for the fiscal year ended June 30, 1891, would amount to the sum of \$145,000,000. It affords me pleasure to state that the actual receipts for the year named were \$146,035,415.97, exceeding my estimate in the sum of \$1,035,415.97.

The following statements exhibit in detail the amount of internal revenue collected during the fiscal year ended June 30, 1891, the source from which the revenue was derived, the total sum collected in each district, State, and Territory, the cost of collecting, etc:

Note.—The decrease in the receipts from snuff, chewing and smoking tobacco, is due to the reduction of the tax on the same, January 1, 1891, from 8 to 6 cents per pound. Special taxes relating to tobacco were repealed May 1, 1891. The act of October 1, 1890, provides that all special taxes shall become due on the first day of July, 1891, and on the first day of July in each year thereafter, or on commencing any trade or business on which such tax is imposed. The effect of this provision was to postpone the collection of the bulk of special taxes from May and June, 1891, to July and August, 1891, or from the last quarter of the fiscal year 1892. Hence the apparent decrease in the receipts from special taxes relating to distilled spirits, fermented liquors, and oleonargarine as compared with the receipts from the same sources for 1890.

WITHDRAWALS FOR CONSUMPTION DURING THE LAST TWO FISCAL YEARS.

The quantities of distilled spirits, fermented liquors, manufactured tobacco, snuff, cigars, cigarettes, and oleomargarine on which tax was paid during the last two fiscal years are as follows:

COST OF COLLECTION. .

The cost of collection for the past fiscal year, distributed among the different items of appropriation, was approximately as follows:

	/ /
>	For salaries and expenses of collectors, including pay of deputy collectors, clerks, etc., and including expenses incident to enforcing the
	provisions of law taxing oleomargarine
2, 103, 451. 58	gaugers, storekeepers, and miscellaneous expenses
45, 575. 90	For paper for internal-revenue stamps For expenses of detecting and punishing violations of internal-revenue
35, 762, 15	laws
259, 708. 16	For salaries of officers, clerks, and employés in the office of Commissioner of Internal Revenue
4, 205, 655. 49	Total
	In addition to the foregoing there was also paid from a specific appropriation made for this purpose, for expenses incident to carrying into effect the provisions of the act of October 1, 1890, relating to
4, 948. 67	the payment of bounty on sugar produced, the sum of
4, 210, 604. 16	Making the total amount expended
	The percentage of the cost of collection is 2.88 per cent.

The expenses for the previous fiscal year were \$4,095,110.80, being

2.82 per cent. of the collections.

The amount appropriated for salaries and expenses of agents, gaugers, storekeepers, etc., was \$2,100,000, while, owing to the increased number of distilleries in operation resulting, in an increase in the amount of taxes collected from spirits of more than \$3,000,000, as compared with the previous year, as shown in this report, the actual expenses for this purpose were \$3,451.58 more than the amount appropriated, as shown by unpaid accounts now on file, and for which an additional appropriation will be needed.

In the above statement of cost of collection there is included a very considerable amount of money expended in the preparation of the regulations, and other expenses incident to the enforcement of the law in

relation to the payment of the bounty on sugar.

These items are so connected with the other expenditures of this Bureau as to render it impracticable to separate them. In addition to this, there were gauged 193,557 gallons of grape brandy used in the fortification of sweet wines upon which no tax was paid, and a number of deputy collectors and other officers were necessarily employed in supervising the delivery of this brandy to the wine-makers. sums should properly be deducted from the cost of collection, and it they could be separated the percentage of cost of collection for the fiscal year ended June 30, 1891, would be very materially reduced.

MISCELLANEOUS EXPENSES.

The act of Congress approved August 7, 1882, making provision for sundry civil expenses for the year ending June 30, 1883, required the Commissioner of Internal Revenue to make a detailed statement of all miscellaneous expenditures in the Bureau of Internal Revenue for which appropriation was made in that act. In accordance with this requirement, I submit the following detailed statement of miscellaneous expenses incurred:

Express charges on public moneys forwarded by collectors and deputy	•
collectors to the depositories	\$4, 272, 20
Locks for use at distilleries	5, 915, 86
Hydrometers used in gauging spirits	
Gauging rods and wine measures	

Digitized for FRASER

Steel letters for numbering stills	999.08.

The Federal Reporter for the office of the Commissioner of Internal Revenue Compensation of United States attorneys in internal-revenue cases allowed under sections 827 and 838 Revised Statutes	
Traveling expenses of clerks under special orders of the Department Expenses of seizures and sales by collectors	530. 38
Total	

ESTIMATED EXPENSES FOR NEXT FISCAL YEAR.

I estimate the expenses of the Internal Revenue Service for the fiscal year ending June 30, 1893, as follows:

For salaries and expenses of collectors, including pay of deputy collectors and clerks, and expense of enforcing the act of August 2, 1886, taxing oleomargarine, and the act of August 4, 1886, imposing on the Government the expense of the inspection of tobacco experted, and the act of October 1, 1890, providing for payment of a bounty of englishing for the contract of the contrac	: • •
October 1, 1890, providing for payment of a bounty on sugar, including miscellaneous expenses incident to ascertaining and paying said	41 080 000
For salaries and expenses of twenty revenue agents, for surveyors, for fees and expenses of gaugers, for salaries of storekeepers, and for mis-	\$1, 950, 000
cellaneous expenses	2, 150, 000
For salaries and expenses of sugar inspectors	40,000 60,000
For detecting and bringing to trial and punishment persons guilty of violating the internal-revenue laws, including payment for information	-
and detection	50, 000
For salaries of officers, clerks, and employés in the office of the Commissioner of Internal Revenue	272, 580
Total	4, 522, 580

SALARIES.

I have the honor to recommend that Congress appropriate for the fiscal year ending June 30, 1893, the sum of \$272,980 as salaries for the following officers, clerks, and employés in this Bureau:

One Commissioner, at	\$6,000
One deputy commissioner, at	3,600
One chemist, at	2,500
One microscopist, at	-2,500
Two heads of division, at	2,500
Six heads of division, at	. 2,250
One superintendent of stamp vault, at	2,000
One stenographer, at	1,800
Twenty-five clerks, at.	1,800
Twenty-five clerks, at.	1,600
Thirty-five clerks, at	
Twenty-five clerks, at	
Fourteen clerks, at	
Forty clerks, at	
Three messengers, at	840
Fourteen assistant messengers, at	
Thirteen laborers, at	660

An aggregate of 208 persons.

I also recommend the appropriation of the sum of \$2,500 as salaries for one stamp agent at \$1,600 and one counter at \$900, the same to be reimbursed by the stamp manufacturers, as provided by the act of August 5, 1882.

GENERAL CONDITION OF THE OFFICE AND THE SERVICE.

At the close of the year ended June 30, 1891, 201 officers, clerks, messengers, and laborers were employed in this Bureau, and the aggregate amount paid during the year for their salaries was \$259,708.16.

I take great pleasure in bearing witness to the fidelity, diligence, and accuracy of the officers, clerks, and employés of this Bureau during the past fiscal year. The work of the office is in a most excellent condition, and as fully up to date as practicable, and all business has been

promptly and accurately transacted.

The examinations of the offices of collectors, which have been had as often as it was possible with the force of revenue agents at my command, show them to be generally in good condition. It is on account of the promptness, industry, and efficiency of the collectors and their subordinates to a large degree that the collections during the past fiscal year were so largely increased, and by their diligence and econ-

omy that the expense of collection was reduced.

In addition to the regular work of the Bureau the officers and clerks in this office have examined 29,427 claims for the payment of rebate on tobacco, etc., arising under the provisions of the act of October 1, 1890. Many of these claims involved considerable sums of money, and their examination and verification required a large amount of extra work, which was distributed among the different divisions of the office and performed with fidelity and dispatch. For several months prior to the close of the fiscal year three clerks were kept constantly employed in the work preparatory for the payment of a bounty on sugar, as provided for by the act of October 1, 1890. The use of grape brandy for the fortification of sweet wines has also added largely to the clerical work of the office. In considering the entire work performed by the force in this office I regard their year's labor as most praiseworthy indeed.

SCALE OF SALARIES OF COLLECTORS.

The recommendations made for the salaries of collectors are based upon an estimate of their probable collections according to the following scale, with the qualification that if the actual collections should vary from the amounts estimated the salaries will be readjusted at the end of the fiscal year:

For collection of—	Salary.	For collection of—	Salary.
\$25, 000 or less 25, 001 to \$37, 500 37, 501 to 50, 000 50, 001 to 75, 000 75, 001 to 100, 000 100, 001 to 125, 000 125, 001 to 175, 000 175, 001 to 225, 000 225, 001 to 275, 000 225, 001 to 375, 000 325, 001 to 375, 000	2, 125 2, 250 2, 375 2, 500 2, 625 2, 750 2, 875 3, 000 3, 125	475, 001 to 550, 000 550, 001 to 625, 000 625, 001 to 700, 000 700, 001 to 775, 000 775, 001 to 850, 000 850, 001 to 925, 000	3, 500 3, 625 3, 750 3, 875 4, 000 4, 125 4, 250 4, 375

OFFICIAL FORCE.

The force connected with this Bureau during the fiscal year which ended June 30, 1891, in the various districts throughout the United

States, as reorganized under the executive order of May 21, 1887, was 63 collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
32	\$4,500 4,250 4,125 4,000 3,875	3 3 4 2	\$3, 750 3, 625 3, 500 3, 375 3, 125	3 2 5 2	\$3,000 2,875 2,750 2,625

There were also employed 963 deputy collectors, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
22 11 33 1 10 31 2 59 9	\$2,000 1,900 1,800 1,750 1,700 1,600 1,550 1,500 1,450 1,450 1,350	169 127 136 2 64 4 23 1 5 25	\$1, 200 1, 100 1, 000 950 900 850 800 750 700 600 500	1 11 27 3 2 2 7 4 6	\$425 400 360 300 250 240 200 150 120

There were also employed in the offices of the different collectors 185 clerks, who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
1	\$1,800 1,600 1,500 1,400 1,300 1,250 1,200	8 6 30 34 118 5 2	\$1, 150 1, 100 1, 000 900 800 750 720	9	\$700

Also 31 porters, messengers, or janitors who received per annum salaries as follows:

Number.	Salary.	Number.	Salary.	Number.	Salary.
7	\$600 500 480 400	2 4 2 2	\$360 300 240 200	1	\$180 120 100

STOREKEEPERS, GAUGERS, ETC.

There were also employed 622 gaugers, who received fees not to exceed \$5 per day; 570 storekeepers, and 1,204 storekeepers and gaugers, whose pay did not exceed \$4 per diem, and 4 distillery surveyors. All the foregoing officers are paid only when actually employed.

Storekeepers are assigned to those distilleries only which have a surveyed daily capacity of 100 bushels or more, and are paid such compensation as may be prescribed by the Commissioner of Internal Revenue, not to exceed \$4 per day.

The pay of storekeepers and gaugers assigned to distilleries whose registered daily capacity is 20 bushels or less is fixed by law at \$2 per diem. The pay of those assigned to larger distilleries has been graded

according to the following scale:

Compensation for storekeepers and gaugers assigned to distilleries having a surveyed daily capacity exceeding 20 bushels and not exceeding 40 bushels, \$3 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels and not exceeding 60 bushels, \$3.50 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60 bushels, \$4 per day.

REVENUE AGENTS' DIVISION.

Twenty revenue agents have been employed during the last fiscal year, one as chief of division in this office, ten in charge of territorial divisions, three in the examination of the offices and accounts of collectors, and six in assisting agents in charge of divisions and on special duty.

EXPENSES OF REVENUE AGENTS.

There have been expended from the appropriation for salaries and expenses of revenue agents during the year the following amounts:

Aggregate salary of agents	\$43,024.00
Stationery furnished agents	209.76
Transportation over Pacific railroads	380.94
Total	72, 937. 13

WORK OF REVENUE AGENTS.

One thousand six hundred and thirty-seven violations of internalrevenue law have been reported by revenue agents during the year; 744 persons have been arrested on their information; property to the value of \$215,003.85 has been reported by them for seizure, and \$111,324.48 for assessment for unpaid taxes and penalties.

ILLICIT STILLS SEIZED.

The following statement shows the number of illicit stills seized, persons arrested, and casualties to officers and employés during the fiscal year ended June 30, 1891:

MANUFACTURE OF STAMP PAPER.

On the 25th day of March, 1891, sealed proposals were invited from manufacturers for supplying paper of prescribed quality and finish to be used in the printing of internal-revenue stamps for the present fiscal year. But one bid was received, that of the Fairchild Paper Company, of Boston, Mass. The committee appointed by the Secretary of the Treasury to consider the bids met at 12 o'clock m. on the 4th day of May, 1891, and in presence of a representative of the Fairchild Paper Company opened the bid, and after consultation decided to recommend its acceptance. The rate at which the company proposed to manufacture the paper was 6.1 cents per pound, a reduction of 0.2 cent per pound from last year's contract price. The contract was awarded to the Fairchild Paper Company under date of June 8, 1891, and the work thereunder was begun July 13, following. It is estimated that not less than 700,000 pounds of paper will be required under the present contract in order that a six months' stock may be assured at the close of operations.

STAMP PRODUCTION.

The Bureau of Engraving and Printing supplies all internal-revenue stamps required by law, with the exception of those imprinted on tinfoil wrappers for certain manufactures of tobacco. These last are furnished by the John J. Crooke Company, of New York, under contract, without cost to the Government, the contractor being compensated by the manufacturers. Under the terms of the contract the Crooke Company reimburses the Government in full for the aggregate salaries paid one United States stamp agent and one counter, amounting to \$2,500 per year. These salaries are reimbursed monthly.

CLAIMS FOR REDEMPTION BARRED BY STATUTE.

One hundred and forty-eight applications and inquiries for redemption of check and proprietary stamps were received during the year. These claims varied in amounts from a few cents to \$32. Being barred by statute, the claims were rejected and the stamps returned to claimants. The seventy-eight claims noted in previous reports as being made up without sufficient data are not yet disposed of. I would suggest the adoption of some measure for final disposition of these cases, in order that they may be omitted from subsequent reports. They were never in proper condition for adjudication, since some were made up without claims to accompany stamps and some without stamps to accompany claims, and in neither case could claimants be identified.

OFFICIAL COUNT OF STAMPS IN VAULT.

December 22, 1890, a committee of three, representing the Secretary's Office, the Comptroller's Office, and the Bureau of Engraving and Printing, respectively, was appointed to superintend the counting of the internal-revenue stamps in the vaults of this Bureau. The vaults were placed in charge of the committee on the morning of December 29 following, when the count began, a special force of counters and laborers having been designated for the purpose. Statements showing by classes and denominations the balances of stamps on hand December 26, 1889, the receipts and deliveries thereafter and the balances on hand December 29, 1890, were furnished by the Division of Loans and Currency, Secre-

tary's Office, and the count of stamps, which closed on the evening of December 31, was found to agree in every respect therewith, and showed that all the stamps with which the Commissioner was charged were properly accounted for. The summary given by the committee shows that there were on hand December 26, 1889 (the date of previous count), 78,865,617 stamps of all denominations. There were received from the Bureau of Engraving and Printing and from collectors for reissue, during the period from December 26, 1889, to December 29, 1890, 820,138,024 stamps, making a total to be accounted for of 899,003,641 stamps. There were delivered for issue, reissue, and destruction, during the same period, 876,066,300 stamps, leaving a balance to be accounted for December 29, 1890, of 22,937,341 stamps, which, by actual count, were found to be in the vaults on that date. The decrease in the balance on hand, as compared with the previous annual count, is accounted for in the fact that the issues of all denominations of stamps during the period mentioned was, in about the degree of the difference noted, in excess of the receipts from the Bureau of Engraving and Printing.

The committee in charge of the vaults carefully verified the accounts of the bookkeepers of the division, and found that they agreed in all

respects with those of the Secretary's office.

The fact that nearly one billion of stamps were received and issued by the Office of Internal Revenue without loss during the past year was noted by the committee as indicating "the h ghest efficiency and integrity on the part of the officers charged with the responsible duty, and that the system by which this result has been accomplished is well calculated to protect the interests of the Government in this important branch of the service."

ACT OF OCTOBER 1, 1890.

Under the provisions of the act of Congress approved October 1, 1890, the special-tax year was made to begin with the fiscal year, the law to take effect July 1, 1891. Provision was therefore made for the extension of all special-tax stamps issued May 1, 1890, and thereafter of that series, to cover the business of purchasers for the months of May and June, 1891, by the issuance of certificates of extension, numbered in regular sequence and describing in each, by serial number and otherwise, the particular stamp, for extension of which it was issued. By reference to tabular statement of stamps issued it will be seen that there were sent to collectors during the period from April 10 to June 30, 1891, 222,538 of these certificates, aggregating in value \$1,131,740.

Under the same act the special taxes heretofore imposed upon dealers in manufactured tobacco, dealers in leaf tobacco, retail dealers in leaf tobacco, manufacturers of tobacco, manufacturers of eigars, and peddlers of tobacco were abolished, with the provision that all such manufacturers and dealers, with the exception of dealers in manufactured tobacco, should register with the collectors their names, places of business, etc., the same as though the tax had not been repealed, prescribing a penalty of \$50 for neglect or refusal to comply with the requirement. For the protection of those who might desire to register in either of the occupations enumerated, certificates of registry were provided for issue through the collectors, in the same manner as specialtax stamps are issued, to all applicants regularly registered. There were 61,160 of all classes of these certificates issued to collectors prior

to June 30, of the present year, many of these having been consumed for the registry of dealers for the period of two months ending June 30. The foregoing certificates, as well as the certificates of extension,

were furnished by the Government Printing Office.

The reduction of 2 cents per pound in the tax on tobacco necessitated the return to the office by collectors of all the stamps of the series of 1883 in their hands at the close of business December 31, 1890, and their reissue at the rate of 6 cents per pound. To accomplish this, all these stamps were received into vault, and the sheet and strip stamps, together with those of same class and denomination in stock, were forwarded to the Bureau of Engraving and Printing and were there properly imprinted. The coupon stamps returned and those in stock were imprinted by the use of hand stamps under the supervision of a special committee appointed for that purpose by the Secretary of the Treasury.

It is proper to say that the increased labor imposed by this reduction in the tax, and by the introduction of the certificates of extension, the certificates of registry, and a stamp with two coupons for issue to special-tax payers who began business in May and June, 1891, was accomplished successfully, and the accounts accurately kept, without a moment's delay in the current work and without additions to the clerical

force.

There have been added to the stock of stamps regularly kept in vault since July 1, 1890, the following new classes and denominations: (a) Fortified sweet wine; (b) fortified wine for exportation; (c) transfer stamp for grape brandy; (d) export stamp for fermented liquors; (e) 12s cigar stamps; (f) 13s cigar stamps; (g) cigarette stamps, rate \$3 per thousand; (h) stamps for prepared smoking opium; also, certificates of registry. In addition, for use this year only, were the special-tax stamps with two coupons for issue to purchasers who desired to begin business in May and June, and the certificates of extension, both being mentioned elsewhere in this report.

STAMPS DESTROYED IN TRANSIT.

On the 28th day of April, 1891, a wreck occurred on the Baltimore and Ohio Railroad, which involved the total destruction of internal-revenue stamps, in transit by registered mail, of the face value of \$29,505. The stamps consisted of tax-paid spirits stamps of the denomination of 100 gallons, value \$29,430, and 20,000 one-ounce tobacco stamps, value \$75, all mailed to Collector Wilcox, of the eighth Illinois district. In addition, there were destroyed two books of 200 stamps each of rectifiers' stamps, denomination 40 gallons (of no face value), shipped to Collector McDowell, of the seventh Kentucky district. The destruction of the stamps necessitated a second requisition by the collectors, and the destroyed stamps stand charged to the Commissioner of Internal Revenue, and are unaccounted for in the accounts of the Bureau.

There is no provision of law authorizing the accounting officers of the Treasury Department to credit the accounts of the Commissioner of Internal Revenue with stamps destroyed under such circumstances, and it will be necessary for Congress to pass a special act authorizing the accounting officers to give credit for this loss. I therefore have the honor to ask that you will recommend the necessary legislation on the

part of Congress to obtain such credit.

TOBACCO DIVISION.

The aggregate amount of taxes collected from tobacco during the last fiscal year was \$32,796,270.97. This amount includes internal-revenue taxes paid by stamps on imported and manufactured tobacco, snuff, cigars, and cigarettes.

The decrease of collections for the last fiscal year as compared with those for the previous fiscal year was \$1,162,720.09. This is due to the reduction by the act of October 1, 1890, of the tax on snuff, chewing and smoking tobacco, January 1, 1891, from 8 to 6 cents per pound, and to the repeal of special taxes relating to tobacco, May 1, 1891.

The tax on cigars and cigarettes was not changed, and the collections therefrom were increased \$1,386,650.39 during the last fiscal year.

Cigars and cheroots \$1, 16 Cigarettes \$2	crease. 1, 008. 35 5, 642. 04	Decrease.

Special-tax payers previous special-tax year	632, 229
Increase during special-tax year 1891	7,879

The act of October 1, 1890, abolishing all special taxes upon the foregoing, went into effect May 1, 1891, and in lieu thereof requires registry, (except in the cases of dealers in manufactured tobacco, 611,411 persons who are exempted.) No reports are on file at present showing number of manufacturers, peddlers, dealers, and retail dealers who have so registered.

DISCONTINUING THE USE OF CAUTION LABELS.

I beg to recommend that sections 3364 and 3393 of the Revised Stat-

utes be repealed.

Section 3364 requires every manufacturer of tobacco or snuff, in addition to all other requirements of law relating to tobacco, to print on each package, or securely affix by pasting on each package containing tobacco or snuff manufactured by him or for him, a label on which shall be printed the number of the factory, the district, and State in which it is situated, and these words:

NOTICE. The manufacturer of this tobacco has complied with all the requirements of law. Every person is cautioned under the penalties of law not to use this package for tobacco again.

Every manufacturer of tobacco who neglects to print on or affix such label to every package containing tobacco made by him or for him, or sold or offered for sale by him, and every person who removes any such label so affixed from any such package shall be fined \$50 for each package.

Section 3393 provides that every manufacturer of cigars shall securely affix by pasting on each box containing cigars manufactured by him or for him a label, on which shall be printed, besides the number of the factory, and district, and State, in which it is situated, these words:

NOTICE. The manufacturer of the cigars herein contained has complied with all the requirements of law. Every person is cautioned not to use either this box for cigars again or the stamp thereon again, nor to remove the contents of this box without destroying said stamp, under the penalties provided by law in such cases.

The penalty for violation of this section is \$50 for each box.

It will be observed that these notices are required to be given by the manufacturers of tobacco, snuff, and cigars. They are required to declare that they have complied with all the requirements of law and also to state what the law is as to the re-use of packages and stamps, and to caution the public against the re-use of the package or stamp or the removal of the contents without destroying the stamp. If it were thought necessary that a caution of this kind should be given the public, and that notice should be given declaring that the manufacturer had complied with law, it is submitted that that notice and caution should Neither of these sections be given by the proper revenue officer. imposes any penalty except one for failing to give the notice and for removing same. Whatever may have been the necessity for giving public notice of any of the provisions of internal revenue law at the time that the internal-revenue law was enacted, there seems to be no further reason for it, the system having been in existence for many

In addition to that, I am of the opinion that the caution notice is placed upon packages in such a manner that but few people read it.

I am clearly of the opinion that both of these sections are wholly unnecessary; that they require manufacturers to incur needless expense, and add to the petty penalties with which the system is overburdened.

THE TABULAR STATEMENTS.

In the tables* annexed will be found statements showing the manner in which the manufacturing is distributed through the different States, the number of persons and firms engaged in each of the two branches of manufacturing, the quantity of different kinds of material used, and

the quantity and kind of products manufactured. These tables are compiled from the reports received from collectors of internal revenue of the transactions of manufacturers in their several districts for the calendar year ended December 31, 1890, a period of time differing from the fiscal year, which will account for any apparent discrepancies between them and the previous part of the report relating to tobacco.

tween them and the previous part of the report relating to tobacco.

There were in New York City thirty-six persons who qualified and kept books as tobacco manufacturers solely for the purpose of lawfully dealing in the refuse scraps, clippings, cuttings, and waste made by eigar manufacturers. They sort, sieve, and pack this material and export most of it to foreign countries. The rest they sell in bulk, under permits, to other manufacturers, who manipulate it and pack and sell their product as smoking tobacco. During the year 1890 they purchased 1,455,378 pounds of such material and exported and sold 1,388,060 pounds. These purchases and sales are not included in the tabular statement, because they did not pack and sell any of this tobacco for use and consumption.

STATEMENT SHOWING THE NUMBER, BY STATES, OF CIGAR MANUFACTURERS' ACCOUNTS REPORTED, THE QUANTITY OF TOBACCO USED, AND THE NUMBER OF CIGARS AND CIGARETTES REPORTED MANUFACTURED DURING THE CALENDAR YEAR ENDED DECEMBER 31, 1890.

SMOKING OPIUM.

Under the act of October 1, 1890, section 36, a tax of \$10 per pound was levied upon all opium manufactured in the United States for smok-

ing purposes.

Proper regulations, blanks, forms, records, bonds, stamps, etc., have been prepared in accordance with the terms of said act, but no persons qualified as manufacturers of opium during the fiscal year, and except the issuing by this office of proper stamps, records, blanks, etc., to the collector of the first district of California, there is at present nothing to report in connection with the legitimate manufacture of opium in the United States under the provisions of said act.

In order to make this law effective several amendments will be required, among which one forfeiting illicit factories, and also duly authorized factories where there is any serious violation of the law. It should also be made a penal offense to remove stamps, to re-use stamps, or to have in possession stamps that have once been used. In addition to this, I would suggest that Congress be requested to further amend the act by requiring all dealers in crude opium to keep such books and to make such returns as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may direct.

DIVISION OF LAW.

REPORTS OF DISTRICT ATTORNEYS.

The following is an abstract of reports of district attorneys for the fiscal year 1890-'91, of internal-revenue suits and prosecutions pending, commenced, and disposed of:

DIRECT TAX.

A few claims for the surplus proceeds of the sale of land under the direct-tax laws (section 36 of the act of August 5, 1861) have been allowed during the past year, amounting to the sum of \$643.47.

Of the amount appropriated by the act of March 3, 1883, for the payment of these claims, there remained at the commencement of this fiscal year the sum of \$126,172.31 available.

All the applications for redemption of school farm lands, under the provisions of the act of March 3, 1887, as amended, have been acted upon.

Total number of releases, 28; total number of acres redeemed, $3,446\frac{1}{2}$; number of acres unredeemed, $6\frac{1}{2}$.

ABATEMENT CLAIMS.

On the 1st of July, 1890, there were pending 74 claims for abatement of assessed taxes, amounting to \$13,674.32, and during the year 3,866

claims amounting to \$2,840,252.23 were presented. Of these, 1,967 claims, amounting to \$1,519,363.73, have been allowed by this office, and 476 claims, amounting to \$1,063,883.26, have been rejected or returned for amendment. This left 1,497 claims for abatement still pending on the 30th of June, 1891, amounting to \$270,679.56.

Since that date and up to October 1, 548 other claims have been filed, amounting to \$172,289.45; 1,302 claims have been allowed, amounting to \$259,078.29, and 249 rejected or returned for amendment, amounting to \$25,911.16, and on the 1st of October, 1891, 494 claims for abatement were pending, amounting to \$157,979.56.

REFUNDING CLAIMS.

On the 1st of July, 1890, there were pending 82 claims for the refunding of taxes collected, amounting to \$129,634.72, and during the year 308 other claims, amounting to \$124,041.02, were presented, and 2 rejected claims, amounting to \$27,698.32, were reconsidered.

jected claims, amounting to \$27,698.32, were reconsidered.

Of these, 190 claims, amounting to \$105,475.50, have been allowed, and 62 claims, amounting to \$42,914.54, have been rejected or returned for amendment. This left 140 claims for refunding still pending on the

30th of June, 1891, amounting to \$132,984.02.

Since that date and up to the 1st of October, 1891, 47 other claims have been received, amounting to \$2,572.81. Of these, 42 claims have been allowed, amounting to \$1,632.80, and 8 have been rejected or returned for amendment, amounting to \$1,851.82, and on the 1st of October, 1891, 137 claims for refunding were pending, amounting to \$132,062.21.

REBATE CLAIMS.

The following statement shows the number and amount of claims presented for rebate of taxes on tobacco and snuff, under the provisions of the act of December 15, 1890, and the disposition of the same:

Whole number of claims presented, from January 1, 1891, to October 1, 1891	29, 427
Number of claims allowed and paid up to October 1, 1891	. 84
Total	29, 427
Amount of claims allowed and paid	1. 984. 39

Of the claims allowed, forty, amounting to \$11,033.50, were paid in stamps.

Three thousand and ninety-two claims were returned for amendment before final allowance and payment.

COMPARATIVE STATEMENT OF DISTILLERIES REGISTERED AND OPERATED.

The whole number of grain distilleries registered during the fiscal year ended June 30, 1891, was 1,618, of which number 1,424 were operated.

The numbers registered and operated during the fiscal year ended June 30, 1890, were 1,536 and 1,397, respectively, showing an increase during the last fiscal year of 82 in the number registered and of 27 in

the number operated.

The larger portion of the increase in the number registered and the whole of the increase in the number operated occurred in the class of distilleries having the smaller capacities for the production of spirits, there having been an increase of 70 in the number of distilleries of this class registered and an increase of 29 in the number operated.

In the class of larger distilleries there was an increase of 12 in the

number registered, but a decrease of 2 in the number operated.

During the fiscal year ended June 30, 1890, there were registered 1,308 distilleries of the smaller class, varying in daily grain capacity from not over 5 to not over 60 bushels each, and of this number 1,170, or 89 + per cent., were operated.

Of the larger distilleries having daily grain capacities varying from 60 to several thousand bushels each, 228 were registered and 227, or

99½ per cent., were operated.

During the fiscal year ended June 30, 1891, of the smaller distilleries

1,378 were registered, and 1,199 or 87+ per cent. were operated.

Of the larger distilleries 240 were registered, and 225 or 93+per cent. were operated.

There were 11 rum distilleries registered and 11 operated, an increase

of one over the number reported for the previous fiscal year.

There were 2,420 fruit distilleries registered and 2,384 operated; a decrease of 2,464 in the number registered and of 2,420 in the number operated during the fiscal year.

The total number of grain, molasses, and fruit distilleries registered

and operated during the year is 4,049 and 3,819, respectively.

There was a decrease of 2,381 in the number of all kinds of distilleries registered and a decrease of 2,392 in the number of all kinds operated during the fiscal year ended June 30, 1891, as compared with the fiscal year ended June 30, 1890.

The average yield per bushel of grain was ${}^{114, 178, 077}_{<26, 385, 401} = 4.32 + gallons of spirits.$

The average yield per gallon of molasses was $\frac{1,784,312}{*2,368,171} = .753 + \text{gallons of rum}$.

^{*242,747} gallons of molasses were used in combination with grain for the production of spirits instead of rum; and their equivalent, estimated in bushels of grain, is added to the total grain in determining the yield per bushel of grain.

COMPARATIVE STATEMENT OF MATERIALS USED AND SPIRITS PRODUCED DURING THE LAST TEN FISCAL YEARS.

The quantity of grain used in the production of spirits during the fiscal year ended June 30, 1891 (26,347,641 bushels) is an increase of 1,144,740 bushels over the amount used in the preceding fiscal year (25,202,901 bushels) and is 5,476,048 bushels more than the average (20,871,593 bushels) for the last ten years.

The number of gallons of spirits produced from grain during the year (114,178,077 gallons) shows an increase of 6,559,957 gallons over the product (107,618,120 gallons) of the year ended June 30, 1890, and is 28,624,713 gallons more than the average produced (85,553,364 gallons)

for the last ten years.

The yield of spirits from each bushel of grain is 4.32+ gallons. The yield for the two preceding years was 4.18+ for 1889 and 4.27+ for 1890.

The quantity of molasses used for the production of rum during the fiscal year (2,368,171 gallons) shows an increase of 169,633 gallons over the quantity used in the previous year (2,198,538 gallons) and is 43,363 gallons more than the average (2,324,808 gallons) for the last ten years. The quantity of rum distilled from molasses during the fiscal year

(1,784,312 gallons) shows an increase of 126,504 gallons over the product of the previous year (1,657,808 gallons) and is 8,316 gallons more than the average product (1,775,996 gallons) for the last ten years.

WEIGHING DISTILLED SPIRITS.

The expediency of ascertaining the quantity of distilled spirits subject to tax, by means of weighing, has engaged my attention during the past year, and I have caused a number of experiments to be made, some of which I have personally supervised, to test the relative merits of weighing, and of gauging, as methods of finding the true quantities, and to determine the practicability of the former for use under the internal-

revenue system.

The defects of gauging as an exact measure of the contents of packages have long been apparent, and have occasioned many difficulties in obtaining the full and correct amounts of tax due, and in guarding against intentional evasions of liability. Gauging is at best but an approximate way of finding the holding contents of a perfect cask, made upon true lines, and of material of an even thickness. When the curves of the cask differ from those upon which the mathematics of gauging are based, or its staves or heads are not of a uniform and established thickness, then gauging is further at fault and its results still more unreliable. Even when the capacity of a cask has been found with reasonable correctness, there still remains another measurement to be made to determine the portion of that capacity not occupied by spirits, if the package be not full, as for reasons of expansion it can not well be; and when the apparent volume of spirits has thus been

found, a calculation must still be made to find the true volume at a temperature of 60° F., whenever the spirits are gauged at any other temperature. These several steps must be taken to obtain the wine gallons upon which the proof gallons are to be still further calculated.

Besides the liability to error in any one or in all of these processes, there is necessitated, in order to avoid delay, a constant dropping of fractions, or taking of the next higher gallon, which, in theory, offset

each other, but in practice are usually against a true result.

Moreover, the performance of these various operations is a lengthy one, requiring a considerable time to insure the degree of accuracy obtainable, and thus compelling the employment of a large number of officers to discharge the duties with the promptness which the business demands.

By the system of weighing, on the other hand, the scales record quickly and with unfailing accuracy the gross weight of spirits and of containing cask; and the ascertained empty weight of the cask being deducted, the precise number of pounds weight of the spirit contents remains.

After taking the proof, or alcoholic strength, of the spirits, the exact equivalent, in wine gallons, of the pounds weight is obtainable by applying thereto the factor arising from the known weight of a gallon of water and the specific gravity of spirits of the ascertained proof.

This calculation is easily tabulated for ready use for any number of

pounds of spirits of any degree of proof.

From the wine gallons so found the proof gallons follow by the simple

application of the proof thereto.

This method of finding the true volume of spirits avoids all difficulties arising from the shape or dimensions of packages, or from their ullage or wantage, as well as from variations in the bulk of spirits due to temperature, and appears to be superior to the present method of gauging in every feature of facility, convenience, and accuracy.

It can be readily acquired, calling for little skill beyond the ability to read the scales and to ascertain proof correctly. It seems probable that it will so far facilitate the labors of gaugers as to materially lessen the number of officers of this class necessary for the performance of

their duties.

As to the entire practicability of substituting weighing for gauging I have taken the opinion of a large number of men experienced in the production or handling of distilled spirits, and the predominating expression on the part of intelligent persons who have given any thought

to this matter is distinctly in its favor.

In view of these considerations, I have decided, after consultation with yourself and with your approval, and under the authority conferred upom me by section 3249 of the United States Revised Statutes, to prescribe the use of the scales in place of the gauge rod at distilleries and, so far as applicable, at rectifying houses; retaining the rod for use in gauging packages of rectified spirits whose true proof is not ascertainable owing to the presence of saccharine or other matter in the spirits; and under other circumstances when the use of the scales may not be feasible.

For this purpose I have had tables prepared in this office for use, as above indicated, in connection with the scales, and for the ascertainment of the proof gallons as well as the wine gallons, and I am now

preparing regulations to establish the new system.

I have also, with your approval, contracted with the Fairbanks Company, which upon advertisement was the only bidder, to furnish at the expense of the United States twenty-three hundred scales or weighing

beams, with poises and barrel hooks—a sufficient number, I judge, for

the present, and perhaps for a considerable period.

The cost of these scales, at \$10 each, with the appurtenances, will, I am confident, be much more than compensated within no great space of time by a reduction in the expense of gaugers' fees, relative to the number of gallons gauged, and, besides, by a large addition to the amount of tax collected, due to greater accuracy, although such addition can not perhaps be definitely estimated.

DISPENSING WITH GAUGING SPIRITS OUT FROM RECTIFYING HOUSES.

Section 3320 of the Revised Statutes requires that "Whenever any cask or package of rectified spirits containing five wine-gallons or more is filled for shipment, sale, or delivery, on the premises of any rectifier who has paid the special tax required by law, it shall be the duty of the United States gauger to gauge and inspect the same, and to place thereon an engraved stamp, signed by the collector of the district and the said gauger, which shall state the date when affixed, and the number of proof-gallons," etc. When this stamp is attached the package is placed upon the market. The stamp is, of course, expected to show the proof of the contents of the package, but inasmuch as rectified spirits are very frequently compounded by the addition of saccharine substances it is impossible to accurately determine the proof thereof. The proof of spirits is obtained by the use of a hydrometer, but where any substance is mingled with the spirits which has a greater specific gravity than water and alcohol, the hydrometer will not register the proof. In all such cases the gauger is compelled to take the statement of the rectifier as to the strength of the spirits. When spirits are entered into a rectifying house and dumped they are gauged before any rectification takes place. spirits have also been gauged at least once before at the distillery, and as the surveillance exercised by the Government over rectifying houses is simply to prevent frauds (there being no additional tax on rectified spirits), it is, in my opinion, unnecessary to attempt to regauge spirits after they have passed through a rectifying house.

First, because I think it is unnecessary as a protection against fraud; and, secondly, because whenever any saccharine matter has been added to the spirits it is impossible to ascertain their proof. the past fiscal year 71,220,931 gallons of rectified spirits were gauged, involving a large amount of work, which cost the Government a very large sum of money. I am of the opinion that the interests of the service do not require this expenditure, and therefore suggest that Congress be asked to make the necessary amendments to the law dispensing with the gauging of spirits out from rectifying houses, and providing in lieu thereof that the rectifier be required to report to the collector of internal revenue the number of gallons so rectified and the proof thereof, and to place a stamp upon the package showing the serial number of the package from which it was taken, the manufacturer thereof, and such other facts as shall be required by the Commissioner of Internal Revenue, with your approval, and imposing a fine for a failure to make such report or affix such stamp. Of the Revised Statutes, sections 3317 and 3318 would be indirectly affected, and sections 3320 and 3323 directly affected

by such amendments.

By substituting the system of weighing for the present system of gauging for the purpose of ascertaining the contents of a package of distilled spirits, and by dispensing with regauging out of rectifying houses, it is believed that the expenses of gauging will be reduced to the minimum.

DIVISION OF ASSESSMENTS.

The following statements relative to assessments, to spirits deposited in and withdrawn from distillery warehouses and special bonded warehouses, the number and location of such warehouses and the names of the proprietors thereof; to the stock of spirits in the United States October 1, 1891; to the exportation of spirits, fermented liquors, tobacco, snuff, cigars, and cigarettes in bond; to the exportation of tobacco, cigars; fermented liquors, and stills, with benefit of drawback; to the use of grape brandy tax-free in fortifying wines; to the act of October 12, 1888, entitled "An act to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia," and to the act of March 3, 1891, authorizing the use of alcohol tax-free in the manufacture of sugar from sorghum, are prepared from reports in the Division of Reports relative to the operation of the oleomargarine Assessments. law, which were received during the first half of the fiscal year, were transferred to the Division of Revenue Agents January 1, 1891. statements relative to assessments are to be found on this page and the page following; statements relative to operations in distillery warehouses commence on page 82 (see also special index on page 81); to operations in special bonded warehouses on page 169; to exportations in bond free of tax as to spirits on page 142; as to fermented liquors on page 180; as to tobacco, snuff, cigars, and cigarettes on page 177; to exportations with benefit of drawback on page 179; and to the use of brandy in fortifying wines on page 175. No case has yet arisen under the act of March 3, 1891, above referred to, and since my last report only one under the act of October 12, 1888.

ASSESSMENTS.

1. By STATES AND TERRITORIES, 1891.

The following statement shows the amount of assessments in each of the several States and Territories of the United States, except where two or more are comprised in one district, during the fiscal year ended June 30, 1891:

States and Territories.	Amount.	States and Territories,	Amount.
Alabama. Arkansas California and Nevada. Colorado and Wyoming Connecticut and Rhode Island. Florida Georgia Illinois Indiana Iowa. Kansas, Indian Territory, and Oklahoma Kentucky Louisiana and Mississippi. Maryland, Delaware, and District of Columbia	\$6, 296, 53 3, 250, 02 31, 627, 02 1, 651, 74 9, 342, 58 920, 13 9, 267, 38 37, 186, 65 129, 793, 67 13, 405, 67 2, 818, 64 2, 125, 712, 81 6, 638, 15 233, 380, 99 39, 317, 07	Montana, Idaho, and Utah. INCREASED PRODUCTION OF SPIRITS.

The quantity of spirits (115,962,389 gallons) produced and deposited in distillery warehouses during the fiscal year ended June 30, 1891, is more than the production (109,275,928 gallons) of the year 1890, by 6,686,461 gallons. The difference is distributed among the different kinds as known to the trade as follows:

Increase in the production of—	Gallons.
High wines	. 451, 498
Rye whisky	
Alcohol	906, 373
Rum	. 126, 504
Gin	90, 934
Pure, neutral, or cologue spirits	. 1, 333, 507
Miscellaneous	. 5, 331, 202
Total increase	
Decrease in the production of bourbon whisky	. 2, 543, 369
Not imprope	C COC 101
Net increase	. 0,00 0,401

INCREASED WITHDRAWAL OF TAX-PAID SPIRITS.

The quantity of spirits (87,176,226 gallons) withdrawn tax-paid from distillery warehouses during the fiscal year ended June 30, 1891, is more than the quantity (83,479,837 gallons) withdrawn from distillery warehouses during the fiscal year ended June 30, 1890, by 3,696,389 gallons, the increase being distributed among the different kinds known to the trade as follows:

Increase in withdrawals of—	Gallons.
Rye whisky Rum Gin	5, 637
Gin	90, 379
High wines	412, 815.
Miscellaneous	6, 089, 662
Total increase	6, 637, 531
Decrease in withdrawals of— Gallons.	
Bourbon whisky	
Alcohol	
Pure, neutral, or cologne spirits	
Total decrease	2, 941, 142
Net increase	3, 696, 389

If the quantity, 1,081,482 gallons (as stated by the Chief of the Bureau of Statistics), of exported domestic spirits reimported during the year upon payment of a customs duty equal to the internal-revenue tax be added, the quantity virtually withdrawn from distillery warehouses during the year ended June 30, 1891, is found to be 88,257,708 gallons, or 3,756,775 gallons more than during the year 1890, including the 1,021,096 gallons reimported and tax-paid during that year.

SPIRITS REMOVED IN BOND FOR EXPORT.

The quantity of spirits (1,676,395 gallons) withdrawn for exportation during the fiscal year ended June 30, 1891, is greater than the quantity (1,367,726 gallons) so withdrawn during the fiscal year ended June 30, 1890, by 308,669 gallons, the increase being distributed among the different kinds known in the trade as follows:

Increase in the withdrawals of—	Gallons.
Alcohôl	31, 860
Rum	479, 137
Pure, neutral, or cologne spirits	7,046
Total increase	518, 043
Decrease in the withdrawals of— Gallons	
Bourbon whisky)
Rye whisky 78, 946	;

BALANCE IN WAREHOUSE AT CLOSE OF THIS AND PREVIOUS FISCAL YEARS.

Date.	Quantity.	Date.	Quantity.
Remaining June 30—	Gallons.	Remaining June 30—	Gallons.
1869	16, 685, 166	1881	64, 648, 111
1870		1882	89, 962, 645
1871	6, 745, 360	1883	80, 499, 993
1872	10, 103, 392	1884	63, 502, 551
1873		1885	54, 724, 916
1874		1886	58, 096, 620
1875		1887	65, 145, 269
1876	12, 595, 850	1888	61, 033, 018
1877		1889.	68, 512, 070
1878		1890	89, 721, 053
1879	19, 212, 470		112, 921, 457
	31, 363, 869	1091	112, 321, 437
1880	91, 303, 809		

An inspection of the above table shows that the quantity of spirits in distillery warehouses June 30, 1891, is the largest quantity so held at the close of any fiscal year. This stock on hand has grown from 61 millions in 1888 to 68,5 millions in 1889, to 89,7 millions in 1890, and finally to the above quantity, nearly 113 millions, in 1891.

The increase during the last two years was 44.4 millions, but this increment has been twice exceeded, once from 1879 to 1881, when the increase was more than 45.4 millions, and from 1880 to 1882, when it

was nearly 58.6 millions.

It appears from reports recently received that while the quantity of spirits in distillery warehouses September 30, 1890, was 85,106,670 gallons, or more than 4.6 millions less than the quantity therein June 30, 1890, the quantity in warehouse September 30, 1891, was 104,810,892 gallons, or more than 8.1 millions less than the quantity so held June 30, 1891. It is noted also that this increased reduction is due to decrease in production during July, August, and September, 1891, rather than to increased tax-paid withdrawals, the quantity withdrawn tax-paid during these three months being nearly 1,000,000 gallons less than the quantity so withdrawn during July, August, and September, 1890.

DISTILLED SPIRITS IN THE UNITED STATES OCTOBER 1, 1891.

The quantity of distilled spirits in the United States, except what may be in customs bonded warehouses, on the 1st day of October, 1891, was 152,945,773 gallons, this quantity being distributed as follows:

In d	istillery and sp	ecial bonded	warehous	es	e jedin birki. L		Gallons. 106, 539, 498
In h	ands of wholesa ands of retail li	le liquor dea	lers				14, 406, 275
	Total					•	152, 945, 773

In making the above computation the average stock of each retail liquor dealer in the United States is estimated at 150 gallons.

FORTIFICATION OF WINES WITH GRAPE BRANDY FREE OF TAX.

Under the provisions of sections 42 to 49, inclusive, of the act entitled "An act to reduce revenue and equalize duties on imports, and for other purposes," approved October 1, 1890, provision is made for the fortification with grape brandy, free of tax, of pure sweet wine, and of wine

intended for exportation. No limitations are prescribed as to the character of the wines intended for exportation, but certain limitations are specified as to the pure sweet wine evidently designed to avoid the use of the brandy in fortifying wines other than pure sweet wines. The limitations are those requiring that the fortification be done on the winery where the grapes are crushed and the grape juice is expressed and fermented; that there must be no additions to the natural wine of any other substance, and that the addition of the brandy shall be for the preservation of the saccharine matter contained therein. The law also contains limitations to the effect that the wine to be fortified shall not contain less than 4 per cent. of sugar; that the wine spirits added shall not introduce alcohol to exceed 14 per cent., and that the wine shall not contain more than 24 per cent. of alcohol, these percentages of alcohol being computed by volume and on the volumes of the wine after fortification.

The law limits the use of wine spirits or brandy to the months of August to April, inclusive; allows the wine producer who is also a distiller to use the grape brandy produced by him to fortify his wine, and authorizes the withdrawal of grape brandy from special bonded warehouse to fortify wine.

Authority is given to the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, to prescribe bonds, stamps,

seals, and necessary regulations.

As the law could not take effect until the regulations were prescribed, and was passed in the midst of the wine season, it was found necessary to adopt certain existing blank forms and stamps to be used until the new forms and stamps could be prepared. It was also found necessary to adopt a method of determining the alcoholic strength of the wine by the use of Ballings's saccharometer, as it was impossible at such short notice to secure and test the needed distilling apparatus, including hydrometers.

The regulations were issued during the month in which the law was passed, and required a seal to be affixed over the bung of each cask of

fortified wine.

The quantity of grape brandy used in fortifying wines under the act of October 1, 1890, was 193,557 tax gallons, all but 2,128 gallons being derived directly from distilleries. The kinds of wine fortified were port, angelica, muscat, sherry, malaga, and tokay, the quantity of fortified wine produced being 1,083,274 gallons.

The quantity of brandy used and of each kind of wine fortified up to April 30, 1891, in each district, is shown in the following table:

WINES FORTIFIED.

	First Ca	difornia.	Fourth California.

At the close of the season the regulations governing the fortification of wines were revised so as to embody tables made and decisions rendered from time to time, as necessity required.

The revised regulations also removed the obligation to affix seals, substituting a fortifying room, to be under lock and seal, as a simpler safeguard. These regulations are in force during the present wine season, which commenced August 1, 1891.

The quantity of wine fortified during the months of August and Sen-

tember, 1891, is as follows:

Exportation of Cigars and Cigarettes in Bond during the Fiscal Year ended June 30, 1891.

Cigars and cigarettes.	Cigars at \$3 per 1,000.	Cigarettes at 50 cents per 1,000.
Removed and unaccounted for July 1, 1890 Removed during the year ended June 30, 1891	550, 175 3, 209, 484	14, 550, 000 294, 534, 250
Total	3, 759, 659	309, 084, 250
3. Exported and accounted for during the year ended June 30, 1891 4. Remaining unaccounted for at the close of the fiscal year ended June	3, 498, 559	298, 139, 750
30, 1891	261, 100	10, 944, 500
Total	3, 759, 659	309, 084, 250

It appears upon comparing the figures in the foregoing tables with similar tables published in my report for the fiscal year ended June 30, 1890, that there was an increase in the exportations of 1891 over those of 1890, as to tobacco and cigarettes, and a decrease as to cigars, as follows:

		Increase.	Decrease.
Tobacco	 pounds	4, 2885	•••••
Cigars	do	35, 224, 200	40, 966
3			

Neither the increase as to tobacco nor the decrease as to cigars is very great, but the increase as to cigarettes is remarkable and brings the quantity exported during the year ended June 30, 1891, up to nearly 300,000,000. The business of exporting cigarettes has grown during the past ten years as follows:

Number during Fiscal Year ended June 30-

1882	64, 001, 500	1886	134, 311, 180	1890	259, 310, 050
1883	68, 413, 560	1887	139, 935, 300	1891	294, 534, 250
1884 1885					

WITHDRAWAL OF DISTILLED SPIRITS FROM DISTILLERY WAREHOUSES, FREE OF TAX, FOR USE IN THE MANUFACTURE OF SUGAR FROM SORGHUM.

By the act of Congress making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1892, approved March 3, 1891, provision is made for the withdrawal of distilled spirits from distillery warehouses, free of tax, to be used solely in the manufacture of sugar from sorghum on the manufacturer's premises.

Regulations pursuant to said act have been issued, but no withdrawal of spirits for the purpose named was made or applied for during the fiscal year 1891.

OLEOMARGARINE.

The following statements, skewing operations under the act of August 2, 1886, defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine,

First. A summary of operations at oleomargarine manufactories during the fiscal year ended June 30, 1891; also a summary of operations during the past two fiscal years, and by months covering the period from November 1, 1886, to June 30,1891; also a statement of the quantity of oleomargarine in the United States June 30, 1891, in the hands of manufacturers and wholesale dealers.

Second. A statement of the receipts from all classes of taxes im-

posed by the eleomargarine law for the year ended June 30, 1891.

Third. A statement by States and Territories and in the aggregate of all persons who paid taxes as manufacturers of and dealers in oleomargarine during the 14 months ended June 30, 1891; also in aggregate of all persons who paid oleomargarine special taxes for the special-tax vear ended April 30, 1890.

Fourth. A statement as to the location of oleomargarine manufactories and of wholesale dealers in oleomargarine in April, 1890, and April,

1891, respectively.

Fifth. A statement as to the location of oleomargarine manufactories

and of wholesale dealers in oleomargarine in June, 1891.

Sixth. A statement relative to examinations made by collectors and deputy collectors with internal-revenue microscopes during the year. Seventh. A statement relative to laws of States and Territories con-

cerning oleomargarine.

It appears from the subjoined tables that the average monthly production of oleomargarine under the operations of the law has been as follows:

·	Pounds.
During the eight months ended June 30, 1887	
During the fiscal year ended June 30, 1888	2, 860, 460
During the fiscal year ended June 30, 1889	2, 972, 002
During the fiscal year ended June 30, 1890.	2, 693, 669
During the fiscal year ended June 30, 1891	8, 699, 367

^{*} Date when act went into effect.

It also appears that the average monthly quantity withdrawn from factories on payment of the tax was as follows:

	Pounds.
During the eight months ended June 30, 1887	2,592,946
During the fiscal year ended June 30, 1888	2, 707, 430
During the fiscal year ended June 30, 1889	2,821,970
During the fiscal year ended June 30, 1890	2, 566, 494
During the fiscal year ended June 30, 1891	3, 601, 292

The average quantity withdrawn monthly for exportation during the same time is shown to have been as follows:

	Pounds.
During the eight months ended June 30, 1887	90,566
During the fiscal year ended June 30, 1888	140,516
During the fiscal year ended June 30, 1889	145, 746
During the fiscal year ended June 30, 1890	134, 866
During the fiscal year ended June 30, 1891	102,426
= · · · · · · · · · · · · · · · · · · ·	

These figures show an increase from year to year in the production both for consumption at home and abroad, from November 1, 1886, the date the law went into effect, until June 30, 1889; a decrease during the year ended June 30, 1890; and during the year ended June 30, 1891, an increase of production over any former year, but a decrease for exportation.

In the fiscal years 1887 and 1888 the largest production month was March; in the fiscal year 1889, December; in the fiscal year 1890, October; while the greatest production during the fiscal year ended June 30, 1891, occurred in March, the quantity produced during these months

being as follows:

	. •	•	Pounds.
In March, 1887		 	. 3, 568, 254
In March, 1888		 	3, 940, 727
In December, 1888		 	. 4, 181, 317
In October, 1889	\.	 	. 4, 072, 333
In March, 1891		 	. 6, 723, 224

The months in which the production fell below 2,000,000 pounds were as follows:

During the fiscal year ended June 30, 1887: May, 1887, produced June, 1887, produced	1, 885, 027
June, 1887, produced	1, 375, 423
During the fiscal year ended June 30, 1888: July, 1887, produced	1, 208, 638
During the fiscal year ended June 30, 1889: June, 1889. produced	1, 575, 362
During the fiscal year ended June 30, 1890: July, 1889, produced August, 1889, produced	1, 404, 749
August, 1889, produced	1, 975, 773
May, 1890, produced June, 1890, produced	1, 864, 746
June, 1890, produced	1, 364, 826
During the fiscal year ended June 30, 1891: July, 1890, produced	4, 723, 966
Juné, 1891, produced	1, 988, 633

There was an increase in the number of persons engaged in the sale of oleomargarine during the fiscal year ended June 30, 1891, as well as an increase in the production of the article.

The following table shows the quantity of oleomargarine, in pounds, at two cents tax, produced at manufactories during the fiscal year ended

June 30, 1891, the quantity withdrawn therefrom during the year, and the stock of oleomargarine remaining in factories June 30, 1891:

necticut.

b Including the Indian Territory and the Territory of Oklahoma. But no oleomargarine was manufactured in either of these Territories.

Each special tax year has heretofore ended April 30. By act of Congress, approved October 1, 1890, each special-tax year was thereafter to commence July 1, and end June 30, following; in other words, the special-tax year was from and after July 1, 1891, to conform to the fiscal year. Hence the months of May and June in the year 1891, only, belong to no regular special-tax year, and by the act referred to they were constituted a special-tax period. The following table is designed to show the situation with regard to the number and location of manufacturers and wholesale dealers in the closing month of that period.

FIELD SERVICE WITH THE INTERNAL-REVENUE MICROSCOPE.

During the year not only was the practice continued by deputy collectors of canvassing the districts with internal-revenue microscopes for the purpose of examining specimens of products exposed for sale as butter, with a view to ascertain whether the substances were really oleomargarine, but an extensive special canvass of this nature was made, induced by the belief of this office that there was more oleomargarine on the market not marked, branded, and stamped as required by law, than had been previously supposed. Although the extent of the work in certain districts fell somewhat short of the expectations of this office, the result on the whole was rather satisfactory. The per cent. of products discovered not marked, branded, and stamped, as required by law, was about eight in every thousand samples examined. This being nearly-double the per cent. of last year is confirmatory of the belief above alluded to and fairly illustrative of the improved efficiency in the field service of the use of the microscope. The experience of this office, however, is that there is not so much evasion of the payment of the pound tax on oleomargarine as of the payment of special tax of dealers in the product.

The following table of production and total receipts from all oleomargarine sources for each fiscal year since November 1, 1886, the date the oleomargarine law took effect, is interesting as showing the extent of operations in the country:

	Produced.	Received.
On hand November 1, 1886 During the fiscal year ended June 30, 1887 (from November 1, 1886) During the fiscal year ended June 30, 1888 During the fiscal year ended June 30, 1889 During the fiscal year ended June 30, 1890 During the fiscal year ended June 30, 1891 Total	21, 513, 537 34, 325, 527 35, 664, 026 32, 324, 032	\$723, 948. 04 864, 139. 88 894, 247. 91 786, 291. 72 1, 077, 924. 14 4, 346, 551. 69

It will be seen that the production for the fiscal year, for which this report is submitted, is the largest in the history of eleomargarine operations, exceeding the largest previous production by 8,728,383 pounds; and in receipts exceeding the greatest previous record by \$183,676.23. The increase in production over last year was 12,068,377 pounds; in receipts, \$291,632.42.

STATE AND TERRITORIAL LAWS RELATIVE TO OLEOMARGARINE.

In last year's report there was published a brief summary of the laws of States and Territories that were in force June 17, 1890 (the date of

request of this office for information upon the subject). Through failure to receive advice from Delaware, Georgia, Indiana, Louisiana, Mississippi, South Carolina, Texas, and Washington the summaries of the oleomargarine laws of these States, or remarks concerning the subject, were based upon information received up to and including November, 1888. Information has since been received from the States just named, also from all other States and Territories where changes in the laws have been made since June 17, 1890, which enables this office to make its summary (herewith presented) complete up to the close of the fiscal year for which this report is submitted, namely, June 30, 1891:

Alabama.—No change in the law as summarized in last year's report-

Arizona.—No change.

Arkansas.—No legislation.

California.—No change. Colorado.—No change.

Connecticut.—No change.

Delaware.—No change. Florida.—No change.

Georgia.—An act approved September 21, 1883, prohibits the sale of oleomargarine, except under its true name conspicuously branded upon the package, and also unless the person offering to purchase the article is first informed that it is oleomargarine. In hotels, inns, restaurants, or houses of public entertainment serving oleomargarine, placards must be posted in the dining rooms, and also in the private rooms of the guests, bearing the following words: "This house uses oleomargarine." These words must also appear upon the bills of fare.

Idaho.—No change.
Illinois.—No change.
Indiana.—No change.
Iowa.—No change.
Kansas.—No change.
Kentucky.—No legislation.
Louisiana.—No change.
Maine.—No change.
Maryland.—No change.

Massachusetts.—Section 1, of an act approved March 10, 1891, to take effect the 1st day of September, 1891, reads as follows:

No person, by himself, or his agents, or servants, shall render, or manufacture, sell, or offer for sale, expose for sale, or have in his possession with intent to sell, any article, product, or compound made wholly or partly out of any fat, oil, or oleaginous substance or compound thereof, not produced from unadulterated milk or cream from the same, which shall be in imitation of yellow butter produced from pure unadulterated milk or cream of the same: Provided, That nothing in this act shall be construed to prohibit the manufacture or sale of oleomargarine in a separate and distinct form, and in such manner as will advise the consumer of its real character, free from coloration or ingredient that causes it to look like butter.

An act approved June 11, 1891, to take effect September 1, 1891, imposes penalties upon whoever sells or offers for sale to any person who asks, sends, or inquires for butter, any oleomargarine, butterine, or any substance made in imitation of pure butter.

Section 3 requires a placard bearing the words "Oleomargarine sold here," or "Butter sold here," to be posted in every dwelling, store,

office, or public mart where oleomargarine is offered for sale.

Under section 5 it is required where oleomargarine or butterine is served in hotels, restaurants, or any lunch counter, guests or patrons thereof should be notified of the fact.

Michigan.—The law of this State appears to have been supplemented as follows: An act approved April 29, 1891, prohibits the use of oleomargarine, butterine, or any other substitute for butter in any of the public institutions of the State.

Minnesota.—An act of April 21, 1891, to take effect from date of its passage, provides against the sale, or having in possession with intent to sell, any butter substitute that is of any other color than bright

pink.

Mississippi.—No change. Missouri.—No change.

Montana.-No change.

Nebraska.—No change.

Nevada.—No change.

New Hampshire.—Penalty changed from \$50 to discretion of court and not to exceed \$100. Office not informed as to date of this act.

New Jersey.—No change. New Mexico.—No change.

New York.—Section 1, chapter 140, of an act approved April 7, 1891, amends section 27 of chapter 183 of the laws of 1885, as added thereto by section 1 of chapter 583 of the laws of 1887, to read as follows:

SECTION 27. No keeper or proprietor of any bakery, hotel, tavern, boarding house, restaurant, saloon, lunch counter, or place of public entertainment, or of any place where any person or persons, in the employ of the keeper or proprietor thereof, is furnished with board, either without charge or as compensation wholly or in part for his services, or any person having charge thereof or employed thereat, shall keep, use, or serve therein, either as food for their guests, boarders, patrons, or customers, or for cooking purposes, any article made in violation of the provision of section seven of this act, as amended by chapter five hundred and seventy-seven of the laws of eighteen hundred and eighty-six. This section shall not be so construed as to require evidence of a willful or intentional violation thereof. Whoever violates the provisions of this section shall be guilty of a misdemeanor and punished by a fine of not less than fifty dollars nor more than two hundred dollars, or not less than ten days' or more than thirty days' imprisonment for the first offense and by imprisonment for one year for each subsequent offense.

SECTION 2. This act shall take effect immediately.

North Carolina.—There has been no legislation on the subject of oleomargarine.

North Dakota.—No change.

Ohio.—No change.

Oklahoma.—There has been no legislation on the subject of oleomargarine.

Oregon.—No change.

Pennsylvania.—No change. Rhode Island.—No change.

South Carolina.—No change.

South Dakota.—This office is still unable to furnish satisfactory information respecting the law of this State.

Tennessee.—No law. Texas.—No change.

Utah.—No legislation.

Vermont.—By an act approved and in effect November 13, 1890, it is prohibited to sell, expose for sale, or have in possession with intent to sell, any article or compound "made in imitation of butter, and not wholly made from milk or cream and that is of any other color than pink."

Virginia.—No change.

Number 71 of the acts of 1886 hereby repealed.

Washington.—Section 2 of an act approved January 20, 1890, reads as follows:

No person or persons shall sell, supply, or offer for sale or exchange any oleaginous substance, or any compound of the same, other than that produced from wholesome and unadulterated milk or cream of the same, unless the said oleaginous substance and the package containing the same shall be marked so as to plainly establish its true character and distinguish it from pure and genuine dairy products; and in any public dining or eating room where imitation dairy product or products are commonly and knowingly used as an article of food, the bill of fare used in such dining or eating room shall state the fact in the same sized type as is used in printing the body of said bill of fare; or if no bill of fare is used, then in a conspicuous place of said dining or eating room, easily seen by any one entering said room, shall be posted a notice stating the name or names of such imitation dairy products: Provided, That the addition of harmless coloring matter to any product manufactured from pure unadulterated milk, or the cream thereof, shall not come within the provisions of this act; Provided further, That milk drawn from cows within fifteen (15) days before and five (5) days after parturition shall be construed to be unclean, impure, and unwholesome.

West Virginia.—Section 1 of an act passed February 11, and approved February 16, 1891, reads as follows:

That from and after the passage of this act it shall be unlawful for any manufacturer or vender of eleomargarine, artificial or adulterated butter, to manufacture or offer for sale within the limits of this State, any eleomargarine, artificial or adulterated butter, whether the same be manufactured within or without the State, unless the same shall be colored pink.

Wisconsin.—An act approved April 6, 1891, to take effect April 11, 1891, date of publication, prohibits the sale of any article having the semblance of butter, which substance is not made wholly from pure milk or cream, salt and harmless coloring matter, except under its true name, to be durably painted, stamped, stenciled, or marked in bold-faced capital letters not less than five-line pica in size upon the packages. With any quantity sold less than the original package there must be delivered with each such quantity a label bearing the true name of the substance.

Section 7 provides that no butter not made wholly and directly from pure milk or cream, salt and harmless coloring matter, shall be used in any of the charitable or penal institutions of the State.

Wyoming.—No legislation.

BOUNTY ON SUGAR.

The act of October 1, 1890 (26 Stat., 567), entitled "An act to reduce the revenue and equalize duties on imports, and for other purposes," provides—

That on and after July first, eighteen hundred and ninety-one, and until July first, nineteen hundred and five, there shall be paid, from any moneys in the Treasury not otherwise appropriated, under the provisions of section three thousands ix hundred and eighty-nine of the Revised Statutes, to the producer of sugar testing not less than ninety degrees by the polariscope, from beets, sorghum, or sugar cane grown within the United States, or from maple sap produced within the United States, a bounty of two cents per pound; and upon such sugar testing less than ninety degrees by the polariscope, and not less than eighty degrees, a bounty of one and three-fourths cents per pound, under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe.

Congress at the last session made the appropriation necessary to carry out the law according to the recommendations made by this office, based upon the best data obtainable.

The act making appropriations for the legislative, executive, and ju-

dicial expenses of the Government for the fiscal year ending June 30, 1892, and for other purposes (act of March 3, 1891), authorized the Commissioner to employ not to exceed 12 inspectors, at a salary not exceeding \$5 per day and necessary expenses, whose duty it should be to inspect sugar upon which a bounty is required to be paid, to aid in ascertaining the amount of bounty due thereon, and to perform such other duties as may be required by the Commissioner of Internal Revenue; and the sum of \$36,000 was appropriated for that purpose.

An increase of \$165,000 was made in the same act in the appropriations for the salaries and expenses of collectors of internal revenue, deputy collectors and clerks over the estimated amount necessary for collecting internal revenue, for the purpose of carrying out the provisions of the

law relative to the bounty.

The clerical force in this office was also increased as follows:

1 clerk, at a salary of	1,800	1 clerk, at a salary of	900
1 clerk, at a salary of		Total	10, 990

The total additional appropriation made for the fiscal year ending June 30, 1892, on account of sugar bounty was, therefore, \$211,990.

The act making appropriations to supply deficiencies in the appropriation for the fiscal year ending June 30, 1891, and prior years (act of March 3, 1891), also appropriated \$5,000, or so much thereof as may be necessary, for expenses incident to carrying out the provisions of the act of October 1, 1890, relative to the bounty on sugar.

Of this appropriation, the sum of \$4,948.67 has been expended—most of it for polariscopes, chemical supplies, and fitting up laboratories. The sum expended for weighing and sampling instruments, polari-

The sum expended for weighing and sampling instruments, polariscopes, supplies for laboratories, etc., will not be an annual expense except as far as may be necessary to furnish new instruments or apparatus to replace those injured or worn out.

It should be borne in mind that the Government is obliged to have all the sugar weighed by Government weighers, and to throw all the safeguards and checks around the payment of a bounty of \$10,000,000 requires the same system that is necessary in the collection of a like amount of

taxes.

The same oversight is to be taken of factories where sugar is produced upon which bounty is to be claimed, as is taken in the case of tobacco factories, eleomargarine factories, etc., where revenue is collected.

The bounty will be paid from the Treasury to the individual through the same general channel and surrounded by the same checks as where money is collected from individuals and paid into the Treasury.

WHEN THE ACT TOOK EFFECT.

The first question that arose in making arrangements for carrying out the law was as to the time when the provisions of the act relative to bounty went into effect.

The act itself stated that the provisions thereof, relative to the payment of the bounty, should take effect on the 1st day of April, 1891.

The question was submitted to the Attorney-General whether the bounty was payable on maple sugar made on and after April 1, 1891, and before July 1, 1891. It was decided that it was not intended by Congress to make the bounty payable on sugar produced prior to July 1, 1891.

WHO ARE SUGAR PRODUCERS.

If a planter or farmer sells the cane which he has raised, or the sirup which he has produced, at any period before the manufacture of sugar is completed, he will have no right to the bounty on the completed product. The party purchasing such cane or sirup and making the sugar will be entitled to the bounty upon compliance with the requirements of the regulations.

If, however, the planter or farmer takes his cane or sirup to a sugar factory and has it made into sugar for his own account, retaining ownership and paying to the factory a toll for the manufacture, he is then

the sugar-producer and entitled to the bounty.

The central factories which work sirup into sugar, on contract for other parties who produce the sirup and retain ownership, are treated and considered as a part of the sugar factory of the licensed sugarproducer and are subject to the same rules and regulations in regard to notices, books, etc.

SUGAR FROM SUGAR CANE.

The following is the number of persons intending to manufacture sugar from sugar cane during the present fiscal year, under the provisions of the bounty act, and the estimated amount of sugar which they propose to produce, as stated in their applications:

† Not stated.

The beet-sugar industry in the continental countries of Europe has grown within recent years to great dimensions, so that now the production of beet sugar in the world exceeds that of cane. The improved methods of manufacture and the protective system established in those countries and the payment of bounties to beet-sugar manufacturers on exporting their product have produced this result.

The bounty granted to the manufacturers of sugar under the act of October 1, 1890, the admission free of duty of beet sugar machinery until July 1, 1892, and the encouragement given by the Department of Agriculture in the experiments for the benefit of farmers, and the aid given by different States will doubtless have the effect of stimulating the industry in this country.

In 1887 we produced in this country from the sugar beet 600,000 pounds of sugar, in 1888 about 4,000,000 pounds, in 1889 about 6,000,000 pounds. In 1890 three factories in this country (two in California and one in Nebraska) produced about 8,000,000 pounds. Three additional factories have been established during the past year, and it is estimated that their production this year will be about 25,000,000 pounds.

SUGAR FROM SORGHUM.

The following is a list of producers of sugar from sorghum cane who have made application for license, with the number of acres planted and estimated production as given in their applications:

^{*} License issued but party proposes to make no sugar for bounty.

Sugar is obtained from sorghum by the same method as from the sugar cane. Its cultivation in this country for sugar-making purposes has been limited.

The quantity of sugar made last year by the applicants for license in Kansas, in which State most of it is made, was 1,132,044 pounds.

The act of March 3, 1891, making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1892, contains the following provision:

That any manufacturer of sugar from sorghum may remove from distillery warehouses to factories used solely for the manufacture of such sugar from sorghum, distilled spirits in bond free of tax, to be used solely in such manufacture of sugar from sorghum; that all distilled spirits removed as herein authorized shall be of an alcoholic strength of not less than one hundred and sixty per centum proof, and may be removed, stored, and used in the manufacture of sugar from sorghum, and when so used may be recovered by redistillation in the sugar factory of such manufacturer under such bonds, rules, and regulations for the protection of the revenue and the accomplishment of the purposes herein expressed as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe.

Regulations have been issued by this office governing the withdrawal from distillery warehouses, free of tax, of distilled spirits to be used in the manufacture of sugar from sorghum, pursuant to this provision. The sorghum manufactories have not taken advantage of this provision the present season. The use of alcohol, free of tax, by manufacturers of sugar from sorghum for the purpose of separating the gummy matter from the sorghum juice promises to be of great advantage to this industry. Recent experiments made in this direction by the Department of Agriculture show that the yield of sugar from sorghum cane will be about doubled by the new process.

Total	•••••		4, 906	613, 376, 380

The above estimate of production was made by the producers early in the season, and is considerably in excess of what may be expected. In making their estimate for the year the producers naturally placed their figures high. It is what they hoped to make if all conditions were favorable. The production in Louisiana last year, which was larger than usual, was 436,056,926 pounds, as reported by applicants for license, and the prevalent opinion is that the coming crop will not be any larger.

The production this year by licensed producers will probably not be

in excess of the following estimate:

Cane sugar: Pounds. Louisiana 450,000,000 Texas 12,000,000 The sugar in th	Cane sugar:	Pounds.
Texas	Louisiana	450, 000, 000

Estimating that the beet and sorghum sugar will test 90° or over, by the polariscope, and be entitled to the bounty of 2 cents per pound, and that two-thirds of the cane sugar will test 90° and over, and one-third between 80° and 90°, and that one-twentieth of the maple sugar will test 90° and over and the rest between 80° and 90°, the amount of bounty to be paid for the production of the year ending June 30, 1892, will be as follows:

ESTIMATE OF BOUNTY TO BE PAID.

On cane sugar On beet sugar	500, 000
On sorghum sugar Ou maple sugar	40,000
Total	\$9,628,750

STATE BOUNTIES. -

In Kansas the State pays a bounty of three-fourths of a cent a pound on sugar made from beets, sorghum, or other sugar-yielding cane or plants grown in the State; the sugar to polarize at least 90°, the amount having been reduced from 2 cents a pound by a recent act (act of March 4, 1891). The law provides that the expenses of branding the

packages and of making the analysis shall be paid by the persons receiving the bounty. All property of sugar factories is exempt from

taxation until 1895.

In Utah the Territorial law (act of March 12, 1890) gives a bounty of 1 cent a pound for the years 1890 and 1891 on sugar made from sorghum, beets, or other sugar-bearing plants grown in Utah; not more than \$15,000 to be drawn each year. No bounty shall be paid upon sugar unless the corporation, firm, or person claiming it shall have first erected a plant for its manufacture, costing not less than \$200,000, and having a capacity of manufacturing 15 tons of sugar per day.

The claimants for bounty are required to pay the cost of carrying out

the law.

The State of Nebraska, by the act of legislature of March 19, 1889, "An act to provide for the encouragement of the manufacture of sugar and paying a bounty therefor," authorized the payment of a bounty of 1 cent per pound upon sugar made from beets, sorghum, or other sugar-yielding cane or plants, but the law was repealed by the legislature of 1891.

RECOMMENDATION AS TO AMENDMENT OF THE LAW.

The law makes no provision for transferring a license, and no provision for issuing a license upon papers filed after the 1st of July of each year.

A case of this kind arose: A firm filed a notice and gave the required bond prior to the 1st of July, and a license was duly issued. Subsequently, after the 1st of July, the firm was dissolved, one member retiring, and a new member took his place. The question arose whether the new firm would be entitled to the bounty upon giving a new notice and filing a new bond. This office held that there was no authority to issue a license to the new firm; that the business must be continued in the name of the old firm and the bounty paid to it; that members of the old firm and the sureties on their bond must sign papers to be filed in this office consenting to this, and continue their liability. Such contracts may be made by the parties between themselves as to indemnity, disposition of the bounty, etc., as they consider necessary for their own protection.

I recommend that the law be amended so as to provide for the transfer of a license or the issuing of a new license to successors or legal representatives, in case of the death of a party who has obtained a license or a change of firm or transfer of business occurring after the

1st of July and after a license has been issued.

CONSUMPTION OF SUGAR IN THE UNITED STATES.

This country is a large consumer of sugar, the people using more per capita than those of any other country, except England.

In the last fiscal year we imported 3,483,477,222 pounds of sugar of

the value of \$105,728,216, and produced 512,261,530 pounds.

Of the amount imported 661,448,057 pounds were beet sugar of the value of \$18,318,269, and 2,822,029,165 pounds cane sugar of the value of \$87,409,947.

The amount of sugar produced in the United States is about one

eighth of the amount consumed.

ederal Reserve Bank of St. Louis

CHEMICAL AND MICROSCOPICAL LABORATORY.

From November, 1886, when this laboratory was established under the act of August 2, 1886, "defining butter," etc., to July 1, 1890, there had been a total of 479 samples of various articles received and analyzed, but during the past year 754 samples have been received. This large increase in the number of samples submitted for analysis arises from the free fortification of sweet wines, under the provisions of sections 42 to 49 of the "act to reduce revenue," etc., approved October 1, 1890, which makes it necessary to accurately ascertain the alcoholic and saccharine strength of such wines owing to the limitations prescribed in the law. This act made no provision for an increase in the laboratory force, although the work of a scientific nature called for by several of its provisions, whose enforcement belongs to this office, largely increased the work to be performed in the laboratory here. The consequence is that there is now nearly a year's work on hand.

The following table shows the variety and number of samples received each month, and the variety and number analyzed and on hand

awaiting analysis at the end of the fiscal year:

Table I.—Variety, Number of Samples Received, Analyzed, and on Hand, 1890-'91.

	-	1890.						1891.

On hand July 1, 1891				2			54	60	118	139	35	13	421

^{*} On hand July 1, 1891.

In addition to the samples received from officers of this Bureau, samples have been submitted for investigations and analysis by other Bureaus of this Department.

An investigation was made of the composition of the paper used for bank notes, etc., for a special committee appointed by the Secretary of

the Treasury.

[†] A portion on hand July 1, 1891.

The provisions of the act of October 1, 1890, relating to sweet wines, have also added to the work of the laboratory in the preparation of instructions for taking samples of sweet wines for the determination of the alcoholic strength and the sugar contained in such wines. There was also required the calculation of whole per cents tables indicating the number of wine gallons of brandy to be added to sweet wine to produce a given alcoholic strength within the limits prescribed by law.

Regulations for carrying into effect the above sections of the act have also been prepared and have received the approval of the Secretary of the Treasury, and the necessary instruments to be used in testing sweet wines have been purchased in conformity with the law governing such

purchases.

As the law (section 43) prescribes Balling's saccharometer as the instrument that may be used to ascertain the saccharine strength of sweet wines after the due evaporation of the contained alcohol, and restoration to original volume, it was deemed advisable as a saving in time and materials to use this instrument not only for the purpose specified in the law, but as a means of approximately determining the alcoholic strength of the wine, by first using the saccharometer as a specific gravity spindle. The method devised by Tabarie for the determination of alcohol in presence of fixed matters with tolerable accuracy could be followed, and one set of instruments and one evaporation suffice for both the alcohol and sugar determinations. method the specific gravity of the original liquid is first observed, a measured quantity is then boiled sufficiently long to volatilize all the alcohol, and the "extract" subsequently made up with water again to the exact original volume, the dilution being made at the same temperature as the original, 60° F. being taken as the standard temperature. Then the specific gravity of the original liquid divided by the specific gravity of the extract is equal to the specific gravity of the alcohol evaporated. From this last figure the proportion of alcohol can be ascertained by reference to suitable tables. When wine is examined by this method the estimation of alcohol has a tendency to be low, but the process is extremely simple and the results approximate closely to (Allen's Commercial Organic Analysis, second edition, vol. 1, pp. 71–72).

Instead of instructing the officers and furnishing them with copies of elaborate alcohol tables and the corresponding specific gravity for each tenth degree of the internal revenue Balling saccharometer in order to make the calculations called for by the above equation, as they now have to do under the revised regulations, it was considered less complex to instruct them to subtract the reading of the spindle before from that after dealcoholization and refer to a table for the corresponding percentage of absolute alcohol by volume for the difference obtained. table was calculated by taking some ten to twenty different specific gravities at various points on the saccharometer scales, and, using the above equation, there was obtained the various specific gravities for the alcohol evaporated for a given difference in saccharometer readings. The mean of these calculations was then taken and this result stated in The elaborate tables of W. Schultze, showing the quantity the table. of extract by weight corresponding to each increase of one-tenth in the fourth place of decimals of the specific gravity at 15° C. (59° F.), were employed (Dingler, Polytechnisches Journal, 1878, 230, p. 421), and the alcohol tables of Dr. Thomas Stevenson (London, second edition, 1888).

It was not the intention of this office to allow the gauger or other officer who supervised the fortification to be the sole judge where wines are presented for fortification that approach the limits prescribed by law, but to subject such wines to accurate chemical analysis by skilled chemists. For this reason certain limits were placed in the regulations, and when an officer in the course of his work obtained, by the approximate method given, results approaching these limits, he was to send a sample to this laboratory for careful analysis.

As a matter of fact nearly every fortification that was carried out during the past season in California is represented by one or more sam-

ples received in this laboratory.

A large number of the samples of wines have been analyzed by the indirect method prescribed in the regulations and also by the more elaborate and accurate method of weighing on a delicate analytical balance. The results obtained are stated in the following Table II:

Table II.—Analyses of Fortified Sweet Wines. Comparison of Direct and Indirect Alcohol Determinations.

Table II.—Analyses of Fortified Sweet Wines. Comparison of Direct and Indirect Alcohol Determinations.

ANGELICA.

			Direct method. Indirect method.						Differences between indirect and direct methods.											
Scrial number.	Date of fortification.	Specific gravity at 15.56° C.	Equal to per cent. extract.	Per cent. alcohol by volume.	Per cent. total solids.	Per cent., reducing sugars as glucose.	Temperature noted, original liquid, degrees F.	Reading of instru- ment.	Corrected reading at 60° F.		Temperature noted, extract, degrees F.	Reading of instru- ment.	Corrected reading at 60° F.	Equal to per cent.	Difference be- tween readings.	Equal to per cent, alcohol by volume.	Specific gravity, original liquid.	Per cent. "sugar," original liquid.	Per cent. alcohol, by volume.	Per cent. 'sugar," or extract.

It will be seen in the summary of the above table the average of the 101 samples analyzed shows an alcoholic content of 1.210 per cent. less by the indirect than by the accurate direct method. When it is considered that this average represents an error of adjustment on the hydrometer spindles not exceeding 41 millimeters the accuracy of the indirect method is remarkable. The readings of the three hydrometers used in these determinations were first corrected for instrumental errors (according to the data furnished by the Office of Weights and Measures of the U.S. Coast and Geodetic Survey), and the solutions were made up at various temperatures as a counter check on the table of temperature corrections published in the regulations. The difference between the amount of alcohol by volume contained in the distillate and that in the original liquid would be slightly greater than that found by the indirect method, i. e., the method of ignoring the weight of the original liquid and taking the percentage of alcohol to be that found in an equal volume of the distillate gives plus errors, amounting in some cases to as much as 3.5 per cent. All determinations of alcohol, like other liquids, are of necessity made by weight and the percentage by volume found by calculation.

The ascertaining of the specific gravity of a liquid is a method of determining the weight of a certain volume of that liquid compared with the weight of the same volume of a standard liquid, generally distilled water, at a certain standard temperature. (See page CLIV, Report Commissioner Internal Revenue, 1888.) Although section 3249, Revised Statutes, seemingly defines the standard of alcoholic strength in proof spirits as being at the standard temperature of 60° F. (15.56° C.) it makes no mention of the fact that water at its maximum density, 39.2° F. (4° C.), is what the stated volume at 60° F. is compared with. For general convenience the table of alcoholic strength by volume contained in the revised sweet-wine regulations has been calculated with the equal volumes taken at 60° F., and not the volume of alcohol at 60° F. compared

with the equal volume of water at 39.2° F.

In Table III will be found tabulated the results of the analyses of all wines received and analyzed in this laboratory during the past fiscal year.

FI 91----31

This office not being provided with a physical laboratory for the proper testing of hydrometers and the standardization of weights, flasks, and tubes, arrangement had to be made with the Superintendent of the Coast and Geodetic Survey to have all such work carried out in the physical laboratory connected with the Office of Weights and Measures. of his Bureau. It is hardly necessary to say that this class of work involves the greatest accuracy of manipulation and a large amount of time to properly perform the various comparisons at controlled temperatures. For the saccharometers and alcoholometers to be hereafter issued by this office, the necessary correction to be applied for every 24 per cent. readings of their stems will be furnished by the Coast Survey after direct comparison with the standard solutions and instruments now in their posses-For the manufacturers of these instruments sets of standard ones have been supplied so that it is expected that the hydrometers furnished will be as accurate as it is possible to make such instruments. As soon as the necessary comparisons can be made by the Coast Survey after the instruments are received from the manufacturers, a sufficient stock will be kept on hand in this laboratory, and the unavoidable delays hitherto occasioned in filling requisitions from collectors will, it is hoped, The most serious delay has been caused in obtaining a satisfactory model of a portable still for the alcoholic determinations in sweet wines (in accordance with the provisions of the revised regulations), and although one of the largest chemical supply houses in the country has the contract for furnishing the necessary outfits, they have not yet been able to make a still that comes up to the requirements of the specifications.

OLEOMARGARINE.

Of the fifty-one samples received from revenue officers for chemical analysis twenty-six proved to be oleomargarines and the remainder butters. The butters were in most cases exceedingly rancid; some of the officers had evidently considered that rancidity was presumptive of the presence of added fats, overlooking the well known fact that manufactured oleomargarine will keep for a long time without undergoing rancid fermentation, whereas poorly worked butters rapidly decompose, and will even undergo putrefactive fermentation if kept long enough. Samples of oleomargarines have been kept in the laboratory refrigerator for over 2 years without becoming rancid, although at the end of that time they had lost their butter flavor and tasted and smelt like suet fat. These were of the ordinary grades, and retained until they were called for as evidence in trials, and no especial precautions were taken to exclude the air.

An interesting report of the United States consul at Rotterdam has lately been issued by the State Department, showing the vast strides made in the production and consumption of oleomargarine in the Netherlands, oleo oil to the value of \$10,000,000 being imported from the United States during the calendar year 1890, and an estimated total output of oleomargarine of 165,000,000 pounds being produced during the same period, of which nearly 128,000,000 pounds were exported to England, Belgium, France, Spain, Portugal, Sweden, Norway, Denmark, and the Dutch, English, and Portuguese colonial possessions. The farmers found that this large output of artificial butter did not interfere in the least with those of them who made a high grade of butter, which commanded good prices the year round, and those who only owned a few cows had no difficulty in making contracts with the oleomargarine fac-

tories to take all the milk their cows would yield. The sale of oleomargarine in Europe, as in this country, was among the poorer classes, who prefer a palatable fat to a rancid one.

MISCELLANEOUS SAMPLES.

Several samples of so-called ciders have been analyzed, which proved on examination to be free from any admixture of the fermented juice of expressed apples, and to consist of varying mixtures of water, tartaric acid, coloring matters, with more or less alcohol, and certain flavoring matters according as peach, cherry, or orange cider was desired to be manufactured. Although a well fermented apple cider contains more alcohol than the strongest ales, its manufacture and sale are not under internal-revenue laws, yet the manufacture of mixtures of alcohol or other distilled spirits flavored or colored to imitate certain alcoholic beverages is subject to tax.

Two samples of a mixture of rock candy and diluted distilled spirits were analyzed, and the manufacturers held to be rectifiers under the

law.

Samples of high-colored recently produced distilled spirits continue to be received for analysis. In most cases caramel or other artificial coloring matter is found on examination to be present, arising from such material being introduced into the barrels, presumably before they are filled at the cistern room of the distillery. Of course in the case of rectified goods, where the rectifier is at perfect liberty to introduce what coloring matter or flavoring extracts he pleases, abnormal whiskies may be expected, but they should not be found on distillery prem-The introduction of foreign matter into distilled spirits in which such matter is more or less soluble tends to a greater or less extent to increase the specific gravity of such spirits, and as a consequence the reading of the alcoholometer is below the existing alcoholic contents. This is well exemplified in an exaggerated form in the case of sweet wines (see Tables II and III, ante), where there may be as much as 26 per cent. of alcohol by volume in the wine, which the alcoholometer would not only fail to indicate, but would apparently show that there was none at all present. No hydrometer can be made to indicate the composition of three liquids, but is restricted to two, one of which is water, as a general thing, and the other a variable quantity of the substance whose percentage presence has previously been determined by careful analysis, and consequently whose resulting specific gravity is known. Where a third substance is present in a solution it must be eliminated before a hydrometer can be used to indicate the proportions of the other two. In the case of sweet wines, cordials, artificially colored spirits, etc., the evaporation of the liquid in a closed vessel with condensation of the vapors given off on heating readily separates the volatile matters, ethers, alcohols, and water from the non-volatile coloring matters, sugars, mineral salts, etc., and permits of the determination of the alcohol present in the distillate by means of a hydrometer, and by suitable calculation of the amount in the original liquid.

The paper used for printing revenue stamps has frequently been examined and the admixture of wood pulp detected, when present, readily under the microscope by using a moderate power and staining the well macerated paper (previously boiled in dilute caustic alkali solution and washed with dilute acid and water) with potassium iodide, when the characteristic cellular structure of the wood fiber assumes a purplish hue; as such admixture is contrary to the terms of the contract, when

such adulterated paper was found the contract was annulled; the deliveries under the new contract made in consequence of this examination

have been so far free from such adulteration.

The first sample received under the provisions of the act "to prevent the manufacture or sale of adulterated food or drugs in the District of Columbia," approved October 12, 1888, has been analyzed, and the matnow in the hands of the Office State I have the honor to be, very respectfully,

JOHN W. MASON, ter is now in the hands of the United States attorney.

Commissioner.

Hon. CHARLES FOSTER, Sccretary of the Treasury.

REPORT OF THE CHIEF OF THE BUREAU OF ENGRAVING AND PRINTING.

TREASURY DEPARTMENT,
BUREAU OF ENGRAVING AND PRINTING,
Washington, D. C., October 16, 1891.

SIR: I have the honor to submit the following report of the operations

of this Bureau during the fiscal year 1891:

The result of the year's operations is the largest delivery of securities, stamps, and miscellaneous work of any year during a period of 14 years. There were completed and delivered during the year 11,233,999 sheets of United States notes, Treasury notes, gold and silver certificates, bonds, and national bank notes, having a face value of \$308,965,930; 33,500,696 sheets of internal revenue and customs stamps containing 927,934,984 stamps, and 1,655,686 sheets of drafts, checks, certificates, etc., besides a large amount of miscellaneous work for the various departments of the Government. There were also received from the Commissioner of Internal Revenue, and returned to him after being imprinted with the words "Act of March 1, 1890," 723,663 sheets containing 24,522,669 stamps for tobacco and snuff.

When the estimates for this year's work were submitted in October, 1889, it was anticipated that the deliveries would be nearly 15 per cent. greater than for the year 1890 and nearly 8 per cent. greater than for 1889 in which were made the largest deliveries from 1877 to that time. The result shows that the deliveries are 27 per cent. greater than those for 1890 and 18 per cent. greater than those for 1889. This large amount of work has not been accomplished without extra effort on the part of nearly every one connected with the establishment. During the greater part of the year it was necessary to work the plate printers and other employes connected with their work, constituting the largest part of the force of the Bureau, $2\frac{1}{2}$ hours, and from March 19 to May 31, 1891, $3\frac{1}{2}$ hours beyond the regular hours daily, commencing work

during this latter period at 7 a.m. and closing at 6.30 p.m.

During the spring of 1891 the demand for small notes, under the Act of July 14, 1890, and the Act of August 4, 1886, was so great that, taken in connection with the steadily increasing demand for internal revenue stamps, it became apparent that the facilities of the Bureau, even with the additional space which would be afforded by the new wing when completed, would not be sufficient for the execution of the work within the regular hours. It became necessary, therefore, to devise some method of performing the work that would enable the Bureau to do this. After a very full and careful examination into the matter I became satisfied that the method of printing internal revenue stamps from steel plates engraved in relief, while affording ample protection to the Government, would enable me to do the printing more rapidly, and would thus secure the prompt filling of orders without the necessity of working overtime. I accordingly recommended that the internal revenue stamps known as "strip tobacco stamps," of denominations from 1 ounce to 16 ounces inclusive, be executed by this method, and, upon submitting samples of this work to the Secretary and to the Commissioner of Internal Revenue, they were approved, and a large quantity of the stamps of the denominations of 2 ounce and 4 ounce has been printed by this method, delivered to, and issued by the Commissioner. As rapidly as the engraving of the other denominations of strip tobacco stamps can be finished they will be printed by that method also. It is estimated that the difference in cost between the two methods will result in a saving of \$156,941 a year.

Work on the addition to the building, recently authorized by Congress, was commenced March 19, 1891, and was pushed forward as rapidly as the weather would permit. The first part of the building was completed and turned over to me July 1, 1891, and the entire building was completed and turned over to me August 29, 1891. As rapidly as portions of the building were turned over I had new presses placed therein, and there are now in operation in the new wing 126 hand presses. Since I assumed charge of the Bureau (July 1, 1889) I have added 149 hand presses to its plant. With these additional presses, and the relief afforded by the change to relief printing on the tobacco stamps, I am now able to do all the work required within the regular hours, and the force of the Bureau has, since October 1, 1891, been working but eight hours daily.

The large increase in the work of the Bureau has necessitated a corresponding increase in its force. The number of employés has increased from 1,074 at the close of 1890 to 1,246 at the close of 1891, an increase of 16 per cent. The principal increase was in plate printers and assistants, there having been 60 printers and 61 assistants employed during

the year.

The financial statement for the year is as follows:

Appropriations for the year:	
- Salarias	\$17, 450, 00
Compensation of employés	370, 000, 00
Plate printing	525,000.00
Plate printing Materials and miscellaneous expenses	178, 000. 00
Total	1,090,450.00
Repayments were made to credit of these appropriations on account of engraving and printing the Treasury notes and of materials furnished the several departments, divided as follows: Salaries \$1,015.30 Compensation of employés 55,740.64 Plate printing 81,059.25	
Materials and miscellaneous expenses	
	\$177, 249. 25
Aggregate available	1, 267, 699. 25
Expenditures during the year:	
Salaries Compensation of employés	17, 208. 68
Compensation of employés	425, 533. 95
Plate printing	605, 483. 73 217, 036. 93
Total	1, 265, 263. 29
Unexpended balances:	
Salaries	1, 256. 62
Compensation of employés	206.69
Plate printing	
Materials and miscellaneous expenses	397.13
Total	2, 435. 96

The expenditures of 1891, as compared with those of 1890, show an increase of 25 per cent., while the increase in the amount of work delivered is 27 per cent. There was added to the plant of the Bureau

during the year new machinery to the value of \$12,257.54.

I desire to earnestly renew my recommendation that an appropriation be obtained from Congress for the erection of an outbuilding for the accommodation of the Bureau's ink mills, laundry, carpenter shop, stable, and for storage. The necessity for this building has been so often shown in the annual reports of this Bureau and in communications to Congress that it is hardly necessary to repeat it here. beg to call attention to the great need of an appropriation for painting the old portion of the Bureau building, both the woodwork and the The building has not been painted for 10 years, and the brickwork. woodwork is now in such a condition that unless it is covered with a fresh coat of paint it will rot from exposure to the weather.

The result of the year's operations, as shown above, is especially gratifying when the fact is considered that there were many difficulties to contend with; and I must acknowledge here the uniform courtesy and cordial support I have received from yourself and your Assistant Secretaries. My thanks are also due to the subordinate officers of the

Bureau for faithfulness in the discharge of their several duties.

Respectfully submitted.

WM. M. MEREDITH. Chief of Bureau.

Hon. CHARLES FOSTER, Secretary of the Treasury.

Consular drafts registered	1, 31	1

The foregoing statement omits mention of a very large amount of official work principally of a legal nature, and more especially requiring the personal consideration of the Comptroller, which does not admit of systematic classification and detailed report, and yet has occupied much time and care, such as, e. g., the investigation of and decision upon legal points arising in the adjustment of accounts; the examination of and decision upon applications for the issuing of duplicates in lieu of bonds and other securities lost or destroyed, and also for the transfer of the same; the examination of powers of attorney for the collection of money due to creditors of the United States; decisions upon the rights of persons claiming to be executors, administrators, or heirs of deceased claimants, to receive money due from the United States; the examination of official bonds; answering calls for information made by Congress, the Departments, and private persons; receiving and examining emolument returns, and other work of a miscellaneous character.

SUITS AGAINST THE UNITED STATES.

As directly pertaining to the duties of this office, I respectfully invite attention to the act of Congress of March 3, 1887, entitled "An act to provide for the bringing of suits against the Government of the United States" (24 Stat., 505). The section of the act to which I wish to invite attention provides:

That the district courts of the United States shall have concurrent jurisdiction with the Court of Claims as to all matters named in the preceding section where the amount of the claim does not exceed one thousand dollars, and the circuit courts of the United States shall have such concurrent jurisdiction in all cases where the amount of such claim exceeds one thousand dollars and does not exceed ten thousand dollars. All causes brought and tried under the provisions of this act shall be tried by the court without a jury.

The result of this extended jurisdiction has been the bringing of many suits in the several district and circuit courts of the United States and Territories against the United States. They arise in every conceivable form, based upon every conceivable cause of action, and are prosecuted alike by officers who are receiving a salary from the Government and those who are seeking to recover, in many cases, unjust claims against it.

Prior to the passage of this act the accounting officers had but little trouble in keeping in line with the law as it is found in the statute and as interpreted by the Supreme Court and the Court of Claims, but with all the district and circuit judges of the States and Territories added, a sharp conflict of opinion can now be found upon the leading statutes on the payment of fees, salaries, and the like to Government This conflict of opinion is extremely embarrassing to this The desire is to administer the laws in their letter and spirit, and to the entire satisfaction of the officials who are interested, and to the Government, which is to pay the bills. This can be accomplished when there is no conflict of opinion as to what the statute means. The whole trouble arises from the fact that the courts do not understand and interpret the statutes alike. A few illustrations upon this point will make my meaning clearer than any words I can use.

It was held in the Wallace case (116 U.S.R., 398) that a charge for docket fees was proper when made by a circuit court commissioner, who was directed by the court to keep a docket. This was contrary to the holding of the accounting office for all time, so far as any evidence The attention of Congress was invited to the decican be discovered. sion, and in the act of August 4, 1886 (deficiency bill, 24 Stat., 274), that body passed a law declaring that "docket fees should not thereafter be charged." The question came before the courts whether or not the legislation was general, or only had application to the disbursement of the appropriation contained in the bill then under consideration. commissioners contended that the act applied to the single appropriation made for that year, while the accounting office contended that it was general legislation, and that after the passage of the act no docket fee should be charged.

In the following cases the construction given by the accounting office was upheld by the Federal courts:

Thornley vs. United States (37 Federal Reporter, 762); Strong vs. United States (34 Federal Reporter, 17); McKinstry vs. United States (34 Federal Reporter, 446); Goodrich vs. United States (42 Federal Reporter, 392); Faris vs. United States (23 Court Claims, 374); McKinstry vs. United States (40 Federal Reporter, 819).

On the other hand, the following cases held that the legislation was special, and had application only to the appropriation then before Congress, to wit:

Bell vs. United States (35 Federal Reporter, 889); Rand vs. United States (36 Federal Reporter, 675); Hoyne vs. United States (38 Federal Reporter, 543); McDermott vs. United States (40 Federal Reporter, 217); Phillips vs. United States (33 Federal Reporter, 164).

This matter was finally taken to the Supreme Court, which court held that the construction given by the accounting office was correct. took years to bring about that interpretation, and the controversy that attended the administration of that law upon a point so trifling, involving in the aggregate a large sum of money, led to a great deal of criticism and unfriendly feeling towards the Treasury Department. particular statute is but one of many where there is a like diversity of holding among the Federal courts.

The same diversity of opinion appeared in regard to complaints and acknowledgments of recognizances before circuit court commissioners, and in regard to the accounts of supervisors of elections, and the fees that they should charge and be paid. Taking the law in its application to the Treasury Department, it may be said that it creates confusion among officials and among those having claims against the Government, and requires almost daily explanation why the holdings are being changed from time to time. The necessity for a change of ruling grows out of the fact that the courts constantly change their holdings.

These illustrations, with many more that might be cited, are sufficient to show how utterly impossible it is for this office to follow the Federal

courts in the adjustment of commissioners' accounts.

The courts, under this law, have uniformly held that the Government may be sued in the first instance. That is to say, a clerk or a marshal, a district attorney, or a commissioner, after he has earned his fees, need not present his account at the Treasury Department for payment before suit is brought, and thus mulet the Government in costs before his accounts are passed upon. This has been done time and time again, and is being repeated almost every day, notwithstanding the provisions of section 856 of the Revised Statutes. Such proceedings render it very difficult for the accounting office to prevent duplicate payments, which have in several cases been made. On the other hand, judgments have been obtained in the courts by officials after they had been paid at the accounting office.

In one instance, recently, while suit was pending, an account duly certified was presented and paid; subsequently judgment was obtained for the same services and was in due course also paid. This double payment was soon discovered, however, and the money recovered. Another case: A clerk of a United States court brought suit and obtained judgment for several hundred dollars on account of disallowances and suspensions made during the calendar year in which he had already been allowed and paid the maximum compensation fixed by law, and it was only by the most rigid scrutiny of his accounts that the fact was discovered and the double payment prevented. This office has adopted a system of checks, which it is hoped will reduce to the minimum the danger of double payments, but the only safety is in the repeal of the If it should appear unwise to repeal the law, it should statute itself. be so amended, at least, that Government officials shall be required to present their claims to the accounting office for adjustment and payment before suit is brought. Then, and not till then, they might safely be permitted to sue in the Court of Claims if not satisfied with the ad-The official would then be obliged to make it affirmatively appear in court that the item had been presented to the accounting office, and rejected by that office, before his case could be heard. In that way duplicate payments would be prevented.

LIMITATIONS.

In my last report I invited attention to the propriety of adopting some limitation as to the time when claims against the Government should be presented for payment, but no action looking in that direction was taken by Congress. Since that time, however, the Court of Claims, in the case of Charlotte A. Waddell, executrix, etc., vs. United States (25 C. Cls. R., 323), has held that the accounting officers have no right to pay a "stale claim"—and that the Secretary of the Treasury is without power to transmit it under the Bowman Act—holding that a stale claim is one that has not been presented for a long period of time, during which time the claimant has slept upon his rights. This case this office has adopted as enunciating the law correctly on the subject. Claims, therefore, that are twenty years past due, unless they are in the

nature of a trust, are held to be barred and are not allowed. The court says:

It has often been said that there is no statute of limitations applicable to claims required to be presented and examined by the accounting officers of the Treasury Department, and that is undoubtedly so. But there is an unwritten law recognized by courts of equity and admiralty in which no statute of limitation is applicable against entertaining and enforcing stale claims. (Speidel vs. Henrici, 120 U. S. R., 387, and numerous cases there cited; Willard vs. Dorr, 3 Mason C. C. R., 161), and that law the accounting officers may rightly invoke and rely upon.

A stale claim is one that has not been presented for payment for a long period of time, during which the claimant has slept upon his rights, and thus created a

A stale claim is one that has not been presented for payment for a long period of time, during which the claimant has slept upon his rights, and thus created a presumption that the claim was never an honest and just one, and that he has been waiting until it was forgotten by the alleged debtor, and all evidence against it is lost or destroyed. Courts of equity usually follow the law and adopt the statutes of limitation as fixing the period beyond which delay requires explanation, and which, unless satisfactorily accounted for, will constitute a bar to demands. We see no reason why the accounting officers may not rightly adopt the same rule.

To the end, however, that there may be no misunderstanding on this subject, I respectfully recommend that the attention of Congress be

again invited to it.

To adopt some reasonable limitation is but to follow the practice of the civilized world. I know of no State in the Union but what has a limitation law, and I know of no State that suffers itself to be sued by any of its citizens. If, therefore, any one holding a claim against the Government is permitted to sue in the courts (he must bring suit within a reasonable time, which is fixed by law at a given number of years,) why should it not follow, if he has a demand against the Government and elects to present it to the accounting officers for payment, he should present it within such a reasonable time as would enable the official to determine whether or not the claim is just? Should he be permitted to hold his claim until his remedy in court is barred, and then for the first time present it to the accounting officers for payment?

DOUBLE COMPENSATION.

Section 1763, Revised Statutes, is as follows:

No person who holds an office, the salary or annual compensation attached to which amounts to the sum of two thousand five hundred dollars, shall receive compensation for discharging the duties of any other office, unless expressly authorized by law.

The fair reading of this statute must leave the impression that Congress intended that when a person holds an office, the salary or annual compensation of which amounted to \$2,500, he was well served, and that he should receive no additional compensation for discharging the duties of any other office, unless expressly authorized by Congress. However natural this interpretation may seem, the departure from it has been so great that it is now held that an official may hold two or more distinct offices and draw the salary for each. The Attorneys-General themselves do not agree upon the question. Attorney-General Black held (9 Op., 127) as follows:

My conclusion is that no officer of the Government having a salary fixed by law, nor no (any) other officer whose compensation amounts to \$2,500 per annum, can receive extra pay for any service whatever, whether it be within the line of his duty or outside of it. Nor is it possible for any such officer to receive the salaries of more than one office, no matter under what circumstances be may have performed the duties of more than one.

This opinion is indorsed by several other Attorneys General.

On the other hand several Attorneys General, who stand equally high in the profession, have held that this section and the two succeed-

ing sections do not forbid holding two offices at the same time. They say:

These sections are intended to fence against arbitrary extra allowances in each particular case; but do not apply to distinct employments with salaries or compensation affixed to each by law or regulation.

The plain meaning of this seems to be that an individual holding one office and receiving its salary shall in no case be allowed to receive also the salary of another office which he does not hold, simply on account of his having performed the duties thereof

The prohibition is against his receiving the salary of an office that he does not hold, and not against his receiving the salaries of two offices which he does legitimately hold.

This last opinion is concurred in by Attorneys-General Evarts, Cushing and Devens. The opinion by Attorney-General Devens is found in 15 Op., 306. His language is:

That the evil intended to be guarded against by these statutes, according to the construction given them, was not so much plurality of office as it was additional pay or compensation to an officer holding but one office for performing additional duties or the duties properly belonging to another. If he actually holds two commissions and does the two duties of the two distinct offices, he may receive the salary which has been appropriated to each office.

One part of this controversy has been settled by the Supreme Court in what is known as the Saunders case, which is reported in U. S. R., 120, p. 126, and was decided in January, 1887. Saunders was a clerk at the Executive Mansion during the last administration, and also a clerk to one of the committees of Congress at the same time, neither salary, however, amounted to \$2,500 per annum. The court held, after reviewing all the authorities bearing on the subject, that he was entitled to both salaries. This case, however, does not relieve the whole situation. It does not touch the question where the salary is \$2,500 or more, and leaves that still an open question.

In this connection I wish to state that under the act of Congress passed March 3, 1891, establishing a circuit court of appeals, the court for the sixth circuit, which by law will hold its sessions at Cincinnati, appointed the clerk of the circuit court for the eastern district of Michigan clerk of the circuit court of appeals for the said sixth circuit. This clerk took the oath of office, entered upon the discharge of his duties and has been paid for his services as clerk of the circuit court of appeals. When this clerk, however, comes to present his claim for services as clerk of the circuit court for the eastern district of Michigan, a serious question will arise, whether he can be paid or not.

The act of Congress of June 30, 1874 (18 Stat. 109, sec. 2), provides:

That every clerk of the circuit or district courts of the United States * * * shall reside permanently in the district where his official duties are to be performed, and shall give his personal attention thereto, and in case any such officer shall remove from his district, or shall fail to give personal attention to the duties of the office, except in case of sickness, such office shall be deemed vacant.

Just how this official can discharge the duties of the office of clerk of the circuit court of appeals at Cincinnati, and give "personal attention" to the duties of his office in Detroit, Mich., is difficult to see. If he does not "reside permanently in the district where his official duties are to be performed, and give personal attention thereto, his office shall be deemed vacant," is the substance of the law on the subject. Two bodies can not occupy the same space at the same time, nor can one body occupy two places at the same moment. This clerk can not be at Detroit, giving "personal attention" to the duties of his

office located at that place, and at the same time be at Cincinnati attending to the duties of his office as clerk of the circuit court of appeals. It is physically impossible to give personal attention to the

duties at both places.

This case, however, is not exceptional. There are many instances in which the same person holds three or more offices. The case of the clerk of the circuit court of the eastern district of Arkansas is one in point. The same person was clerk of the district court, and in 1889 received compensation as such, the sum of \$5,243.55; he was also clerk of the circuit court, and received compensation as such in the sum of \$1,047.75, and at the same time was circuit court commissioner, and his fees for the same period, paid to him by the United States, amounted to \$3,949.90, making an aggregate compensation of \$10,241.10. For the year 1890 he received as clerk of the district court \$5,434.65, as clerk of the circuit court \$2,095.54, and as circuit court commissioner, \$3,053, making an aggregate of \$10,583.19; and for the first 6 months of 1891, in the same capacities, he received an aggregate compensation of \$6,217.48.

The clerk of the circuit court of the northern district of Texas is also clerk of the district court and United States commissioner. The clerk of the district court of the southern district of New York is also a United States commissioner and clerk of the court of appeals, and many more cases might be cited of like character, but it is deemed unnecessary, the only object being to call attention to the fact, and to emphasize it, that, notwithstanding the statute above quoted, it is a common practice for one person to hold more than one office where the compensation of one of the offices amounts to the sum of \$2,500 per

annum.

It is not a question for the Treasury Department to determine how many offices one person may hold, or how many salaries he may receive; that question is entirely with Congress, but it is important that the compensation to be paid and the number of offices a person may hold should be clear and well defined to the end that illegal payments shall not be made.

In view of the premises I respectfully recommend that the attention of Congress be invited to this subject. There are also many cases where a United States commissioner is paid during the calendar year more than the sum of \$7,000, and in some cases the amount received by him will amount to more than \$10,000. Such payments appear to be excessive, in view of the service rendered, and it is respectfully suggested that a limit should be made to the amount that should be paid a United States commissioner for services rendered during a calendar year, and that limit should certainly not exceed the sum of \$5,000. No reason is known to exist why a commissioner or clerk should receive more than the judge of the court.

It must be remembered that these fees are almost wholly paid by the United States and not by the individual. In the figures above given, which have reference to the eastern district of Arkansas, the aggregate paid to the clerk was \$27,041.87; of this sum the United States paid \$25,743.23 and individuals paid \$1,298.64. About the same proportion is found to run through not only the other accounts mentioned but all clerks' accounts throughout the United States. In the case, however, of United States commissioners the fees are wholly paid by

the United States.

COLLECTION OF BALANCES DUE TO THE UNITED STATES.

I repeat the suggestions and recommendations contained in my last report on this subject, and respectfully invite your attention to the requirements of sections 3624 et seq, Revised Statutes, as to the collection of balances due to the United States; section 1766, Revised Statutes, as to withholding money found due to any person for his compensation who is in arrears to the United States, until such person has accounted for and paid into the Treasury all sums for which he may be liable; and the act of March 3, 1875 (18 Statutes at Large, page 481, chapter 149), providing for the deduction of any debt due the United States from any judgment recovered against the United States by such debtor.

Duties and obligations are devolved upon the accounting officers of the Treasury by the statutes referred to, a practical compliance with which is not possible under the system of account keeping of the Treasury Department. This is because the accounting officers charged with the duty of collecting balances due to the United States and withholding sums found due to persons who are indebted to the Govern-

ment are not in possession of the necessary information.

Accounts are kept by the Second, Third, Fourth, and Sixth Auditors and the Register of the Treasury, and there is no system of concentrating the balances on their respective books or of informing all the accounting officers regularly of the balances remaining on the books of such officers. For instance, a balance may be standing on the books of the Second, Third, Fourth, or Sixth Auditor against some person who has been in the Government service at some time and whose accounts were kept by some one of these auditors and the same person is again in the Government service in a different capacity, whose accounts in the latter capacity are kept by some other of the auditors or the Register of the Treasury or vice versa; balances may appear on the books of the Register of the Treasury of which the auditors have no official information, and thus balances may be and are paid to parties on the adjustment of accounts who are at the same time indebted to the United States on the books of some other bureau of the Department. The object of the statutes is impossible of accomplishment and the Government is a loser. Large sums are lost annually, which could and ought to be saved to the Government, for want of a system of reporting regularly all balances due to or from the United States, on any of the books of the Treasury, to the Secretary, for the information and assistance of the accounting The necessity for some such system is emphasized by the act of August 8, 1888 (25 Stat., 387), which is a statute of limitation against the Government's recovery of indebtedness from sureties on the bond of the debtor, unless suit be instituted within five years after statement of the account by the accounting officers of the Treasury.

It is due alike to debtors and their bondsmen that they be informed promptly of any balance that may be found due from them to the United States, and the information upon which the accounting officers' action is based should not be uncertain or accidental, as it is and must necessarily be, without some such system as above suggested. I would therefore earnestly recommend that the Register of the Treasury and the Auditors who are charged with keeping accounts be required to report at least once in each year all balances due to or from the United States on their respective books to the Secretary of the Treasury, under such rules as he may prescribe. I would further suggest and recommend that final balances or balances on final accounts be specially indicated, or that such reports be confined to final balances if the same

can be done with certainty; and that these several reports be arranged and consolidated and indexed alphabetically in such manner that each and every balance appearing in such report would be referred to in connection with the name and office of the person from whom or to whom any balance is due, and that copies thereof be furnished to each of the accounting officers of the Treasury Department for their official information and assistance in the discharge of their duties.

INDIVIDUAL DEPOSITS FOR SURVEYING PUBLIC LANDS.

I deem it important to invite your attention to the present condition of the fund or appropriation denominated "Deposits by individuals for surveying public lands." This fund had its origin in section 10 of the act of May 30, 1862 (12 Stat., 410), now section 2401 of the Revised Statutes, which provides that where the settlers in any township or townships, "not mineral or reserved by Government," shall desire a survey of the same under the authority of the surveyor-general of the United States, and shall file an application therefor in writing, such settlers shall deposit, in a proper United States depository, to the credit of the United States, a sum sufficient to pay for such survey, together with all expenses incident thereto, without cost or claim for indemnity on the United States,

By a resolution of Congress approved July 1, 1864 (13 Stat., 414), now embraced in section 2402 of the Revised Statutes, it is provided that the deposit of money in a proper United States depository, pursuant to the foregoing provisions of law, shall be construed to be an appropriation of the sums so deposited for the objects contemplated in the law, and the Secretary of the Treasury is authorized to cause the sums so deposited to be placed to the credit of the proper appropriations for the surveying service. It is also provided in the resolution referred to (now section 2402, Revised Statutes) that any excess in the sums so deposited over and above the actual cost of the surveys, comprising all expenses incident thereto, shall be repaid to the depositors,

respectively.

It will be thus seen that the fund or appropriation arising from deposits by individuals in the manner provided was created for the sole purpose of paying all the expenses of the respective surveys of lands "not mineral or reserved," and expenses incident thereto, and for refunding any excesses in deposits to the respective depositors. balance remaining to the credit of this fund or appropriation, if correctly kept, must represent unpaid expenses of surveys for which deposits have been made, and unpaid excesses of deposits by individuals. It could not therefore be reasonably expected that the balance to the credit of the fund would at any time be very large. Furthermore, by the act of March 3, 1871 (16 Stat., 581), now section 2403, Revised Statutes, and by subsequent amendments (act of March 3, 1879, 20 Stat., 352; act Aug. 7, 1882, 22 Stat., 327), the deposits by settlers for the expenses of surveys desired by them shall go in part payment of the lands situated in the townships, the surveying of which is paid for out of such deposits, and the certificates of deposit, which are made assignable, shall be received at the land office at which the lands so surveyed are subject to entry. This legislation practically cuts off any claims for refunding excesses of deposits, since the total amounts deposited in each individual case are made receivable in payment of the lands purchased.

I find, however, that the fund or appropriation for "deposits by individuals for surveying public lands" has been annually increasing upon the books of the Treasury.

On the 30th of June, 1890, the balance remaining to the credit of this appropriation was	\$792, 892, 59 131, 422, 80
Total Expenditures from the appropriation during the fiscal year	
Balance to credit of appropriation June 30, 1891	829, 418, 55

It is manifest that the enormous sum remaining to the credit of this appropriation does not represent unpaid expenses of surveys of lands "not mineral or reserved by Government," for which deposits have been made, and unpaid excesses of deposits, and that deposits have been covered in to the credit of this appropriation without warrant of Although the statute expressly refers to lands "not mineral or reserved by Government," and the appropriation for "deposits by individuals for surveying public lands," among the permanent indefinite appropriations enumerated in section 3689 of the Revised Statutes, cites the same words ("not mineral or reserved"), it has been the practice for years past to cover in to the credit of this appropriation amounts deposited, pursuant to regulations prescribed by the General Land Office, to cover the expenses of the surveys of mining claims. This practice is, in my judgment, wholly unwarranted by law. I find nothing in section 2334 of the Revised Statutes, or in the acts of May 10, 1872 (17 Stat., 95), and May 5, 1876 (19 Stat., 52), from which said section is taken, that gives any color of authority to the practice which has prevailed. On the contrary, the plain reading of said section seems to be that the expenses of the surveys of mining claims are to be paid by the applicants, and that each applicant shall file with the register of the respective land office a sworn statement of the expenses so paid, to be forwarded to the Commissioner of the General Land Office for his information.

The large balance which remains to the credit of this appropriation is a constant menace to the public treasury, and an invitation for the presentation of illegal and fraudulent claims, which are sometimes pressed As a marked instance, reference may be made to the payments of additional amounts on a number of old claims of deputy surveyors, coming under the appropriation in question, which I am informed were made during the years 1886 and 1887, notwithstanding the fact that the original claims had been long previously settled, and the full amounts deposited by the respective settlers had been paid in the first settlements. The additional payments referred to have been characterized, and I think justly so, as irregular and illegal. I learn that the sole ground on which the additional payments were urged and finally allowed was that the balance then to the credit of the appropriation for deposits by individuals was very large and amply sufficient to pay the claims of the deputy surveyors in full, without regard to the respective amounts which had been deposited by the settlers to meet the expenses of the surveys.

I find that the practice has prevailed and still exists of charging to this appropriation a large portion of the contingent expenses and clerk hire in the offices of surveyors general for some of the States and Territories, on the ground that such expenses and clerical services relate to mineral surveys. As Congress provides specific appropriations

FI 91----33

for the contingent expenses and clerk hire in the offices of the several surveyors general, the practice of trenching upon the appropriation for "Deposits by individuals" for contingent expenses and clerk hire is, in my judgment, contrary to law, and I shall in the future decline to allow such charges under this appropriation.

I respectfully recommend that this matter be brought to the attention of Congress, with the request that proper authority of law be granted for covering back into the general treasury the large balance now standing to the credit of the appropriation known as "Deposits

by individuals for surveying public lands."

It is believed that the accretions to this appropriation arising from deposits made, and to be made, subsequent to the beginning of the current fiscal year will be sufficient to meet any legitimate demands payable from said appropriation.

SALARIES OF DISTRICT JUDGES.

By the act of February 24, 1891 (26 stat., 783), the salaries of the several judges of the district courts, after the date of the passage of the act, was fixed at the rate of \$5,000 per annum. Congress, however, failed to make the proper appropriation for the remainder of the fiscal year 1891, and as a consequence the judges could not be paid for the period commencing February 24, 1891, and ending June 30 of the same year, at the new rate. The attention of Congress should be invited to the subject, to the end that the proper appropriation may be made.

EXTRA WORK.

Owing to the refunding of tobacco taxes, the increase of accounts occasioned by the taking of the census, and the payment of the sugar bounty, the force in this office was required to work extra hours for some two months. This matter I will make the subject of a future communication.

It is with pleasure that I commend the Deputy Comptroller and other persons employed in this Bureau for the faithful and intelligent manner in which they have discharged their respective duties.

in which they have discharged their respective duties.

I have the honor to be, very respectfully,

A. C. MATTHEWS, Comptroller.

The SECRETARY OF THE TREASURY.

REPORT OF THE SECOND COMPTROLLER.

TREASURY DEPARTMENT,

SECOND COMPTROLLER'S OFFICE,

Washington, D. C., October 15, 1891.

SIR: I have the honor to submit the following report of the transactions of this office for the tiscal year concluded June 30, 1891, together with a comparative statement of the work done the previous year, and the present condition of the public business.

TOTAL NUMBER OF ACCOUNTS, CLAIMS, AND CASES SETTLED.

7	1891.		1890.	
From—	Number.	Amount.	Number.	Amount.
Second Auditor Third Auditor Fourth Auditor Various sources	2, 693	\$27, 348, 754 122, 912, 594 26, 596, 232 26, 482	22, 404 11, 669 4, 018 9, 447	\$29, 973, 478 115, 200, 015 22, 936, 131 25, 855
Grand total	50, 732	176, 884, 062	47, 538	168, 135, 479

A comparison of the above results shows that during the last fiscal year this office, without any additional help, did considerably more work than the previous year. The clerks have been faithful in their duties, and yet some of the divisions of the office are behind in their work. Four additional clerks have been provided, to commence at the beginning of the next fiscal year (July 1, 1891), and, although not a sufficient number for the prompt examination of all claims, yet will greatly facilitate matters.

The Second Comptroller finally settles all claims and accounts coming from the Second, Third, and Fourth Auditors of the Treasury.

The number of clerks on the rolls of the office during the year was 59, the same as the year previous.

The work of the office is done by seven divisions, known as the Navy Division, employing 5 clerks; Army Paymasters' Division, 6 clerks; Army Back-pay and Bounty Division, 9 clerks; Army Pension Division, 9 clerks; Quartermasters' Division, 9 clerks; Indian Division, 4 clerks; Miscellaneous Claims Division, 10 clerks, and 7 chiefs of divisions, making in all 59. The average number of clerks employed during the past fiscal year was 53.

A detailed statement of claims and accounts disposed of during the year in each division, including a general statement of their character, is as follows:

ARMY BACK-PAY AND BOUNTY DIVISION.

Character of the claims.	Number.	Amount.
Soldiers' pay and bounty allowed	9, 162 10, 202	\$1,095,386 10,720
Total	19, 364	1, 106, 106

On July 1, 1891, there remained on hand and unadjusted in this division 7,870 claims, estimated to be 166 days' work of the division.

ARMY PAYMASTERS' DIVISION.

Character of the accounts.		· Amount.
Army paymasters, for pay of the Army	435	\$13, 387, 366

SUITS BROUGHT.

During the year transcripts and briefs have been made up, examined, and forwarded to the Solicitor of the Treasury for suit in favor of the United States, in two cases, as follows:

Pension agent
Failing contractor

Suits were instituted in both cases and are still pending. There was recovered and paid into the Treasury from suits begun in previous years the sum of \$7,386.43.

OFFICE APPROPRIATIONS.

The appropriations for the salaries of the officers and employés for the fiscal year ended June 30, 1891, aggregated \$95,050, of which \$781.42 remained unexpended at the close of the fiscal year. The appropriations for the current fiscal year (1892) amounted to \$100,450.

Very respectfully,

B. F. GILKESON, Second Comptroller.

Hon. CHARLES FOSTER,

Digitized for FRASE Secretary of the Treasury.

REPORT OF THE COMMISSIONER OF CUSTOMS.

24, 977, 131. 13

In presenting this annual report I can only say that the experience of each year demonstrates that the recommendations heretofore made should have some attention paid to them. The principal ones are:

A permanent annual appropriation of, say, \$7,500,000 for expenses of

collecting the revenue from customs in lieu of the present one of \$5,500,000, with an addition of the collections from customs sources as enumerated in section 3687 Revised Statutes; the modification of the present law so that the miscellaneous collections now belonging to that appropriation be covered into the Treasury as a part of the general fund; the fixing of specific salaries as the total compensation of collectors of customs and of surveyors acting as such; the modification of the laws relating to appointment and salary of subordinate customs officers, so that there can be no doubt of any one of them being an officer of the United States; and abolishing their distinctive names, classing them all as customs officers, with power to the principal officer of the district to detail them to any duty relating to customs or navigation within his district.

The transfer from the Special Agents Division to this Bureau of the Immediate Transportation accounts, together with the increase in number of ports and importations, has made necessary the employment of details to keep the work up to the requirements of the office. In many cases these details are not familiar with the duties, and such work is expensive and unsatisfactory. I therefore recommend that Congress be requested to provide for a sufficient clerical force to perform the duties without the delay that is at present unavoidable.

I inclose herewith the statements (A) of transactions in bonded goods as shown by the adjusted accounts; (B) comparative statement of transactions under the immediate transportation system for the years

1881 and 1891.

I am, very respectfully, your obedient servant,
SAML. V. HOLLIDAY,
Commissioner of Customs.

The SECRETARY OF THE TREASURY.

APPENDIX.

The foregoing exhibit shows the immense volume of business transacted in this office during the fiscal year 1891. It is not thought necessary to call special attention in this connection to the entirely inadequate force allowed by law for the transaction of the constantly increasing business of this office, as that matter has been fully and specifically set forth in letter addressed to you under date of September 21, 1891, transmitting estimates for appropriations for this office, fiscal year 1893. Allow me to commend to your favorable notice the personnel of this office, for faithful, intelligent, and exceedingly laborious services rendered during the past year.

Very respectfully,

GEO. P. FISHER, First Auditor.

The SECRETÁRY OF THE TREASURY.

(No. 10.)

REPORT OF THE SECOND AUDITOR.

TREASURY DEPARTMENT, SECOND AUDITOR'S OFFICE, Washington, D. C., October 16, 1891.

SIR: As required by section 283, Revised Statutes, I have the honor to submit a statement of the application of moneys appropriated for the Indian service, and for those branches of the military service the accounts of which are adjusted by the Second Auditor. I also furnish, in compliance with your request of the 2d ultimo, a report of the work performed during the fiscal year 1891, and a statement showing the condition of public business at the close of said year.

A brief synopsis of the work assigned to it is prefixed to the detailed

report of each division of the office.

BOOKKEEPERS' DIVISION.

This division keeps a journal and ledger record of all disbursing officers' accounts and of all claims (except claims for arrears of pay and bounty) which come within the jurisdiction of the Second Auditor and Second Comptroller; also ledger accounts of the various appropriations involved in said accounts and claims. All requisitions issued by the Secretary of the Interior on Indian account, and such requisitions of the Secretary of War as are chargeable to appropriations on the book of this office, are registered, indexed, and posted under their proper heads. Claims of heirs of deceased payees of paymasters' checks are adjusted in this division and a record is kept of valuable effects of deceased soldiers. Certificates are issued as to the indebtedness or nonindebtedness of claimants, and claims for pay, etc., in cases where the claimants are charged on the books of this office, or on the Third Auditor's books, are referred to the bookkeeper for settlement. A proper record is kept of suits pending against the United States in the Court of Claims and in the circuit and district courts of the United States, in cases where notice is received that such suits have been entered, and all information, copies of documents, etc., required by the courts or the Attorney-General in army cases are furnished by this division (calls for information, etc., in Indian cases are attended to by the Indian division). The annual report of the Auditor, annual and other estimates, and, generally, such reports as may be called for by Congress, are prepared by the bookkeeper.

APPLICATION OF APPROPRIATIONS.

The application of moneys appropriated for the Indian service, the Medical Department, Pay Department, Ordnance Department, expenses of the Commanding General's Office, contingencies of the Adjutant-General's Office, the Soldiers' Home, the National Home for Disabled Volunteer Soldiers, the Artillery School at Fortress Monroe, publication of Official Records of the War of the Rebellion, contingencies of the military establishment, etc., is indicated by the subjoined tabular statements of amounts drawn from the Treasury on requisitions of the Secretary of War and Secretary of the Interior, repayments of unexpended balances, and aggregate balances remaining in the Treasury on June 30, 1891.

The miscellaneous work of the bookkeeper's division consisted	of—
Requisitions registered, indexed, journalized, and posted	5,740 4,469
accounts	292 985
Repay requisitions prepared for the War and Interior Departments	56
Claims of legal representatives of deceased payees of checks examined and adjusted	,
Bonds of disbursing officers recorded	3,096 84
The amount drawn from the Treasury on settlements was \$295,41 including the following sums on Soldiers' Home account:	4.94,
Withdrawn from the "permanent fund" of the Soldiers' Home and paid to the treasurer of said home to meet current expenses (section 8, act of March 3, 1883, 22 Stats., 565) and payments on account of building improvements \$208.5	330, 00

The adjustment of claims presented by the heirs of deceased payees of checks for arrears of pay and bounty involves a large amount of correspondence. Under current rulings, if a claimant dies after the certification of his claim the balance due belongs to his estate and is payable to his legal representatives or heirs at law. If he dies prior to the settlement of his claim the arrears of pay, and such bounty as he had actually earned, go to his estate or heirs at law, but other classes of bounty go only to statutory heirs. As this office is rarely notified of the death of claimants whose cases are pending it frequently happens that balances are certified and checks issued in favor of deceased payees for bounty to which their heirs are either not entitled at all or are entitled to only a portion thereof. Hence new adjustments have to be made, based upon the facts and evidence presented by those claiming as heirs of the soldier or as heirs of the payee of a check, as the case may be.

Interest on Soldiers' Home permanent fund (same act)......

PAYMASTER'S DIVISION.

The duties of this division are to audit and adjust the accounts of army paymasters; to state accounts in favor of the Soldiers' Home for the monthly contributions of 12½ cents by enlisted men of the Army, court-martial fines, forfeitures by desertion, etc.; to keep a record of deposits by and repayments to enlisted men, to determine the longevity status of officers of the Army, to raise charges against officers for overpayments, erroneous musters, etc.; to transfer to the Third Auditor's books such amounts collected by paymasters as have not already been deposited and passed to the credit of the proper appropriations on books of the Second and Third Auditors, and to make such settlements, of a miscellaneous character, as are incidental to the general work of the division.

The work performed during the year is shown by the following figures:

Number of accounts on hand July 1, 1890		
Total to be accounted for	49 0 422	
On hand June 30, 1891	68	

The records of 43 officers have been examined for the purpose of establishing dates on which longevity pay accrued under acts of June 18, 1878, and February 24, 1881, and the decisions of the Supreme Court in the cases of the United States vs. Tyler and United States vs. Morton.

The record of deposits by enlisted men, under act of May 15,1872, shows that 5,973 deposits were made since last report, amounting to \$344,259.37, and that 8,093 deposits, amounting to \$494,495.26, have been withdrawn, upon which the depositors received \$48,941.63 interest.

The amount involved in 422 paymasters' accounts and 192 miscellaneous settlements was \$15,141,186,06, as follows:

Amount disbursed by paymasters, as per audited accounts	29, 952. 61 136. 45 99. 02
Payment of transportation accounts	5,704.52
Total	15, 141, 186. 06
Letters received	494

10tal	 ,	15, 141, 180.06
· ·	The state of the s	· · · · · · · · · · · · · · · · · · ·

On June 30, 1891, the accounts of paymasters were rendered to this office to include February, 1891; audited to include December, 1890, and confirmed by the Second Comptroller to include September, 1890. Thirty six paymasters were on duty, so that the 68 monthly accounts on hand, unsettled, represent a period of about 2 months. The adjustment of this class of accounts is more nearly up to date than it has been since 1861, although it involves considerably more work than formerly, for the reason that the accounts of deserters at large are now settled in this division and the amounts forfeited by their desertion ascertained in the current examination of paymasters' accounts instead of being left for future consideration.

ORDNANCE, MEDICAL, AND MISCELLANEOUS DIVISION.

With the exception of paymasters' accounts, all army disbursing accounts rendered to the Second Auditor are audited in this division; also the accounts of the National Home for Disabled Volunteer Soldiers, and the military accounts of the disbursing clerk of the War Department; also claims of a miscellaneous character, namely, claims under special acts of Congress; claims for material furnished the Ordnance Department: for refundment of bounty money taken from soldiers under General Orders 305 of 1864; for refundment of money erroneously paid to secure exemption from draft, etc. The book records of payments to officers of the regular and volunteer armies are kept in this division, and transcripts from said records are furnished when required by other It also has charge of the files of settled ordnance, medical, and miscellaneous accounts from 1817 to date.

The following is a record of work performed during the fiscal year 1891:

	Ordnance accounts.	Medical accounts.	Miscella- neous accounts.	Claims.	Total.
On hand July 1, 1890	55	101	38	72	266
	489	289	206	330	1, 314
Total	544	390	244	402	1,580
	521	349	233	335	1,438
On hand June 30, 1891	23	41	11	. 67	142

The amount involved in 1,438 accounts and claims disposed of was \$6,356,516.79, as follows:

Ordnance, ordnance stores, etc., ordnance service, arming and equipping the militia, armament of fortifications, repairs of arsenals, and other appropriations of the Ordnance Department. Medical and hospital department, artificial limbs, Army Medical Museum, library of the Surgeon-General's Office, trusses and appliances for disabled soldiers, and other appropriations of the Medical Department. Contingencies of the Army, publication of Official Records of the War of the Rebellion, expenses of military convicts, expenses of the Commanding General's office, contingencies of the Adjutant-General's Department, special acts of relief, Artillery School at Fortress Monroe, Infantry and Cavalry School at Fort Leavenworth Expenses of recruiting, local bounty claims, etc. Support of National Home for Disabled Volunteer Soldiers.	516, 304, 09 258, 179, 53 63, 597, 52
Total	6, 356, 516, 79
Number of vouchers examined Payment to officers recorded Payments to officers reported to other divisions for use in settlement of claims	29, 660 37, 304 21 595
Letters written Payments of advance bounty reported to other divisions for use in settlement of claims.	10,548

The accounts of the National Home for Disabled Volunteer Soldiers have been examined to include June 30, 1890. All other disbursing accounts are practically up to date.

INDIAN DIVISION.

The general duties of the Indian division are to audit the money accounts of Indian agents and other disbursing officers of the Indian service, and the claims of contractors, employés, etc., for supplies furnished and services rendered; also to examine and finally dispose of the property accounts of Indian disbursing officers, and to keep records of contracts for supplies and deliveries thereunder, so that any article can be readily traced from the place of purchase to its destination. This division has charge of the files of settled accounts and claims pertaining to the Indian service and furnishes to the Attorney General and to the proper courts such information and documentary evidence as may be found in said files touching suits against the United States. It also makes transcripts of the accounts of Indian disbursing officers in cases where it is necessary to bring suit for balances found due the Government.

The work of the division is indicated by the following statements:

	Money accounts.	Property accounts.	Claims.
on hand July 1, 1890	439	386	17
	1, 012	824	3, 702
Total	1, 451	1, 210	3, 719
Audited and reported to the Second Comptroller	1, 020	813	3, 687
On hand June 30, 1891	431	397	32

The term "accounts" as above used includes both the quarterly accounts rendered by disbursing officers and the "explanations" filed by them in modification thereof to remove items suspended in settlement. The following analysis is therefore added to exhibit the status of each of these species of accounts on June 30, 1891:

	Ca	sh.	Prop		
	Quarterly accounts.	Explara- tions.	Quarterly accounts.	Explana- tions.	Total.
In process of examination	59 193	48 131	43 197	42 115	192 636
Total	252	179	: 240	157	828

The number of quarterly accounts on hand July 1, 1890, was, cash, 266; property, 249. The examinations are therefore more nearly up to date than then; a result very gratifying, as the work of the division has been greatly retarded by the backward condition of the Indian service, consequent on the lateness of the date at which the appropriations for the fiscal year 1891 were made, occasioning a corresponding delay in the completion of contracts.

The number of accounts of all kinds on hand June 30, 1891, was 860, against 842 on June 30, 1890, and the number settled in 1891 was 5,520, against 5,173 in 1890. Thus it appears that though there are on hand, of all classes of accounts, 18 more than a year ago, yet the division made 347 more settlements than last year. When the newer members of the force shall have acquired a little more experience there will be no difficulty in bringing the settlements as nearly up to date as practicable.

The accounts of 136 disbursing officers are now in the current files, so that the unsettled accounts average but one and a half quarters (4½ months) for each officer. With the present clerical force it is believed that next year's work will result in very materially reducing the arrears, if not in completely removing them.

The number of letters written was 3,829; pages copied, 3,770. Transcripts and information have been furnished to the Court of Claims in 23 cases, and to the Attorney General and Solicitor of the Treasury in

4 cases.

PAY AND BOUNTY DIVISION.

To properly consider and dispose of the large amount of business devolving upon it this division is practically subdivided into six

· branches, or sections, namely:

(1) The registering branch, by which all claims for arrears of pay and bounty that have accrued since April 13, 1861, are received, registered according to regiments or other independent organizations, and sent to the files of claims awaiting examination. After being certified by the Second Auditor and Second Comptroller, the claims again pass through this branch in order that the number of the certificates may be entered on the claims' register, thus completing the record. Letters of inquiry concerning claims either settled or pending are necessarily referred to this branch for information as to date of filing, number of certificate, &c.

(2) The examining branch, by which such evidence as may be necessary to complete claims is collected and scrutinized. When completed, if there appears to be anything due from the United States, the cases, after passing the board of review, go to the settling branch for adjustment. In cases where formal settlements have not previously been made, and it is evident that nothing is due the claimants, settlements disallowing the claims are made in this branch and reported to the Comptroller for his action thereon as required by law. In cases where formal settlements have already been made and it is apparent that nothing further is due, claimants are so notified and the papers are filed with said settlements.

(3) The settling branch, by which all claims passed by the examining branch and reported correct by the board of review are formally adjusted by certificate settlements and reported to the Second Comptroller.

- (4) The correspondence branch, in which inquiries relating to settled claims, and all letters from members of Congress in regard to claims, whether open or settled, are answered, and the miscellaneous correspondence attended to, including the writing of letters to claimants and attorneys notifying them of the settlement of their claims. This branch also transmits certificates to the Paymaster General for payment, and keeps the necessary records showing under what heads of appropriations balances have been certified.
- (5) Branch in charge of open and disallowed files.—These files consist of claims awaiting evidence to be furnished by claimants and attorneys, claims awaiting action by the examining and settling branches, claims summarily disallowed by the Auditor prior to January 1, 1882, and not since called up, and claims which have not been completed by the parties in interest and are regarded as abandoned.

(6) Branch in charge of files of settled claims.—These files consist of claims for arrears of pay and bounty which have been formally certified by the Second Auditor and Second Comptroller since 1832.

The following is a record of last year's work:

EXAMINING BRANCH.

Classes of claims.	Claims pending July 1, 1890.	New claims re- ceived.	Old claims revived.	Sent to settling branch.	Disal- lowed.		Claims pending June 30, 1891.

The amount involved in 9.281 claims audited and allowed was \$1,190,892.72; number of vouchers examined in connection with the adjustment of claims, 245,909; number of letters written and mailed

during the year, 171,932.

With regard to the claims reported as "referred elsewhere" (8,724 and 429=9,153) it should be explained that three classes are included under this head, namely, (1) claims which are actually sent out of the office or referred to other divisions; (2) claims that have already been formally settled, leaving nothing more due to the claimant—the claimant is so notified and the papers are filed with the settlement; (3) claims that have been suspended for more than 3 years for material evidence required to complete the cases, and in which no reply has been received from the claimant or attorney. Cases of the latter class, which constitute the majority of those reported as "referred elsewhere" are regarded as abandoned and are transferred to the disallowed files. Some of these may, eventually, be revived by the receipt of new evidence, but the great mass of them will never be disturbed.

Of the 58,237 pending June 30, 1891, 46,771 were original claims, the remainder being cases in which settlements have heretofore been made, but which have been practically reopened under recent laws, and cases already settled, in which new applications have been filed by the sol-

diers or their heirs.

DIVISION FOR INVESTIGATION OF FRAUD.

It is the duty of this division to examine and investigate all cases in which fraud, forgery, unlawful personation of claimants and witnesses, disputed questions of heirship and identity, irregular practices of attorneys, etc., are involved, and to take the necessary steps, through the officers of the Department of Justice, to recover any moneys that may have been improperly drawn from the Treasury and to punish the offenders.

The number of cases on hand June 30, 1890, was 1,995; number referred to the division during the year, 1,106; making a total of 3,101 cases for consideration; 1,686 have been disposed of, leaving 1,415 cases

on hand June 30, 1891, as follows:

Cases of white soldiers in which settlements have already been made by the	
accounting officers	150
Cases of white soldiers in which settlements have not been made	45
Cases of colored soldiers settled	880
Cases of colored soldiers unsettled	

Total 1,415

During the year 18 cases were prepared for United States courts and 63 for the secret service division of the Treasury Department. Abstracts of facts were made in 303 cases.

The sum of \$333.16 was recovered from persons to whom it had been improperly paid; judgments were obtained for \$345.92, and fines were imposed by United States courts amounting to \$1,000. Letters written, 6,792.

PROPERTY DIVISION.

This division examines and settles all accounts of clothing, camp and garrison equipage, and has charge of the files of such accounts, both settled and unsettled. Said accounts are not reported to the Second Comptroller; therefore the action of the property division is final. On the call of the pay and bounty division and the Third Auditor, and on the request of the officer concerned or his representative, this division issues certificates as to the indebtedness or nonindebtedness of officers who served in the armies of the United States, both regular and volunteer, since the organization of this office in 1817. These certificates cover all accountability for ordnance, ordnance stores, etc., up to 1871, and all responsibility for clothing, camp and garrison equipage. It is a part of the duty of this division to see that officers of the Army who fail to satisfactorily account for any article embraced in their returns of clothing, etc., promptly pay the value thereof.

The number of returns of clothing, camp and garrison equipage on hand and unsettled June 30, 1890, was	
Total	5, 853 4, 215
On hand, unsettled, June 30, 1891	1 638

As about 1,200 officers render quarterly returns of clothing, etc., the number on hand is equivalent to 1½ returns per officer, and the work is as nearly up to date as it is desirable to bring it. When an officer is relieved from duty his returns can not be properly settled until the next quarter's accounts have been sent in by his successor; hence it is necessary to defer the examination of many accounts until later returns have been rendered.

The number of wouchers examined during the year was 44,164; letters received, 5,072; letters written, 2,409; letters recorded, 1,577; certificates of nonindebtedness issued, 3,756.

I deem it proper to invite attention to the subjoined extract from the report of this office for 1887, which was also inserted in the report for 1888:

Prior to 1871 this division was charged with the settlement of property accounts or returns rendered by Army officers responsible for ordnance, ordnance stores, and supplies, but on December 19, 1870, the Secretary of War directed that such returns, after rigid examination by the Chief of Ordnance, should be filed in the Ordnance Office, and not transmitted to the Treasury. As the act of March 3, 1817 (section 277, Revised Statutes), makes it the duty of the Second Auditor to receive and examine all accounts relating to military stores, it may be questioned whether such property accounts as have received only the rigid examination of the Ordnance Office have been adjusted in accordance with law. (See 13 Op., 483.)

DIVISION OF INQUIRIES AND REPLIES.

The following are the duties assigned to this division: To answer calls for information in regard to officers and enlisted men who served in the armies of the United States since the war of 1812 from the Adju-

tant-General, Quartermaster General, Commissary-General of Subsistence, the Commissioner of Pensions, the Third and Fourth Auditors of the Treasury, and the various divisions of this office; to furnish the pay and bounty division with statements of payments to officers and enlisted men on detached service, absent sick, etc., who were not paid on the regular muster and pay rolls of their commands; to copy or repair worn and defaced rolls and vouchers; to compare and verify the signatures of claimants and their witnesses who have cases before the Pension and Third Auditor's Offices with their signatures on the original rolls and vouchers on file in this Office, and to furnish copies of such affidavits, final statements, certificates of disability, etc, as may be required by the Adjutant-General and other officers.

The record of work performed during the fiscal year 1891 is as follows:

Officer making inquiry.	On hand July 1, 1890.	Received.	Answered.	On hand June 30, 1891.
Adjutant-General	. 8	4, 160 1, 498	4, 059 1, 478	109
Commissioner of Pensions	4 15	2, 724 12, 403 2, 007	2,711 12,418 2,002	17
Fourth Auditor	2	2, 007 30 19, 167	32 19, 167	
Total	29	41, 989	41, 867	151

^{*}Calls from pay and bounty division, and ordnance, medical, and miscellaneous divisions for records of payments to officers and culisted men.

†Chiefly cases in which rolls and vouchers had to be examined to correct errors found in book records

of payments.

Miscellaneous work.—Muster rolls and vouchers copied for the Adjutant-General, 54; letters, final statements, affidavits, certificates of disability, special orders, applications, and other papers copied, 413; pages of foolscap used in copying, 1,453; signatures examined for verification, 4,249; letters written, 1,021.

Copying and repairing rolls.—On November 1, 1890, the work of copying and repairing worn and defaced rolls and vouchers was transferred from the archives division to this division. Since that date 1,184 single vouchers, 3,400 muster and pay rolls, 30 discharges, 185 sheets of paymasters' abstracts of payments, and two large registers of payments (over 700 pages each) have been repaired, and 1,214 pages (48,942 lines)

of rolls have been copied and compared.

Card indexing.—The work of card indexing the records of payments to enlisted men of volunteers has rapidly progressed and is nearing completion. All cards covering payments to enlisted men from Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Dakota, District of Columbia, Kansas, Kentucky, Louisiana, Maine, Massachusetts, Nebraska, Nevada, New Hampshire, New Mexico, North Carolina, Oregou, Rhode Island, Tennessee, Texas, Vermont, Virginia, Washington, and West Virginia, and more than one half of Delaware, Marvland, New Jersey, New York, and Pennsylvania have been assorted and are in daily use. A large number of erroneous entries in the registers have been corrected from the vouchers.

On April 1, 1891, the card indexing of payments to enlisted men of volunteers absent from their commands in hospitals, parole camps, etc., was commenced. About 400 bundles of paymasters' accounts have been examined, in which 368 rolls, covering 8,813 payments made in the early part of the war, were found and indexed. Comparatively few

men were absent in hospitals, etc., in 1861 and the early part of 1862, and the rolls above mentioned are, therefore, not in great demand; but the card indexes so far made have proved of use, and when all payments of the character referred to have been indexed a great saving of time will be accomplished, and, what is of equal if not more importance, the wear and tear of one class of muster and pay rolls, already much dilapidated, will be considerably reduced, if not altogether obviated, and there will be less necessity for copying and repairing such rolls.

On June 1, 1891, the work of registering payments to officers of the regular Army was transferred to this division. Up to that date these payments were registered in the ordnance, medical, and miscellaneous division in bound volumes specially prepared for the purpose. The card index system has now been adopted, and payments made to officers of the Army since December 31, 1890, will be registered upon cards instead of in books. At the same time a card index will be made of payments, since said date, to discharged enlisted men. Heretofore no record of such payments has been kept in this office, the Pay Department having been depended upon for information on this subject.

The total number of payments card-indexed during the year was

508.434, as follows:

From records transferred from Paymaster-General's Office	8,813
Total	508, 434

Current work.—The current work of the division is well in hand and has been kept so all through the year. There has not been a day when all inquiries on hand at the close of business could not have been answered within 24 hours.

MAIL DIVISION.

The general duties of the mail division are to carefully examine, stamp, assort, and distribute the entire incoming mail of the office, including all papers received from the Second Comptroller's Office, the Indian Office, the War Department, etc.; to inspect the outgoing mail and see that errors or irregularities are corrected; to answer all letters not relating to claims on file, and to dispose of or properly refer all letters, claims, etc., which do not pertain to this office.

The incoming mail is generally distributed within an hour after its receipt. The system devised for examining and dispatching the outgoing mail is such that nearly all letters are mailed the day after their

date.

Letters received: General mail	97, 259
Departmental mail	123, 545
Total	220, 804
Letters, etc., forwarded: General mail Departmental mail	73,649
Total	204, 422
Claims briefed and registered Additional evidence registered Letters written Letters referred Letters returned uncalled for	16,950 17,032 1,970

ARCHIVES DIVISION.

This division has charge of all accounts of Army paymasters which have ever been settled by the Second Auditor and Second Comptroller; also of the book records of payments to regiments, batteries, and other independent organizations, detachments, hospitals, paroled prisoners of war, recruiting parties, and all other separate commands. It withdraws from the files such vouchers as are required by the settling clerks in other divisions, and returns them to their proper places when no longer required. The duties of the division incidental to the care of the files are sufficiently indicated in the following report of the work performed during the last fiscal year.

Paymasters' accounts received from the Pay Department	-338
Confirmed settlements received from the Second Comptroller entered, indexed,	
and filed; paymasters', 112; Indian, 3,124; miscellaneous, 1,145	4, 381
Vouchers examined and stamped	44,683
Vouchers withdrawn for reference	121,318
Vouchers returned to files	169, 619
Vouchers briefed	201,007
Vouchers rearranged, renumbered, and indexed	23,995
Vouchers withdrawn from files for the record and pension division, War De-	
partment, and subsequently returned to files	3,243
Payments to companies, detachments, etc., of the United States Army cn-	•
tered on registers	15,043
Pages of defaced registers of payments copied	1,430
Pages of abstracts and miscellaneous papers copied, from July 1 to October	•
30, 1890	402
Pages of muster and pay rolls copied during same period	429
Rolls repaired during same period	1,887
Mutilated rolls prepared for copyists	774
File boxes stenciled.	1,280
Letters written	232

In copying the worn and defaced registers of payments to volunteer organizations which have been in constant use for about 20 years it is found necessary, in order to correct errors made when the registers were first written, to refer to every muster and pay roll covering said payments. The number of the paymaster's voucher has been added to the record of payments, which much simplifies the work of withdrawing papers from the files. The record now shows at a glance the company and regiment to which payment was made, the period embraced in each payment, the paymaster's name, the file number, the number given to the account by the Pay Department, and the number of the voucher.

The rearrangement and renumbering of vouchers was found to be necessary in consequence of some paymasters having several series of vouchers in the same account and several series of numbers on the same

abstract, which caused both delay and confusion.

More than half the time of one clerk has been occupied in furnishing muster and pay rolls for the use of the record and pension division of the War Department and in rendering assistance to clerks of other divisions of this office who were searching for information required in the transaction of current business.

THE OLD ARMY DIVISION.

This division adjusts claims for arrears of pay and bounty which accrued prior to April 13, 1861, also claims of sutlers, post traders, laundresses, company tailors, and others in whose favor stoppages were entered upon the muster rolls and deducted from the pay of soldiers under the old regulations of the Army. It settles the accounts of the Soldiers' Home for moneys belonging to the estates of deceased soldiers and remaining unclaimed for 3 years, and for such arrearages of for-

feitures by desertion and by sentence of court-martial as have accumulated since March 3, 1881. It has charge of the records of claims filed and payments made prior to April 13, 1861, and from these records supplies such information as may be called for either by claimants or by other divisions of this office. It also keeps the list of attorneys and claim agents authorized to practice before the Treasury Department, and furnishes information to other divisions, when required, as to the standing of such attorneys and agents.

The work performed is shown by the following statement:

Classes of claims.	Claims pending July 1, 1890.	New claims received.	Old claims revived.	Allowed.	Dis- allowed.	Referred else- where.	Claims pending June 30, 1891.

dresses, tailors, etc	10	. 129	44	27	24	64	68
Total	240	418	131	80	182	. 299	228

Under section 4818, Revised Statutes, and the legislative, executive and judicial appropriation acts of February 26, 1889; July 11, 1890, and March 3, 1891, the accounts of soldiers who deserted or were discharged by sentence of court-martial subsequent to March 3, 1881, also the accounts of deceased soldiers whose arrears of pay, etc., have not been claimed, have been audited in favor of the Soldiers' Home. The number of cases acted upon was 6,340, in 3,055 of which nothing was due. In the remaining 3,285 cases balances aggregating \$112,133.24 were found due and passed to the credit of the permanent fund of the Home.

The time of one clerk was occupied in answering letters of inquiry as to payments made and amounts due for services in the old Army, and in furnishing information to other divisions of the office. The number of vouchers examined was 188,170, number of letters written 12,995, number of cards written for restoring and improving old records 8,934. The amount found due claimants in the 80 allowed claims was \$4,174.09.

CONDITION OF PUBLIC BUSINESS.

I am pleased to report that the public business intrusted to my charge is in a fairly satisfactory condition. The work performed during the fiscal year 1891 is fully set forth in the detailed report of each division of the office, to which attention is respectfully invited. The result, so far as accounts and claims are concerned, is summarized in the tabular "recapitulation," which shows the number of each class of accounts, etc, on hand at the commencement of the year, the number received and disposed of during the year, and the number awaiting action on June It will be seen that the unsettled accounts and claims, which numbered 63,397 on July 1, 1890, have been reduced to 61,173, of which 58,465 are claims for arrears of pay and bounty, 32 are Indian claims, 641 are accounts of disbursing officers, and 2,035 are property accounts. The accounts of Army disbursing officers, and returns of clothing, camp; and garrison equipage have been settled so nearly up to date that, practically, there are no arrearages. Indian claims have also been promptly audited and reported to the Second Comptroller. The money and property accounts of Indian disbursing officers are somewhat in arrears, there being 252 quarterly cash accounts and 240 quarterly property accounts awaiting examination, as well as 336 sets of "explanations" to accounts previously audited, in which suspensions were made in consequence of the vouchers presented not being satisfactory. It is highly

desirable that all disbursing officers' accounts be speedily adjusted so that a proper check can be kept upon their disbursements, and I shall therefore use every endeavor to dispose of existing arrearages and thus place the accounts of Indian agents on the same footing as the accounts of Army disbursing officers.

With regard to arrears of pay and bounty, I am able to report that since the close of the fiscal year 1891 a decided impression has been made upon the mass of unsettled claims, and that on October 1 the number of such claims remaining on hand was reduced to 50,269, a gain of 8,196 as compared with the returns for June 30, 1891, and of

9,901 as compared with the returns for June 30, 1890.

DISALLOWED CLAIMS.

Attention is again invited to the great number of claims for arrears of pay and bounty presented to this office in cases where payment in full has already been made. Out of 32,058 claims disposed of last year no fewer than 13,245 were disallowed, while balances were found due the claimants in 9,361 cases.

Prior to January, 1882, the Auditor summarily rejected a claim when it did not appear from the records that anything was due from the Government. If, however, the claimant was dissatisfied with the action of the Auditor and requested that his case be referred to the Second Comptroller it was referred accordingly. This practice of disposing of worthless claims terminated December 31, 1881, in consequence of a decision of the Second Comptroller that "when an account is presented to the Second Auditor, and the subject matter of the account is within his jurisdistion, section 277 of the Revised Statutes requires him to certify the balance of the account and transmit the account, with the vouchers and certificate, to the Second Comptroller for his decision The duty of the Auditor under section 277 does not depend upon the amount found to be due. If the balance is nothing, the law requires it to be so certified, and the account, vouchers, and certificate are to be transmitted to the Comptroller" (Second Comptroller's Digest, vol. 2, p. 147).

I present a tabular statement showing the number of claims allowed and disallowed since this decision went into effect.

₩	Cla	ims—	ti I		
Year.	Allowed.	Disallowed.	Year.	Allowed.	Disallowed.
1882 1883 1884 1885 1886	3, 371 2, 931 3, 609 3, 852 6, 170	9,574 5,281 5,911 7,782 8,778	1888	7, 895 6, 654 9, 223 9, 361	10, 666 8, 686 10, 360 13, 245
1887	8, 744	14, 264	Total	61, 810	94, 547

It will be observed that out of 156,357 claims that have been formally certified to the Second Comptroller during the last 10 years more than 60 per cent. were cases in which nothing was due the claimants, although there is no reason to suppose that the claims were not presented in good The formal settlement of this large mass of worthless claims not only cost the Government tens of thousands of dollars which might just as well have been saved by the summary rejection of every demand where there was prima facie evidence of full payment, but it also delayed the adjustment of a large number of accounts where balances were really due

the claimants. As there is no check upon the presentation of claims for arrears of pay and bounty the Auditor must continue to receive and examine all such claims as have accrued since the organization of this office, in 1817, and must formally submit them to the Second Comptroller, with the vouchers pertaining thereto for his action, as required by law and the decision above mentioned. It the soldier or his heirs have already been paid in full a simple statement of that fact will not suffice. In the words of the Second Comptroller, "if the balance is nothing the law requires it to be so certified, and the account, vouchers, and certificate are to be transmitted to the Comptroller." In my judgment a law which requires the formal certificate of two accounting officers to the fact that a soldier has been paid in full is susceptible of amendment, and I suggest that section 277 of the Revised Statutes may properly be so modified as to authorize the Second Auditor to disallow claims for arrears of pay and bounty in cases where the muster and pay rolls or other records of his office show that the soldier or his heirs have received all they are entitled to under the law; provided that if the claimants are dissatisfied they may, within 6 months, appeal to the Second Comptroller, otherwise the Auditor's action shall be deemed final and conclusive and be subject to revision only by Congress or the proper courts.

IMPORTANT INDIAN RECORDS.

The tendency of legislation on Indian affairs is towards the policy of conferring upon Indian tribes the right to seek an adjustment of their landed and monetary relations with the United States through the courts. Thus the act of March 3, 1881 (21 Stat., 504), authorized the Court of Claims to take jurisdiction of and try all questions of difference arising out of treaty stipulations with the Choctaw Nation; the act of March 3, 1883 (22 Stat., 585), authorized the Eastern Band of Cherokee Indians to institute a suit in the Court of Claims to determine their right to moneys, stocks, and bonds held by the United States in trust for the Cherokee Indians; the act of October 1, 1890 (26 Stat., 636), allows the Shawnees, Delawares, and Cherokee freedmen to bring suit in the Court of Claims to recover moneys alleged to be due them jointly and severally, and under the "Bowman Act" (22 Stat., 485) matters in dispute between the United States and the Chickasaw and Creek Indians have been referred to said court by the Secretary of the Interior. It is probable that in the near future this will become the settled policy of the Government, and it will therefore be incumbent upon the Second Auditor to furnish the courts and the Attorney-General with complete information, as far as possible, as to the expenditures of appropriations made in fulfillment of treaty stipulations since 1817, in order that it may be determined whether the treaties have been carried out, or to what extent their stipulations remain unfulfilled. For this purpose the files of settled accounts in this office will have to be depended upon, but the information contained in said files can only be obtained after long and careful examination, and even then there is no absolute certainty that all necessary information will have been extracted from the The law, however, makes it obligatory upon the Auditor to furnish the Attorney General, without delay and within a reasonable time, a full statement in writing of all facts, information, and proofs in his possession or knowledge touching any claim brought against the United States in the Court of Claims. (Sec. 188, Revised Statutes.)

The accounts, as formerly kept, on the ledgers of this office do not show in all cases the sums appropriated for particular tribes, nor were

appropriations always made for the tribes specifically. Thus the act of March 3, 1843 (5 Stats., 612), appropriated \$1,472,773 "for the fulfillment of treaties with the various Indian tribes" for a period of eighteen months. In other cases where specific appropriations were made for each tribe the gross amount appropriated was brought on the ledgers under the general head of "Fulfilling treaties with various Indian tribes." In such cases the only mode of ascertaining the facts necessary to determine questions raised in the course of judicial proceedings is to examine the accounts of the superintendents and agents to whom the funds were advanced, as well as the accounts of other agents and subagents to whom they were often transferred for expenditure—a process which will involve the critical revision of several millions of documents filed away in thousands of settlements.

I estimate that it will require the services of ten clerks for one year to make a proper record of payments under Indian treaties. Such a record will be of the greatest service, and will eventually save many

times its cost.

CARD INDEXES VERSUS BOOK RECORDS.

Reference has been made in previous reports to the transfer of 1,551 registers of payments to volunteers from the Pay Department to this office, and to the fact that instead of rebinding, recopying and correcting said registers, many of which were in a dilapidated condition from long and constant use, I had decided to adopt the card index system in use in the Record and Pension Division of the War Department. The work, which was assigned to the division of inquiries and replies, was commenced January 27, 1890, and it was estimated that 650,000 cards would be required. Up to June 30, 1891, payments to discharged enlisted men from twenty-six States and Territories and to about ouehalf of the men from five other States had been carded, the total number of payments being 640,984. It is expected that the work will be completed before 1892. A year's experience with the card-index system has demonstrated its superiority over book records. Where it would take from fifteen minutes to an hour to find a payment on the registers received from the Pay Department, the same payment can be found on the card index in not exceeding two minutes. The work of searching for payments in the book records now takes two clerks. When all the cards are completed one clerk will be able to do all the searching in three hours a day; in other words, one clerk will do in three hours as much as two clerks can now do in one day. This fact speaks for itself and requires no comment.

The application of the card index system to one class of book records having proved so satisfactory, I have extended that system in several directions and anticipate equally good results. The want of a record of payments to enlisted men absent in hospitals, on detached service, in parole camps, etc., has long been felt. Payments to commissioned officers, to regiments, companies, batteries, detachments, and, generally, to all separate commands, were duly recorded. Payments at hospitals and camps of parole were also recorded under the name of the hospital or camp. But as the payees on the muster roll of paroled prisoners of war, say at Camp Parole, Annapolis, Md., might belong to several hundred different organizations, the knowledge that all paroled men at that camp were paid for a certain period was of little service in any individual case unless it was first ascertained that the man whose claim was being adjusted was actually in said camp during that period.

FI 91---36

I therefore decided to have a card index made of all payments to individual enlisted men absent from their commands, and the work is progressing favorably. When completed two desirable results will have been attained—the time required to find a payment to an individual volunteer soldier will be reduced to a minimum and the wear and tear of old muster rolls and youchers will be obviated.

A register of payments to officers of the Regular Army has heretofore been kept in book form the entries being made as soon as possible after the receipt of the accounts from the Pay Department. The vouchers were withdrawn from the paymasters' accounts, assorted by regiments, etc., reassorted alphabetically, and, after being recorded, again reassorted in their original order and returned to the accounts. After due consideration it appeared to me that this time-honored system might be profitably superseded by a simple system which would dispense with the reiterated assortment of vouchers, and involve much less work. Hence the card-index system has been applied to all payments made since the commencement of the present calendar year. At the same time a card record of payments to discharged enlisted men of the Regular Army has been commenced, no record of such payments having previously been made in this office.

Under the regulations of the Treasury Department, made in pursuance of the act of July 7, 1884, a list is kept of attorneys and agents authorized to practice before the Department. As a matter of supposed convenience thirteen copies were made for use in different parts of the office. They have all been discontinued, and in place thereof a card index is kept in the old army division which furnishes without delay and with very little labor such information concerning attorneys and agents as may be needed by the other divisions. The list now contains nearly

5,000 names and is constantly increasing.

Respectfully yours,

J. N. PATTERSON,
Auditor.

The SECRETARY OF THE TREASURY.

Ĉ.

REPORT OF THE THIRD AUDITOR.

TREASURY DEPARTMENT, OFFICE OF THE THIRD AUDITOR, Washington, D. C., July 1, 1891.

SIR: The annual report for the fiscal year just closed is certainly a gratifying exhibit of the work of this office. There is, and will continue to be, a steady increase in the volume of business; for the assignment of departmental duty is such that the accountings examined are in direct touch with the growth and development of the Republic. tary, river and harbor, and pension appropriations represent in the examination of the vouchers of expenditure an infinite detail of careful supervision; and only by close application and expert experience can certainly be demonstrated a faithful and legal disbursement of the immense revenue so liberally allotted for these purposes. Entering into the expenses of the Army and the river and harbor improvements is the transportation account, and this involves, especially with the Pacific railroads, a laborious and careful comparison of schedules and charges, and apportionment of percentages under the law to the Goverment, that is tedious in its detail and requires proportionately more In addition to the natural growth of the list of pensioners, clerical labor. the act of June 27, 1890, has added a very large number of the veterans of the war for the Union to the roll of honor. The increase in the pension work of this office in the past three years is nearly 100 per cent. It now requires a force of ten clerks to record the monthly additions of During the past year a corps of eleven clerks has been concertificates. tinuously employed in making new rolls. It will be necessary to keep a detail of clerks constantly employed in the preparation of new records. An account is kept with each pensioner; so some abstract idea can be formed of the magnitude of the labor and the care necessary, to the end that the sacred purposes of the pension appropriation shall be shown to have reached the honored beneficiaries of the country's gratitude. The exhibits referring to the pension disbursements are comprehensive in statistical data, and will be found of special interest. bursement section is growing, and must continue to grow as the ranks of the old soldiers are decimated by the touch of death. The work of the office is not behind; each division is practically on current labor, and I doubt not will be able to continue this record the coming year without any increase of force, other than the five clerks of Class E authorized by the Fifty-first Congress.

During the year past I consolidated the miscellaneous division with other divisions of the office, and experience has proved that it expedited the work. In the coming year I shall consolidate the collection division. The labor of this office divides on four natural lines, and I hope to arrange the duties of the divisions to conform to this practical business demonstration. Too much organization is not only cumbersome, but, aside from creating superfluous places, retards rather than expedites the work. The coming fiscal year I will be able to consolidate the horse claim division, and instead of having seven divisions, as in 1888, meet the increased duties with four divisions.

I desire to specially congratulate the force of this office for its industry and conscientious discharge of duty. The record of results, as will appear in the tabulated statements of division work, is a worthy compliment to their faithfulness.

There are 141 employes connected with this office. The time lost by sickness during the year past amounted to 1,131 days. The following clarks died during the recovery

clerks died during the year:

French, A. R., October 14, 1890. Mohl, Frederick, March 28, 1891. Montague, P. H., September 11, 1890.

Peake, James B., October 31, 1890. Pope, William, November 13, 1890.

The number of resignations were three: H. V. Cooke, July 31, 1890; Minnie C. Moreau, September 16, 1890; C. A. Rodgers, September 10, 1890.

The following were changed by appointment and transfer:

Brookings, Edward J., transferred from War Department, January 13, 1891; Bartlett, Miss S. A., transferred from Bureau of Navigation, January 5, 1891; Caruthers, J. O., transferred from Superintendent's office, December 5, 1890; Clark, David A., transferred from Internal Revenue, June 8, 1891; Costello, Mrs. Gertrude, transferred from Second Auditor's, September 11, 1890; Cowie, Jno. G., transferred from Secret Service division, February 6, 1891; Doran, Thomas S., transferred to Second Auditor's office, October 1, 1890; Guyton, Eva E., transferred from Second Comptroller's office, December 5, 1890; Hampton, E. P., transferred to Superintendent's office, December 5, 1890; Hay, Miss Corinne, transferred from Treasurer's office, December 5, 1890; Hoffman, Miss C., transferred to Secretary's office, July 11, 1890; Huntoon, Andrew J., transferred to Second Comptroller's office, October 8, 1890; McEwen, W. C., appointed July 23, 1890; Nippen, John T., transferred from Sixth Auditor's office, January 8, 1891; Sprague, Dewit C., transferred to Second Comptroller's office, October 8, 1890; Watkins, Sarah A., transferred from Life-Saving Service, April 2, 1891.

Promotions made during the year:

Thomas Kee, from class E to class 1, August 30, 1890; H. H. Seltzer, from class 1 to class 2, November 24, 1890; Miss J. A. Somerville, from class D to class E, September 6, 1890; Mrs. M. J. Wallace, from class 1 to class 2, August 30, 1890; Miss Hannah M. Whitney, from class E to class 1, October 20, 1890; Thomas C. Clark, from class E to class 1, October 21, 1890.

In the estimate for the next fiscal year, an additional assistant messenger will be asked for, and one less chief of division. The pres-

ent clerical force will be adequate.

HORSE CLAIMS DIVISION.

The beginning of the end of the horse-claim industry is very happily within vision. The presentation of new claims is barred after August 13, 1891. Of the class of losses considered by this division there have been since the war about 21,000 horses paid for. Of the 5,014 claims on hand now nearly one half have been awaiting calls for additional evidence, or, in cases growing out of the Mexican war, for proof of loyalty. In some of the claims post-office addresses of claimants have been lost. The pension files are frequently examined in the effort to supply this deficiency. No court would permit its docket to be weighed down with dead causes, and so the practice will be adopted hereafter, in the settlement of horse claims, of rejecting without prejudice all cases where no attention has been given for 5 years. This policy will very much facilitate the disposition of the present accumulation during the coming year.

CLAIMS DIVISION.

To this division is assigned all the miscellaneous claims, railroad and telegraph accounts, lost vessels, Oregon and Washington Indian war claims, State war claims, etc. The nature of the duties requires not only expert accountants, but a familiarity with appropriations, statutes, and departmental business, that renders it one of the most responsible and important divisions in the Treasury. Its record is as follows:

	Number of claims.	Amount claimed.	Amount allowed.
Miscellaneous claims.			
On hand July 1, 1890	4, 424 8, 216

The tabulated statement of the work in the Pension and Bookkeeper's Divisions is referred to the following exhibits in the appendix:

EXHIBIT A.—Report of the operations of the Pension Division for year ending June 30, 1891, showing the number of "Army pensions," "Arrears," "Special," and "Supplemental," and the amounts involved.

EXHIBIT B.—Amount of arrears of Army pensions disbursed by pension agents

during fiscal year.
EXHIBIT C.—Report of Reimbursement Section.

EXHIBIT D.—Comparative statement showing the nature of work and amount

involved in Pension Division during fiscal years 1-89 and 1890, respectively. Exhibit E.—Comparative statement of accounts paid by pension agents during period from July 1, 1882, to June 30, 1891, and work of Third Auditor's Office in auditing such accounts for same period.

EXHIBIT F.—Comparative statement showing disbursements by pension agents to pensioners and examining surgeons during the fiscal years 1886, 1887, 1888, 1889, 1890, and 1891, and entire expenses of the agencies during said years, including salaries, clerk hire, rent, fuel, lights, and contingent expenses, and the average cost for each \$1,000 disbursed.

EXHIBIT G.—Consolidated statement of work on hand at date of consolidation of agencies, July 1, 1887, amount received and disposed of each fiscal year since that date, and amount remaining on hand at close of each fiscal year; also

average number of clerks employed each year.
EXHIBIT H.—Statement of amounts paid to each class of pensioners, etc., as shown by accounts-current of pension agents, during year ending June 30,

EXHIBIT I.—Statement showing amounts advanced to and disbursed by pension agents during fiscal year ending June 30, 1891; also balances covered into the Treasury during the year, and balances remaining in hands of agents June 30, 1891.

EXHIBIT J.—Consolidated report for year ending June 30, 1891.

EXHIBIT K.—Report of Bookkeeper's Division.

STATEMENT CONCERNING THE FILES OF SETTLED ACCOUNTS IN THE OFFICE OF THE THIRD AUDITOR FOR THE YEAR ENDING JUNE 30, 1891.

NEW ACCOUNTS FILED.

Quartermaster, Subsistence, and Engineer settlements Pension settlements Miscellaneous Claims settlements Property Returns settlements	3, 77 6 3, 546
Volumes Pension Abstracts bound during the year Volumes Pension Abstracts bound previously	16, 097 425 557
Total now bound On hand and unbound (estimated). Cubic feet of space filled with new matter Lineal feet of shelving, 17 inches wide	750 1, 610

The files are very much crowded, so much so that the floors have to be now utilized for the accommodation of the accumulating papers. By shelving several of the rooms on the Bureau floor this year's accounts have been partially accommodated. Electric lights have been put in, which lessens the danger from fire.

Respectfully,

W. H. HART, Auditor.

Hon. CHAS. FOSTER, Secretary of the Treasury.

APPENDIX.

PENSION DIVISION.

Exhibit A.—Report of the Operations of the Army Pension Division, Third Auditor's Office, for the Fiscal Year ending June 30, 1891.

Accounts of pension agents, and amounts involved, including supplemental settlements; also special settlements, accounts for lost checks, reclaimed checks, examining surgeon's fees, attorney's fees, etc., on hand July 1, 1890, received and audited during the fiscal year, and remaining on hand June 30, 1891.

EXCHANGE.

Bills of exchange were sold by the pay officers of the Navy Department during the year to the amount of \$1,195,506.74. Of this sum \$738,376.05 was drawn on the Navy agents at London and \$457,130.69 on the Secretary of the Navy.

These bills were negotiated at varying rates of exchange, the gross loss being \$30,539.66; gross gain, \$9,995.44; making the total net cost

of negotiation \$20,554.22.

SPECIAL FISCAL AGENTS AT LONDON.

The same contract continues in force with Messrs. Seligman Bros., special fiscal agents at London, as stated in my last annual report, viz:

A commission of one-half of 1 per cent is paid on disbursements made by them on account of the Navy Department. On daily balances in their hands they pay to the Government the rate of interest paid by the London joint stock banks, and on advances they receive the rate charged by the Bank of England. Commissions amounting to \$3,853.56 have been paid to them during the year. They have paid the amount of \$13,644.15 as interest on the daily credit balances. There has been a gain of \$3,781.32 in the transfer of funds from New York to London.

WORK OF THE OFFICE.

The following tables show a summary of the work performed in the different divisions of the office for the fiscal year:

The sum of \$3,420.46 was expended under section 4718 of the Revised Statutes to reimburse those who bore the expense of last sickness and burial of pensioners. Also the amount of \$94 was paid as fees to examining surgeons for surgical examinations made during the fiscal year ending June 30, 1891.

CONDITION OF BUSINESS.

You will observe that material progress has been made by the different divisions of the office in bringing up the work heretofore in arrears. In every division the claims and accounts on hand unsettled is considerably less than at the end of the preceding fiscal year. While recent pension legislation has materially increased the work of at least two divisions of the office, and while the increase in the clerical force has not been commensurate with the increased labor as a result of such legislation, yet I am happy to be able to say that the work has been kept up by the present force to a satisfactory degree.

The number of letters of inquiry from the Pension Office unanswered a few mouths ago was over 6,000, covering a period of over six months. At this writing the number has been reduced to less than 3,000, covering a period of less than three months. Unless there is a material increase in the number of inquiries, which I do not anticipate, I am satisfied that this class of work will be fully up to date before the end of the present calendar year, and at that time a part of the force now engaged upon it can be assigned to duty in the paymaster's division, the work of which is now somewhat in arrears.

The work of the paymaster's division requires the highest order of clerical ability, hence my recommendation in the "Estimate for salaries, 1893," that the two \$800 clerkships should be abolished and one \$1,600 clerk be allowed in lieu thereof; one such clerk will be of more value to the office than two \$800 copyists. I have every reason to believe that before the end of another year the work of every division will be up to date.

Too much can not be said in commendation of the efficient chiefs of the different divisions of the office and their able corps of clerks. They have been faithful, attentive, and industrious, and they fully merit all the words of commendation that can be bestowed upon them by the head of the office.

I have the honor to be, sir, your obedient servant,

JOHN R. LYNCH, Auditor.

Hon. CHARLES FOSTER, Secretary of the Treasury.

REPORT OF THE FIFTH AUDITOR.

TREASURY DEPARTMENT, FIFTH AUDITOR'S OFFICE, Washington, D. C., October 30, 1891.

Sir: According to your instruction under date of the 2d ultimo, I have the honor to hereby submit to you the annual report of this office for the fiscal year ended June 30, 1891.

The following is a statement showing the character and amount of

the work performed:

Accounts adjusted	8, 387
Vouchers examined	
Reports copied	
Letters written	
Coupon books of internal-revenue stamps counted	
Letters copied by hand	
Comptroller's certificates copied	8,409
Invoice and debenture certificate numbers posted from returns of collectors of customs (section 4213, Revised Statutes)	
Consular-fee reports proven	2, 469
Pages of consular-fee reports tabulated	18, 216
Drafts examined for payment	1, 113

The accounts shown to have been adjusted are more than three times the number ordinarily settled annually by this office in the regular course of business. The excess consists almost wholly of 27,372 claims for rebate of revenue tax on tobacco and snuff, which were settled during the last four months of the fiscal year; while these claims were simple compared with the other accounts settled in this office, they entailed a very large amount of extra work. The regular business of the Bureau was thereby necessarily retarded, the extra work coming upon a clerical force whose common duties were already adequate to their strength. But I am gratified to be able to report that by close application to business, and by working during extra hours, the lost ground has been recovered and the work is now up to its customary status of completion.

I appreciate the interest manifested in the public business connected with their desks, by the clerks of the office, and commend them for the industry and alacrity with which they have prosecuted their labors.

The results of the system of checking consular fees from customs returns (section 4213 of the Revised Statutes, the work of which appears in two captions of the above statement) are quite satisfactory. A considerable amount of fees is annually saved to the Treasury by the detec-

tion and correction of errors and omissions in fee returns and of prac-

tices tending to deprive the Government of its revenue.

The matter to which my letter to you, of the 25th of June last, related, was one of the results of the workings of this system in this Bureau, in which it was discovered that goods ostensibly shipped through this country to a foreign destination were being entered largely for consumption in the United States, the official fee of \$2.50 required by law for exportations to this country, for each consular certification to an invoice, being in these cases retained by the consul as a notarial or personal fee, under the decision of the Supreme Court of the United States in the case of Mosby vs. the United States (133 U. S. Reports, 273), in which the fees for certification by United States consuls of invoices for goods in transit through the United States to other countries were declared to be unofficial fees and as belonging to the coosul.

You were pleased to lay the subject before the Department of State on the day following the receipt of my letter, and thereupon, on July 17, 1891, that Department issued a circular to the consular officers of the United States, in which the following conclusions were reached and in-

struction given:

This discovery leads to the belief that the obtaining of a consular invoice for goods shipped ostensibly in transit through the United States to some other county is prima facie evidence of an intent to dispose of the goods in the United States if it be found on arrival there to be advantageous to do so. A shipment nominally "for transit," but with the option of sale in the United States, and so documented as to enjoy the privilege of entry for consumption as well as for transit, should be regarded and treated as an export to the United States, and the fee for certifying the invoice should be turned into the Treasury as official. The fee for an invoice of goods shipped for transit through the United States is unofficial only when the goods are shipped bona fide and absolutely for transit, without any arrangement for the contingency of a sale in the United States. You will be held to account for the fees in accordance with this instruction.

I have construed this circular to mean that in all cases where a certificate to an invoice is procured from a consular officer of the United States the fee therefor shall be returned to the Treasury as official, without regard to the alleged destination of the goods; and those officers are being so instructed when the subject is adverted to in their correspondence with this Bureau. It seems to be the only practical and safe solution of the question, the difficulty being to ascertain in each case the final disposition of the goods. Neither the assertion of the shipper nor the writing upon the invoice that the goods are "for transit" is a guaranty of the absolute carriage of the merchandise through and out of the United States.

There will now follow in the order of the divisions of the office some exhibits resultant upon the adjustments of accounts and claims and suitable remarks thereon, and at the end of the report will appear the customary appendix, tables lettered from A to K, showing in detail the condition of the public business to which they relate.

DIPLOMATIC AND CONSULAR DIVISION.

Diplomatic service.—The accounts of ministers and other officers of the diplomatic service have been adjusted, showing (Table A of the Appendix) expenditures and passport fees for the year, as follows:

Paid for salaries of ministers	\$288, 297, 54
Paid for salaries, secretaries of legations	31, 302, 20
Paid for salary, clerk to legation in Spain	1,200,00
Paid for salaries, diplomatic officers, while receiving instructions and in	.,
transit.	14 002 91

Paid for salaries, charges d'affaires ad interim	\$26, 792, 06
Paid for salaries, interpreters to legations	9, 279, 29
Paid for contingent expenses, foreign missions.	95, 898, 96
Paid for loss by exchange, diplomatic service	5, 656, 74
Total salaries and expenses	473, 330, 60
Passport fees received and accounted for	1,767,56

The total of salaries and expenses for this service is greater than that reported for last year, the excess being principally on the contingent expenses, foreign missions, which exceeds the amount for 1890 by \$18,857.62.

There are six legations for which the salary accounts of the ministers have not been received for the quarter ended June 30. These are

pointed out in Table A of the Appendix.

The appropriations for salaries, charges d'affaires ad interim, \$20,000, and loss by exchange, diplomatic service, \$2,500, have each been exceeded, the former by one third and the latter by more than double the amount appropriated.

The deficiencies in both of these appropriations are larger than they

were for last year.

Consular service.—Accounts of consular officers have been adjusted, showing expenses for this service and official fees collected, as follows (Tables B, C, D, and E of the Appendix):

Pa	id:	**
	Salaries, consular service	\$480,091,48
	Salaries while receiving instructions and in transit	20, 373, 05
	Salaries, consular officers not citizens	13, 099, 73
	Salaries, consular clerks	13, 212.52
	Loss on bills of exchange	7,006.63
	Pay of consular officers for services to American vessels	21, 312, 01
	Compensation from fees (sections 1703, 1730, and 1733, Revised Stat-	
	utes)	195, 879, 59
	Office rent and clerk hire (section 1732, Revised Statutes)	3, 272, 46
	Contingent expenses, United States consulates	219, 880, 68
	Allowance for clerks at consulates	86, 175, 33
	Expenses of prisons for American convicts	7,767.48
	Salaries, interpreters to consulates in China, etc	13, 350, 00
	Salaries, marshals for consular courts	8, 332, 88
	Expenses of interpreters and guards, etc	4,561,28
	Boat and crew at Hongkong and Osaka and Hogo	842.76
	Don't war to the first and a same to the transfer to the same transfer t	
٠.		1,095,160.93
Ŗθ	occived:	000 140 50
	Consular fees received for official services	978, 142. 58
	Excess of expenditures over receipts	117, 018, 35

The expenditures for the consular service have exceeded the receipts for the first time since 1886. The expenses show an increase of \$63,112.85 over last year, and the fees a falling off of \$61,510.68, making a difference of \$124,623.53. About seven-eighths of the increase in expenses occurred in the "contingent expenses, United States consulates" and "allowance for clerks at consulates." The remainder is for "salaries while receiving instructions and in transit" and "salaries, consular service," for the former of which an appropriation was made for this year for the first time, the appropriation for "salaries, consular service," having heretofore had to bear the extra compensation incident to instructions and transits in addition to the regular salaries while at post. The new appropriation is a step in the right direction, and the need therefor had been a subject of remark in the annual reports of this office for a number of years. It was suggested in the report of this Bureau for the fiscal year of 1887 that an annual permanent

FI 91---38

appropriation should be made to cover the payments to consular officers while receiving instructions, awaiting the receipt of their exequaturs and making transit. The new appropriation does not include the payments for time while awaiting the receipt of exequatur, which it would seem proper for it to do, as the payments made for time thus employed duplicate with the regular salary of the officer in charge of the post, as in case of payments for instructions and transit salary.

Three appropriations have been exceeded by the expenditures reported in the above summary, viz: "Salaries, consular officers not citizens," "loss by exchange, consular service" and "contingent expenses,

United States consulates."

Consular fees.—The consular fees collected for official services are stated in detail, as to the character and amount at each consulate, in Table H of the Appendix (page 619), and aggregate, in kind and amount, as follows:

Invoice certificates	
Bills of health	
Other fees	
Total	978 149 59

The falling off in the consular fees is upon invoice and currency certificates. The invoice fees are short in amount of those received last year by \$55,285.50; which, at the rate of \$2.50 per invoice, would show 22,114 fewer dutiable importations of foreign goods into this country during the year.

Relief of seamen.—As shown in Tables F and G of the Appendix, accounts for relief and wages of seamen were adjusted with the following

results:

Board and lodging	. 5.610.49
Medical aid Other expenses Loss by exchange Passage to the United States paid at the Treasury	8,031.11 282.93
Total	262, 899. 02
Amount of extra wages and arrears paid to seamen. Amount of extra wages and arrears paid for relief. Amount of extra wages and arrears in hands of consuls.	6, 261. 96
Total	
Total relief afforded seamen	38, 703. 67 6, 261. 96
Amount paid by the United States	32, 441, 71
Total sum appropriated	50,000.00

The cost of relief of destitute American seamen for this year, namely, \$32,441.71, is less than it has been for the last two previous years, yet the number of seamen relieved (1,282) is greater. The amount of relief reported for last year (1890) was \$38,277.75, while the number of seamen aided was 1,174, and for the year before (1889) \$34,813.19 were expended for 956 seamen.

It is suggested whether the disbursement of a smaller sum for the

care of a larger number of seamen may not indicate greater attention by consular officers to the duty of freeing their consulates as soon as possible of the subjects of relief, and thereby lessening the amount of expense per capita.

The average amount of expense per head was \$25.30.

The three largest amounts paid for relief by consular officers for the year were at consulates in Nova Scotia, namely:

At Halifax	 	 \$4,411.09
At Pictou		
At Yarmouth		

inclusive of amounts paid at the Treasury for certificates of transportation issued at those offices, the whole aggregating nearly one-third of the total relief afforded seamen, and the men receiving it, numbering 511, amounted to nearly one-half of the whole number relieved during the year. And it is worthy of notice that while such heavy relief is granted by these consulates, the seamen's wages collected by them are insignificant. It may be stated also that the seamen receiving relief at these and neighboring points are mainly fishermen, and many of them appear in the reports to have been simply lost from their vessels, a condition considered unfavorable to relief, at least of the nature of clothing.

Other expenses of the foreign service.—Accounts other than those herein before reported and in addition to the amounts which are included in the following table of disbursing clerks' accounts, adjusted during the year and relating to appropriations, as follows:

International American Conference	\$46, 194. 41
Conference of North, South, and Central American States	23,986.46
International Marine Conference	10, 447, 46
International Union of American Republics	3,547.63
Venezuela and American Claims Commission	30.33
Continental Railway Commission	4.00
International Standard Weights and Measures	6,724.45
Commission on the Establishment of International Coins	525, 29
Protecting the interests of the United States in the Samoan Islands	1, 333, 33
Publication of international catalogue of exports and imports	558, 90
Publication of consular and commercial reports, 1891	11, 793, 22
Procuring evidence relating to French spoliation claims	529.40
Refunding penalties or charges erroneously exacted	233, 42
Allowance to widows or heirs of diplomatic or consular officers who die	
abroad 1891	104.17
Transporting remains of diplomatic officers, consuls, and consular clerks,	. =
1891	616.64
Fees and costs in extradition cases, 1891	406.37
Relief of claimants for destruction of private-armed brig General Arm-	2.0.0.
strong	121.65
Relief of Henry Clay and others, owners and crew of the whaling schooner	
Franklin, per private act No. 166, approved February 21, 1891	3,500.00
Relief of the owners and crews of the American whaling vessels Midas,	0,000.00
Progress, Lagoda, Daniel Webster, and Europa, private act No. 171,	
approved February 21, 1891	125,000,90
Buildings for legation in Japan, 1891	2,000.00
Steam launch for legation at Constautinople, 1891	1,086.19
Bringing home criminals, 1891	282.57
Payment to A. H. Allen, act of September 30, 1890	110.60
Rescuing shipwrecked American seamen, 1891	350.00
Foreign hospital at Panama, 1891.	500, 00
Total Hookens and amama, tookers	500.00

Disbursing clerk's accounts.—Accounts of F. J. Kieckhoefer, disbursing clerk of the Department of State, have been adjusted, showing expenditures from appropriations as follows:

Salaries, Department of State, 1890, \$1,000; 1891, \$110,671.51	\$111,671.51
Stationery and furniture, Department of State, 1890, \$21; 1891, \$5,995.28.	6,016,28
Contingent expenses, Department of State, 1890, \$279.40; 1891, \$5,599.13.	5, 878, 53
Books and maps, Department of State, 1890, \$376.50; 1891, \$1,729.73	2, 106, 23

Estate of Daniel Healy.	\$39.00
Estate of Frederick Poucher	
Estate of William Thomas	833.19

INTERNAL REVENUE DIVISION.

The total collections of internal revenue during the fiscal year 1891, as shown by the adjustments of collectors' accounts, and exhibited in detail in Table I, amounted to \$145,624,272.42. Included in this amount \$12,405.03 belongs to the collections of previous year.

The accounts of collectors of internal revenue, as adjusted for the fiscal year, aggregate \$3,875,287.24, inclusive of amounts allowed storekeepers and gaugers. These expenses in detail are given in Table K (page —).

Of this total expense the sum of \$74,767.63 belongs to prior fiscal year, of which \$550.56 is commissions on tax-paid spirit stamps sold. The following exhibit shows, by States, for what these expenses were

Five hundred and forty-nine claims for the redemption of stamps, amounting to \$23,165.65, were settled during the year, from which \$365.25 were discounted, leaving \$22,800.45 actually paid.

By the last annual report of this office for 1890 it appeared the Secretary of the Treasury had on deposit to his credit on account of "fines, penalties, and forfeitures" (special deposit account No. 1) \$52,336.70. During the year \$190,654,59 have been deposited and \$172,622.98 have been disbursed, leaving a balance to his credit January 1, 1891, of \$70.368.31.

On account of "miscellaneous deposit" (special deposit account No. 3) there was a balance to his credit January 1, 1890, of \$70,171.59; \$79,847 have been deposited and \$72,602.87 disbursed, leaving a bal-

ance to his credit January 1, 1891, of \$77,415.72.

The balance to his credit January 1, 1890, on account of "offers in compromise" (special deposit account No. 5), was \$28,235.45. During the year \$76,509.43 were deposited and \$84,896.78 disbursed, leaving a balance to his credit January 1, 1891, of \$19,854.10.

Accounts were adjusted for the following sums refunded:

Taxes erroneously assessed and collected, \$69,210.32; drawback on beer exported, \$29,891.16; and on other merchandise exported, \$16,928.38; and surplus proceeds of lands sold for taxes in the late insurrectionary States, \$643.47.

The disbursements made by George Waterhouse, special disbursing agent of the Treasury Department of the South Carolina free school

fund commissioners, amounted to \$1,884.25.

Accounts of one stamp agent, involving \$70.63, were adjusted during the year.

Accounts of Robert Martin for taking census of Oklahoma amount to \$2,764.13.

Accounts of Theodore Davenport, disbursing clerk, Post-Office Department, have been adjusted, as follows:

REPORT OF THE SIXTH AUDITOR.

TREASURY DEPARTMENT, SIXTH AUDITOR'S OFFICE, Washington, D. C., October 10, 1891.

SIR: I have the honor to submit the following report of the business operations of this office during the fiscal year ended June 30, 1891.

The following table shows the principal transactions of the office in money orders and postal notes for the fiscal year ended June 30, 1891:

Reference was made in the last annual report of this office to the reorganization of the Bureau, the changes adopted in the manner of executing the work of auditing postal accounts and the consolidation of records, and a statement was made of the results expected therefrom in economy of labor and expedition of business. It affords me pleasure to state that the test of a year's experience has fully demonstrated the practicability and value of the changes made. Under the system now in use all postmasters in the United States were advised prior to September 30, 1891, and in advance of the preparation of their returns for that quarter, of the state of their postal accounts as audited to June 30, 1891, and this office is enabled on this date, October 10, 1891, to submit to the Secretary of the Treasury and to the Postmaster General a statement of the receipts and expenditures of the postal service for the last fiscal year, a result not beretofore attained, and one hardly possible to exceed under a system of quarterly accountability. change of methods has proven equally satisfactory in point of improvement, in correctness of work, and in the earlier collection of debit and payment of credit balances. The gain has been no less in efficiency than in promptness. An important advantage resulting from the improved system has been experienced in the preparation during the present year, without the least interference with current work, of the large mass of material furnished by this office for the publication of the Official Register of the United States, which formerly required a detail of ten or fifteen clerks for several months.

The work of the several divisions engaged upon the accounts of money-order business and those for mail transportation is in a satisfactory condition. Arrears of work in some of the divisions have been fully brought up to date, so that settlements of accounts are made with promptness. A change of assignment has been made, whereby the "checking" or comparison of money-order statements with their vouchers is performed by the checking division, and all "assorting and numbering" of money orders and postal notes by the "assorting" division.

The offices of the money-order divisions have been transferred from the building known as Marini's Hall to the handsome and commodious Busch Building, on E street, between Seventh and Eighth streets, inmediately opposite the Post Office Department, where the employes of those divisions enjoy a degree of personal comfort and official convenience unknown to them during the history of the Bureau. The steel file and book cases adopted for the Busch Building, upon my recommendation and through a special appropriation by Congress, have proven most valuable for compactness, ease of access, and security afforded to contents. It would be highly advantageous to have the system of these files adopted throughout the office.

I renew the recommendation made in my last annual report to the effect that inasmuch as the "Busch Building" is occupied wholly by employés of the Treasury Department it should be placed in the custody and under the control of the Secretary of the Treasury. I strongly urge your attention to this recommendation, with a view to procuring the necessary legislation. This request does not imply any dissatisfaction on the part of this office with the present management of the building, for all reasonable wants are supplied and the building is well cared for in all respects. I desire the change simply on the ground that, in my opinion, the head of the Treasury Department should exercise control over all the buildings occupied exclusively by Treasury employés. There can be no better argument for continuing the present

control than could be found for transferring the custody of the offices of the Second Auditor to the War Department, or those of the Fourth

Auditor to the Havy Department.

I desire to acknowledge my appreciation of your kind advice and assistance in my official duties, and of the unvarying courtesy constantly extended to this office by your Assistant Secretaries and all the officers of the Department. Whatever of utility and value I have been enabled to accomplish has been due to the aid and support I have received from my superiors, and to the admirable devotion to the public interest displayed by all the officers and employes of this office through. out a trying year of hard labor. Respectfully submitted.

T. B. COULTER, Sixth Auditor.

Hon. CHARLES FOSTER, Secretary of the Treasury.

REPORT OF THE REGISTER.

TREASURY DEPARTMENT,
REGISTER'S OFFICE,
Washington, October 31, 1891.

SIR: I have the honor to submit the following report of the operations of this Bureau during the fiscal year ending June 30, 1891:

The appropriation under which the work of the fiscal year was performed called for 108 officers and employés, at an expense of \$139,750. Of this appropriation there was spent \$138,785.61, leaving unexpended about \$1,000. The number in each division, and the amount of salaries paid, appear immediately beneath the headings preliminary to the remarks and statements made regarding the work of the several divisions and a complete and consolidated statement of the number and grade of all in the Register's Office, together with a mention of details to other bureaus, is given in the following table:

DISTRIBUTION OF FORCE AND SALARIES FOR THE FISCAL YEAR ENDING JUNE 30, 1891.

Divisions.	Register, \$4,000.	Assistant Register, \$2,250.	Chief of Division, \$2,000.	Class 4, \$1,800.	Class 3, \$1,600.	Class 2, \$1,400.	Class 1, \$1,200.	\$1,000.	\$900.	Messenger, \$840.	Assistant messenger, \$720.	Laborer, \$660.	Number in each division.	Salaries.

RECEIPTS AND EXPENDITURES DIVISION.

(Number representing average force employed, 32.53; cost \$46,491.16.)

This division keeps accounts of all receipts and expenditures of public moneys, and all debts due to and from the Government; receives, enters, and files, with accompanying vouchers and other papers, all reports of account settlements made by the First Comptroller and Commissioner of Customs, and the quarterly statements to the Secretary of the Treasury, of the War, Navy, Interior, and Post-Office Departments, upon requisitions on the Secretary of the Treasury; records and certifies all warrants save those of the Secretaries of War, Navy, Interior Depart-

ment proper, or the Postmaster General; and furnishes to accounting

officers certificates showing balances of accounts.

During the fiscal year, this division lost, by death, one of its most valuable fourth-class clerks, Dr. William Guilford, and subsequently, on September 3, suffered a further and similar loss in the decease of Charles N. Lapham; but its employés effectively carried on all the work incumbent and devolving upon them, details of which appear in the various statements appended to this report.

The condition of the United States Treasury, the receipts and expenditures during the fiscal year, and balance on hand at close of same,

appear in the following table:

Receipts during the fiscal year 1891, from-

CONDITION OF THE UNITED STATES TREASURY, GIVING THE RECEIPTS, EXPENDITURES, AND BALANCE, FISCAL YEAR ENDING JUNE 30, 1891, AS SHOWN BY THE BOOKS OF THE RECEIPTS AND EXPENDITURES DIVISION.

RECAPITULATION.

From the foregoing it appears that on the 30th day of June, 1890, the United States Treasury contained. During the fiscal year there has been received: From customs From internal revenue. From issues of gold and silver certificates, legal tenders, certificates of deposit, funded loan of 1907, and Treasury notes of 1890 From fund for redemption of notes of national banks From other sources Total in Treasury and received during year.	\$691, 527, 403, 76 219, 522, 205, 23, 145, 686, 249, 44 309, 637, 167, 00 63, 571, 690, 75 27, 403, 992, 64
Expenditures for the year, summarized, were: Civil and miscellaneous. War Department, including rivers and harbors Navy Department, Interior Department, including \$124,415,951.40 for pensions Premium on bonds redeemed. Interest on public debt Redemptions of gold and silver certificates, legal tenders, and other evidences of public debt Total expended	26, 113, 896, 46 132, 943, 420, 41 10, 401, 220, 61 37, 547, 135, 37 365, 352, 470, 87 731, 126, 376, 22
Leaving in Treasury, June 30, 1891, inclusive of \$28,101,644.91 unavailable funds deposited with States	726, 222, 332. 60
	1, 457, 348, 708. 82

The foregoing tabular statement suggests the various operations of which records are kept by the clerks in this division, the following tables furnishing a classification and statement of certain work performed by the two sections of the division:

WORK PERFORMED IN BOOKKEEPING SECTION.

Covering, repay and counter warrants registered	15,572 $23,535$
Statements furnished the First Comptroller	124
Statements furnished the General Land Office	285
Accounts and warrants journalized	38, 101
Journal entries	
Journal pages written	7,832
Accounts and warrants posted in receipt, personal and appropriation ledgers. Ledger entries	90, 803
Ledger entries	229,672

WORK PERFORMED IN COPY-ROOM SECTION.

Accounts received, stamped, and registered	35, 439
Accounts copied for warrants	19, 953
Civil warrants registered and copied	
War, Navy, and Interior pay and repay warrants registered	16, 582
Transfer drafts registered	1,603

Quarterly schedules of warrants drawn on, and in favor of, Treasurer United States are also furnished First Auditor for use in settlement of Treasurer's general account of receipts and expenditures.

This division prepares the annual volumes of financial history required

by law to be printed.

These volumes, some years since nearly five years behindhand, are now as near up to date as is practicable, the volumes for 1887 having been delivered, those for 1888 and 1889 being in the hands of the printer, that for 1890 nearly completed, and work begun on the volume for 1891.

LOANS DIVISION.

(Number representing average force employed, 15.21; cost, \$21,079.64.)

The expenditures for salaries in this division during the year have

been less than for any period during about 30 years.

Table A, appended, shows the number and amount of United States bonds issued during the fiscal year. A comparison with the report of last year will show that there has been a decrease in number of bonds

issued of 1,077, but an increase in amount of \$1,970,100.

Table B, appended, shows the number and amount of bonds canceled during the fiscal year. A comparison with my last report will show for this year an increase of 8,776 in number canceled and an increase of \$681,250 in amount.

The following table will afford a means of comparison as to number and amount of bonds issued and canceled during the last six years:

Year.	Bone	ds issued. Bone		Bonds canceled.		Total handled.	
rear.	Number.	Amount.	Number.	Amount.	Number.	Amount.	
1885-'86 1886-'87 1887-'88 1888-'89 1889-'90 1890-'91	34, 620 26, 598 21, 500 17, 669	\$180, 987, 250 171, 119, 600 114, 831, 900 103, 894, 350 67, 181, 500 69, 151, 600	70, 753 106, 173 72, 135 85, 149 66, 830 75, 606	\$191, 667, 950 325, 019, 750 189, 656, 950 231, 811, 450 171, 575, 200 172, 256, 450	109, 926 140, 793 98, 733 106, 649 84, 499 92, 198	\$372, 655, 200 496, 139, 350 304, 488, 850 335, 705, 800 238, 756, 700 241, 408, 050	

As classified upon the loan account, the foregoing amounts were divided as follows:

BONDS ISSUED.

	Year.	Direct issues.	Exchanges.	Transfers.	Total issued.
1886-'87	a	44, 050 101, 550 48, 350 50, 100	\$9, 623, 150 19, 139, 700 5, 915, 700 3, 493, 900 1, 888, 100 1, 738, 650	\$171, 301, 550 151, 935, 850 108, 814, 650 100, 352, 100 65, 243, 300 67, 348, 450	\$180, 987, 250 171, 119, 600 114, 831, 900 103, 894, 350 67, 181, 500 69, 151, 600

BONDS CANCELED.

Year.	Redemptions.	Exchanges.	Transfers.	Total canceled.
1885-'86 1886-'87 1887-'88 1888-'89 1889-'90 1890-'91	153, 944, 200 74, 926, 600 127, 965, 450 104, 443, 800	\$9, 623, 150 19, 139, 700 5, 915, 700 3, 493, 900 1, 888, 100 1, 738, 650	\$171, 301, 550 151, 935, 850. 108, 814, 650 100, 352, 100 65, 243, 300 67, 348, 450	\$191, 667, 950 325, 019, 750 189, 656, 950 231, 811, 450 171, 575, 200 172, 256, 450

Table C, appended, shows transactions in Spanish indemnity bonds under act of Congress approved June 7, 1836, and contains a comparison with transactions in same during the fiscal years 1889 and 1890, from which latter it will appear that these transactions have been unusually small this year.

Table D, appended, gives a general summary of unissued bonds

received and on hand at the close of the fiscal year.

Table E, appended, gives a statement of work performed by the loan division during the fiscal year.

The following table gives a classification of the outstanding registered bonds, showing the amount held of each of the unmatured loans, as shown on dividends due June 1 and July 1, 1891:

Loans.	Date of dividend.	Foreign.	Treasurer United States in trust for national banks.	Domestic.	Total.
4½ per cent		\$1, 426, 300 5, 891, 450	\$26, 671, 450 133, 078, 950 10, 019, 000	\$10, 943, 950 344, 145, 950 54, 604, 512	\$39, 041, 700 483, 116, 350 64, 623, 512
Total		7, 317, 750	169, 769, 400	409, 694, 412	586, 781, 562

On comparison of the above table with that contained in my report of last year it will be found that there is a decrease in all holdings, except in issues to the Treasurer of the United States in trust for national banks, upon the 4 per cent and Pacific Railroad loans. Details of both increase and decrease in holdings of such bonds, as compared with last year, are given in the following table:

[Increase +; decrease -.]

Loans.	Foreign.	Treasurer United States in trust for national banks.	Domestic.	Total.
4½ per cent. 4 per cent. Pacific Railroads		-19, 970, 900 +11, 135, 650 +3, 594, 000	-\$28, 948, 650 45, 940, 750 3, 594, 000	-\$50, 047, 400 -35, 684, 150
Total	-2,006,900	-5, 241, 250	-78, 483, 400	-85, 731, 550

The following bonds, issued by the District of Columbia when under a territorial government and purchased by the Treasurer of the United States for the sinking funds of the District, were recorded upon the books of the office during the year 1890–'91:

Loans.	Number bonds.	Amount.
6 per cent permanent improvement bonds. 7 per cent permanent improvement bonds. 6 per cent twenty-year funding bonds.	538 18 82	\$216, 350 13, 500 36, 800
Total	638	266, 650

The only new bonds received were 205 bonds of the District of Columbia, 3.65 per cent issue, and 2,470 of the new 3½ per cent issue, act of March 3, 1891. The latter were intended for issue in connection with refunding the District of Columbia 6 and 7 per cent permanent improvement bonds, due July 1, 1891.

BLANK BONDS ON HAND, RECEIVED, AND ISSUED, YEAR ENDING JUNE 30, 1891. (See STATEMENT D.)

·		Number.	Amount.
Blank bonds on hand July 1, 1890		84, 594 2, 675	\$441, 181, 750 3, 000, 250
Total		87, 269	444, 182, 000
Bonds issued during year	•••••	16, 592 70, 677	69, 151, 600 375, 030, 400
Total		87, 269	. 444, 182, 000

As a consequence of the extension, at 2 per cent, of a large part of the funded loan of 1891, and the calling for redemption of the remainder of that loan, the loans division, at the date of this report, has on hand a large number of surplus unissued bonds which might properly be destroyed at an early date. There were no deliveries of surplus unissued bonds to the destruction committee during the year.

The work in this division, during the last year, has been made unusually heavy on account of the large redemptions of the 4 and 4½ per

cent loans, especially in August, September, and October, 1890.

A very large amount of extra work has also been occasioned by the prepayment of interest upon the registered 4 per cent and Pacific Railroad bonds. Prepayments were made for the great bulk of the interest due on these loans January 1, April 1, and July 1, 1891. Great care was required to accurately distinguish between prepaid and nonprepaid bonds, so as to avoid errors in transactions; and other precautions of like nature were constantly necessary.

The following table shows the amount of principal upon which interest was prepaid on registered bonds, at each of the dividends mentioned:

	Loan.	Divi du	dend e—	Principal.
1907 Consols		Apr. July Jan.	1, 1891 1, 1891 1, 1891	\$284, 314, 400 278, 584, 600 278, 615, 150 51, 001, 680 51, 001, 680

Progress has been made in the general index to all United States registered bonds. The work was undertaken in January, 1889. The card system was adopted. It is proposed to make a card for every account open upon the ledgers in this division, with such cross references as shall show the name of every party or corporation which appears upon the face of any bond. Each card will show all the various places upon ledgers of the same loan, or of different loans, where an account may be found bearing the same title as is written at the head of the card, and will obviate the necessity of searching through many volumes of indexes to ascertain the same facts. A large number of cards have also been prepared in the case of foreign names, so that a person unaccustomed to the usages of foreign lands in regard to surnames may readily find any name which may be called for. So far as completed, the cards have all been arranged for reference.

NOTE, COUPON, AND CURRENCY DIVISION.

(Number representing average force employed, 45.55; cost, \$51,544.48.)

Details of operations in this division appear on examination of tables

1 to 15, both inclusive, appended hereto.

Table 1 shows the redemption of gold certificates, act March 3, 1863; currency certificates of deposit, act June 8, 1872; coin certificates, act July 12, 1882; 4 per cent refunding certificates (payable to order), act February 26, 1879, and 7-30 Treasury notes of 1864 and 1865; in the

aggregate, 4,468 vouchers, and amounting to \$63,530,220.

Table 2 gives a statement of interest checks, various loans on hand, received, counted, and registered during the fiscal year. There is a decrease of 35,301 checks in the count, and 42,741 in the registration and examination, this being due to the various purchases of registered bonds, and the prepayment of interest on 4½ per cent registered bonds, which naturally occasioned a corresponding decrease in receipt of checks.

Table 2a gives the places of payment of interest checks, with num-

bers and amounts summarized.

Table 2b gives the total number of interest checks received and on

file in this division to June 30, 1891.

Table 3 gives a statement of transactions in redeemed detached coupons, showing, as compared with last year, a decrease in receipts, in counting and verifying, in arranging numerically, and in examining; while there appears an increase in the number entered in numerical registers. This decrease of work is attributable to the frequent temporary transfers of counters to the currency section of this division, to meet exigencies there, and has also been affected by occasional details for special work in the offices of the Treasurer and Commissioner of Internal Revenue.

Table 3a shows the places of payment of all redeemed detached cou-

pons of various loans received within the year.

Table 3b is a statement of transactions in redeemed detached coupons

as compared with those of last year.

Table 4 shows that up to the close of the fiscal year there has been received in this division a grand total of 97,105,449 detached and redeemed coupons, amounting in value to \$1,198,013,075.42.

Table 5 shows that in the receipt of coupon bonds, with coupons attached, there has been a decrease of 4,730 bonds, of \$1,456,350 in value,

as compared with receipts last year.

Table 6 shows work done in the currency section of this division, by way of receipt, count, cancellation and destruction of various Government securities, including United States notes, gold and silver certificates, fractional currency, and redeemed internal revenue stamps. The record for this year shows an increase, in receipts, of 5,084,406 pieces, and, in amount, an increase of \$20,970,928.35½, as compared with last year.

Table 7 gives an itemized account of various statistical matter counted, examined and destroyed, showing an increase of 254,115 sheets and

12,049,398 internal-revenue stamps so handled and destroyed.

Table 8 shows current work performed in different files rooms. There has been an increase of 2,947 in the number of accounts received for file; a decrease of 11,472 in accounts withdrawn from files; an increase of 786 pages transcribed for suits; an increase of 3,791 pages certified for suits in court; and an increase of 14,056 in the number of warrants received for file.

Table 9, the only stationary table in the report, shows the total number and amount of coupon bonds exchanged, redeemed, transferred, and destroyed up to March 10, 1881, when destructions ceased by order of the honorable Secretary of the Treasury.

Table 10 shows that on June 30, 1891, there was on file in this division a grand total of exchanged, redeemed, and transferred coupon bonds numbering 1,860,378, with attached coupons numbering 53,605,121, and

representing a value of \$1,072,100,750.

Table 11 is a consolidated recapitulation of tables 9 and 10, giving the total number of coupon bonds received at any time in this division up to June 30, 1891, and including both those destroyed and those on file; from which it appears that this division has received coupon bonds numbering 4,223,463, with 130,447,249 coupons attached, and representing a value of \$2,493,788,200.

Table 12 makes mention of certain coupon bonds, which, after registration and scheduling in this division, have been delivered to the loans

division of this office for further examination.

Table 13 shows number and amount of coupon bonds destroyed sta-

tistically.

Table 14 gives, by issues, the number and amount of United States interest-bearing notes and certificates, issued, redeemed and outstanding to June 30, 1891, a recapitulation of which shows that, according to the books of this office, there are still outstanding the following of each class of securities:

Seven-thirty Treasury notes, issued under various acts	\$139, 850, 00
Certificates of indebtedness, issued under various acts	4,000.00
One-year 5 per cent Treasury notes, act March 3, 1863	33, 505. 00
Two-year 5 per cent Treasury notes, act March 3, 1863	28, 150, 00
Three-year 6 per cent compound-interest notes, acts March 3, 1863, and	. *
June 30, 1864	179, 920, 00
Gold certificates, act March 3, 1863, various issues	268, 620, 00
Three per cent certificates, acts March 2, 1867, and July 25, 1868	5,000.00
Refunding certificates, act February 26, 1879	94, 120.00
Total	753 165 00

Table 15 gives the dates when each issue of United States currency began and ceased.

IMPROVEMENT IN CONDITION OF FILES.

The work of rearranging, classifying, and numbering the files under

the custody of this division has progressed very commendably.

During the year, in compliance with an act of Congress, all of the intermal-revenue stamp stub books and old papers of dates embraced within the limits of the act, and weighing nearly 185 tons, were delivered to purchasers, thus effecting a gain of about 23,000 cubic feet of files space, the great relief experienced from which being only offset to a small degree by the granting of 1,406 cubic feet of space to the Life-Saving Service and office of the superintendent.

The registration of old accounts, of which no record had been made, has been continued to the extent of 30,441, being a slight increase over the amount of similar work performed last year. It is thought the whole registration will be completed during the present fiscal year, thus forming a valuable addition to the records of this Bureau.

The compiling of an alphabetical list of 6,041 printed and manuscript books in the custody of this division, has consumed considerable time.

FI 91——41

but the list includes many old records, worn and torn, the accumulation of years, from other offices of the Department, which were not even known to have been in existence until found in the progress of this work.

Under the authority of Congress and the rules adopted by the Secretary of the Treasury, the agents appointed by the governors of Arkansas, Georgia, North Carolina, Tennessee, and West Virginia have been furnished, during the year, with all books, papers, etc., necessary to enable them to make a complete copy of any and all matter relative to their respective States, in regard to refunding the direct tax collected in 1865 and 1866.

A comparative statement of current work done in United States securities during the fiscal year 1890-'91, appears below:

DIVISION OF INTEREST AND EXPENSES OF PUBLIC LOANS.

(Number representing average force employed, 4.28; cost, \$6,112.50.)

This division has continued the work for which it was created, namely, the ascertaining and making separate account of what has been expended by the Government for interest, and what for expenses of public loans. It was to have had the aid of one skilled clerk from the office of the Secretary and another from the office of the Treasurer. Only a few months after its organization one of these clerks was sent to the office of the assistant treasurer in New York, and the other became almost blind, being thereby obliged to suspend work. Thereafter the labor devolved on one chief, two clerks, and one messenger, until March 21 last, when one copyist was added to the force.

The obstacles to the progress of this force grew out of omissions to comprehend and provide for such account keeping as would be adequate to the vastness of the differences between the dollar value of gold and of currency, and the great costs and expenses of placing and handling the successive public loans, which, in the early days of the rebellion, were not provided for by keeping separate the accounts of specie and currency payments, and, not until 1870, by keeping separate accounts

of payments of interest and of expenses by loans.

To supply the defects which grew out of these omissions, and rectify these errors of omission, made the work of the division one of great

skill, intelligence, and labor.

The outcome of its extended labors, performed so very satisfactorily, but the results of which have never hitherto been set forth with much detail, appears in part in the annexed report, from which it will be seen that the amounts of interest paid on loans, and of expenses in making loans, are measurably ascertained, and that a detailed statement of same will soon be given to the printer. It already appears that during the twenty-six years from 1860 to 1886 the Government paid out for interest on its loans \$2,232,240,026.84, and from 1835 to and including 1859, approximately, \$40,862,254.94; making a total outlay for interest on loans of substantially \$2,273,102,281.78.

It further appears that the cost of making public loans for twenty-five years, from 1860 to 1885, was \$39,215,074.19, and that for loans from 1835 to 1860, approximately, \$650,382.81; making a total cost, from

1835 to 1885, of just about \$39,865,457.

REPORT OF THE DIVISION OF INTEREST AND EXPENSES OF PUBLIC LOANS.

By John H. King, Chief.

FORCE EMPLOYED.

One chief	\$2,000
One clerk, class 4	1´800
One clerk, class 2	1,400
One clerk, class 2 One clerk, copyist (since March 21)	900

The history of the organization of this division has been heretofore given in the reports of the Register of the Treasury for the years 1888, 1889, and 1890.

The character of the work to be done necessarily compels the employment for the most part of expert clerks, involving as it does the most extensive and intricate accounts between the Treasurer of the United States, the assistant treasurers, and accounts of various disbursing

officers and agents with the Government.

To separate the interest paid by loans under the general head of "interest on the public debt," (for not until 1870 was an account opened with each loan), to trace and apply repayments where they properly belonged, etc., and see that each item was in every instance as far as possible absolutely correct, was a task alike acute and burdensome, many single items out of the thousands dealt with having often taken weeks of research and close hard work to determine satisfactorily; and when, some years ago, it was found that such information was desirable, and the subject of making a complete and intelligible statement of the amounts paid by loans out of the appropriations known as "interest on the public debt," running from 1841 and 1842 to 1870, was discussed it was considered by most of those familiar with the work as quite impossible to accomplish, as the items had been entered without a view of ever separating them by loans; and considering the complicated state of the undertaking, the time over which it has extended, and the numerous accounts, vouchers, and warrants that had to be examined and compared, the result has not only been marvelous, but surprisingly satisfactory, from its completeness and success, showing also, as it does, how faithful and honest has been the accounting, by the trusted employés of the Government, in these great borrowing transactions.

To ascertain the expenses of making the Government loans involves the examination of the expenses and transactions of the Bureau of Engraving and Printing, and the accounts kept by many branches of the Treasury service, commissions and premiums paid, transactions with banks and bankers in this country and Europe, amounts paid express

companies, etc.

The information once fully obtained will not only be of historic interest, but of intrinsic value for future reference by the Government.

The work of the division is being done under three general heads: (1) Interest paid on loans; (2) expenses paid in making the loans; (3) premiums received and paid, and discounts on loans. All the work done so far has been under the first two heads.

THE WORK SO FAR ACCOMPLISHED.

The division having completed its work on the amount of interest paid from 1860 to 1885, inclusive, is now at work completing the accounts on the amount of interest paid from 1835 to 1860, which work is progressing as rapidly as the limited force at our command will allow. The utmost difficulty exists in determining the payments by loans, in accounts dealing with unclaimed dividends, and in payment of accounts of some old loans, the items having to be traced through innumerable books back to the beginning of the Government. Still, we are far enough along to approximately state the amount between the latter dates.

The amounts paid from 1860 to 1885 are being copied in book form,

and will soon be ready to be printed or filed away.

Appended is a table showing the amount of interest paid each year, from 1860 to 1885, inclusive, and the amounts paid in 1886 out of and belonging to the appropriation of 1885, which total, for the twenty six years, is \$2,232,240,026.84.

There is also appended a table, approximately correct, of the amounts paid for interest, by years, from 1835 to 1859, inclusive, amounting to \$40,862,254.94, making a total cost for interest, from 1835 to 1885, of just

about \$2,273,102,281.78.

The amounts in this table from 1835 to 1860 are the original footings, which may be varied by revision and correction, but they are substantially correct. All the above payments are made up from accounts entered on the books of the Register's Office within the years respectively dealt with. Thus the initial year of each of the periods named takes up and carries forward, until disposed of, all balances in personal accounts and outstanding warrants remaining unsettled at the end of the next preceding year; and, as has already been stated, the payments in accounts entered in 1886 out of appropriations made in 1885, while added in the aggregate, are separately given. This work from 1835 to 1859, inclusive, as soon as compared and corrected, will be copied in book form, the same as the other, and should be printed for preservation and use.

INTEREST PAID EACH YEAR FROM 1860 TO 1885, INCLUSIVE.

Various loans, etc.	Total.	Various loans, etc.	Total.
1860	\$2, 145, 702. 46	1876	
1861		1877	103, 829, 330, 21
1862	3, 976, 420. 73	1878	84, 088, 682, 82
1863. 	12, 117, 509. 46	1879	90, 166, 053, 45
1864	27, 230, 932, 78	1880	71, 997, 557, 70

1875		Aggregate	2, 232, 240, 026, 84

TOTAL INTEREST PAID FROM 1835 TO 1859, INCLUSIVE (CLOSE APPROXIMATE).

Various loans, etc.	Amount.	Various loans, etc.	Amount.
1835		1849 1850.	\$2, 580, 478. 9
1836	475, 633. 97 3, 010. 57	1850	2, 213, 874. 60 1, 688, 216. 90
1838 1839		1852 1853	1, 904, 103, 50 4, 169, 023, 03
840	179, 775. 53	1854:	2, 909, 909. 0
1841		1855	3, 367, 915. 10 8, 160, 272. 10
1843		1857	3, 214, 044, 43 1, 701, 601, 8
845		1859	2, 144, 100. 8
1846 1847	702, 077. 51	Aggregate	40, 862, 254. 9
1848	316, 276. 43	1	

The rates of interest paid have been as follows:

Old debt, 4 to 6 per cent.

Mexican indemnity stock, loans of 1841 and 1843, Texan indemnity,

loans of 1858 and 1860, one and two year notes of 1863, 10-40s of 1864, and funded loan of 1881, were all at 5 per cent.

The Treasury notes prior to 1846 and Treasury notes of 1846 were

from one-tenth of 1 to 6 per cent.

The Treasury notes of 1857, 3 to 6 per cent.

Navy pension fund and 3 per cent certificates of 1867 were all at 3 per cent.

The Treasury notes of 1860 were from 6 to 12 per cent. The 7-30s of 1861, 1864, and 1865 were all at 7.3 per cent.

Temporary loan of 1862 and 1864 was from 4 to 6 per cent.

The certificates of 1870 and funded loan of 1907 were at 4 per cent. Funded loan of 1891 at 4½ per cent.

All the other loans of the Government, from 1836 up to 1885, over twenty in all, including the compound-interest notes and the Pacific railroad bonds, were at 6 per cent interest.

A number of months will be required to complete the interest statement, and as soon as this is done work will be commenced on the pre-

mium and discount accounts.

EXPENSES OF NATIONAL LOANS.

The work is progressing very satisfactorily on the accounts in rela-

tion to the expenses of the Government loans.

The work from 1860 to 1875 and from 1875 to 1885 has been completed and copied in book form, and ready for printing, showing as follows:

1860 to 1875 1875 to 1885	
	-00 015 051 10
Total	39, 215, 074, 19

These figures differ slightly from the amounts heretofore given, but these are made after all corrections, and are undoubtedly right.

The statement in detail is classified under fully one hundred and twenty different heads. It covers every item of expense, from the paper used and commissions paid, down to photograph material and pins used by the Government.

The record shows that for this purpose, among the larger items of

expense, there was paid by the Government:

Salaries	\$12, 325, 569, 45
Commissions	7, 393, 895. 98
Engraving and printing	5, 978, 447. 00
Express charges	2, 553, 524. 38
Paper, including stationery	1, 423, 123. 59
, m. 4-1	00: 051 500 10

The balance of the items, over one hundred in all, are composed of

such as gas, coal, type, hardware, lumber, repairs, etc.

The amount of expenses between the years 1835 and 1860 is being calculated, and the schedules are made up, though not yet corrected and compared; but the footings, which are approximately correct, show that these expenses amount to \$650,382.81, to which add \$39,215,074.19 and we have a grand total of \$39,865,457 from 1835 to 1885.

All the work, after being copied, should be printed for convenience

and preservation.

It is doubtful if a more difficult task in figures was ever undertaken, but that it is being successfully accomplished is certain.

There have been examined over fifty thousand vouchers, and a greater number of accounts, some of the latter being of great length and variety of items; and in making up our items and schedules, the numbers of accounts and vouchers have been preserved for reference thereto when desired.

The discount and premium account, of which at present little can be said except that it is extensive and difficult, will receive attention as soon as the work laid out is completed; and we apprehend a reliable

statement thereof can be made.

In justice to the clerks of the division, it should be stated that, in addition to the vast amount of work they have done on the accounts, the division, small as it is, responded to a call made upon it by the Register to meet an exigency in the dispatch of public business, and by the close of the fiscal year examined and put in typewritten form, ready for issuing drafts over 25,000 claims for "Rebate of tax on tobacco" under act of December 15, 1890.

Respectfully submitted.

JOHN H. KING, Chief of Division of Interest and Expenses of Public Loans.

Hon. W. S. ROSECRANS, Register of the Treasury.

CLOSING OBSERVATIONS.

In closing the foregoing summary of the operations of this Bureau, for the past fiscal year, it seems proper to submit such observations as especially deserve the attentive consideration and action of the head of the Department, to whom the law has given a Treasurer to receive and pay out all moneys for the Government and a Register to keep account thereof.

OUTLOOK FOR THE VARIOUS DIVISIONS.

The receipts and expenditures branch of the Register's office must grow with the growth of the country's business.

That of loans depends on the volume of transactions in United States

bonds, and its force varies with the volume of them.

The note, coupon and currency division depends on the receipt of interest checks and annual redemptions of notes, coin certificates, fractional currency and other evidences of public debt, received, counted, registered, scheduled, and filed away or destroyed.

CATALOGUING OF FILES.

The custody, preservation and handling of public files of accounts and papers, and cataloguing them so as to assure prompt and certain reference to them, will still require much labor on the part of a steady force of skilled clerks before all the files of the Bureau are rendered promptly accessible for immediate securing of information therein.

PRESENT PERIL OF RECORDS.

The files, valuable as they may be, now in custody of this Bureau, are stored partly in six basement rooms and six attic rooms of this building, and in five basement rooms in the Winder building.

About one-tenth of them are in files room A, in this basement, in

fire-proof cases, on iron shelves, closed by iron doors.

All the rest, the preservation of which is so imperative, are kept on wooden shelves, in bundles tied by twine cords or tape, which soon decay. They are exposed to, and are suffering from, the gnawing of rats, mice, cockroaches and other vermin and insects; and to decay and fire. The exposed ends of bundles from 60 to 90 years old have begun to crumble, so as to destroy them as records.

RECOMMENDATIONS FOR IMPROVEMENT IN RECORDS.

All accounts kept in the Treasury Department ought to be thoroughly

catalogued, filed flat, and retained in proper sheet-metal cases.

There should be legal provision for regularly segregating those files not likely to be useful in current work from those likely to be called for, cataloguing and removing the former to a suitable place to be known as a hall of records.

Those files which have ceased to have pecuniary or historic value, after thorough cataloguing, should annually be sent to the macerating

tank to be made into pulp and sold.

Should the honorable Secretary of the Treasury so will it, these suggested improvements in filing could be effected, gradually, at a comparatively small outlay.

The new system ought to embrace flat filing, for reasons given on

page 15 of the Register's Report for 1890.

A RENEWL OF IMPORTANT RECOMMENDATIONS.

To avoid repetition reference is here made to pages 16 and 17 of my report for 1890, in which there are set forth reasons for the following improvements: (1) Making correction of certain entries; and (2) the creation, in this office, of a division wherein shall be kept final balances of accounts and details of cost and expenses of all public buildings and

grounds.

These improvements have been considered of such importance as to call for annual mention in the Register's reports for the last five or six years, and no Senator or Representative who has looked into the matters is known to have expressed any dissent from the views setting forth the great desirability, and even necessity, of such business-like legislation; on the contrary, many of each have favored such views; and the only explanation for the non-accomplishment of the needed legislation, seems to lie in the stronger pressure of numerous other matters upon the attention of Congress, and the absence of sufficiently active and definite efforts in favor of such legislation on the part of its friends.

It is believed that a vigorous recommendation from the honorable Secretary of the Treasury would secure such legislation and action as would give these needed reforms, and form an era in the history of the administration of the Treasury Department.

Respectfully submitted.

W. S. Rosecrans, Register.

Hon. CHARLES FOSTER, Secretary of the Treasury.

REPORT OF THE SUPERVISING SPECIAL AGENT.

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., November 7, 1891.

SIR: I have the honor to submit the following report of the operations of the division of special agents for the past fiscal year:

Number of reports made	5,033
Number of suits commenced.	58
Number of seizures.	1,026
Number of arrests for smuggling	64
Number of customs districts examined	61
Value of seizures	\$143, 236, 17
Amounts recovered on account of seizures, fines, penalties, and duties	\$225, 690. 65
Reduction in expenses recommended	
Amount expended for salaries and traveling expenses of special agents.	\$83, 019, 54.

From these figures it will appear that the special agents have been actively engaged during the past year in the detection and prevention of frauds upon the customs revenue, and in the examination of the books, papers, and accounts of customs officers—duties prescribed for them by law. The supervision of the agents appointed for the care and protection of the seal islands in Alaska, and of the officers for the enforcement of the Chinese exclusion acts, has recently been assigned to this division.

As illustrative of the methods employed to evade the customs revenue, I mention the following cases, some of which have been subjects of

newspaper comment.

- 1. Certain French manufacturers of kid gloves, through their American agents, sought to have their goods appraised at less than the true market value, and induced the appraising officers to accept their values as correct. The facts coming to the knowledge of officers of this division, reappraisements were ordered and resulted in substantial advances in values, notwithstanding a bitter contest by the importers, and a large amount of duties was thus saved to the Treasury. Other importers of gloves, as well as American manufacturers, were deeply interested in these cases, their business interests being jeopardized by such undervaluations.
- 2. One or more dealers in silks and high-class dress goods in Paris had adopted a system of sending agents to our principal cities for the purpose of taking orders from reputable dressmakers for goods to be delivered to them duty paid. The goods thus forwarded were consigned to a custom-house broker and entered by him at low values, in some

FI 91-----54

instances representing not more than one-fourth of the actual price or market value in Paris. A seizure of a number of packages of goods of this character was made in New York, and it is believed that this class

of frauds has been suppressed.

3. It having been alleged that Canadian dealers were selling goods to American tourists, to be delivered by express, an investigation disclosed that conductors and porters of sleeping cars on lines crossing the international boundary were actively engaged in this system of smuggling. One of them was detected, the goods in his possession seized, and the offender committed for trial. A large number of packages thus smuggled have been traced through the books of express offices, where they were deposited for shipment to destination. believed that the action taken in these cases has had a wholesome effect in deterring merchant tailors and others in Canada from employing such methods to increase their business, and from the practice which has existed of sending agents to our cities and towns to solicit orders

for clothing to be delivered by unlawful means.

4. Frauds upon the revenue, by what is known as the "dummy" package system, practiced so extensively some years ago, have been revived. A seizure was recently made at San Francisco of imported goods received there by rail under immediate transportation bond from The invoice and entry presented at the custom-house described four packages of cotton quilts of the value of \$327.69. package was sent to the appraiser's store for examination and the other three were ordered to be delivered from the cars to the importer without The package selected for appraisment contained cottou quilts according to the invoice, while the others, upon seizure, before they reached the importer's hands, were found to contain silks, dress goods, and other merchandise paying high rates of duty of the value of The extent to which these frauds have been perpetrated is not The records show that the firm implicated has imyet fully disclosed. ported more than a thousand cases of goods, and it is probable that a large proportion of the invoices were fraudulent; a searching investigation is in progress, but it is to be regretted that there is no legal method by which an inspection of their books can be enforced for the purpose of ascertaining the amount due from them to the public treasury. It seems clear that such a system of fraud could not be carried on successfully under the customs regulations except by collusion with the official whose duty it was to designate the packages to be examined. That officer, in the present instance, has been dismissed, and an investigation is in progress for the purpose of ascertaining whether or not sufficient proofs can be obtained to sustain criminal proceedings against

5. Evidence has been discovered tending to prove that American liquors exported without the payment of internal-revenue tax, which are ordinarily liable upon reimportation to a duty of 90 cents per gallon, have been manipulated or fortified abroad in such manner as to change their character, and thus render them liable to a duty of \$2.50 per gallon imposed by law upon imported spirits. The evidence has been submitted to the proper legal officers, and the questions involved will be determined by the courts.

The foregoing are typical cases selected from many others upon which the special agents are constantly engaged, and the investigation of which has caused the recovery of increased duties and penalties and checked fraudulent practices. This has not been accomplished without some i ritation and in instances criticism in the public press, inspired doubtless by those whose invoices have been called in question, as well as by merchants of unquestioned integrity who have unadvisedly given ear to the complaints of agents of foreign manufacturers seeking admission of their goods at fictitious values, to the manifest loss of revenue and injury to honest trade.

It is unfortunately true that public officers on account of such opposition and criticism sometimes shrink from the performance of a plain duty. A special agent who should fail in his duty from such considerations would be unfit for his position, and this remark applies to all

officers charged with the enforcement of the revenue laws.

It has been the purpose of the special agents under the instructions and regulations of the Department to so perform the delicate and important labors devolving upon them as to avoid unnecessary inconvenience or embarrassment to business interests, and it is gratifying to note that in their work they have had the full confidence and support of successive Secretaries of the Treasury during the past twenty years. the duties alluded to by no means include all the work performed by these officers. Regular and systematic examinations made by them as often as once a year of the books, accounts, and methods of business in each of the custom-houses, secure the correction of irregularities and promote the efficiency of the customs service. They have also been called upon, under special and confidential instructions of the Secretary, to conduct many important and difficult investigations, requiring the exercise of ability, honesty, and sound judgment, and their reports in these cases have been the basis of executive action.

The success of the Government in obtaining a verdict in the hat-trimmings case recently tried in Philadelphia, the questions at issue involving many millions of dollars, was due in large measure to the indefatigable efforts of officers of this division who were assigned to aid the dis-

trict attorney in the preparation of the suit for trial.

One of the serious questions confronting the department in the exercise of its function of collecting the revenue is the great difficulty under present conditions of enforcing the laws against smugglers who make the Dominion of Canada the base of their operations. Until within the past few years the long line of frontier from Lake Superior to the Pacific Ocean needed but little watch care, as the international boundary line ran through a region, some hundreds of miles in width, practically un-Now all this is changed; railways running parallel on both sides of the boundary line, intersected by other railways crossing the line, have brought with them population and constant communication between the two countries. There are but four collection districts upon the northern frontier between the Lake of the Woods and the Pacific Ocean, a distance of about eleven hundred miles, each district embracing a large territory. The number of officers for preventive duty upon this long line of frontier does not exceed twenty, and the present customs appropriation will not admit of any material increase of this force. Although these officers are active and vigilant, making frequent captures of smuggled goods, chiefly opium, it is apparent that their efforts to prevent smuggling are, in a large degree, futile. A similar condition of affairs exists upon the long boundary line between the United States

The district of Puget Sound, comprising many islands within a few miles of British territory and a long line of water front, furnishes facilities for smuggling and the clandestine introduction of Chinese, against which the customs officers have vainly contended. The revenue steamer on that station, under its present energetic commander, has

done good work in checking smuggling, but this vessel is unfit, on account of her size and want of speed, to render an efficient service. It is believed that it will be necessary to employ a number of speedy steam launches to patrol the waters of Puget Sound in order to break

up this illicit traffic.

I am reliably informed that during the last year 125,000 pounds of crude opium were imported and manufactured at Victoria, making about 70,000 pounds of the prepared article for smoking purposes, and that nearly every pound of it was smuggled into the United States. It is more profitable to take the risk of an occasional capture and confiscation than to pay the enormous duty of \$12 per pound, which is prohibitive of legitimate importations and is the essential basis of the smuggler's profit. Reduce the duty to \$4 per pound and his occupation will be gone. The present arrangement benefits the Canadian government, which collects \$1 per pound upon the crude opium used in the manufacture of the prepared article. Our tariff act of 1890 admits crude opium containing 9 per cent of morphia free, but imposes a duty of \$12 per pound upon opium of a lower grade, such as is used in the preparation of the drug for smoking purposes, the same rate as is imposed upon prepared opium. The practical effect of this is that the revenue formerly derived from imported opium is turned over to Canada and to smugglers. It were better to declare all opium free of duty than to leave the present laws on the statute book. The enormous profits in opium smuggling, due entirely to the high duty, have induced the employment of large capital and a great number of bold, skillful men to engage in the illicit traffic made so alluring by existing laws.

But the smuggling of opium is not the only alarming consequence following the opening up of the railways through Manitoba, the Northwest Territory, and British Columbia. The various acts of Congress having for their object the exclusion of Chinese laborers from the United States are practically nullified by the clandestine introduction of Chinese coming direct from China through the Dominion of Canada. The steamers of the Canadian Pacific Railway Company land Chinese at Vancouver by The Canadian Government collects a head tax of \$50 upon each Chinese person and gives him a certificate which enables him to return to Canada without payment of the tax a second time should he be detected in entering the United States. The law provides that any Chinese person found unlawfully within the United States shall be caused to be removed therefrom to the country whence he came, at the cost of the United States, after being brought before some justice, judge, or commissioner of a court of the United States, and found to be one not entitled to remain in the United States. Inasmuch as nine-tenths of the Chinamen caught within our lines near the Canadian frontier come direct from China, although they enter by way of Canada, they have been treated, so far as this Department is concerned, and in accordance with the views of the Attorney-General, as liable to deportation to China as the country whence they came.

The act of September 13, 1888, which by its terms would seem to be inoperative until the exchange of ratifications of the then pending treaty between the United States and China (which was never ratified), contains certain provisions for an appeal from the decision of the commissioner in these cases to the courts. Such appeals have been entertained by the courts, and in several cases they have given the statute another construction from that of the head of this Department and of the Attorney-General, by deciding that Canada, and not China, was the country whence these Chinamen came, within the meaning of the law. The

effect of this is that Chinese persons once returned to Canada again enter the country, and repeated instances of this kind have occurred. Thus the object of the Chinese restriction acts is practically defeated.

The necessity for a revision of the customs laws, and particularly for a reorganization of customs districts with a view to the abolishment or consolidation of districts in which little or no customs business is done, is shown by the tabular statement of the business of the several districts during the last fiscal year, hereto appended. It will be seen that in thirty-one districts and ports no duties were collected, and in forty-three of them the expenses exceeded the receipts. The decay of commerce in many of the old customs districts, coupled with the rapid growth of the Northwest and the need for the creation of new ports and districts upon the coast as well as frontier, would seem to demand new and comprehensive legislation upon this subject.

Respectfully yours,

A. K. TINGLE, Supervising Special Agent.

Hon. CHARLES FOSTER, Secretary of the Treasury.

Note.—The accounts of receipts and expenditures published by the Register will vary in some cases from the figures above given, for the reason that his statement is made up from warrants issued during the fiscal year, regardless of balances in the hands of officers at the beginning and end of the year. If the accounts of each collector were closed and balances settled at the end of the fiscal year, the two statements would agree.

REPORT ON IMMIGRATION, BY THE CHIEF OF THE MISCELLA-NEOUS DIVISION, OFFICE OF THE SECRETARY OF THE TREAS-URY

> TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, D. C., July 15, 1891.

SIR: I have the honor to submit a statement showing the receipts and disbursements of the immigrant fund from the date of the act of August 3, 1882, creating the fund, to June 30, 1891; also some tables showing, (1) the number of immigrants who arrived at the several ports during the fiscal year ending June 30, 1891, and the number excluded and returned; (2) the nativity, (3) the destination, and (4) the trades or occupations of all the 516,253 immigrants who arrived

during the year.

The statement of receipts and disbursements shows the total amount of per capita tax collected at each port from the passage of the immigration act of August 3, 1882, to June 30, 1891, and the total amount expended in conducting the business at each port for the same period of time, and the balances on hand; also the balances June 30, 1890, for comparison. It will be observed that there was a large accretion of surplus during the year, amounting to \$144,842.20. Over \$134,000 of this sum accumulated at the port of New York, where more than 78 per cent of the immigrants landed, and is mainly attributable to two causes, viz, the increased influx of immigrants, which added largely to the collections of head money, and the reduced cost for the support and care of immigrants under the management of Treasury officials, as compared with the expenses previously incurred for the same purposes by the Commissioners of Emigration of the State of New York.

On June 11, \$125,000 was set aside to meet the expenses in the improvements on Ellis Island, leaving a balance of \$245,332.52, and it is probable that as much more will be required before the Island can be

occupied for immigration purposes.

The experience derived from the first half-year's management of immigration affairs at the port of New York by Treasury officials confirmed the Department in its opinion that joint control by State and Federal authorities was incompatible with the best service. More prompt and harmonious action was evident, and greater economy was certainly assured. The advisability of terminating all existing contracts with State boards and State commissions seemed to be apparent, though the business was being economically conducted by most of the contracting parties.

The following table shows the receipts and expenditures in detail:

STATEMENT SHOWING RECEIPTS AND EXPENDITURES OF THE IMMIGRANT FUND DURING THE PERIOD FROM AUGUST 3, 1882, TO JUNE 30, 1891, AND THE BALANCES ON JUNE 30, 1890 AND 1891.

Balance June 30, 1891							

The contracts made with the Pennsylvania Board of Public Charities, the State Board of Lunacy and Charity of Massachusetts, the State Board of Immigration of Maryland, and the Commissioners of

Immigration of Portland, Me., each contained a five-year clause similar in all respects to the one quoted, as follows:

And the party of the second part shall provide at the hospitals and other public institutions controlled by the State of Massachusetts suitable accommodations for such alien immigrants as shall become sick, or in distress, or idiotic, or insane, or a public charge for a period not exceeding five years from the time of such immigrants' landing at their port of arrival in Massachusetts.

The Department having determined to change this stipulation in the contracts to one year instead of five, gave official notice, under date of February 11, 1891, to each of the contracting parties above mentioned that from March 1 the said clause in the contract would be so modified, and requested them to signify their consent to the change in writ-Prompt replies accepting the modification desired by the Department were received from all the boards notified except the State Board of Lunacy and Charity of Massachusetts, which, after some delay, requested that the proposed change take place one month later, to which proposition the Department did not consent. The contracts being thus modified a uniform period in which aid might be rendered was established at all ports. Meanwhile the administration of the laws by Treasury officers at New York was constantly growing in favor at the Department, and pending legislation promised to cure some of the existing difficulties which prevented a strict execution of both immigration and alien contract-labor laws.

On March 3, 1891, the act amendatory to the immigration and alien contract-labor laws which was passed late in the second session of the Fifty-first Congress, became effective, and the Department at once proceeded to develop by practical tests at the several ports, through the local officials then in charge, what changes if any would be requisite in the local management and what changes in the regulations and instructions should be made in order to insure a thorough execution of the During the months following immigrants were arriving at all the ports in very large numbers, and it was deemed best to strengthen temporarily the hands of the officials at Boston, Baltimore, and Philadelphia by the appointment of additional inspectors at these ports to assist the State boards, rather than at this time make any change which might, during the busy season, interrupt the prompt dispatch of Accordingly contemplated termination of the existing contract system was delayed until June 2, 1891, when the following letter was addressed to the State Board of Lunacy and Charity of Massachusetts and substantially similar ones to the Pennsylvania Board of Public Charities and the State Board of Immigration of Maryland:

GENTLEMEN: The agreement entered into by the Secretary of the Treasury, party of the first part, and by the State board of lunacy and charity of Massachusetts, the party of the second part, dated December 2, 1882, contains this provision: "That this contract may be revoked by either party thereto giving to the other

party sixty days' notice in writing of their intention to terminate said contract, and when sixty days shall have expired after such notice shall be given this contract shall cease and terminate."

In pursuance of the above provision, I hereby give notice that sixty days after this date, that is to say, on the 31st day of July, 1891, the contract above mentioned will be revoked, cease, and terminate, and thereafter the services of the State board of Lunacy and Charity of Massachustts will not be required in the local affairs of immigration at the ports in Massachussetts.

This action is taken in view of the immigration act of March 3, 1891, which in

section 8 contains the following provision:

"All duties imposed and powers conferred by the second section of the act of August third, eighteen hundred and eighty-two, upon State commissioners, boards, or officers acting under contract with the Secretary of the Treasury shall be performed and exercised, as occasion may arise, by the inspection officers of the United States."

The law evidently contemplates, and an efficient administration of the immigra-

tion statutes requires, that the management shall be uniform at all ports.

I take this occasion to assure you that this Department highly appreciates the fidelity with which the Board has discharged the duties devolved upon it under the contract soon to be terminated.

Respectfully, yours,

CHARLES FOSTER, Secretary.

The most notable events in immigration matters during the past year were the extraordinarily large volume of immigration to the United States, and the general interest manifested by the people during the discussion of the question in Congress, and by the daily press before and after the passage of the act of March 3. The general tendency of feeling was seemingly favorable to a rigid exclusion of the dangerous and undesirable classes.

The alien contract-labor law had not met the anticipations of its most ardent advocates before Congress. Its evasion by persons who desired to import skilled labor, mechanics, or experts at any trade or calling, seemed to be easily accomplished, and convictions for violations of its provisions were rare. A few hundred contract laborers had been detected and returned, but it was generally believed that greater numbers, who had been better tutored, escaped detection and passed to their destinations. As a bar to the admission of cheap labor, which was claimed for the act by many of its friends, it proved almost a complete failure, the cheap class of laborers continuing to flow into the country without

hindrance, seeking employment after arrival.

The act of March 3, 1891, was intended to cure the defects in both the alien contract-labor law and the immigration law. Four months' experience, to July 1, of its operation at the ports of New York, Boston, Philadelphia, Baltimore, and a few others of the larger ports has established beyond doubt the feasibility of enforcing with reasonable thoroughness its prohibitive features at these ports. There are, however, a number of minor ports on both the Atlantic and Pacific coasts where preventive measures require to be strengthened. An instance of one method of evading the vigilance of the immigration authorities is shown in the case of Holyer Petersen and wife, who arrived at the port of New York about May 20 last, and were, on their own testimony, adjudged to be polygamists, and were consequently sent back by the vessel which brought them. They returned, however, with a number of other Mormons, arriving at the port of New York on June 29, but did not attempt to land.

On the 2d of July the immigrant inspectors learned that the party had been transferred to another steamer, and were en route for Norfolk, Va., but telegraphic instructions, which were immediately sent to the collector at that port to examine and detain them if found to be polygamists, failed to reach him in time, as the party had landed and started for Utah, via the Norfolk and Western Railroad, the evening before. But it is apparent from information gathered on this subject from immigration officials, and hereafter quoted, that the majority of undesirable and prohibited immigrants have been entering the United States over the northern border, after having landed at Canadian ports.

On April 9 the Department advised the collectors of customs at Portland, Me., Ogdensburg, N. Y., and other ports on the northern border to the effect that it was reported that large numbers of immigrants from European ports were coming to Canadian ports, thence across the border into the United States, in consequence of the additional restrictions imposed by the act of March 3 and the more rigid

inspection at the port of New York, and requested them to report

whether such statements were true.

On April 13 the collector at Portland, Me., reported that on March 27 the steamship Carthagenia arrived at that port with 43 immigrants, having previously landed 100 at Halifax; that on March 30 the steamship Sarnia arrived there with 30 immigrants, having previously landed 600 at Halifax; that on April 7 the steamship *Parisian* arrived with 74 immigrants, having landed 1,000 at Halifax; that on April 10 the steamship Oregon arrived with 15 immigrants, having landed 494 at Halifax.

The following remarks are quoted from the report of the secretary of the Commissioners of Immigration at Portland, Me., covering the fiscal

vear ending June 30:

The steamers that make this their landing place bring less than one-sixth of their passengers to this port; the others they land at Halifax; and the great bulk of them do not stop in Canada, but come directly to this country by railroad. More than this, for nearly seven months in the year a great number of steamers enter the St. Lawrence River, bringing a very large number of passengers who seek homes in this country. We think it safe to say that the immigration from this source exceeds that of all other American ports except New York.

Immigrant Inspector F. A. Woodbridge, writing from Newport, Vt., under date of April 16, says:

For the past month alien immigration passing through this port has averaged 400 persons per day. I am not prepared to state that any large proportion of these immigrants come from Europe; the majority of them come from the eastern provinces of Canada, notably the vicinity of Quebec.

We are receiving at this port three carloads of these French Canadians each day, who are en route to the various manufacturing towns in New England, and a large number of them are, in my opinion, under an implied contract to labor.

The recent legislation intended particularly to regulate immigration. along the Canadian border is contained in the last paragraph of section 8 of the act of March 3, viz:

That the Secretary of the Treasury may prescribe rules for inspection along the borders of Canada, British Columbia, and Mexico, so as not to obstruct or unnecessarily delay, impede, or annoy passengers in ordinary travel between said countries: Provided, That not exceeding one inspector shall be appointed for each customs district, and whose salary shall not exceed twelve hundred dollars per year.

This clause, instead of being in harmony with the general prohibitive features of the act and the ample authority vested in the Secretary to supervise the business of immigration at seaboard ports, restricts him to very narrow limits in prescribing regulations for inspection along the northern and southern borders. If immigration continues over the border in the numbers above reported, it will be impossible for one inspector in each customs district to properly examine them and keep the required record of their number, nativity, etc., and even with the aid of contract-labor inspectors it will be impracticable to satisfactorily examine into the condition of immigrants without to some extent obstructing, delaying, impeding or annoying "passengers in ordinary travel between said countries," especially on railroad trains.

The immigration business continued to be transacted in this division until the second week in July, when it was transferred to the Immigration Bureau created by the seventh section of the act of March 3, 1891, and this report is made to cover only the business of the fiscal year

ending June 30, 1891.

J. W. THOMSON, Chief Miscellaneous Division.

Hon. CHARLES FOSTER, Secretary of the Treasury.
